- Pulses Snapshot
- Sowing Progress
- India
- Australia
- Canada
- US

Domestic Market Fundamentals:

- **Good showers of rains and more likely in coming weeks have encouraged farmers to cover their** sowing acreage as soon as possible. Even govt. seems relaxed as IMD has forecast normal rainfall in Aug & Sep. It may give confidence to govt to release stock in open market. As good rainfall in producing regions would ensure bumper crop this year too. Nafed still has over 37 lakh MT pulses stock. There is a common view in the market that maximum pulses would not be able to get MSP price in markets in new season and so govt. would have to purchase more. For storage space, it would continue to release pulses stock before new procurement season starts.
- **India has received 410.50 mm of actual rainfall against 452.20 mm of normal rainfall during 01st June to 31st July-2019.** During the same period rainfall was below LPA by 8%, 5%, 19% and 11% in Northwest India, Central India, South Peninsula and East & Northeast peninsula respectively. Deficient rainfall has been recorded in Gujarat, West Uttar Pradesh, Jharkhand, West Bengal, Orissa, Marathwada, Rayalseema, S.I Karnataka, Tamil Nadu & Pondicherry. During the week (25 to 31st July the rainfall was 42% above the LPA for the entire country. Wheat crop has been harvested. Farmers were already advised to slightly delay their Kharif sowing. IMD has given forecast for normal monsoon this year.
- **Indian farmers have covered 105.14lakh ha area under pulses as on 2nd, Aug-2019 against 113.73 lakh ha** last year till date. It is 7.56% lower than last year. Normal area under kharif pulses is 119.89 lakh ha. Farmers have covered 37.50lakh ha under tur, 30.27 lakh ha under urad bean, 25.81 lakh ha under moong, 0.18 lakh ha under kulthi and 11.38 lakh ha under other pulses. It is 4.56 % down for tur, 5.38% for urad, 12.3% for moong, 48.57 % for kulthi and 10.84% for other pulses from last year. See sowing table:
- **Improvement in acreage, good showers in producing region and govt's intention to release old stock** may cap uptrend in coming weeks. Short fall in production last year is likely to be compensated by 4 lakh MT import through private channel and 1.75 lakh MT through govt.'s channel. So, any short fall in open market is unlikely before new crop hits Indian market in December. Crop condition in Myanmar is good to excellent so far. So, supply side seems balanced. Myanmar is offering lemon tur at \$740-50 per MT basis Indian port. Demand in domestic market is normal against supply. Nafed still has over 8 lakh MT tur. So, any spark in price is unlikely. Tur in Gulberga market is being traded at Rs 5800-5950 per qtl and it may continue to trade at same level until and unless heavy rains in growing regions wash out the standing crop.
- **Improvement in sowing area, higher stock (3.32 lakh MT) with Nafed and its continuous release** with improving rainfall status, have pressurized urad market once again. Crop condition in MP, Rajasthan, Maharashtra, Gujarat and Uttar Pradesh is very good so far. Under emerging scenario, stockiest would prefer to release old stock too amid continuous import by millers. All these factors are restrictive to urad cash market in coming weeks. Demand remains weak despite festive season. In Mumbai market Urad is being traded at Rs4450-4500 and in Chennai market it is being traded at Rs 4550-4650. Urad may extend its loss further.
- **Pressure on moong might be seen in coming weeks due to improved area, good rainfall in growing region** and 1.45 lakh MT stock with Nafed. New crop in Karnataka is expected to hit market soon and pressure might be seen from mid-August. It would not allow market to move up from current level. Nafed would continue to release stock in various states through auction. Besides, millers have option to import 1.50lakh MT moong. Demand is weak in cash market. So, any upward momentum is unlikely before commencement of procurement at MSP of Rs7050. Crop condition in Karnataka, Maharashtra and Gujarat is good so far. Moong is being traded at RS 6200-6250 in Jaipur market. It may decline to Rs6000 in coming weeks.
- **Chana cash market could not sustain at higher level and decreased during the week under review.** Actually, pressure build up due to active selling in futures, good rainfall forecast by IMD for Aug-Sep and improving sowing status for other kharif pulses. Improved production prospects may give confidence to govt. to release old and new stock (around 3.7 lakh MT) of pulses as new kharif procurement season is about to commence from Aug end -Sep this year. As prices are ruling lower than MSP for all pulses except tur, govt would have to procure higher quantity and so procurement agencies would start releasing stock. It would affect market sentiment. The govt. still has 2.2MMT chana in stock. Besides, weak demand despite festive season and liquidity crunch in open market due to new cash withdrawal rule may negatively impact all pulses market. Stockiest may prefer to off load chana stock. In Delhi market chana is being traded at Rs 4300-4400. It may move down by Rs 100-150 more from Current level.
- **Lentil demand is weak due to which trade is sluggish. Millers are importing nipper quality from Australia** and exporting the same after processing to Bangladesh at Rs 4900-4950 per quintal. The same quality is being offered by millers in Bihar at Rs 5500 per quintal. Due to huge price gap the domestic market is witnessing low demand. Lentil container and vessel at port are being quoted at Rs 4100 per quintal and Rs 3950 per quintal respectively. Lentil mill quality at Kanpur is moving in around Rs

4425 per quintal. As per govt. 's 03rd adv. estimate released on 03rd June-2019 govt. has estimated 1.56 MMT production in 2018-19 compared to final estimate of 1.62 MMT for 2017-18. As per traders view, this estimate is at higher side.

International Market Update:

- **Lentil Production in Canada is expected to increase slightly from 2092(2018-19 thousand MT) to 2200 thousand MT in 2019-20.** However, total supply is expected to decline slightly from 2989 to 2895 thousand MT. Export is expected to remain at 18 lakh MT, similar to 2018-19 level. Carry out stock is expected to decline from 7 lakh MT to 5 lakh MT in 2019-20. Prices are expected to hover in the range of 4430 to 460 per MT. Yield would be same at 1 Tonne per ha, similar as last year.
- **Dry Pea area in Canada is expected to increase slightly from 1431 to 1715 thousand ha in 2019-20.** Thus production is expected to increase from 3581 to 4300 thousand tonne in 2019-20. Due to higher production estimate total supply is likely to increase from 4246 to 4515 thousand tonne in 2019-20. Export is expected to increase from 26 lakh MT to 31 lakh MT in 2019-20. However, carryout would decline from 7.45 to 5 lakh MT this year. Price range is expected to hover in the range of \$255 to 285 per MT in 2019-20.
- **At Chickpea front, production in Canada is expected to decline from 3.11 to 2.60 lakh MT in 2019-20.** However, total supply is expected to increase slightly, from 3.37 to 4.28 lakh MT, due to weak demand in global market. Carryout is likely to increase from 1.70 to 2.20 lakh MT in 2019-20. Price is expected to hover in the range of \$520 to 550 per MT in 2019-20.
- **As per the latest update by US dry peas & lentil council, most of the standing pulses crops are heading towards maturity stage,** despite some planting going on in certain regions. Crop condition is normal to good. As demand from India is weak, farmers have changed planting decision to some extent this year. Inventory of chickpeas and lentil has increased. As per USDA estimate area under chickpeas and lentils have decreased by 31 & 35 % respectively. Montana lentil crops benefitted from good rains across the state. 52% of lentil plants are in bloom. The lentil crop rated 4% poor, 52% fair, 43% good and 1% excellent.
- **Chickpea area in Australia is expected to increase 22.11% from 303(2018-29) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79 % to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chick-peas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick-peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **As per latest data received from Russian Federal Customs Service, chickpeas export from Russia decreased by 16% to 25197 MT in May-2019 in comparison to April when export was registered at 29,858 MT.** Russia has exported total 99674 MT in this MY against 19,209 MT during the previous calendar year. Pakistan was the major buyer buying 9,797 MT in May, followed by India-6,789 MT and Turkey at 3,766 MT. Demand remains weak as main buyer like India is almost out of the market due to higher availability in domestic market as well as central pool.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019. It was 23,066 MT in March.** It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher levels relative to prospective demand. So, Buyers are in no hurry to buy.

Note: Agriwatch 1stAdv Estimate For 2019-20 for Urad ,Moong & Tur & final estimate for Chana and Masur for MY 2019-20.

Urad: Urad production is likely to increase by 1.3 % from 24.58 to 24.90 lakh tonne in new season (2019-20). Import is expected to decrease by 1.5 lakh tonne to 1.5 lakh tonne due to quantitative restriction. Total supply would decrease slightly from 36.55 to 35.15 lakh tonne in 2019-20. Export would decrease from 0.3 to 0.2 lakh tonne due to disparity. Consumption would increase from 27.5 to 28 lakh tonne in 2019-20. So, carryout would decrease slightly from 8.75 to 6.95 lakh tonne. As carryout is higher, supply side is expected to be at comfortable level this year too. So, any unexpected spike is unlikely under prevailing condition.

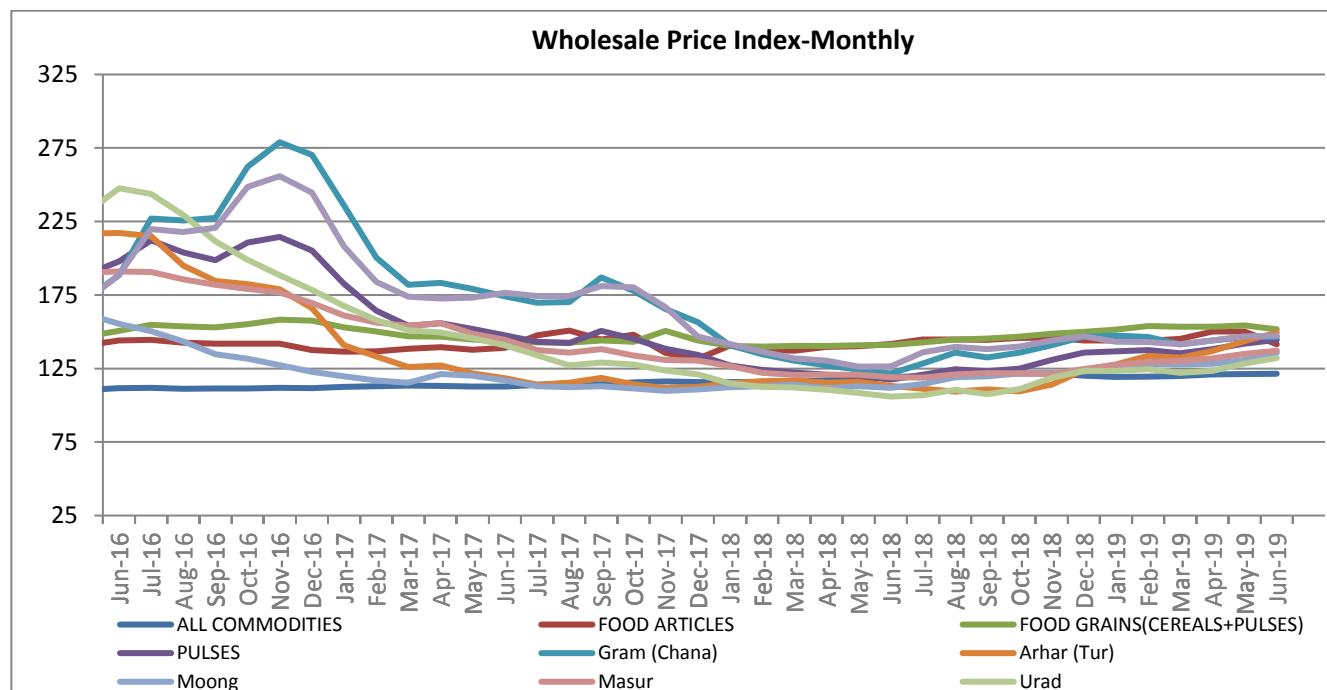

Moong: Moong production is likely to increase by 3.06 % from 20.26 to 20.88 lakh tonne in 2019-20. Import is expected to decline by 50 % to at 0.75 lakh tonne in new season. Total supply is expected to decrease from 29.02 to 27.15 lakh tonne in 2019-20. As there is no demand from overseas market due to disparity, export is likely to decrease from 1 to 0.2 lakh tonne in the new season. Consumption would increase from 22.5 to 23.0 lakh tonne. Total usage is expected to touch 23.2 lakh tonne. Increase in consumption would pull carryout from 5.52 to 3.95 lakh tonne. So, any major decline in moong price is unlikely in the new season.

Tur: Tur production is likely to increase by 15.84 % from 35.21 to 40.79 lakh tonne, in the new season(2019-20). Import is expected to decrease by 0.50 lakh tonne to 3 lakh tonne due to restrictive import policy. Total supply would increase slightly from 46.78 to 49.07 lakh tonne due to expectation of higher production in new season. Export may increase from 0.5 to 0.70 lakh tonne due to likely export incentive. Consumption may increase from 41. to 42 lakh tonne in 2019-20. With export, total consumption has been pegged at 42.7 lakh tonne. Despite higher consumption, carry out would increase to 6.37 lakh tonne for next year. Market is expected to find balance now and price would improve further in the medium term.

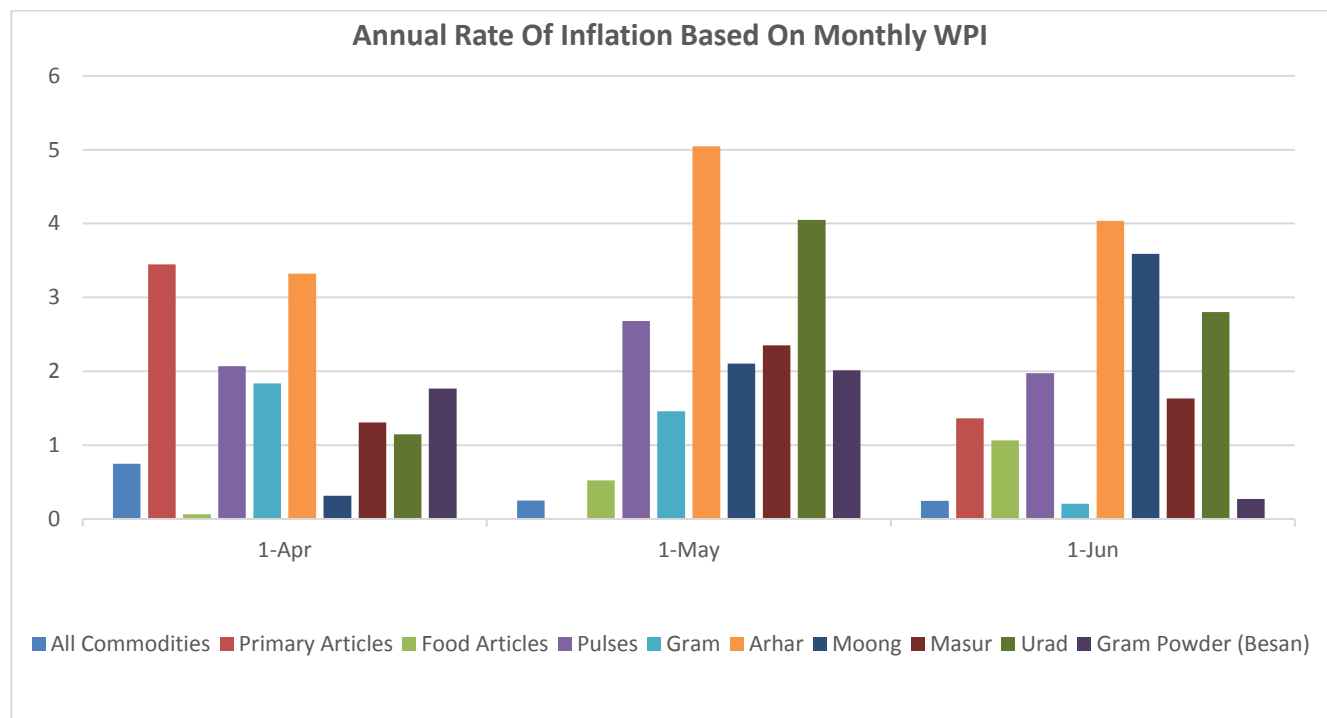

Chana: Chana production is likely to decline from 98.75 to 87.78 lakh tonne for MY 2019-20. It may improve further if light showers of rains continue in late planting areas. As new year started with hefty carry in of 20.01 lakh tonne, starting from March, supply side seems to be at ease despite lower production size of 87.78 lakh tonne. Total availability would decrease slightly from 114.01 to 111.79 lakh tonne including 4 lakh tonne expected import. Consumption with import would increase from 94 to 94.5 lakh tonne.

Masur: MY 2019-20 started with 2.44 lakh tonne carry out amid 11.5 lakh tonne production expectation for the new year. Import is likely to increase as crop size is expected to be lower for CY 2019-20 and touch 6.5 lakh tonne in new season. Lower production would drag down total availability at 20.44 lakh tonne. Export would decrease slightly from 0.15 to 0.1 lakh tonne this year. Consumption has been pegged almost same, at 18.6 tonne in the new season. If prices continue to move up, govt has option to decrease import duty, currently applicable at 40%.

Agri Commodity Indices –June -2019:

Pulses WPI: Pulses WPI increased by 2.8 point from 141.8 in May to 144.6 in June-2019

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

Higher stock availability with Nafed and in private hands, weak futures and sluggish demand in cash market amid good rainfall in kharif pulses growing belts, weak demand for other pulses remain price affecting factors for chana market. Despite higher duty import from African countries at cheaper price is likely to increase in coming months. Sudan is offering Chana at Rs 3850-3900 basis Indian port and around 20,000 MT is expected by mid –Aug-2019. As all pulses prices are under pressure, chana too continues to reel under pressure. Nafed would not be able to retain stock for a longer period as kharif procurement season is round the corner and Nafed has to offload old crop for new pulses storage. So, it seems difficult for chana market to move beyond MSP level (RS 4625 per qtl.) in August. Stake holders should release stock at every improvement of Rs 100 from current level. In Delhi market chana is being traded at Rs 4300-4350. Nafed has 12.79 lakh MT old chana and 7.57 lakh MT new chana in its stock. The higher quantity would not allow market to go up. Bulk buyers too have restricted its buying due to weak demand and availability of higher stock in the market.

All India average price for Chana decreased by 1.70 percent from Rs 4403 (June) to 4328 per qtl. in July-2019. Australian Chana (imported) price too decreased by 3.11 percent from Rs 4393 to Rs 4256 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics: Prices are likely to stay steady to slightly weak in August due to:

- Nafed willing to sell through auction at regular intervals
- Weak demand from bulk users/mills and import
- Higher stock in central pool/ and in private/farmers hands
- Weak futures and
- Govt's strategy to regulate market, keeping market well supplied
- Decreasing retaining capacity of private trades due to liquidity crunch

Seasonality Index, however, hints that Chana (gram) is likely to notice steady to firm movement in the Spot market in Aug-2019.

Chana Future Market Analysis:

Technical Commentary:

- Decreasing price & OI hint weak market.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs

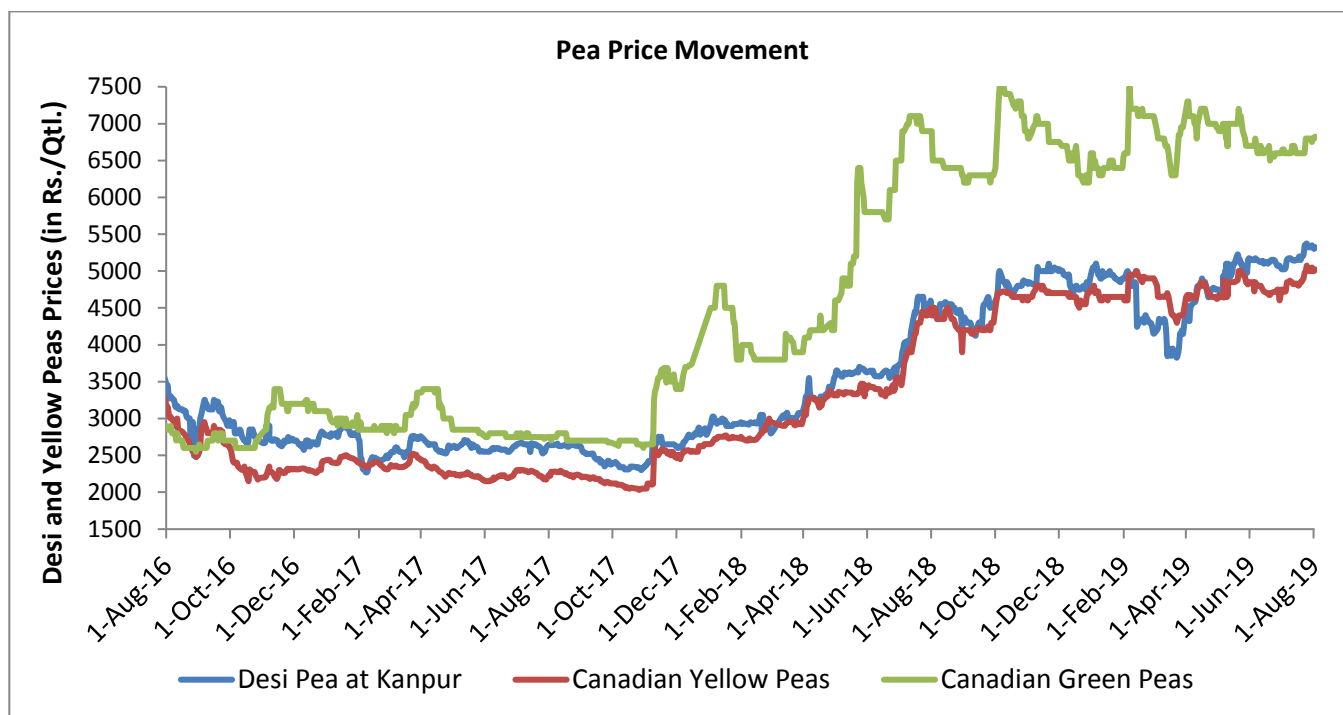

Strategy: Buy on Dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Sep	4221	4254	4272	4425	4539
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Sep	Buy on dip	4221	4350	4400	4150

Field Pea (Matar/Dry Pea):
Fundamental Analysis and Outlook:

Market Recap:

Pea market could not sustain its firm momentum and declined with weak chana market. Pressure is likely to continue due to weak demand in cash market taking clue from other weak pulses. However, some improvement was seen in desi pea market in Kanpur due to lower production in domestic market, restricted import and declining stock. However, upward momentum is unlikely to continue as buyers remain silent at higher level. Import remains restricted for consumption grade pea at 1.5 lakh MT. It may be increased to 2lakh MT in coming months. In a new development, govt. has allowed pea import for seed purpose. However, it would not impact current market trend. Pea in Mumbai market is being traded at Rs. 5025, while in Kanpur market it is being traded at Rs 5300-5350 per qtl. As chana price has started decreasing, pea too would trade under pressure. Arrival in local mandis has decreased. As, there would be shortage of imported crop in coming months, price may trade steady to slightly firm. Stake holders should buy on downward correction. Restriction on pea import at 1.5 lakh tonne till April-2020 and lower availability of imported stock may support pea market once again from Aug end. If chana continues to trade weak, pressure would continue, on pea price too. Weak trend may prevail in August.

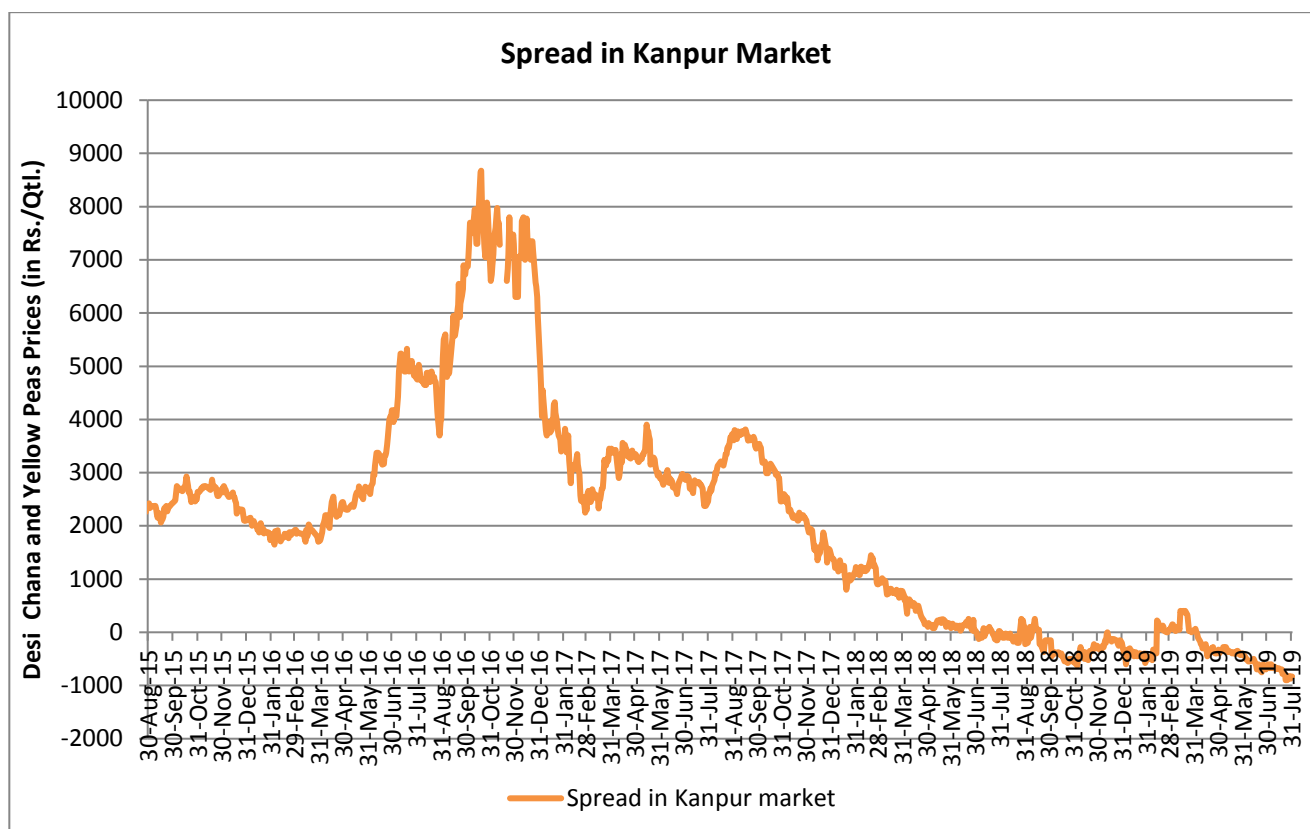

Market recap:

Pea market traded under pressure despite lower stock at port. However, Kanpur market traded slightly up from 5136 to 5201 per qtl due to increased holding by private trades. Overall, all India average increased by 1.25% to Rs5625per qtl in July. In Mumbai market, pea traded at Rs 5025, up from Rs 4810 in June. Pressure is likely to continue in August as chana trades bearish. Stake holders should retain stock as stock at port is dwindling now and demand for festive season is about to begin.

Price Dynamics: Pea market is expected to trade steady to slightly weak in August due to:-

- Weak demand for all pulses including chana despite lower crop size this year
- Despite fixed import quota at 1.5 lakh MT import continues
- Weak demand for pea dal due to higher price
- Despite Stockiest holding in producing region, offtake from mills is weak and availability of chana is ample.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased from Rs650 to Rs 850. Spread is expected to remain in the negative zone in August too on relative movement in Chana prices. Overall outlook seems steady to slightly weak in coming weeks.

Seasonality Index depicts that pea prices are likely to notice slight improvement in July-2019.

Market Outlook For August-Steady to slightly weak movement is expected.

Masoor (Lentil/Masoor):

Fundamental Analysis and Outlook:

Market Recap:

No major spike in lentil market is expected at this point of time due to weak demand and ample stock with Nafed. Nafed still has 2.07 lakh MT old and new stock. Besides, import is taking place at lower level. So, supply side seems at comfortable level amid weak demand in cash market. Prices of other pulses too remain unsupportive for cash market. Prices in global market is lower, so import duty remains ineffective. Range bound movement is expected in lentil market in August. Lentil vessel is being quoted at Rs 4000-4050 per quintal and container is being quoted at Rs 4100 per quintal. In Kanpur market it is being traded at Rs4400-4425 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Cash market may trade in the range of Rs4250-4550 in August.

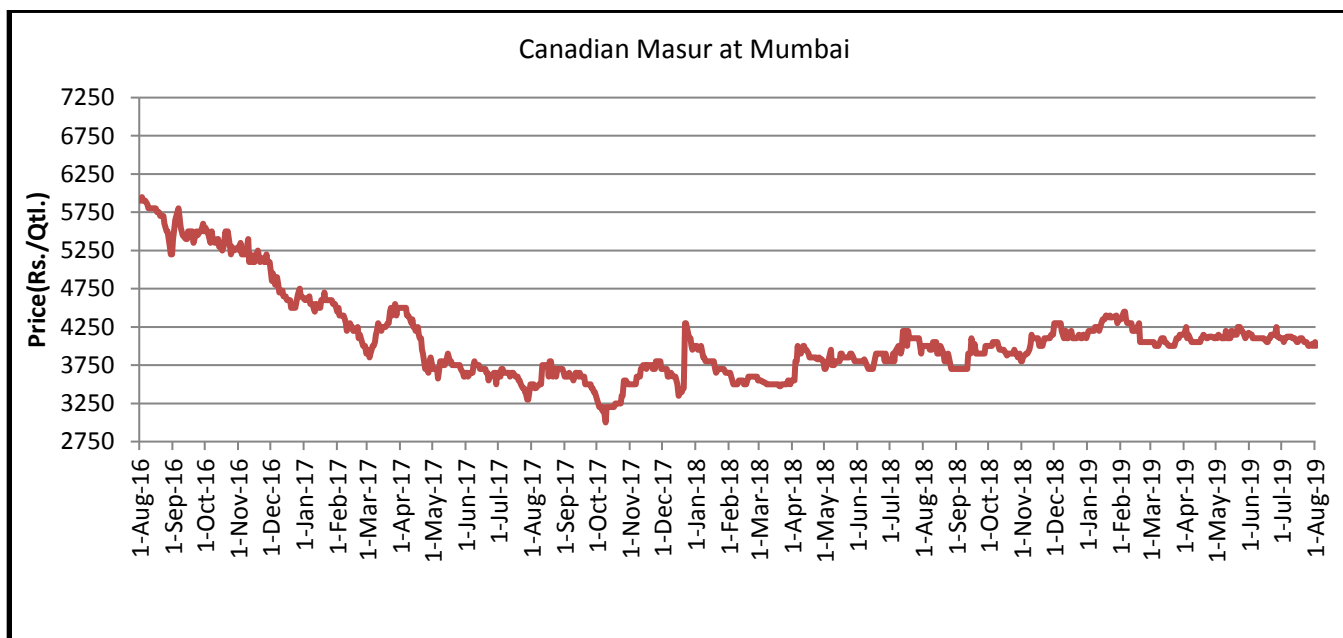

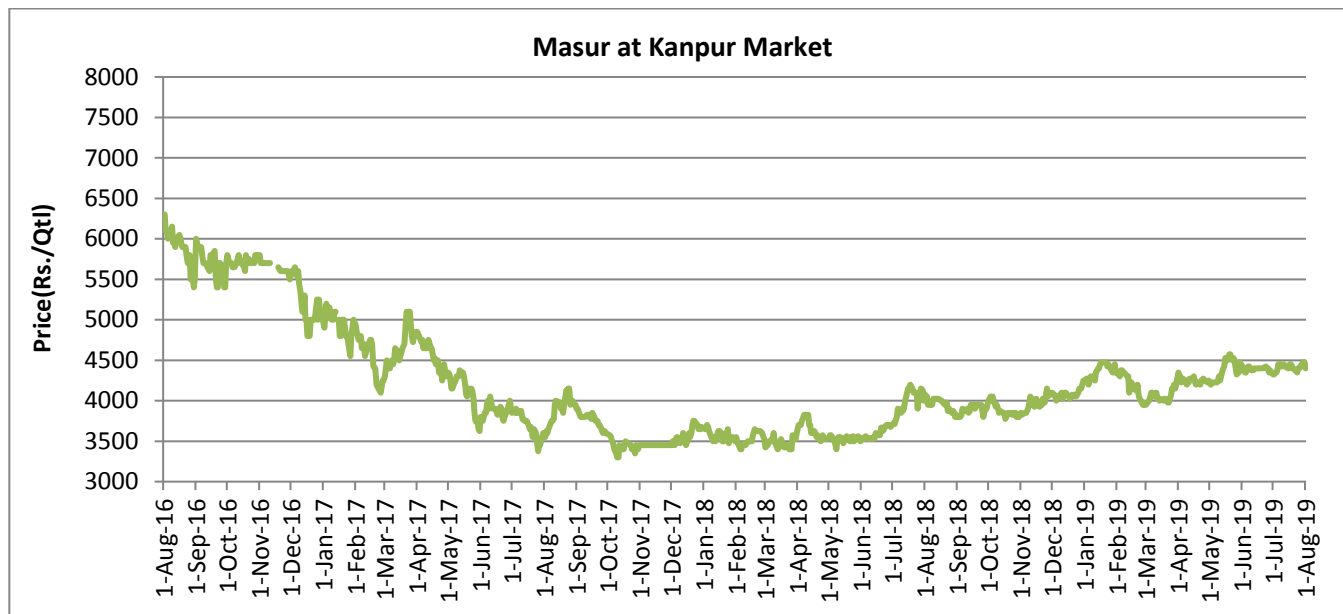

Price Dynamics:

In July-2019, average price in key market Kanpur was up slightly by 0.45% to Rs 4409 per qtl. MoM basis. Prices are likely to trade range bound in August too.

Range bound movement is expected due to:

- Weak demand from bulk buyers
- Nafed intension to start selling
- Import flow at comparatively lower price
- Weakness in other pulses market specially tur, chana and urad

Price Trend In Cash Market:

Seasonality Index depicts steady to slightly weak movement in August-2019.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Tur cash market traded up in the beginning of July and crossed 6200 level in Gulberga market. Lower crop size and fear of lower acreage this year too due to delayed monsoon, helped market to trade continuously up from MSP. However, improvement in rainfall and sowing area amid higher stock(8.38 Lakh MT) with Nafed would not allow market to move beyond a certain level. Besides, govt has taken decision to allow additional 2lakh MT import over and above 2 lakh MT allowed previously and decision of selling 2 lakh MT from buffer stock capped uptrend in the market. Prices decreased by Rs350-450 in last 15 days. However, demand from mills is likely to improve and tur may improve again by August end. Besides, some support is expected from higher MSP(Rs5800) for 2019-20 crop. MSP of tur has been increased by Rs 125 to Rs 5800. In August tur market is expected to trade at Rs 5600-6000. As rains started in main growing region, sowing activities are likely to pick up and farmers may make up for lower coverage. Availability is expected to remain at ease. So, any major jump in market is unlikely in August. Myanmar is offering new tur at \$740-750 per MT in forward deal.

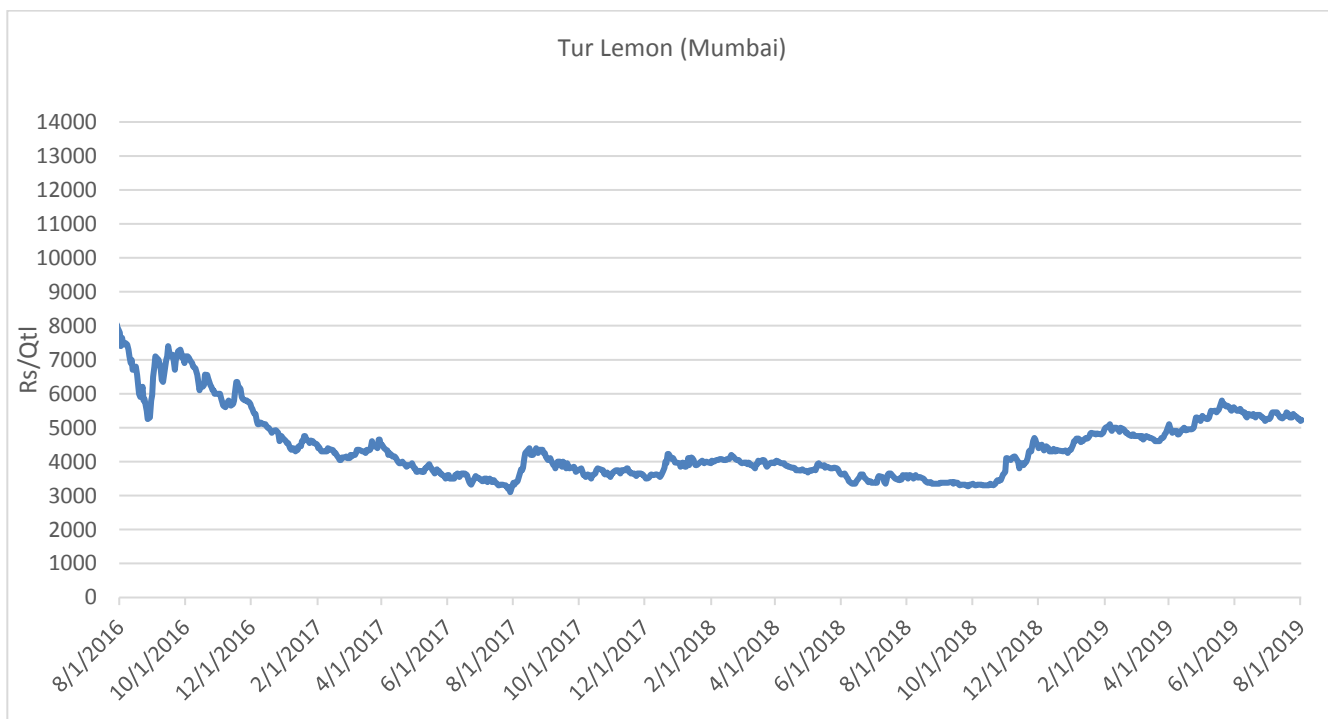

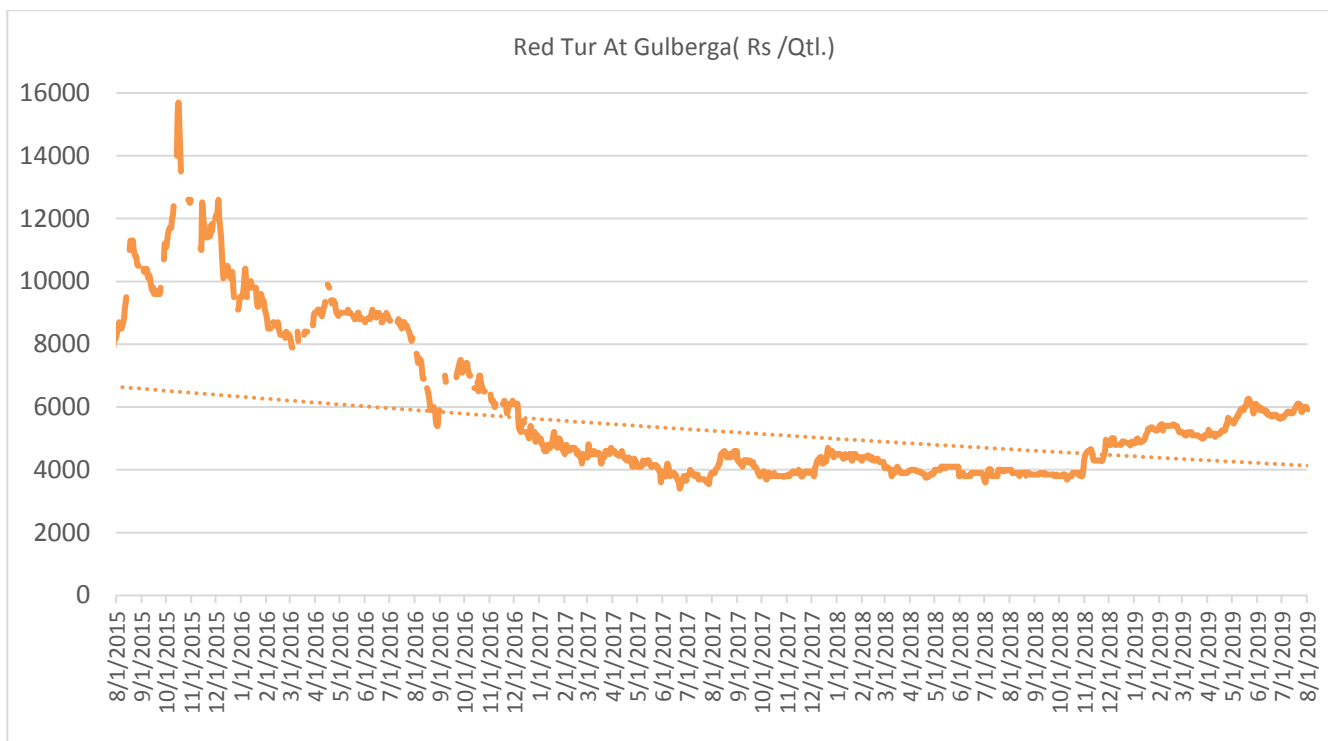

Market Recap:

Tur market is expected to stay steady to slightly weak on the back of lower demand at higher level. Availability would increase due to enhanced import quota from 2 to 4 lakh MT. Besides, 2 lakh MT would be supplied from buffer stock. However, arrival in markets has decreased. Restricted selling by stockiest, fear of lower area due to moisture stress in the field would remain supportive to cash tur market in the medium term. However, any spike in tur market is unlikely. New crop would hit Indian market in Dec and govt has enough stock to handle next four months.

Price Dynamics:

In July-2019, average price in Gulberga market was down by 1.38 % from 5775 to Rs 5700 per qtl. due to higher import quota, decision of selling from buffer stock and good monsoon rains in producing regions in the beginning of Aug. Tur price in August is likely to move down slightly due to

- Higher import quota
- Sale from buffer stock
- Rains in sowing regions
- Weak demand from mills and
- Hope for improvement in sowing area due to higher MSP

Seasonality Index-depicts steady to slightly weak movement.

Market Outlook for August:

Fundamental remains unsupportive for Tur cash market in the near term.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

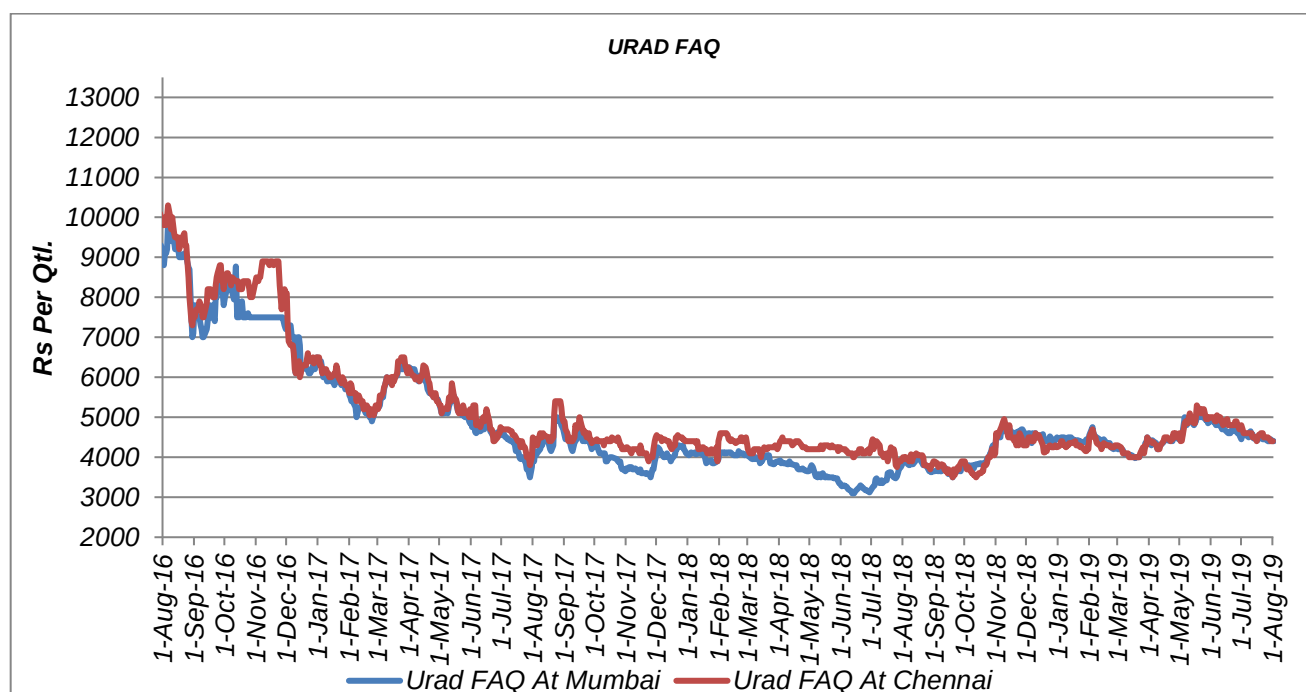

Market Recap:

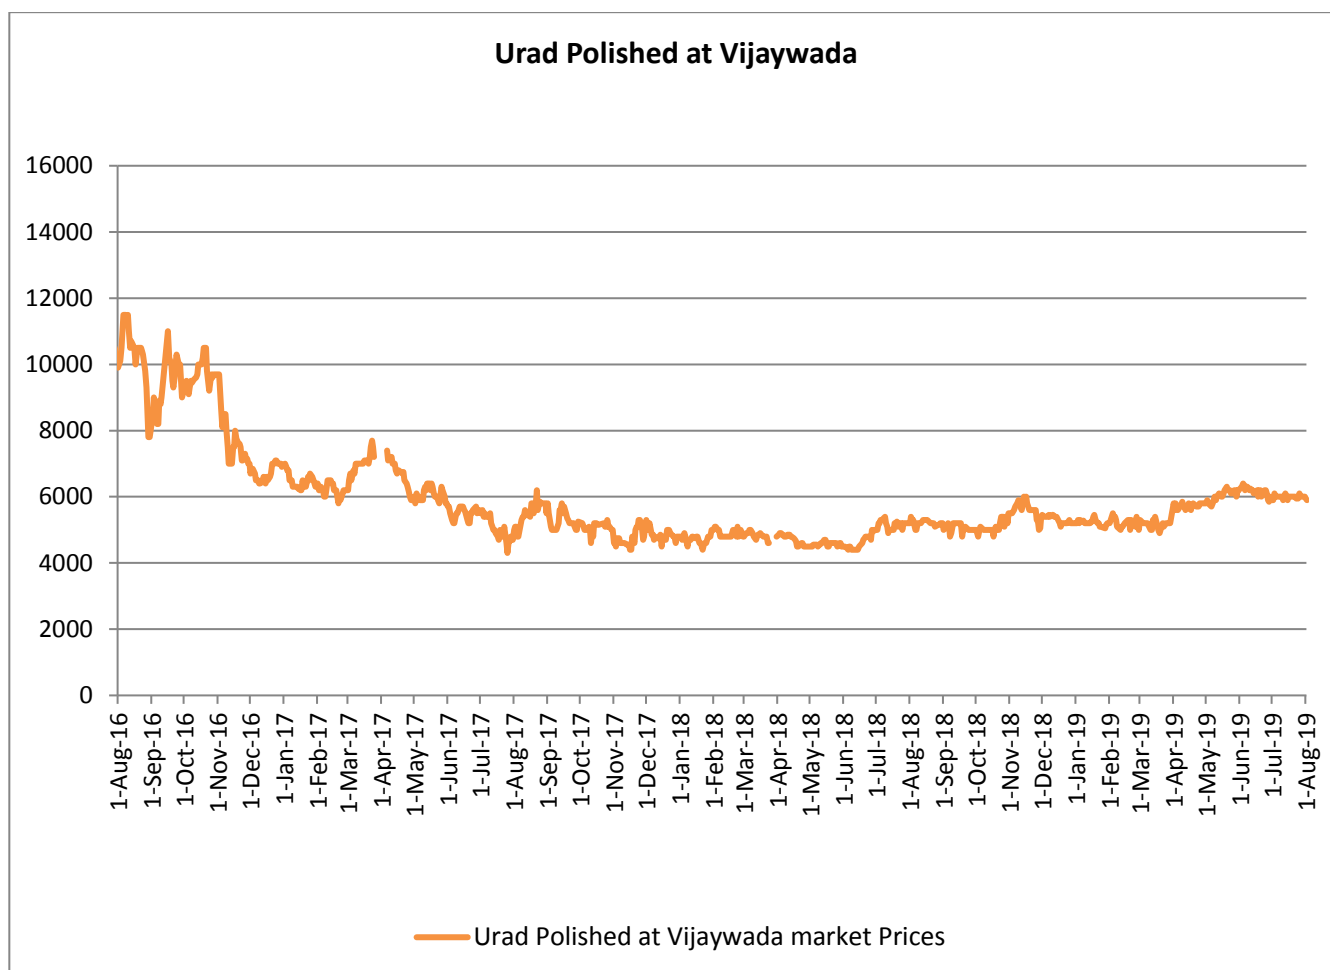

- At planting front, area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan and Gujarat. Indian farmers have covered 30.27 lakh ha so far against 31.99 lakh ha last year. It is lower by 5.36 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running behind by 2.10 % to 13.98 lakh ha against season's normal of 10.67 lakh ha. However, situation in UP has improved now and farmers have covered 5.58% higher area to 5.35 lakh ha so far. Area is up in Rajasthan by 4.44% to 4.56 lakh ha against 4.37 lakh ha last year as on 02nd Aug-2019. As south Indian states are minor from kharif urad point of view, up and down in area in these regions would not impact overall crop size much. Normal area in AP is 0.37 lakh ha and it has covered only 0.04 lakh ha so far. Even in Telangana farmers have covered 0.21 lakh ha against normal of 0.30 lakh ha. Urad may continue to trade weak at Rs4200-4550 per qtl in various markets in coming weeks. In Chennai market, urad is being traded at Rs 4350-4475 per qtl. Buying at dip seems good at this point of time.

Price Dynamics:

In July, average prices in key markets including Mumbai/was down by 1.34 % percent to 4450 per qtl. In Chennai it is being traded at Rs 4500-4550. Prices may stay steady to slightly weak in August due to

- Weak demand & higher stock
- Improved acreage and good rainfall in growing region.
- Higher import volume
- New big crop expected from Sep end
- Higher stock with Nafed (3.32 lakh MT)
- Lower quotes in Myanmar

Seasonality Index depicts steady to slightly weak movement in the near to medium term.

Market Outlook for August : Prices are likely to trade weak .

Fundamental Analysis and Outlook For Moong:

Market Recap:

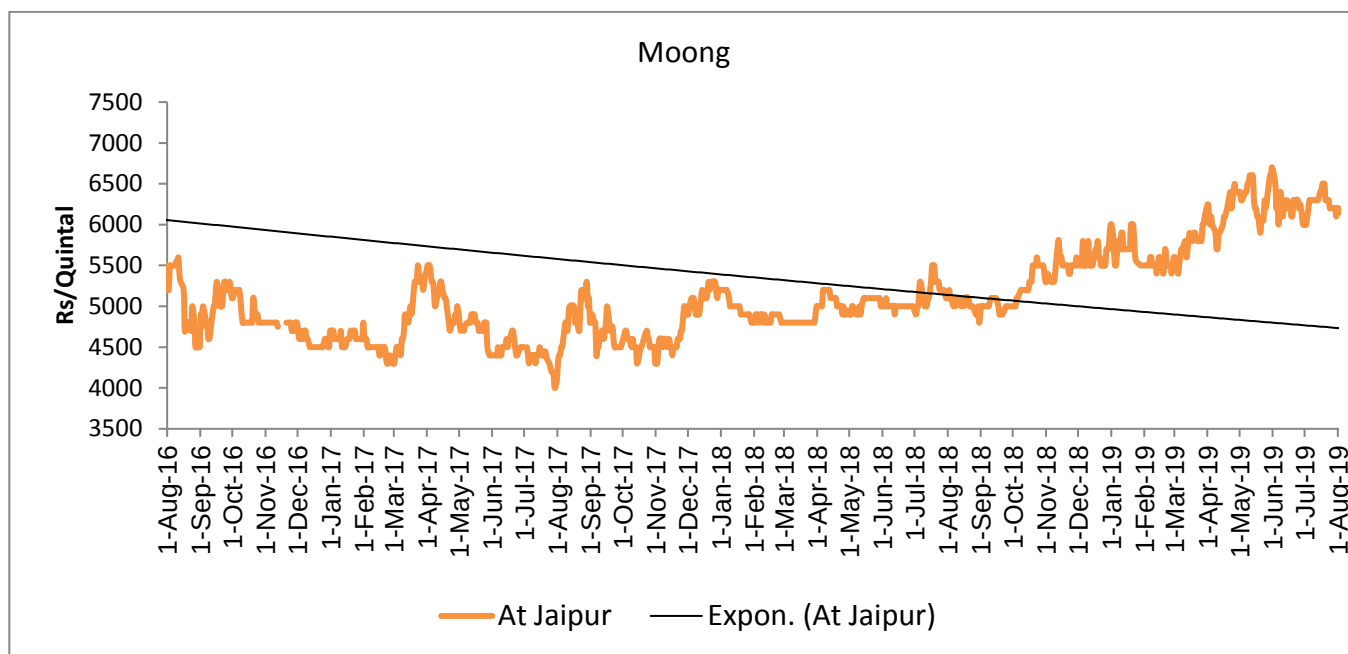

All India kharif area coverage under moong is running behind by 12.01 % to 25.81 lakh ha as on 2nd Aug--2019 against the normal of 27.50 lakh ha so far. Major kharif moong producing states are Rajasthan, Karnataka, MP & Madhya Pradesh. In Rajasthan farmers have covered 16 lakh ha against 16.84 lakh ha last year and normal of 13.27 lakh ha. It is running behind by 35.78 % to 2.49 lakh ha in Karnataka. Normal area in Karnataka is 3.44 lakh ha. In Maharashtra only 2.86 lakh ha has been covered against the normal of 4 lakh ha. Pressure on moong might be seen in coming weeks due to improved area, good rainfall in growing region and 1.45 lakh MT stock with Nafed. New crop in Karnataka is expected to hit market soon and pressure might be seen from mid-August. It would not allow market to move up from current level. Nafed would continue to release stock in various states through auction. Besides millers have option to import 1.50 lakh MT moong. Demand is weak in cash market. So, any upward momentum is unlikely before commencement of procurement at MSP of Rs7050.

Price Dynamics:

New kharif crop from Karnataka starts while it is likely to start in August end from other states too. It would capture trend in cash market. Besides Nafed still has 1.45 lakh MT stock to release before new procurement starts.

Market is expected to trade range bound in August due to:

- Commencement of new arrival
- Higher stock in central pool
- Increasing pace of arrival
- Release of stock from private hands
- Improved area coverage.

Seasonality Index depicts weak movement in the near term

Market Outlook for August: Steady to slightly firm movement is expected.

Pulses Wise Technical Outlook for August -2019: -

Chana:

Outlook –We expect prices to notice steady to slightly weak movement in August-2019. Market may trade down due to:

- Weak demand
- Higher old stock
- unstable demand for besan despite higher price for pea
- Sluggish buying by private trades
- Expected price band for Chana in Delhi is 4200 to 4500 levels in this month.

Trade Strategy: Sell on rise

Trade Recommendations: Go short around 4450 with the first target of 4250 and second target 4150 with stop loss at 4500 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4200	4350	4550	4650

Pea:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slightly weak movement in this month taking clue from lower chana price and weak demand at higher level.

Technical analysis:

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4800- 5200 in this month.

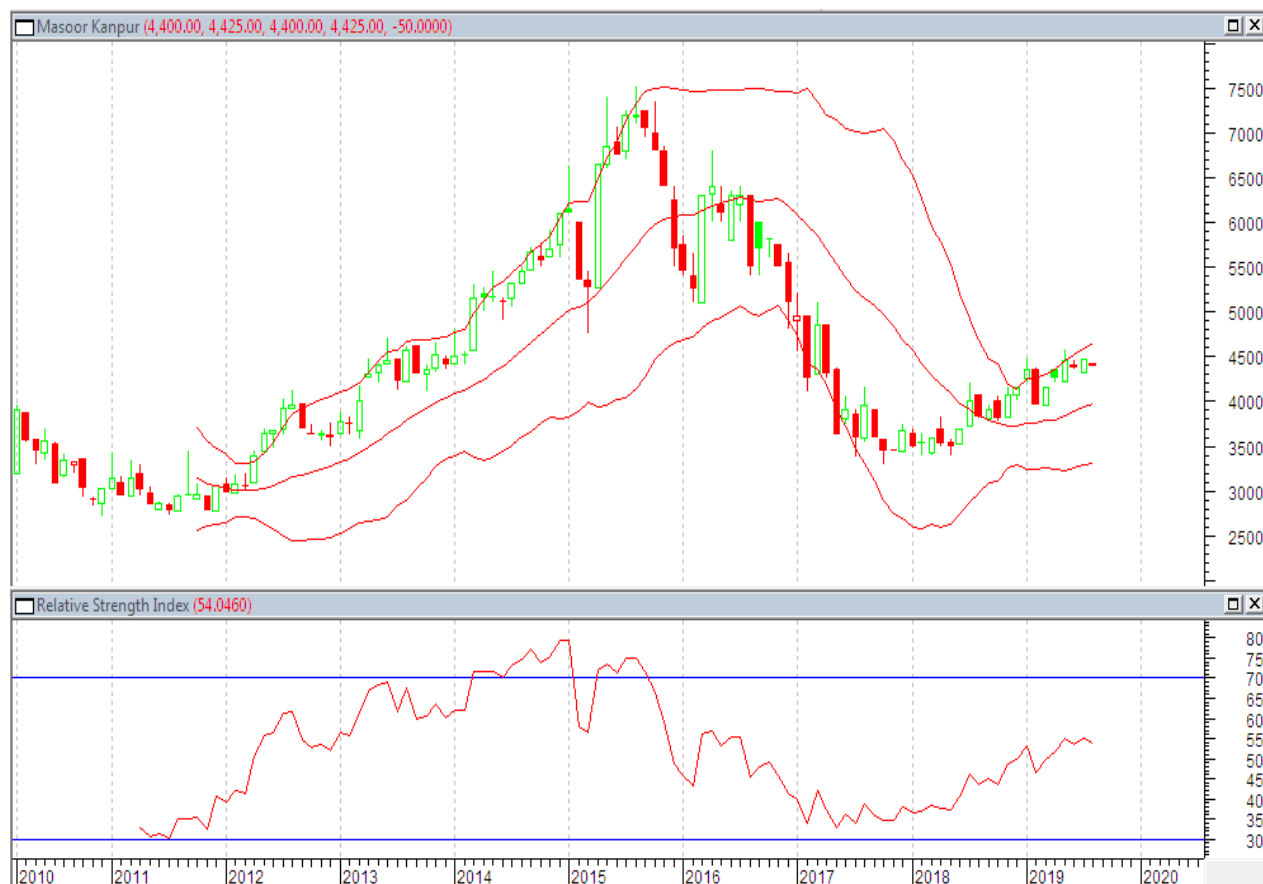

Strategy: Buy on dip

Trade Recommendations: Go long around 4950 with the first target of 5150 and second target 5200 with stop loss at 4850 level

Support & Resistance				
S2	S1	PCP	R1	R2
4650	4850	5025	5200	5300

Masur :

Desi Masur (at Kanpur) Spot Market Monthly Chart:

Outlook –Steady to firm movement is likely to be noticed this month.

Technical Analysis:

- Chart depicts steady to weak movement in the market.
- RSI oscillator is moving down in neutral region.
- Expected price range is 4200-4600

Strategy: Buy on dip

Trade Recommendations: Buy around 4350 with the first target of 4500 and second target 4550 with stop loss at 4250 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4250	4425	4550	4650

Tur:

Tur (at Gulbarga-Kalaburagi) Spot Market Monthly Chart:

Outlook - We expect prices to show weak movement..

Technical Analysis:

- Candlestick chart denotes weak movement in the market.
- Oscillator RSI is moving down in neutral region.
- Expected price range is 5700-6100

Strategy: Buy on dip

- **Trade Recommendations:** -Go long around 5750 with the first target of 5950 and second target 6100 with stop loss at 5650 level.
-

Support & Resistance
