- Pulses Wise Technical Outlook For Month
- Indian Pulses- Wise Import- Monthly Analysis
- Inflation
- Seasonality Index
- Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
- Pulses Snapshot
- Sowing Progress
- India
- Australia
- Canada
- US

Domestic Market Fundamentals:

- **India has received 693 mm of actual rainfall against 689.4 mm of normal rainfall during 01st June to 28th Aug-2019.** During the same period rainfall was 1% higher than normal rainfall. Distribution of rainfall has been uneven despite higher rains. As good rainfall is expected in Sep too, % of higher rainfall may increase. On the one hand, flooding has affected standing crop in some parts of growing region, on the other lower rainfall has affected growth of kharif crop too. However, overall condition of kharif crop is normal to good so far.
- **Weak demand for chana dal has discouraged mills to restrict buying of chana. Nafed has ample chana stock** and its continuous selling may further depress chana price. Supply side is comfortable amid release by private trades. At this time of slower buying surprises market participants. Even prices of other pulses are either steady or trading lower. Generally, millers at this point of time are active due to strong besan demand. It is not happening this year. If Nafed starts selling chana in bulk volume, prices of chana is bound to trade lower in coming weeks. However, if Nafed decides to sell chana near MSP, market may recover proportionally. So, price direction for chana is totally dependent on Nafed selling strategy. In Delhi market chana is being traded at Rs 4175-4200.
- **Nafed has started offering chana in Mah, U.P. & M.P. It has offered 5400 MT in Mah, 1831.47 MT in U.P. & 20815.96 MT in M.P.** It has passed tender for 420 MT in Khandwa at Rs 3981. In other states like Raj, Guj & MH, bids were not passed due to lower price. As market is already reeling under pressure, acceptance of lower bid may pressurize cash market further. Buyers are unwilling to buy in bulk quantity as sentiments turned weak.
- **Nafed has offered 2752.51 MT moong and 40653.93 MT urad in Odisha, Guj and M.P for moong & Odisha, Guj, U.P. & MP for urad.** Out of total moong offered through tender around 1471 MT has been passed at around Rs 6000 plus. The accepted bids break up is Gharsanea -500 MT, Jodhpur -200 MT and Nagore -771 MT. It has passed urad bids in Baran at Rs 4101 (2017)
- **Indian farmers have covered 127.99 lakh ha area under pulses as on 30th, Aug-2019 against 131.54 lakh ha last year till date.** It is 2.70 % lower than last year. Normal area under kharif pulses is 119.89 lakh ha. Farmers have covered 44.36 lakh ha under tur, 37.09 lakh ha under urad bean, 30.14 lakh ha under moong, 0.27 lakh ha under kulthi and 16.12 lakh ha under other pulses. It is 0.14 % down for tur, 1.76 % down for urad, 10.02 % down for moong, 42.27 % for kulthi and 4.13 % up for other pulses from last year.
- **Market has adjusted the impact of flood loss and opening of weather in major growing region has pressurized cash urad market once again.** Besides, private trades are releasing old stock. New crop is hardly one month away now. Import remains restricted so any major decline is unlikely. Govt would procure urad at Rs 5700. So, Agriwatch expects market to stay steady to slightly weak this week. Besides, Nafed has started auction in MP, Raj and U.P. It would restrict market to move further up. Demand – supply side is expected to be slightly tight. As sowing is delayed by 20-25 days, new crop would be available one month late i.e in Oct end. It may keep market well supported at current level in the medium term. At present urad Mumbai is being traded at Rs 4500, in Chennai it is being traded at Rs 4800 per qtl. Cash market may decrease by Rs 100 more this week too. New Urad from Gujarat and Maharashtra would hit market from mid Sep. Urad from Chandausi line is expected in Nov. There is good sowing in Guna & Ashoknagar. Besides, crop is in excellent condition in Lalitpur, Tikamgarh line. So any spike in urad is unlikely at this point of time in normal condition.
- **Moong crop in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and** is expected to hit market by third week of Sep. Higher price during sowing season encouraged farmers to grow more moong this year. However, old moong price would rule higher until moong from Rajasthan hits the market. There is report of some loss in Kishanganj line. Overall, crop size is larger in Rajasthan. In Maharashtra moong crop in Akola and Khamgaon line is in very good condition. Summer crop in UP, Bihar, Jharkhand and MP was lower in size. So moong price increased from normal expected level. Now stockiest have resorted to release light quality stock at Rs 5500-5700. Mills are buying moong at this level. It is good time for traders and stockiest to start offloading moong now. In Jaipur market moong is being traded at Rs 6300-6375. It may move down further by Rs 200 from current level.
- **Govt. started offloading tur stock with tur area crossing last year level due to good rainfall in growing regions during early August.** Nafed has floated tenders for disposing 40259 MT tur in Karnataka, Maharashtra and Gujarat. It may pressurize tur market by Rs 100-200 from current level. As on 23rd August-2019 Indian farmers had covered 43.42 lakh ha against 42.26 lakh ha last year. As sowing would continue till 15th Sep, area is expected to be around 45 lakh ha, around 2 lakh ha higher than last year. Higher coverage area would compensate the recent loss by flooding and heavy rains. As weather has been favorable at this stage, production is expected to increase from normal expectation. Pressure might be seen on tur market to a certain extent.

. In Gulbarga market tur is being traded at Rs 5850-5875. It may test Rs 5700-5750 level this week. If heavy rains occur again and affect standing crop, it may recover again. Next two weeks are very crucial for tur crop..

- **Weak demand, higher volume of import continued to affect lentils price sentiments despite lower arrival in major mandis.** Lentils (containers) at Mumbai port was quoted at Rs 4150-4250. However, demand at lower level is expected in coming weeks. Farmers have sold out maximum crop now. As stockiest too are selling, pressure continues. In Indore market lentils are being traded at Rs 4100-4150. Stockiests are aware that Nafed has around 2 lakh MT stock while import is on, so any spike is unlikely. If demand improves, prices may move up by Rs 200 -300 in the medium term. In Kanpur market masur moti is being traded at Rs 4400-4425. Now marketing is awaiting for demand.:

International Market Update:

- **Chickpeas crop condition is not as satisfactory as local farmers estimate in US and Canada.** There are reports of infestation (ascochyta blight and other diseases) in the crop due to wet weather conditions. Farmers of Western Canada and the northern United States are reporting infestation in standing crops. CDC Orion varieties are more affected than other varieties. If it continues to increase, production in both countries may decline by 10 to 15% from farmer's expectation. Quality of the crop too may be downgraded.
- **Poor domestic and export demand continued to weigh on global chickpea market this week.** Given the supply situation and carry in from 2018-19 buyers are in no hurry to buy. They are active to fulfill their immediate needs. They are not buying for medium or long term basis. As harvesting is delayed by 10 to 15 days, it is difficult to move stock into export market in lesser time. India may pose a challenge as chickpeas market is decreasing and Govt.'s agency like Nafed has excess stock to offload.
- **Dry peas harvest in Canada and US has got momentum despite slower pace of commencement.** It is still running behind of 5 years average. Harvesting of 52% US dry is over now against 70% last year till date. With current harvested area around 4.92 lakh MT peas from new crop would be available for sale this week. It was 5.26 lakh MT last year at this point of time. The 5 years average is 5.98 lakh MT. Against it Canadian farmers have been able to harvest only 12 % dry pea so far due to bad weather condition in growing regions.. In Canada only 4.92 lakh MT new peas is available against 16.6 lakh MT last year till date.
- **Dry peas production in Canada is expected to increase by 20 % to 43 lakh MT in comparison to last year.** The reason is attributed to higher area coverage in 2019-20 crop year. The major growing state is Saskatchewan accounting 50 % in total production. Alberta is 2nd major growing state accounting 45% of total production. As carry in stock is lower supply side is expected to increase by only 55 tp 4.5 MMT. Export may decrease to 31 lakh MT. Top buyers might be China, Bangladesh and the US. Carry in stock would increase. Average price is expected to be similar as 2018-19.
- **Chickpeas export from Australia increased by 10 % to 27251 MT in June against May when it was registered at 24719 MT** as per Australia Bureau of Statistics. Thus total export in current MY reached to 259,863 MT (till June) against 646,411 MT in corresponding period last year. B, desh brought 8,463 MT in June, followed by Pakistan at 8,064 MT. UAE purchased 4,991 MT in June.
- **Dry pea stock in US is likely to increase by 0.02 % tp 203983 MT in 2019. It was 199628 MT in 2018.** Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79833 MT in 2018. All chickpeas stock is 294% higher to 157262 MT against 39916 MT in 2018. Out of total small chickpeas stock increase from 12156 to 43318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.
- **Lentils production in Canada is likely to increase by 5.16 % to 22 lakh MT in 2019-20 against 20.92 lakh MT last year.** However, total supply would decrease by 3.14 % to 28.95 lakh MT due to higher domestic use pegged at almost 6 lakh MT. Carryout would decrease from 7 to 5 lakh MT in 2019-.20. Export has been pegged at 18 lakh MT, similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.
- **A tentative comparison from last year shows that carryover stocks are high for all peas, lentils, and chick-peas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick-peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20 while production is expected to fall from 3.11 to 2.30 lakh MT.** Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.

- **Weekly Outlook:** -Pulses are likely to trade steady to slightly weak.

Pulses Supply & Demand:

(*All quantities in Lakh tonnes)	Urad (Kha-Rabi)		Moong (Kha- Rabi)		Tur		Chana		Masur

Total Use(Export + Consumption)	27.8	28.2	23.5	23.2	41.5	42.7	94	94.5	18.65	18.6
Ending Stocks (Total Supply - Total Use)	8.75	6.95	5.52	3.95	6.28	4.37	20.01	17.29	2.44	1.84

Note: Agriwatch 1st Adv Estimate For 2019-20 for Urad ,Moong & Tur & final estimate for Chana and Masur for MY 2019-20.

Urad: Urad production is likely to increase by 1.3 % from 24.58 to 24.90 lakh tonne in new season (2019-20). Import is expected to decrease by 1.5 lakh tonne to 1.5 lakh tonne due to quantitative restriction. Total supply would decrease slightly from 36.55 to 35.15 lakh tonne in 2019-20. Export would decrease from 0.3 to 0.2 lakh tonne due to disparity. Consumption would increase from 27.5 to 28 lakh tonne in 2019-20. So, carryout would decrease slightly from 8.75 to 6.95 lakh tonne. As carryout is higher, supply side is expected to be at comfortable level this year too. So, any unexpected spike is unlikely under prevailing condition.

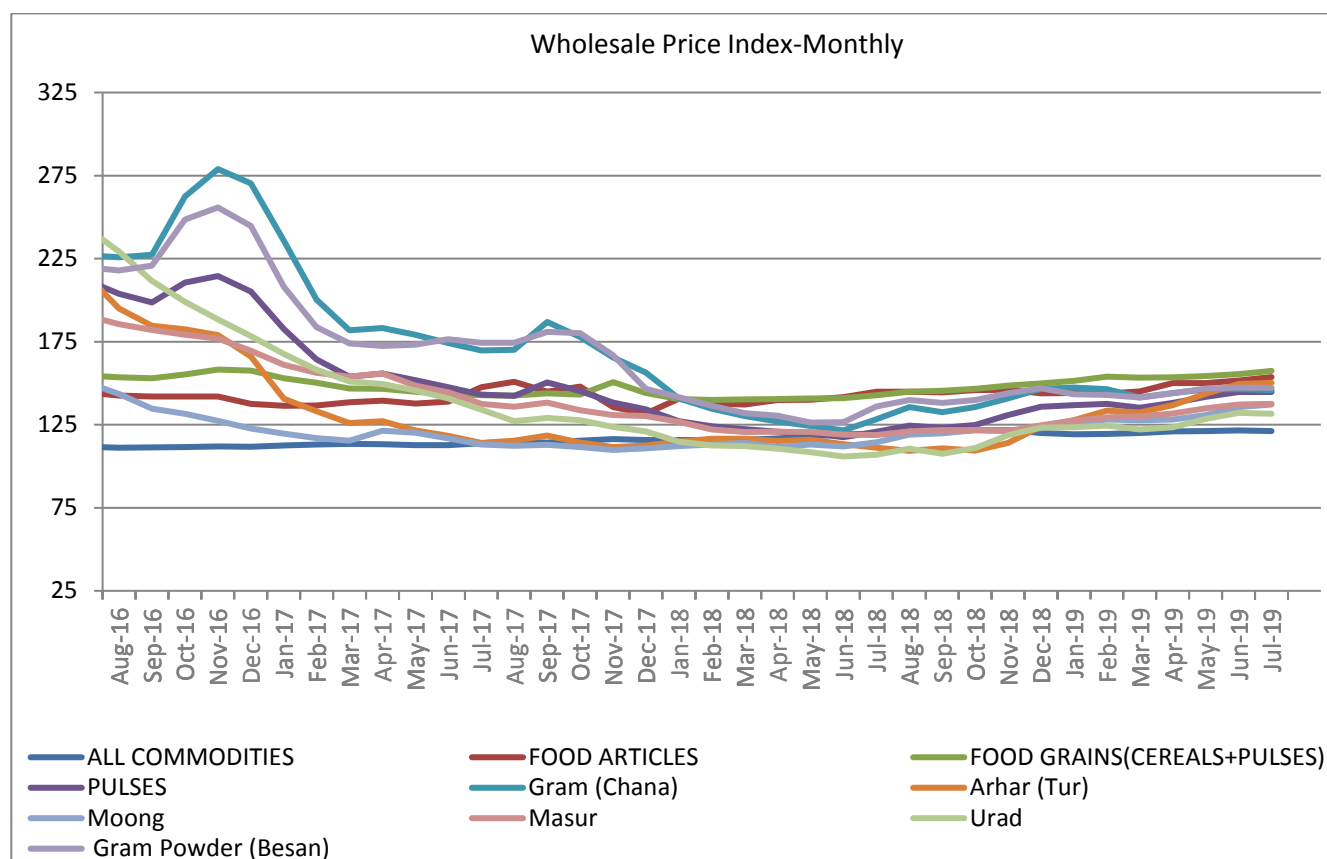

Moong: Moong production is likely to increase by 3.06 % from 20.26 to 20.88 lakh tonne in 2019-20. Import is expected to decline by 50 % to at 0.75 lakh tonne in new season. Total supply is expected to decrease from 29.02 to 27.15 lakh tonne in 2019-20. As there is no demand from overseas market due to disparity, export is likely to decrease from 1 to 0.2 lakh tonne in the new season. Consumption would increase from 22.5 to 23.0 lakh tonne. Total usage is expected to touch 23.2 lakh tonne. Increase in consumption would pull carryout from 5.52 to 3.95 lakh tonne. So, any major decline in moong price is unlikely in the new season.

Tur: Tur production is likely to increase by 3.06 % from 35.21 to 36.29 lakh tonne, in the new season (2019-20). Import is expected to increase by 10.29% to 4.5 lakh tonne due to eased restriction on quantity. Total supply would decrease slightly from 46.78 to 47.07 lakh tonne due to crop loss in new season. Export may increase from 0.5 to 0.70 lakh tonne due to likely export incentive. Consumption may increase from 41. to 42 lakh tonne in 2019-20. With export, total consumption has been pegged at 42.7 lakh tonne. Due to lower production and import, carry out would decrease from 6.28 to 4.37 lakh tonne for next year. Market is expected to find balance and no major spike is expected at this point of time.

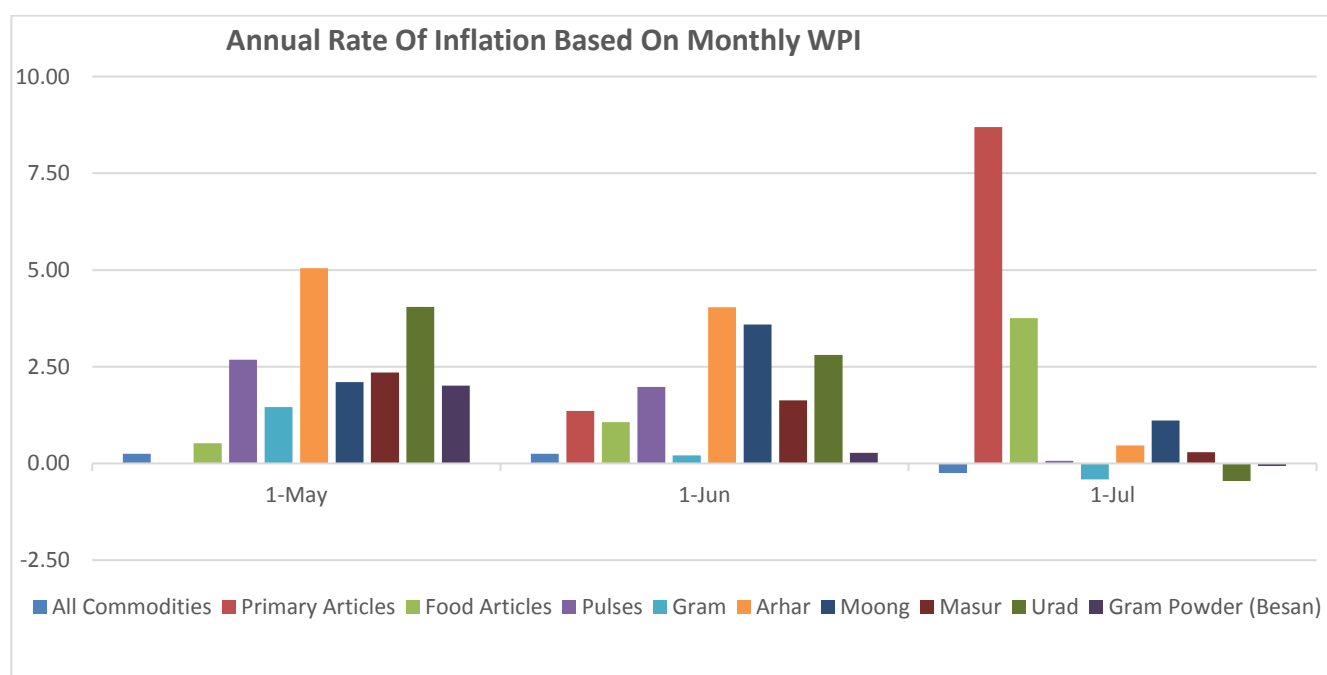

Chana: Chana production is likely to decline from 98.75 to 87.78 lakh tonne for MY 2019-20. It may improve further if light showers of rains continue in late planting areas. As new year started with hefty carry in of 20.01 lakh tonne, starting from March, supply side seems to be at ease despite lower production size of 87.78 lakh tonne. Total availability would decrease slightly from 114.01 to 111.79 lakh tonne including 4 lakh tonne expected import. Consumption with import would increase from 94 to 94.5 lakh tonne.

Masur: MY 2019-20 started with 2.44 lakh tonne carry out amid 11.5 lakh tonne production expectation for the new year. Import is likely to increase as crop size is expected to be lower for CY 2019-20 and touch 6.5 lakh tonne in new season. Lower production would drag down total availability at 20.44 lakh tonne. Export would decrease slightly from 0.15 to 0.1 lakh tonne this year. Consumption has been pegged almost same, at 18.6 tonne in the new season. If prices continue to move up, govt has option to decrease import duty, currently applicable at 40%.

Agri Commodity Indices –July -2019:

Pulses WPI: Pulses WPI increased by 1 point from 144.6 in May to 144.7 in July-2019

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

Chana cash market traded under pressure due to weak futures and lower bids accepted by Nafed. If nafed continued to sell bulk volume below 4000, chana market is unlikely to recover. Nafed has ample stock and it will continue to sell and offer for sale volume would continue to be higher in coming months. Kharif procurement is about to start and Nafed with other procurement agencies have to liquidate stock for storage space. Besides, import volume at cheaper rate from south African countries is increasing. Over one lakh MT has already been imported till July, It would increase further in coming months. Sudan is offering chana at Rs 3800 while Myanmar is offering it at Rs 3900 basi Indian port. So pressure might continue on chana cash market. Stake holders should release stock at every improvement of Rs 100 from current level. In Delhi market chana is being traded at Rs 4175-4200. Procurement agencies including rabi Nafed had procured over 27 lakh MT chana in season 2018. Out of total procured quantity Nafed has sold around 10 Lakh MT chana till August-2019. It has maintained reserve stock of 12.78 lakh MT. Thus for auction it has now 12.32 lakh MT available and auction is likely to continue in coming weeks. The higher quantity would not allow market to go up.

All India average price for Chana decreased by 0.97 percent from Rs 4328 (July) to 4286 per qtl. in Aug-2019. Australian Chana (imported) price too decreased by 1.31 percent from Rs 4256 to Rs 4200 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics: Prices are likely to stay steady to slightly weak in September due to:

- Commencement of auction at lower price by Nafed
- Weak demand from bulk users/mills and increasing import volume at cheaper price
- Higher stock in central pool/ and in private/farmers hands
- Weak futures and
- Govt's strategy to regulate market, keeping market well supplied
- Decreasing retaining capacity of private trades due to liquidity crunch

Seasonality Index: hints firm movement. However, fundamental remains weak for spot market in Sep-2019.

Chana Future Market Analysis:

Technical Commentary:

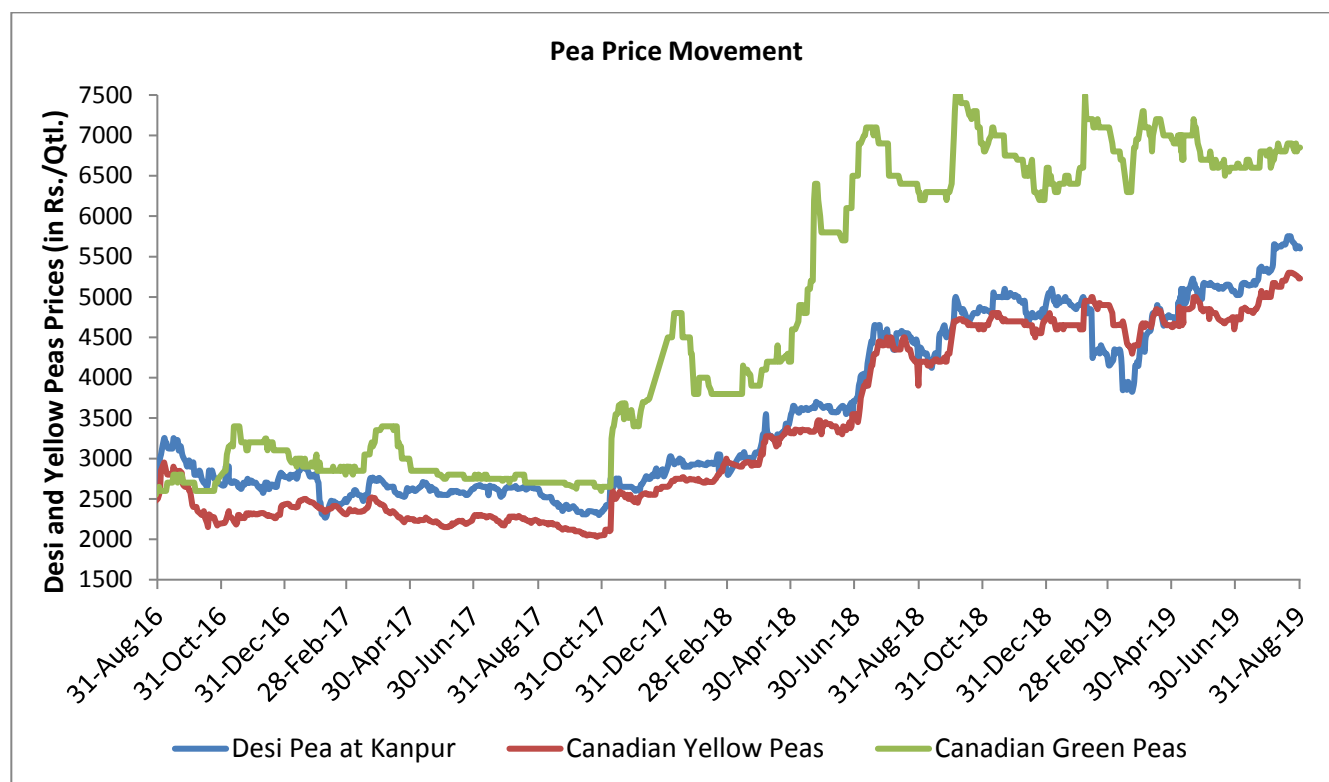

- Decreasing price & OI hint weak market.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs

Strategy: Sell On Rise

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Oct	3900	3850	4017	4210	4358
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Oct	Sell on Rise	4150	3950	3900	4200

Field Pea (Matar/Dry Pea):
Fundamental Analysis and Outlook:

The farm ministry is not in favour of easing quantitative restrictions on imports of yellow peas because of availability of adequate stocks in domestic markets, a senior government official said today. "Farm ministry does not want more imported yellow peas in domestic markets due to sufficient stocks of pulses," the official said. The commerce ministry in June suggested relaxation of the cap on yellow peas' imports by 50,000 tn to 200,000 tn to cool off the prices of pulses during that time, he said. The Centre had relaxed quantitative cap on imports of yellow peas to 150,000 tn from 100,000 tn as at March end. However, on Tuesday, Food Minister Ram Vilas Paswan said that availability of pulses in the country is seen at around 30.7 mln tn in 2019-20 (Jul-Jun) which is "ample". This includes buffer stocks, procured crop by the government agencies and crop to be produced in 2019-20.

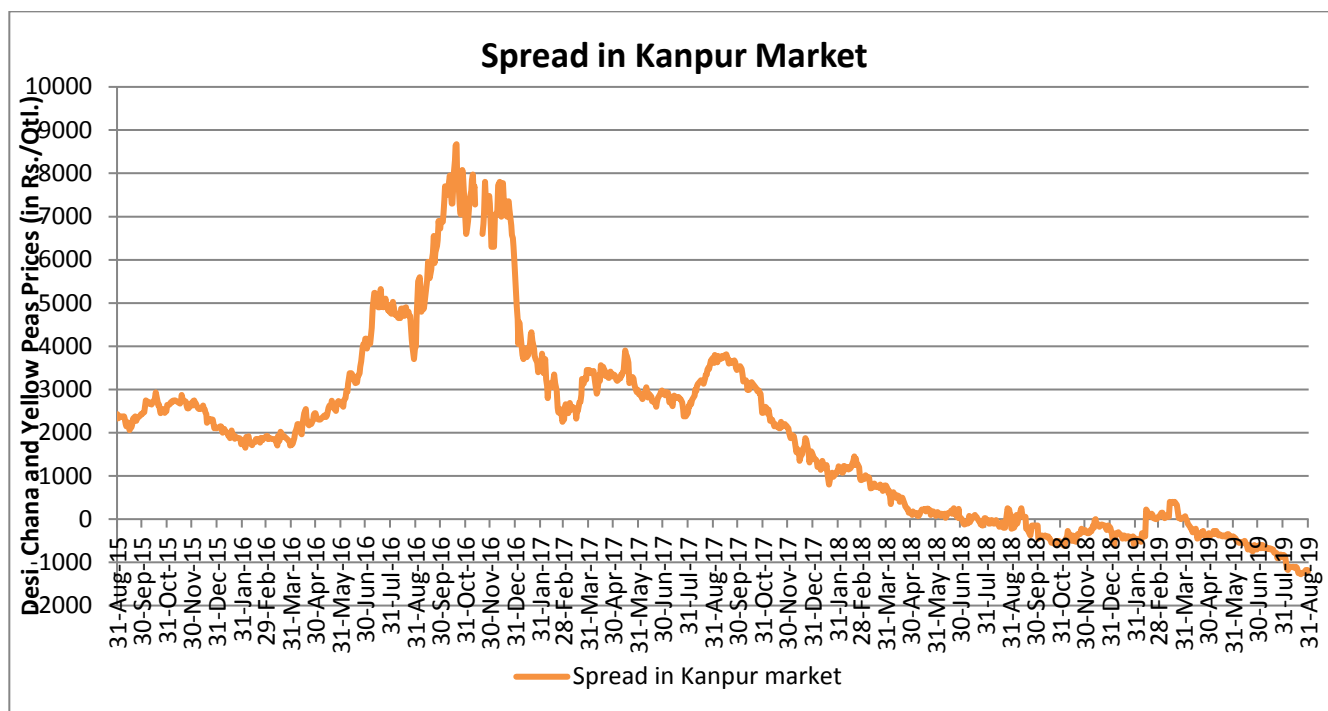

Market recap:

Pea market traded up due lower stock at port and restricted import Kanpur market continued to trade up from 5202 to 5350 per qtl due to increased holding by private trades. Overall, all India average increased by 1.35% to Rs5705per qtl in Aug. In Mumbai market, pea traded at Rs 5230, up from Rs 5105 in July. Pressure might be seen in Sep as chana trades bearish. Stake holders should retain stock as stock at port is dwindling now and demand for festive season is about to begin amid restricted import. Govt is not willing to allow import beyond a certain level.

Price Dynamics: Pea market is expected to trade steady to slightly firm in Sep due to:-

- Dwindling stock and stock holding by private trades
- Govt unwilling to import and increase import quota before Oct.
- Improved demand for pea dal despite higher price
- Stock started declining in consuming regions

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased from Rs1000 to Rs 1250. Spread is expected to remain in the negative zone in Sep too on relative movement in Chana prices. Overall outlook seems steady to slightly firm this month..

Seasonality Index depicts that pea prices are likely to notice slight improvement in Sept-2019.

Market Outlook For Sep: Steady to slightly firm movement is expected.

Masoor (Lentil/Masoor):

No major spike in lentil market is expected at this point of time due to weak demand and ample stock with Nafed and increasing import volume. Nafed still has 2.07 lakh MT old and new stock. So, supply side seems at comfortable level amid weak demand in cash market. Prices of other pulses too remain unsupportive for cash market. Prices in global market is lower, so import duty remains ineffective. Range bound movement is expected in lentil market in Sep. Lentil vessel is being quoted at Rs 4100-4150 per quintal and container is being quoted at Rs 4250-4300 per quintal. In Kanpur market it is being traded at Rs4300-4325 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100-150 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Cash market may trade in the range of Rs4150-4450 in Sept.

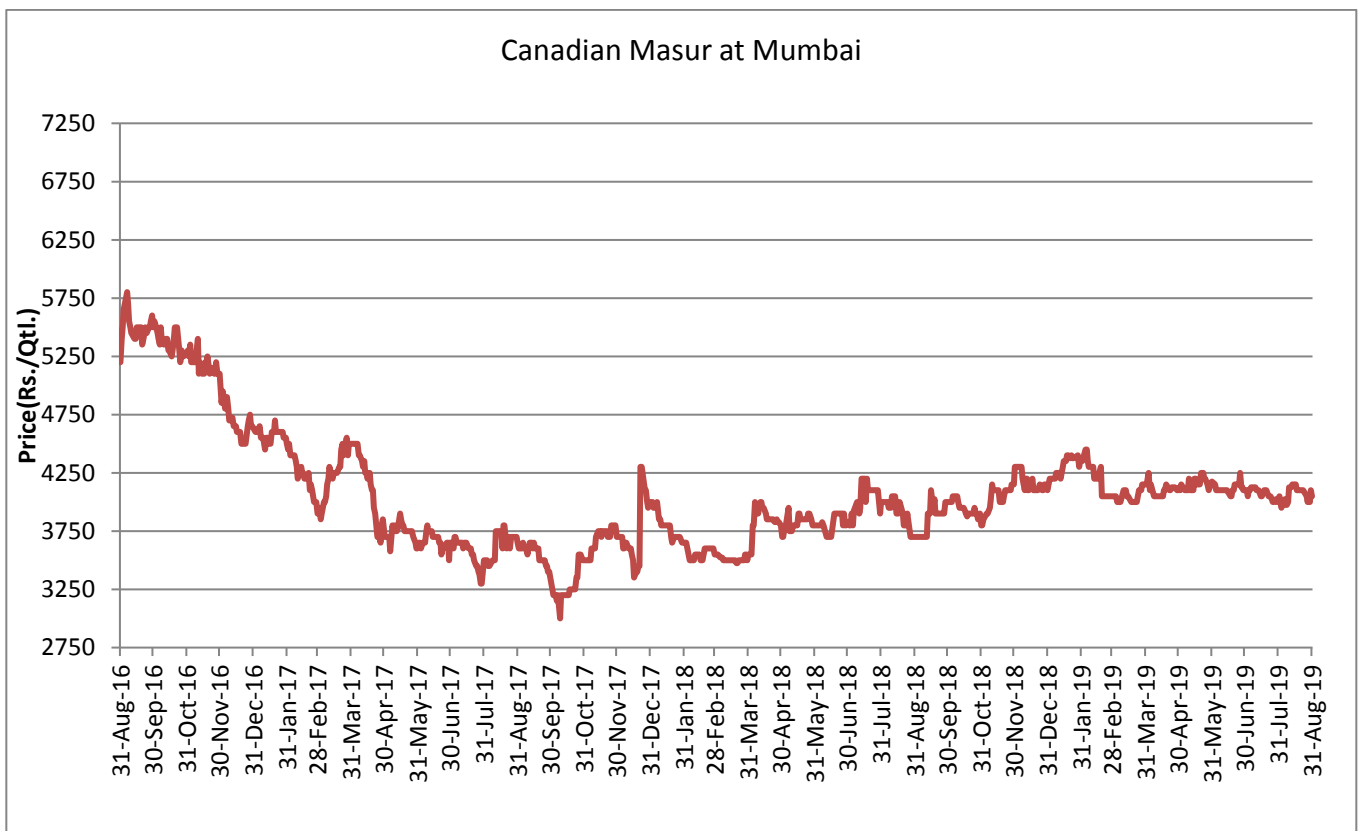

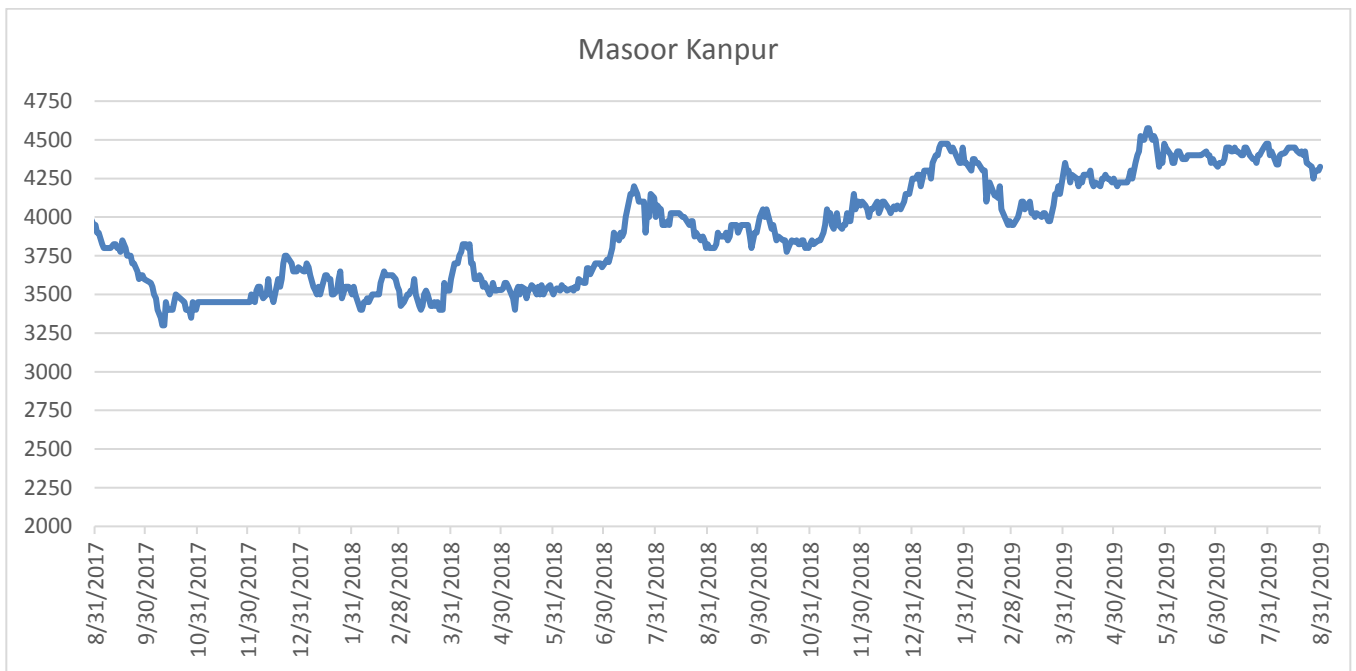

Price Dynamics:

In Aug-2019, average price in key market Kanpur was up slightly by 0.59% from Rs 4409 to Rs 4383 per qtl. MoM basis. Prices are likely to trade range bound in Sep too.

Range bound movement is expected due to:

- Weak demand from bulk buyers
- Nafed intention to start selling
- Higher import flow at comparatively lower price
- Weakness in other pulses market specially tur, chana and urad

Price Trend In Cash Market:

Seasonality Index depicts steady to slightly firm movement in Sep-2019.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Govt. started offloading tur stock with tur area crossing last year level due to good rainfall in growing regions during early August. Nafed has floated tenders for disposing 40259MT tur in Karnataka, Maharashtra and Gujarat. It may pressurize tur market by Rs100-200 from current level. As on 30th August-2019 Indian farmers had covered 44.36 lakh ha against 44.42 lakh ha last year. As sowing would continue till 15th Sep, area is expected to be around 45lakh ha, around 2 lakh ha higher than last year. Higher coverage area would compensate the recent loss by flooding and heavy rains. As weather has been favourable at this stage, production is expected to increase from normal expectation. Pressure might be seen on tur market to a certain extent. . In Gulbarga market tur is being traded at Rs 5850-5875. It may test Rs 5700-5750 level this week. If heavy rains occur again and affect standing crop, it may recover again. Next two weeks are very crucial for tur crop. Myanmar is offering new tur at \$690.695 per MT in forward deal.

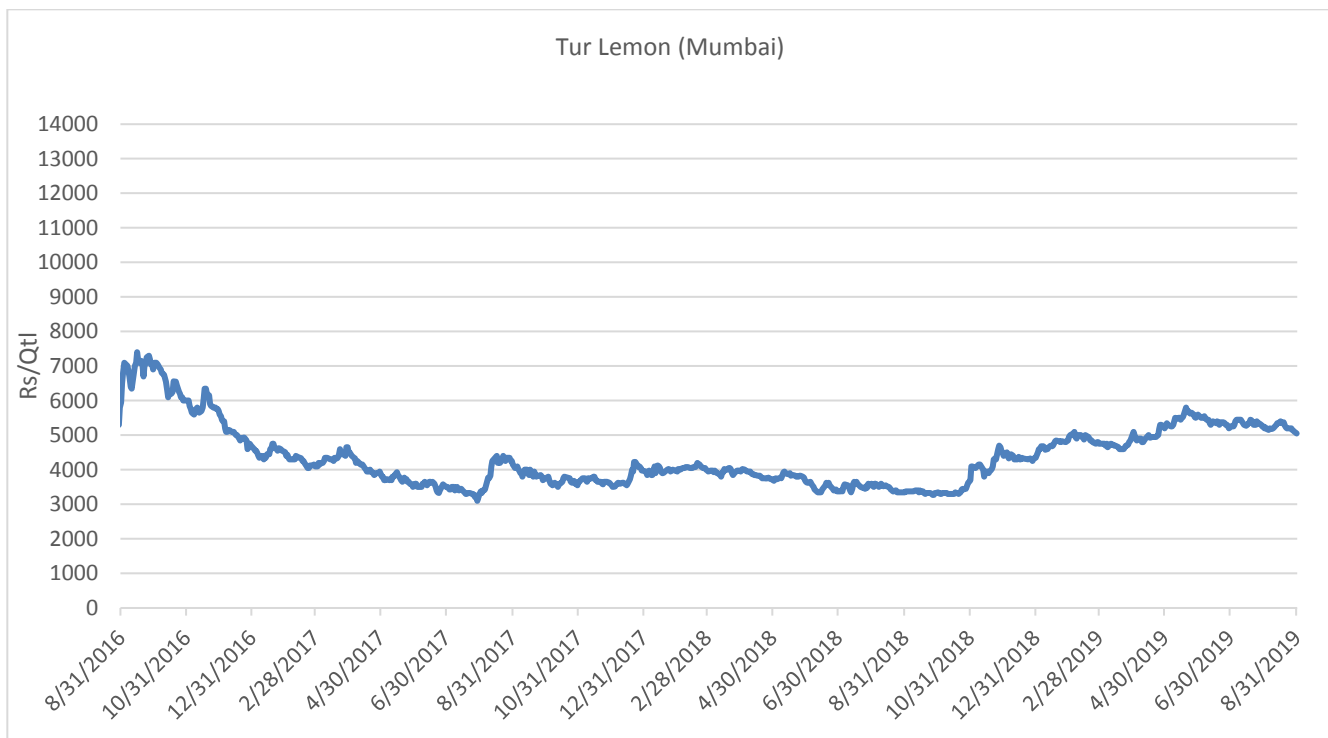

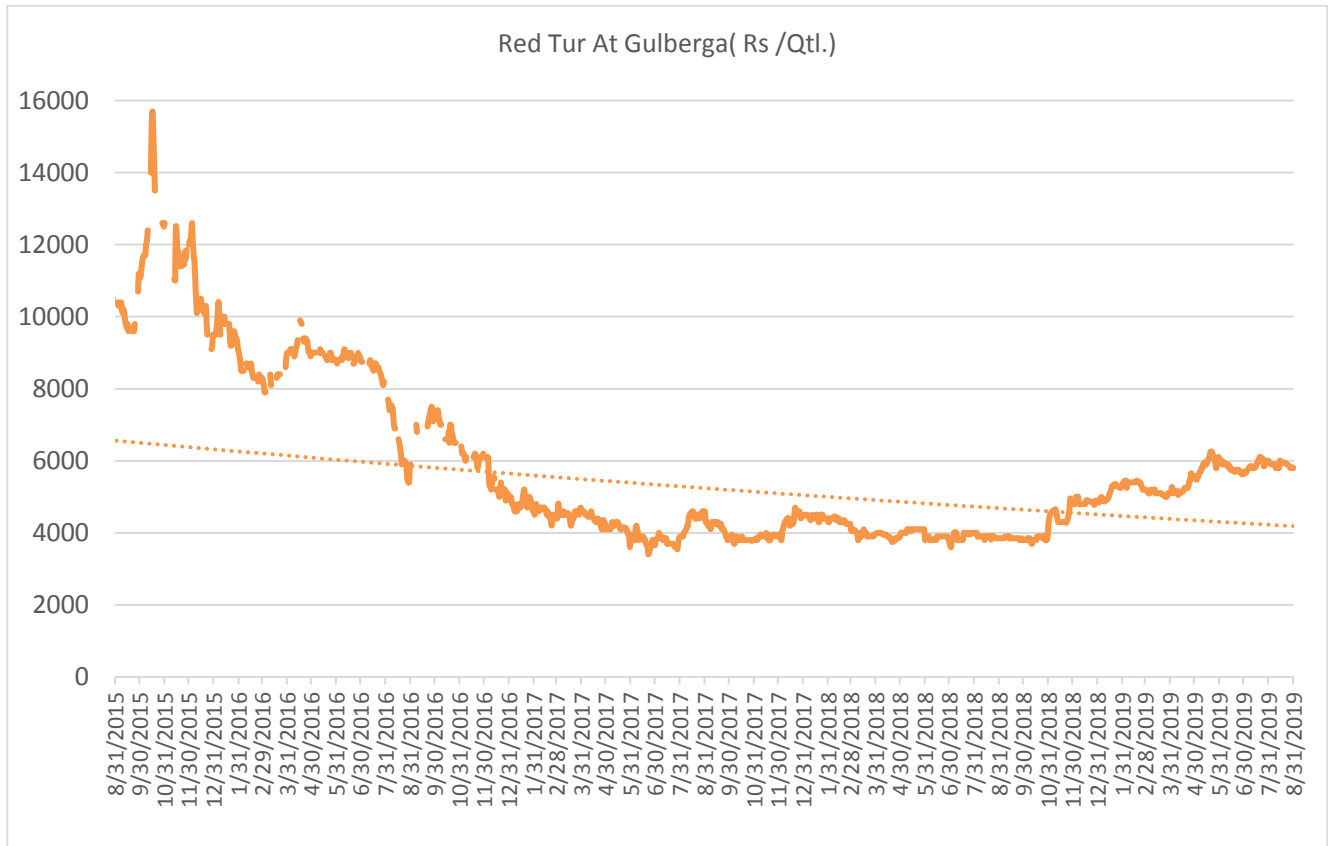

Market Recap:

Tur market is expected to stay steady to slightly weak on the back of lower demand at higher level. Availability would increase due to enhanced import quota from 2 to 4 lakh MT and increasing volume of import. Besides, 2 lakh MT would be supplied from buffer stock. However, arrival in markets has decreased. So, any spike in tur market is unlikely. New crop would hit Indian market in Dec and govt has enough stock to handle next three months demand.

Price Dynamics:

In Aug-2019, average price in Gulbarga market was same as July from 5882 to Rs 5881 per qtl. due to higher import quota, decision of selling from buffer stock and good monsoon rains in producing regions in Aug. Tur price in Sep is likely to move down slightly due to

- Higher import quota
- Sale from buffer stock
- Rains in sowing regions
- Weak demand from mills and
- Hope for improvement in sowing area due to higher MSP&
- Decreasing quotes in Myanmar

Seasonality Index-depicts steady to slightly weak movement.

Market Outlook for Sep:

Fundamental remains unsupportive for Tur cash market in the near term.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

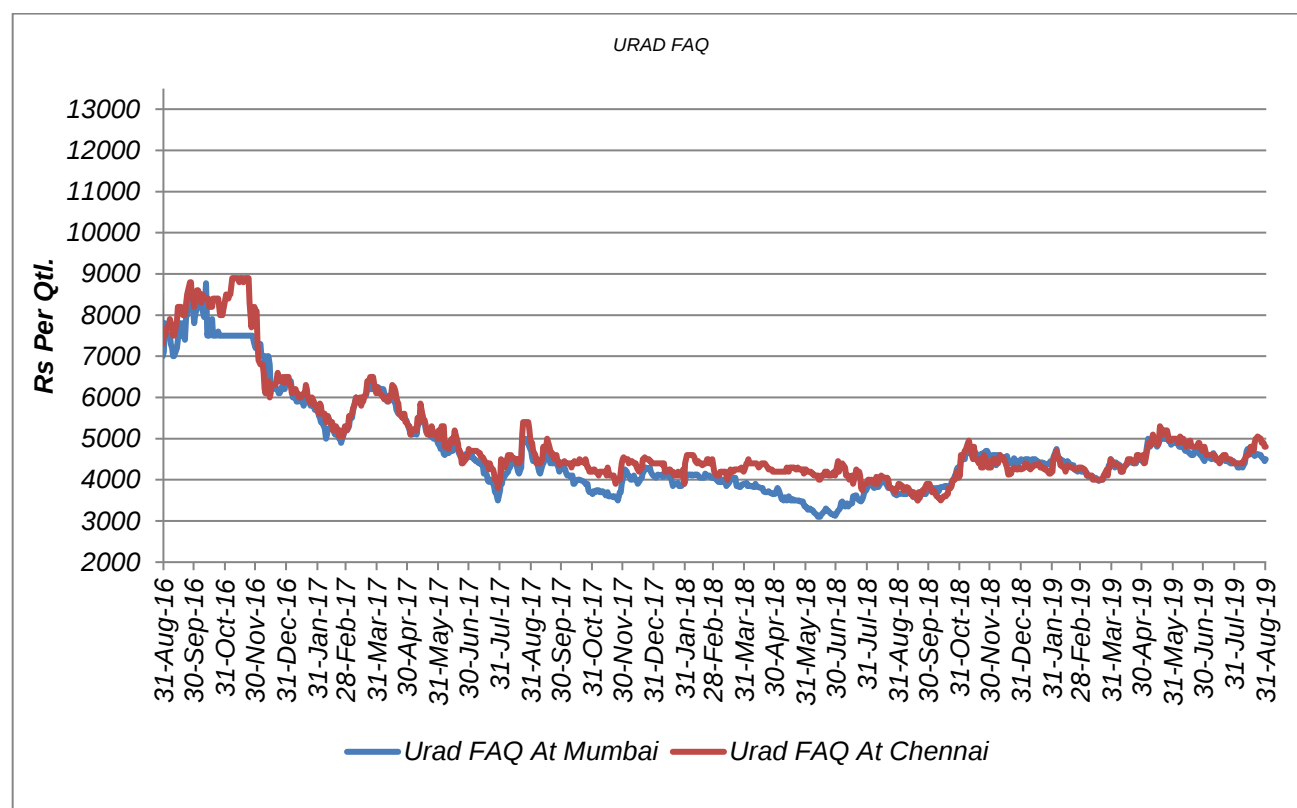

Market Recap:

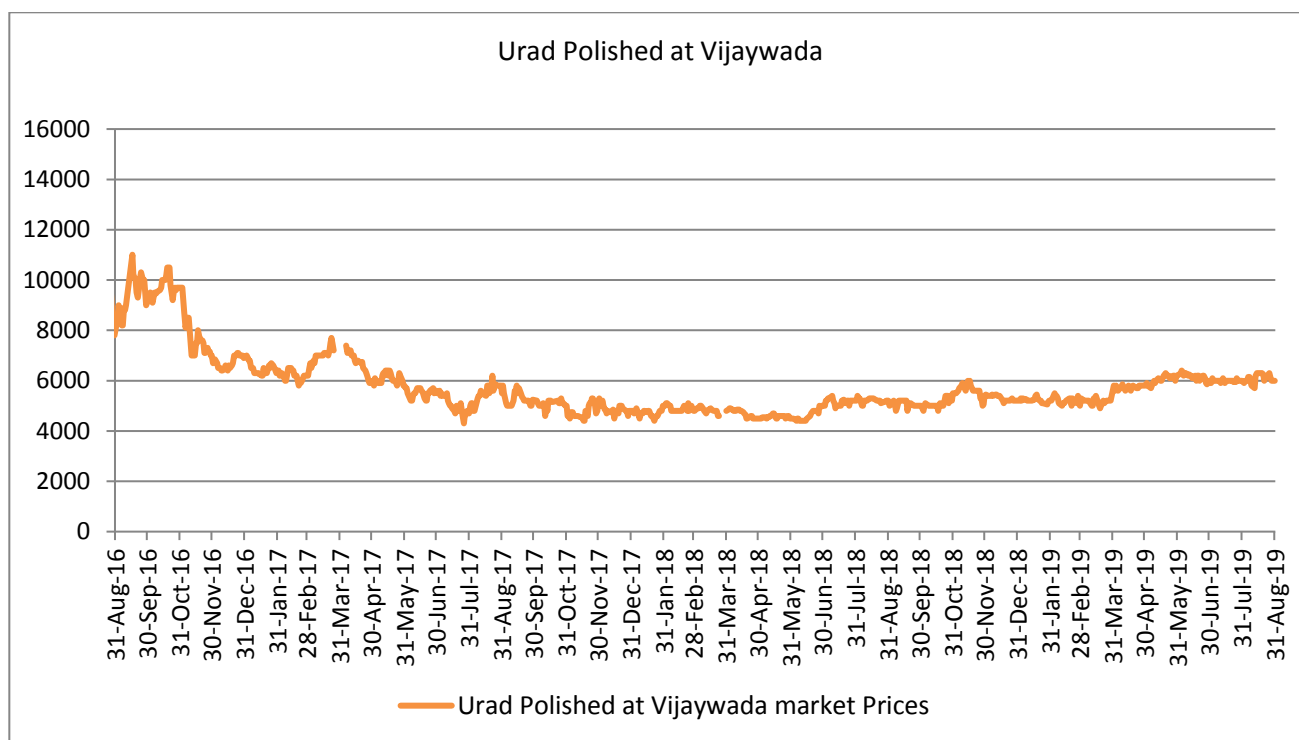

Market has adjusted the impact of flood loss and opening of weather in major growing region has pressurized cash urad market once again. Besides, private trades are releasing old stock. New crop is hardly one month away now. Import remains restricted so any major decline is unlikely. Govt would procure urad at Rs5700. So, Agriwatch expects market to stay steady to slightly weak this week. Besides, Nafed has started auction in MP, Raj and U.P. It would restrict market to move further up. Demand –supply side is expected to be slightly tight. As sowing is delayed by 20-25 days, new crop would be available one month late i.e in Oct end. It may keep market well supported at current level in the medium term. At present urad Mumbai is being traded at Rs 4500, in Chennai it is being traded at Rs 4800 per qtl. Cash market may decrease by Rs 100 more this week too. New Urad from Gujarat and Maharashtra would hit market from mid Sep. Urad from Chandausi line is expected in Nov. There is good sowing in Guna & Ashoknagar. Besides, crop is in excellent condition in Lalitpur, Tikamgarh line. So any spike in urad is unlikely at this point of time in normal condition..

Price Dynamics:

In Aug, average prices in key markets including Mumbai/was up by 0.31 % percent to 4512 per qtl. In Chennai it was up by 2.12% to 4679.. Prices may stay steady to slightly weak in Sept due to

- Weak demand & higher stock
- Improved acreage and good rainfall in growing region.
- Higher import volume
- New big crop expected from Sep end
- Higher stock with Nafed (3.01 lakh MT)
- Lower quotes in Myanmar

Seasonality Index depicts steady to slightly weak movement in the near to medium term.

Market Outlook for Sep : Prices are likely to trade weak .

Fundamental Analysis and Outlook For Moong:

Market Recap:

Moong crop in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and is expected to hit market by third week of Sep. Higher price during sowing season encouraged farmers to grow more moong this year. However, old moong price would rule higher until moong from Rajasthan hits the market. There is report of some loss in Kishanganj line. Overall, crop size is larger in Rajasthan. In Maharashtra moong crop in Akola and Khamgaon line is in very good condition. Summer crop in UP, Bihar, Jharkhand and MP was lower in size. So moong price increased from normal expected level. Now stockiest have resorted to release light quality stock at Rs 5500-5700. Mills are buying moong at this level. It is good time for traders and stockiest to start offloading moong now. In Jaipur market moong is being traded at Rs 6300-6375. It may move down further by Rs 200 from current level. It would not allow market to move up from current level. Nafed would continue to release stock in various states through auction. Besides millers have option to import 1.50 lakh MT moong. Demand is weak in cash market. So, any upward momentum is unlikely before commencement of procurement at MSP of Rs 7050.

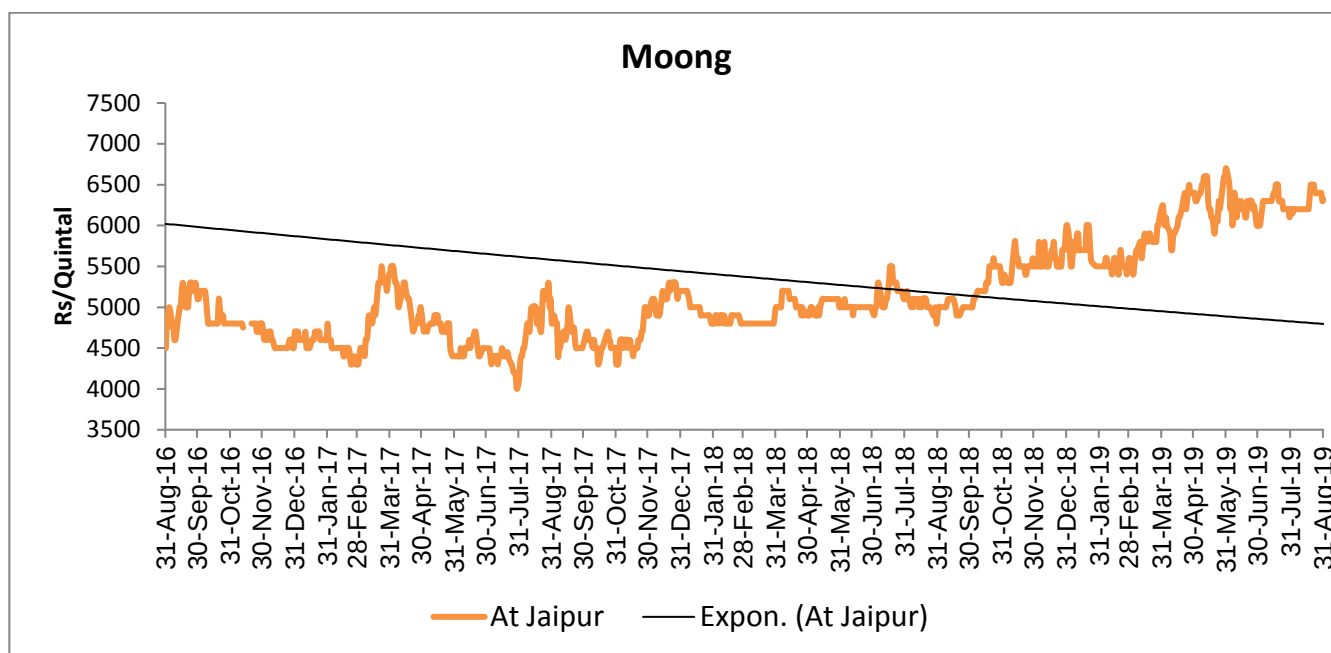

Price Dynamics:

Moong arrivals have started increasing and would continue to increase by the end of this month. It would cap uptrend in cash market. Average price declined by 2.2 % to 6300 in Jaipur market in Aug. Nafed still has 1.45 lakh MT stock to release and auction started in many states.

Market is expected to trade range bound in Sep due to:

- Commencement of new arrival
- Commencement of auction by Nafed
- Higher stock in central pool

- Increasing pace of arrival
- Release of stock from private hands
- Improved area coverage.

Seasonality Index depicts weak movement in the near term

Market Outlook for Sep: Steady to slightly weak movement is expected.

Pulses Wise Technical Outlook for Sep -2019: -
Chana:

Outlook –We expect prices to notice steady to slightly weak movement in Sep-2019. Market may trade down due to:

- Weak demand
- Higher old stock and commencement of selling by Nafed around 4000
- unstable demand for besan despite higher price for pea
- Sluggish buying by private trades
- Expected price band for Chana in Delhi is 4000 to 4400 levels in this month.

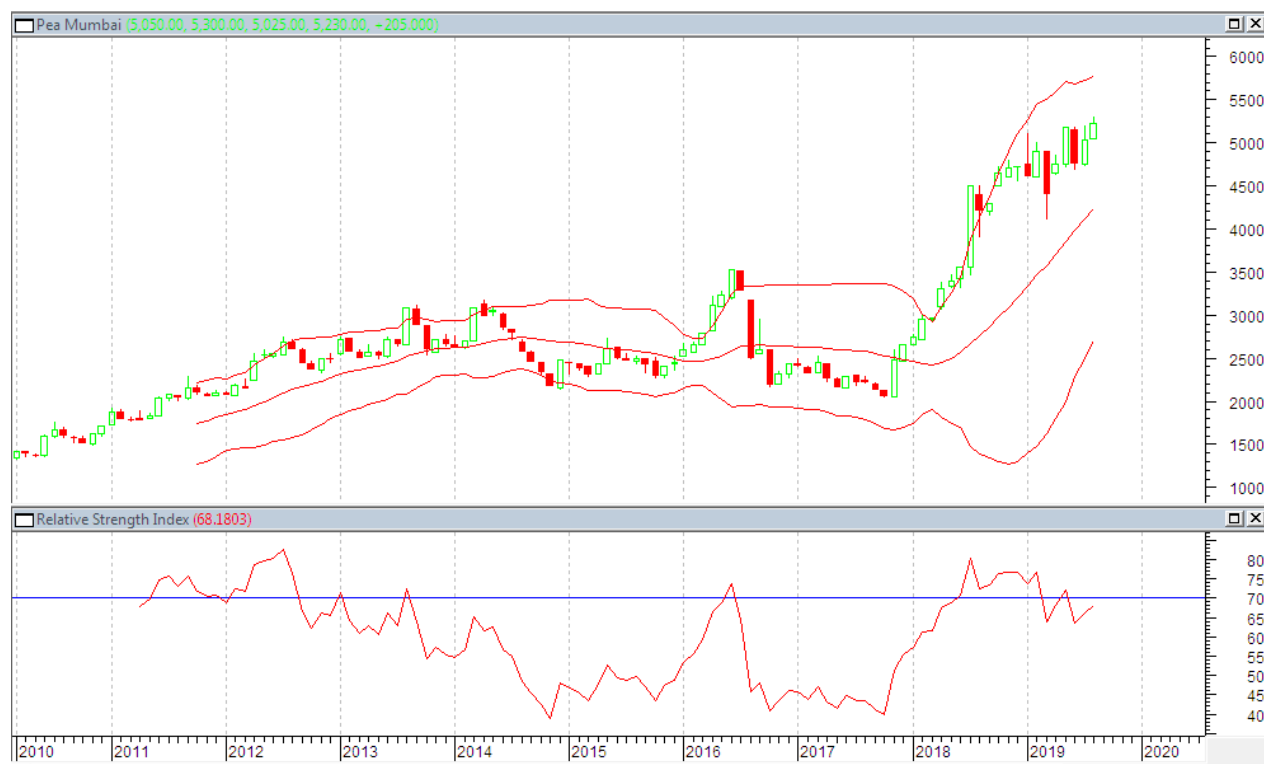

Trade Strategy: Sell on rise

Trade Recommendations: Go short around 4250 with the first target of 4100 and second target 4000 with stop loss at 4300 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3900	4000	4200	4350	4450

Pea:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slightly weak movement in this month taking clue from lower chana price and weak demand at higher level.

Technical analysis:

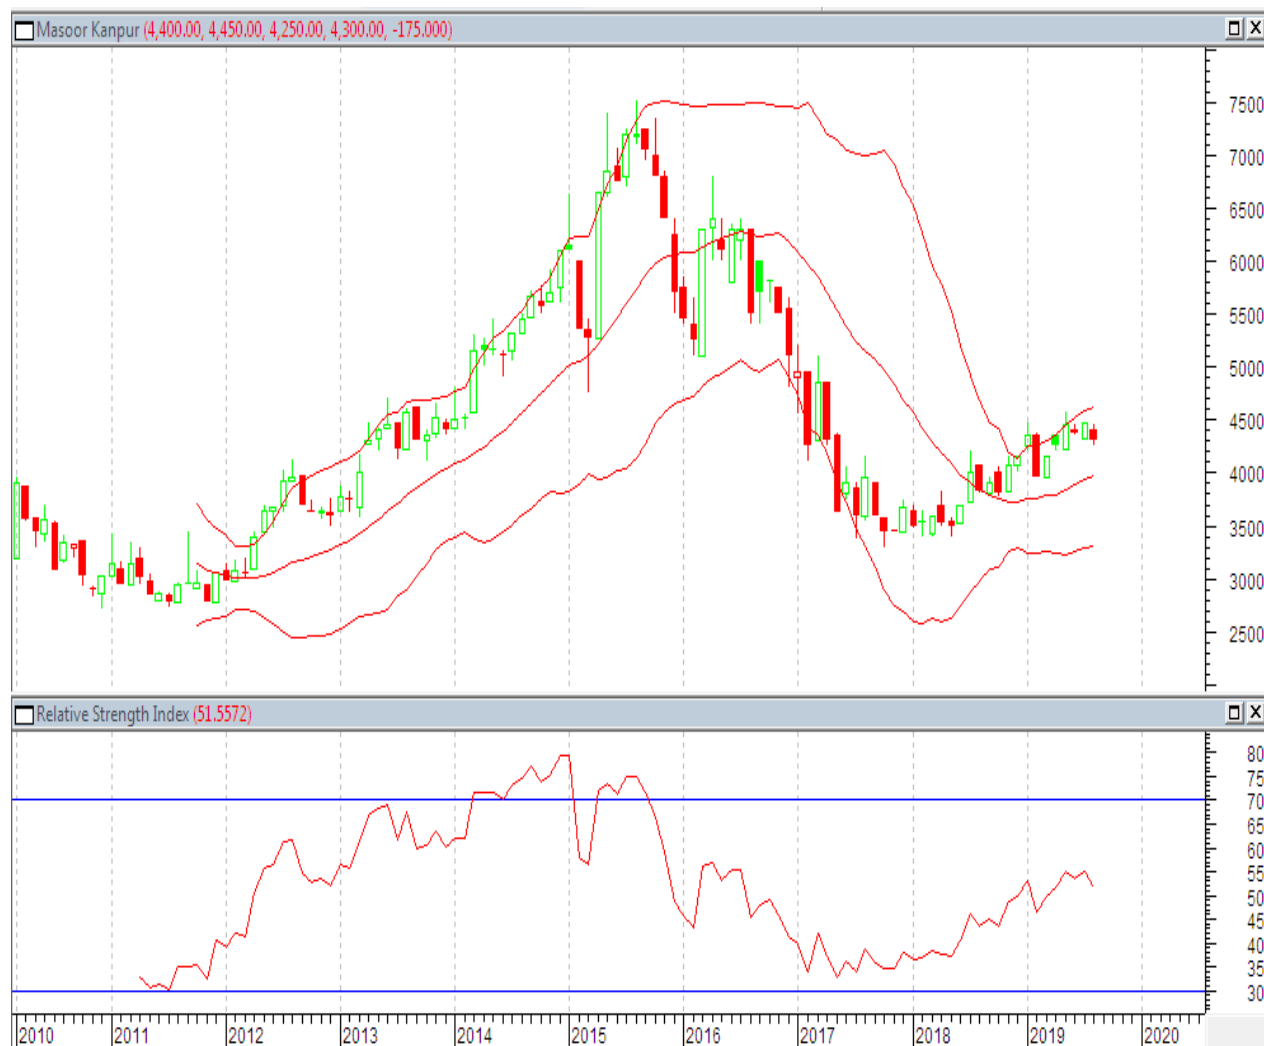

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 5000- 5400 in this month.

Strategy: Buy on dip

Trade Recommendations: Go long around 5150 with the first target of 5250 and second target 5350 with stop loss at 5100 level

Support & Resistance				
S2	S1	PCP	R1	R2
5000	5100	5230	5400	5500

Masur :
Desi Masur (at Kanpur) Spot Market Monthly Chart:

Outlook –Steady to weak movement is likely to be noticed this month.

Technical Analysis:

- Chart depicts steady to weak movement in the market.
- RSI oscillator is moving down in neutral region.
- Expected price range is 4200-4600

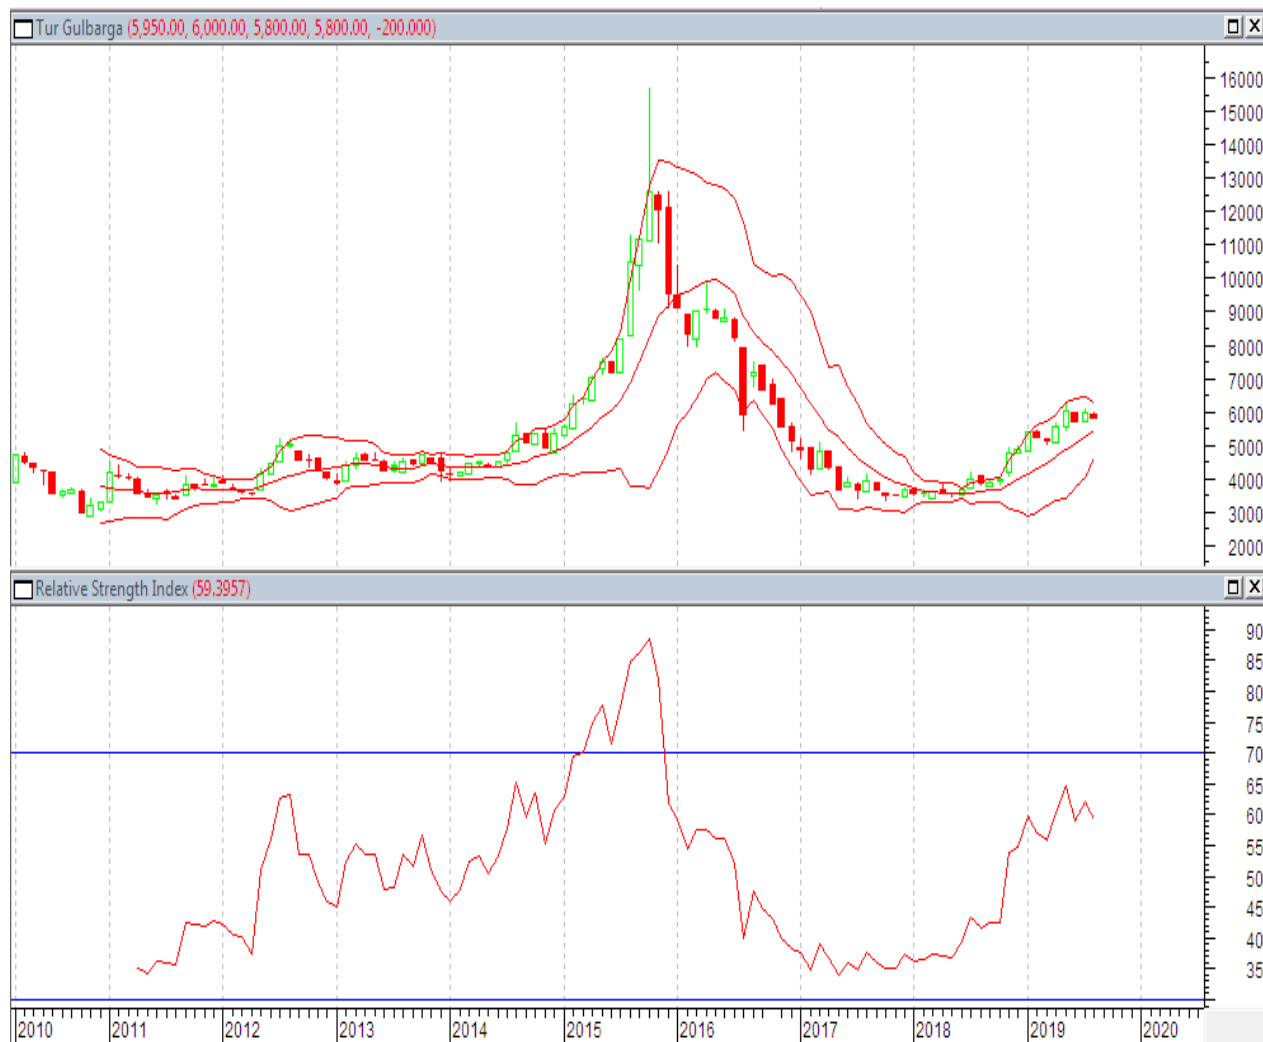

Strategy: Buy on dip

Trade Recommendations: Buy around 4200 with the first target of 4400 and second target 4550 with stop loss at 4150 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4250	4300	4550	4650

Tur:

Tur (at Gulbarga-Kalaburagi) Spot Market Monthly Chart:

Outlook - We expect prices to show weak movement..

Technical Analysis:

- Candlestick chart denotes weak movement in the market.
- Oscillator RSI is moving down in neutral region.
- Expected price range is 5600-6100

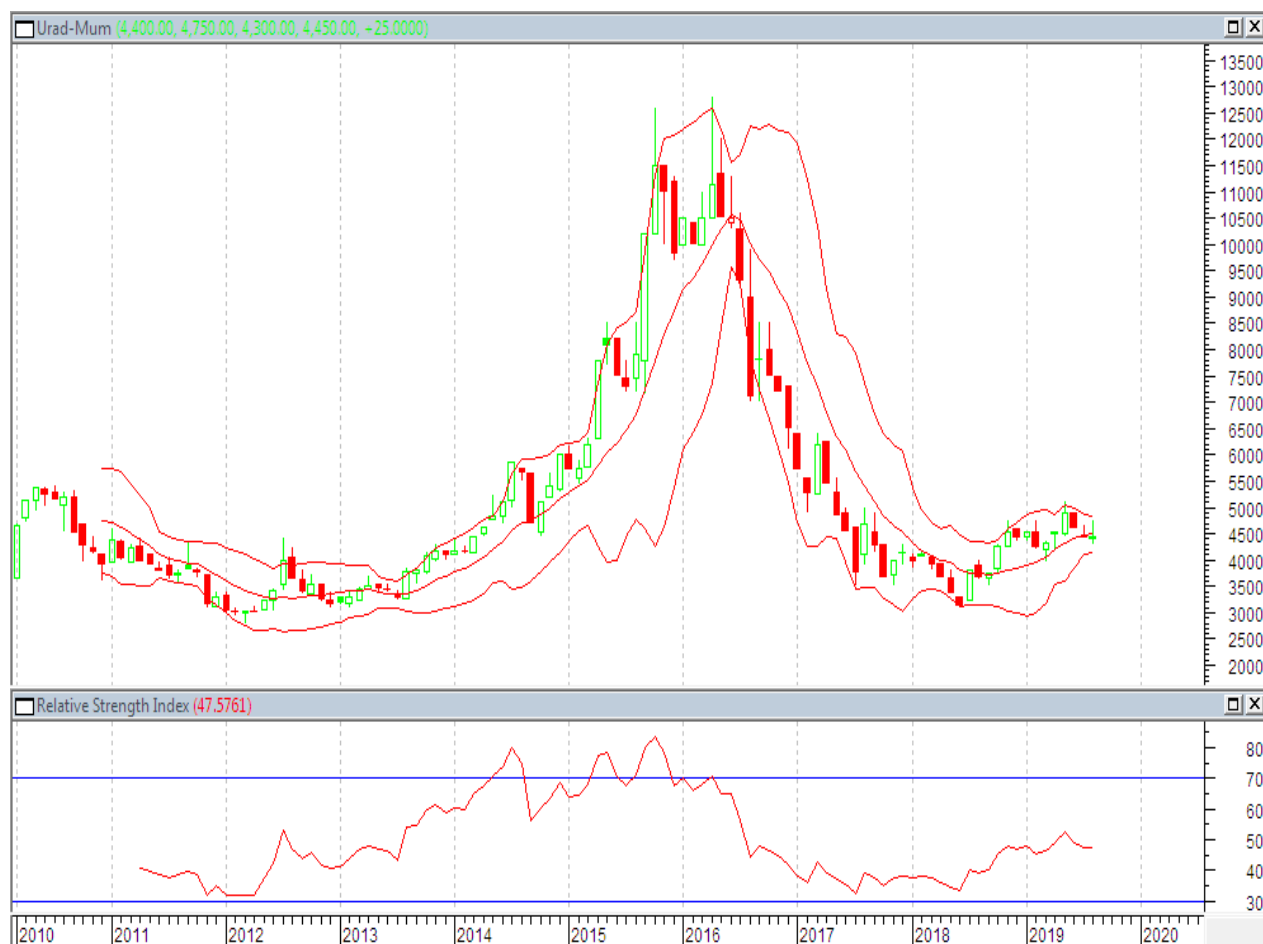

Strategy: Buy on dip

- **Trade Recommendations:** -Go long around 5650 with the first target of 5850 and second target 5950 with stop loss at 5600 level.
-
