- Seasonality Index
- Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
- Pulses Snapshot
- Sowing Progress
- India
- Australia
- Canada
- US

Domestic Market Fundamentals:

- **India has received 968.3 mm of actual rainfall against 880.6 mm of normal rainfall during 01st June to 30th Sep-2019.** During the same period overall, rainfall was 10% higher than normal. However, distribution of rainfall has been uneven despite higher rains. As monsoon is expected to withdraw from mid Oct. rabi sowing might be delayed by 15 days this year. Rabi season starts from Oct. Heavy rains & flooding has affected matured crops in Rajasthan, Madhya Pradesh and Maharashtra, The kharif crop size may decline by 10% from normal expectation. However, prospects for rabi crop have improved too.
- **Indian farmers have covered 135.01 lakh ha area under pulses as on 04th, Oct-2019 against 137.32 lakh ha last year till date.** It is 1.69 % lower than last year. Normal area under kharif pulses is 119.89 lakh ha. Farmers have covered 45.94 lakh ha under tur, 39.19 lakh ha under urad bean, 31.29 lakh ha under moong, 0.97 lakh ha under kulthi and 17.61 lakh ha under other pulses. It is 0.08 % up for tur, 1.53 % down for urad, 8.94 % down for moong. It is 10.26 % up for kulthi and 7.54 % up for other pulses from last year.
- **Cash chana market has gained some ground for improvement after touching low of 3900-4000.** Restricted sale by Nafed and it's intention to accept bid around 4400 has helped market to recover in the first week of Oct. Besides, festive demand for dal, stockiest's unwillingness to sell below 4500 in central and north India gave much needed support to cash chana market. Demand for dal is likely to continue till Nov. Besides, millers and seed industry would continue to buy. It would drag market up by Rs 200 from Current level. This year area under chana is likely to increase as water availability is higher due to good rainfall. Import volume is increasing from LDC (least developed countries), however, it would not affect overall supply side as volume remains at lower level. Import from major importing countries like Australia, Ukraine would be limited due to higher import duty. Govt. has ample stock of chana and it would not allow market to jump. In Oct. Chana market should rule at 4400-4650 in normal condition. In Delhi market chana is being traded at Rs 4400-4500. It may move up to Rs 4650-4700.
- **Moong cash market is expected to rule steady to slightly weak despite kharif crop loss of around 1 lakh ha in Rajasthan, M.P, Mah & Gujarat.** However, majority of the loss is expected to be compensated by higher yield in non-flood affected area. Arrival from Tamil Nadu, Maharashtra, Rajasthan, Maharashtra has commenced, and pressure might be seen on moong market with opening of weather. As quality of moong has suffered considerably in rain affected area, it would restrict uptrend in the medium term. However, shortage of quality moong might be felt at the end of the year and it would continue to rule at higher price. Procurement has commenced in Tamil Nadu, Karnataka, Maharashtra and likely to start soon in Rajasthan & MP. It may help market to rule around current level. In Jaipur market moong chamki is being traded at Rs 5800. It may decrease to 5600 on arrival pressure and move up again.
- **Tur stock from central pool is likely to be released in states like Karnataka, Maharashtra, AP and MP as crop is hardly three months away from now.** Import is likely to continue and total import in Oct may cross 60-75 thousand MT. Nafed still has 7.5 lakh MT. If we include private stock too, it would be around 3 lakh MT. With import till Oct, total availability would be around 10 to 11 lakh MT and it is sufficient to cater the need for next three months. So, supply-demand side is expected to be balanced in coming weeks. As private trade is waiting for higher price, release by them would be limited in Oct. It may support tur price to some extent at current level. As crop size is lower this year, cash market may continue to trade in the range of Rs 5400 to 6000 in Gulberga market. Currently it is being traded at Rs 5550-5600. Demand of dal too is expected to improve due to festive season. Lemon tur quotes in Myanmar is up due to lower availability of old crop.
- **Cash urad market is likely to trade firm due to crop and quality loss in MP, Rajasthan, Maharashtra and Gujarat.** Total area loss is around 1.25 lakh Ha while 30 to 40% quality loss is expected in MP and Raj. It may reduce the total crop size by 1.5 lakh MT. Production of urad was expected at 23.33 lakh MT. Now total crop size may come down to 22 lakh MT including rabi crop too. Besides, procurement on higher MSP lower availability of old crop and restricted import at 1.5 lakh MT would remain supportive for cash urad market. In Chennai market urad is being traded at Rs 5550 and in Mumbai at Rs 5300-5350. It may move up to MSP level soon. Arrival is likely to increase with opening of weather. Lower availability of quality crop, may encourage stockiest to retain stock.
- **Masur cash market may move up due to seed demand, lower availability of quality stock, proposed MSP at Rs 4800 for next season and lower than expected yield in Canada.** As import flow is on, upside movement would be limited. Currently, imported masur is being offered at Rs 4000-4100 while in Kanpur it is being traded at Rs 4300-4400. It may move up to Rs 4600-4650 in coming weeks. Once demand from Nepal and B'desh improves for Indian lentils, price would move up. Quotes in Canada too is expected as crop size is lower than normal expectation.

International Market Update:

- **Lentils production in Canada is expected to increase from 20.92(2018-19) to 25.20 lakh MT in 2019-20** due to higher yield. Yield has increased from 1.40 to 1.68 tonne per ha this year. Despite higher production, total supply is expected to increase slightly from 30 to 31.94 lakh MT due to higher domestic usage. It would increase from 3.14 to 5.94 lakh MT this year. Carry out stock would increase slightly from 6.54 to 7 lakh MT in 2019-20. However, import and export is expected to decrease slightly this year. Average price is expected to rule \$375 to 405 per MT in 2019-20.
- **Chickpea production in Canada is expected to decrease this year from 3.11 to 2.63 lakh MT** due to lower area coverage. Farmers in Canada had covered 1.59 lakh Ha in 2019-20 against 1.79 lakh Ha last year. Despite lower production total supply would increase slightly, from 3.71 to 3.81 lakh MT in 2019-20. Canada consumes 1.26 lakh MT locally. Carryout is expected to stay steady at 1.05 lakh MT. Average price of chickpea may rule at around \$ 425 to 455 per MT.
- **Dry peas production in Canada is expected to increase by 30% from last year to 46.73 lakh MT in 2019-20.** It would be the second highest production. The rise in production is mainly attributed to higher area and yield this year. Main growing states like Saskatchewan and Alberta contribute 51 & 44% in total production in Canada. Manitoba contributes 3% of total production. Despite 30% increase in production, total supply is expected to increase only by 18% due to lower carryin stock. Export is expected to increase to 34 lakh MT. Canada had produced 35.81 lakh MT dry peas in 2018-19. Yield is expected to increase from 2.5 to 2.71 tonne per ha. Canada had exported 32.50 lakh MT last year. Carryout stock is expected to increase from 3.88 to 6 lakh MT in 2019-20. Average price would continue to hover in the range of \$245 to 275 per MT in 2019-20.
- **Chickpeas production In US is expected to decrease sharply to 3.3 lakh MT in 2019-20 as area coverage** declined to 4.5 lakh acres despite higher yield realization this year in the initial stages of harvesting. Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.
- **Chickpea area in Australia is expected to increase 22.11% from 303(2018-29) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79 % to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chick- peas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick- peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down by 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066 MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher Level in relation to prospective demand. So, Buyers are in no hurry to buy.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm.

Pulses Supply & Demand:

Note: Agriwatch 2nd Adv Estimate For 2019-20 for Urad ,Moong & Tur & final estimate for Chana and Masur for MY 2019-20.

Urad: Urad production is likely to decrease by 5.35 % from 24.58 to 23.33 lakh tonne in new season (2019-20). Import is expected to decrease by 1.5 lakh tonne to 1.5 lakh tonne due to quantitative restriction. Total supply would decrease slightly from 36.55 to 33.58 lakh tonne in 2019-20. Export would decrease from 0.3 to 0.2 lakh tonne due to disparity. Consumption would increase from 27.5 to 28 lakh tonne in 2019-20. So, carryout would decrease from 8.75 to 5.38 lakh tonne. As carryout has declined considerably, supply side is expected to be tight this year. So, prices are likely to rule at higher level.

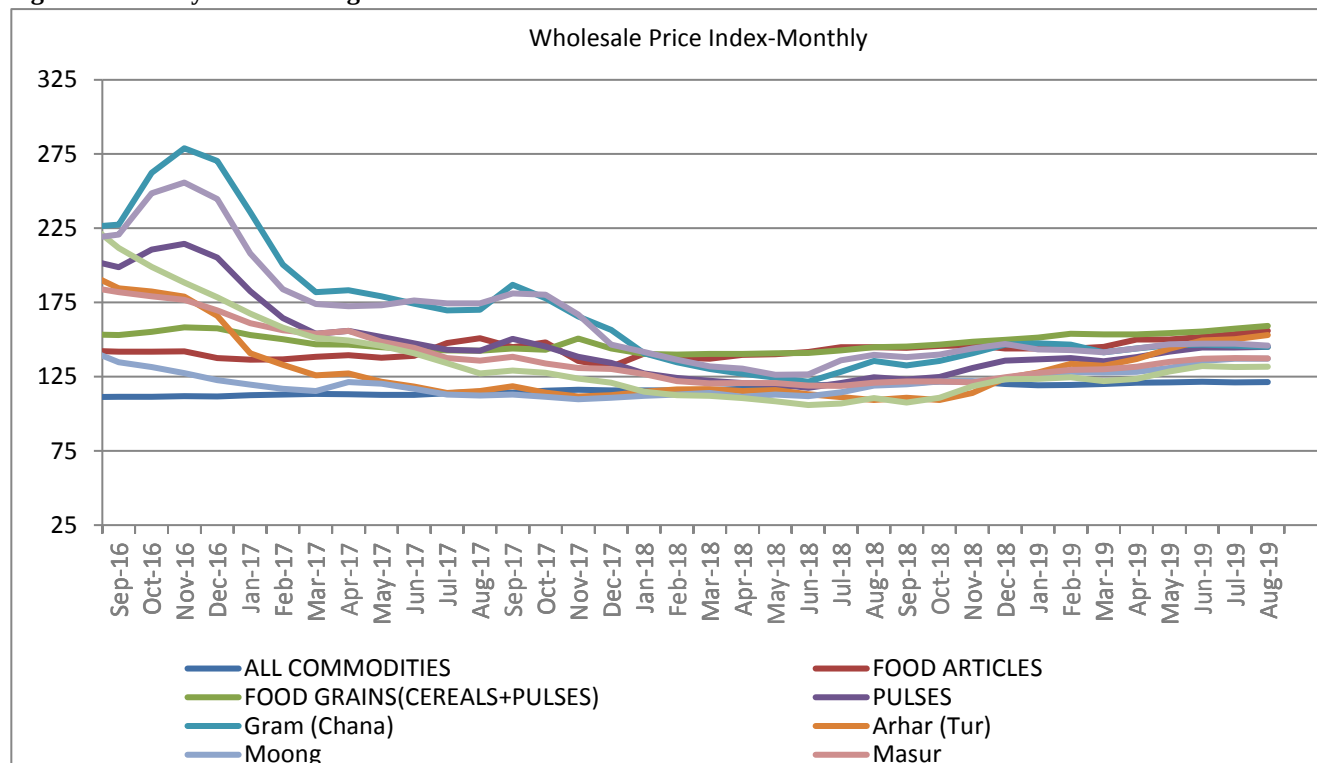

Moong: Moong production is likely to decrease by 0.98 % from 20.26 to 20.08 lakh tonne in 2019-20. Import is expected to stay steady at 1.5 lakh MT in new season too. Total supply is expected to decrease from 29.02 to 27.10 lakh tonne in 2019-20. As there is no demand from overseas market due to disparity, export is likely to decrease from 1 to 0.2 lakh tonne in the new season. Consumption would increase from 22.5 to 23.0 lakh tonne. Total usage is expected to touch 23.2 lakh tonne. Increase in consumption would pull carryout from 5.52 to 3.90 lakh tonne. So, any major decline in moong price is unlikely in the new season.

Tur: Tur production is likely to increase by 2.16 % from 35.21 to 35.99 lakh tonne, in the new season (2019-20). Import is expected to increase by 10.29% to 4.5 lakh tonne due to eased restriction on quantity. Total supply would decrease slightly from 47.02 to 46.19 lakh tonne due to crop loss in new season. Export may stay steady at 0.5 lakh tonne due to lower availability. Consumption may increase from 41. to 42 lakh tonne in 2019-20. With export, total consumption has been pegged at 42.5 lakh tonne. Due to lower production and import, carry out would decrease from 5.07 to 3.69 lakh tonne for next year. Market is expected to find balance and no major spike is expected at this point of time.

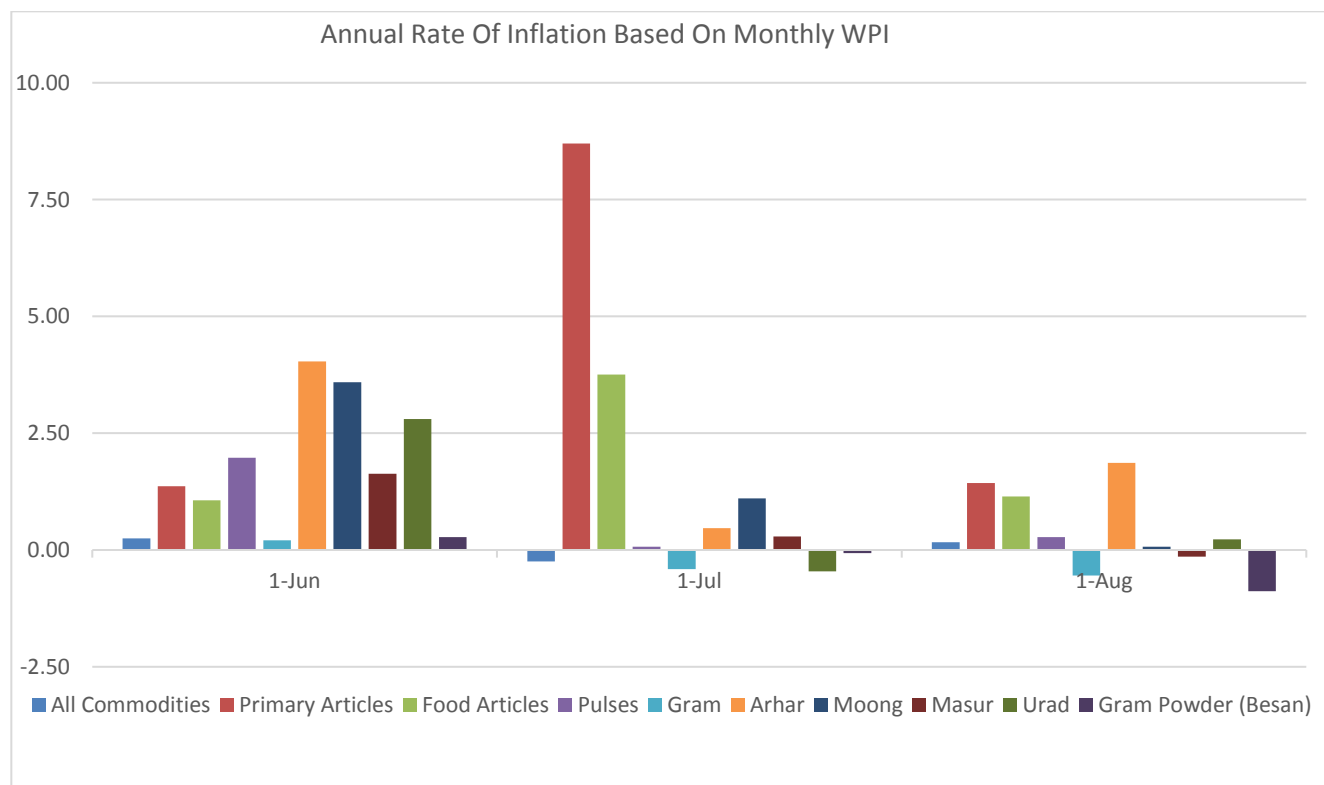

Chana: Chana production is likely to decline from 98.75 to 87.78 lakh tonne for MY 2019-20. It may improve further if light showers of rains continue in late planting areas. As new year started with hefty carry in of 20.01 lakh tonne, starting from March, supply side seems to be at ease despite lower production size of 87.78 lakh tonne. Total availability would decrease slightly from 114.01 to 111.79 lakh tonne including 4 lakh tonne expected import. Consumption with import would increase from 94 to 94.5 lakh tonne.

Masur: MY 2019-20 started with 2.44 lakh tonne carry out amid 11.5 lakh tonne production expectation for the new year. Import is likely to increase as crop size is expected to be lower for CY 2019-20 and touch 6.5 lakh tonne in new season. Lower production would drag down total availability at 20.44 lakh tonne. Export would decrease slightly from 0.15 to 0.1 lakh tonne this year. Consumption has been pegged almost same, at 18.6 tonne in the new season. If prices continue to move up, govt has option to decrease import duty, currently applicable at 40%.

Agri Commodity Indices –Aug -2019:

Pulses WPI: Pulses WPI increased by 4 point from 144.7 in July to 145.1 in Aug-2019

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

This year area under chana is likely to increase as water availability is higher and farmers in Rajasthan MP & Gujarat would prefer to sow chana in barren land too. Despite some improvement seen in futures, chana market is unlikely to sustain at higher level. Demand from bulk users has improved taking clue from firm futures. However, once Nafed starts selling chana in bulk volume it would come down again. Market is aware of ample availability of chana in central pool as well as in private hands. After setting aside reserve stock of 1278453 MT, there is an availability of 1132136MT with Nafed for sale. In Delhi market chana is being traded at Rs 4350-4400. If demand improves and Nafed decides not to sell stock, it may move to 4500-4600 maximum. Liquidity crunch too is restricting normal trade. So, it is better to sell Chana at every hike of Rs75-100. Stockiest have started releasing old stock amid supply from central pool is bound to increase in coming weeks. Chana may dip further by Rs 100 from current level. Stake holders should buy after downward correction.

All India average price for Chana increased by 2.13 percent from Rs 4307 to 4390 per qtl. in Oct-2019. Australian Chana (imported) too price increased by 1.38 percent from Rs 4300 to Rs 4375 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics: Prices are likely to stay steady to slightly firm in Oct due to:

- Restricted selling by Nafed (Nafed would auction chana twice in a week)
- Improved demand from bulk users/mills and seed industry.
- Decreasing stock in central pool/ and in private/farmers hands
- Firm futures and
- Govt's strategy to regulate market by restriction sale and import
- Increased holding by private trades sensing improvement in price in coming weeks.

Seasonality Index: hints firm movement for spot market in Oct-2019.

Chana Future Market Analysis:

Technical Commentary:

- Increasing price & OI hint firm market.
- RSI is moving up in neutral region, hints caution to bears.
- Prices closed above 9 and 18 days EMAs

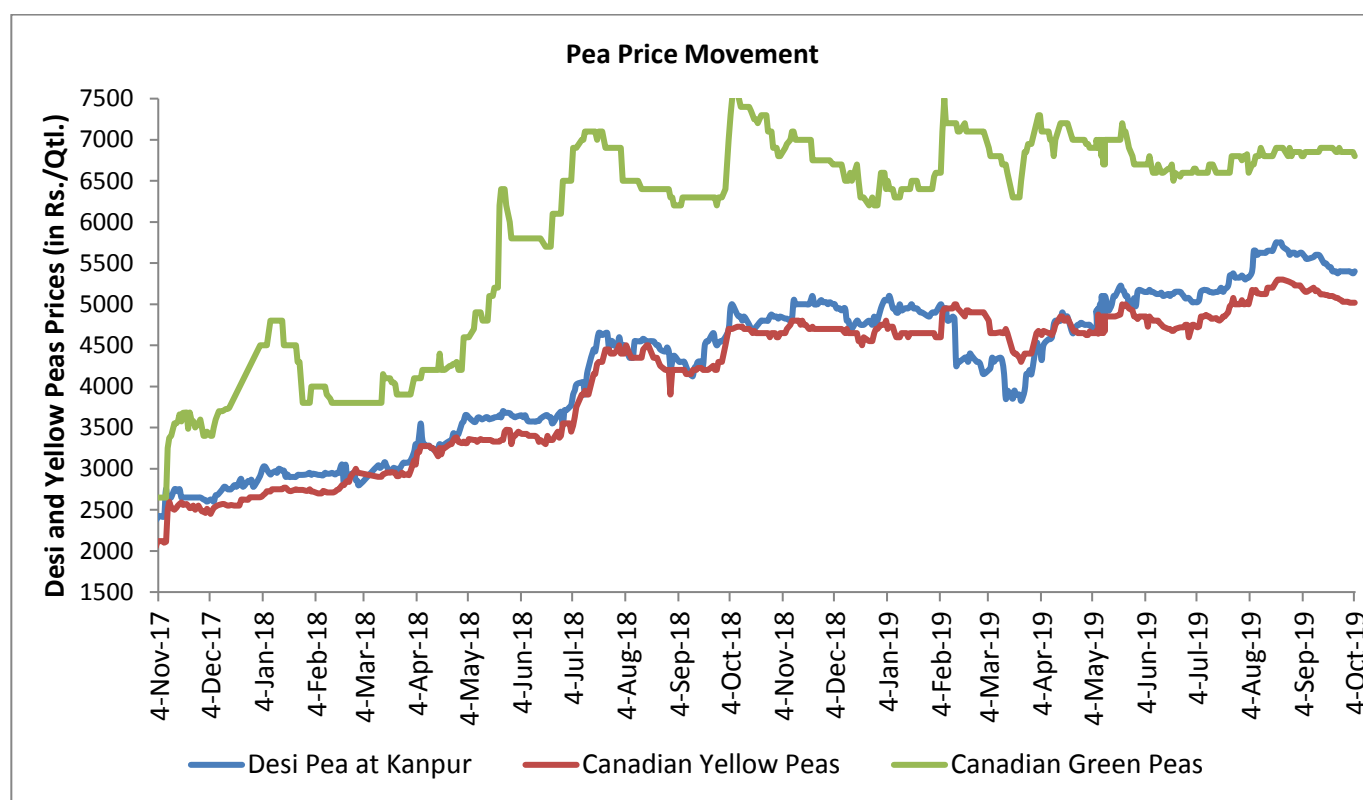

Strategy: Buy above

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Nov	4245	4200	4337	4515	4635
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Nov	Buy above	4246	4400	4550	4200

Field Pea (Matar/Dry Pea): Fundamental Analysis and Outlook:

Illegal import from B'desh and Nepal has eased availability of peas in domestic market and pressure is likely to continue in coming weeks too. Despite higher prevailing prices in domestic market, the farm ministry is unwilling to relax quantitative restriction on imports of yellow peas as pulses availability in domestic market is ample and prices of other pulses are ruling lower. Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT. Earlier in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now, food minister has said that availability of pulses is ample at 30.7 MMT for 2019-20. It hints that peas import quantity is unlikely to be increased further even in third and fourth quarters. If prices continue move up, govt may consider to relax quota norm in last quarter.

Pea in Mumbai market is being traded down at Rs. 5030-35, while in Kanpur market it is being traded at Rs 5400 per qtl. As chana price has started increasing, pea too might recover a slightly. Arrival in local mandis has decreased as supply side is at comfortable level due to illegal flow of peas. It would keep market price under check. Stake holders should buy after downward correction. Restriction on pea import at 1.5 lakh tonnes till March-2020 and lower availability of imported stock may support pea market once again from mid Oct as demand for seed would increase. If chana continues to trade firm, pea price might recover too. Under emerging scenario steady to slightly weak trend may prevail this week.

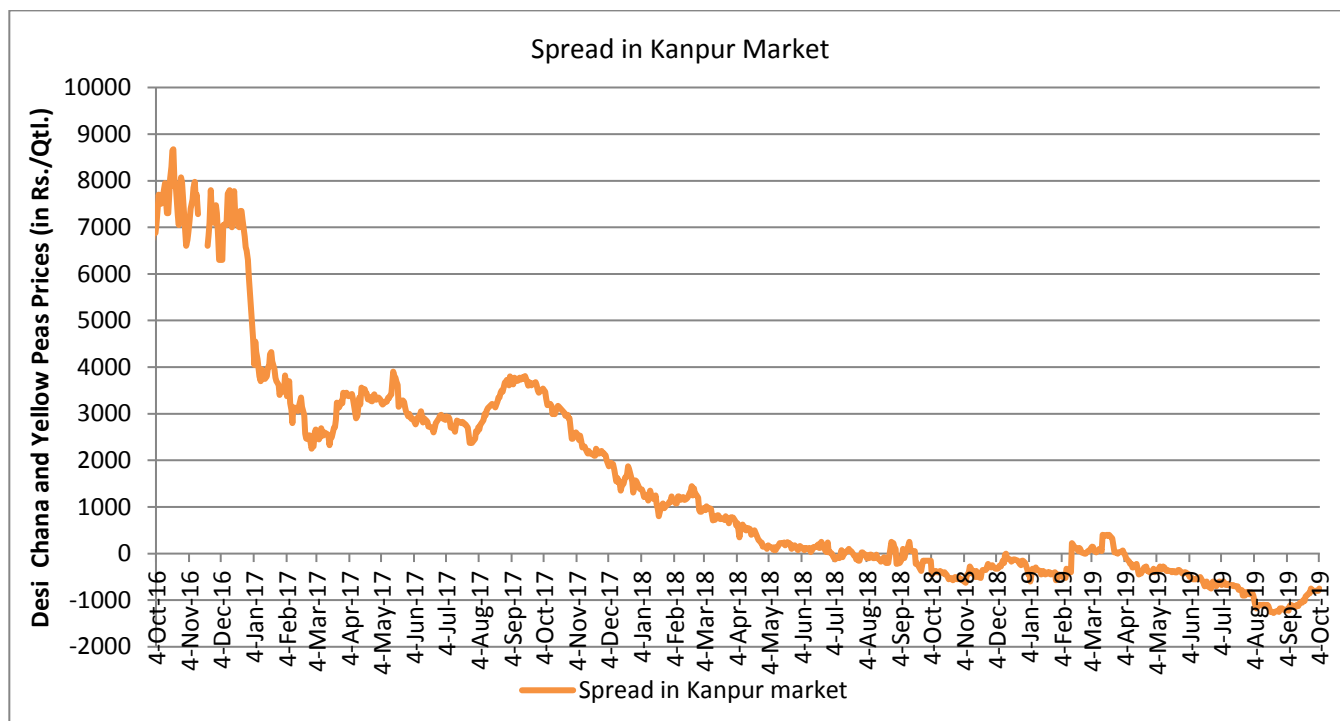

Market recap:

Pea market traded down due illegal supply from neighboring countries and selling of domestic stock. Kanpur market continued to trade up from 5350 to 5400 per qtl due to increased holding by private trades. Overall, all India average decreased by 1.45% to Rs5605per qtl in Sep. In Mumbai market, pea traded at Rs 5030, down from Rs 5125 in Aug. Pressure might be seen in Oct as supply from Nepal continues through illegal route. Stake holders should sell stock at regular interval now.

Price Dynamics: Pea market is expected to trade steady to slightly weak in Oct due to:-

- Illegal import through neighboring countries
- Cheaper availability of other pulses.
- Lower demand at higher price
- Increased selling by private trades in domestic market.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased from Rs900 to Rs 800. Spread is expected to remain in the negative zone in Oct too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this month..

Seasonality Index depicts that pea prices are likely to notice slight improvement in Oct-2019.

Market Outlook For Oct: Steady to slightly weak movement is expected.

Masoor (Lentil/Masoor):

No major spike in lentil market is expected at this point of time due to weak demand and ample stock with Nafed and increasing import volume. Nafed still has 2.07 lakh MT old and new stock. So, supply side seems at comfortable level amid weak demand in cash market. Prices of other pulses too remain unsupportive for cash market. Prices in global market is lower, so import duty remains ineffective. Range bound movement is expected in lentil market in Sep. Lentil vessel is being quoted at Rs 4100-4150 per quintal and container is being quoted at Rs 4250-4300 per quintal. In Kanpur market it is being traded at Rs4300-4325 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100-150 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Cash market may trade in the range of Rs4150-4450 in Oct.

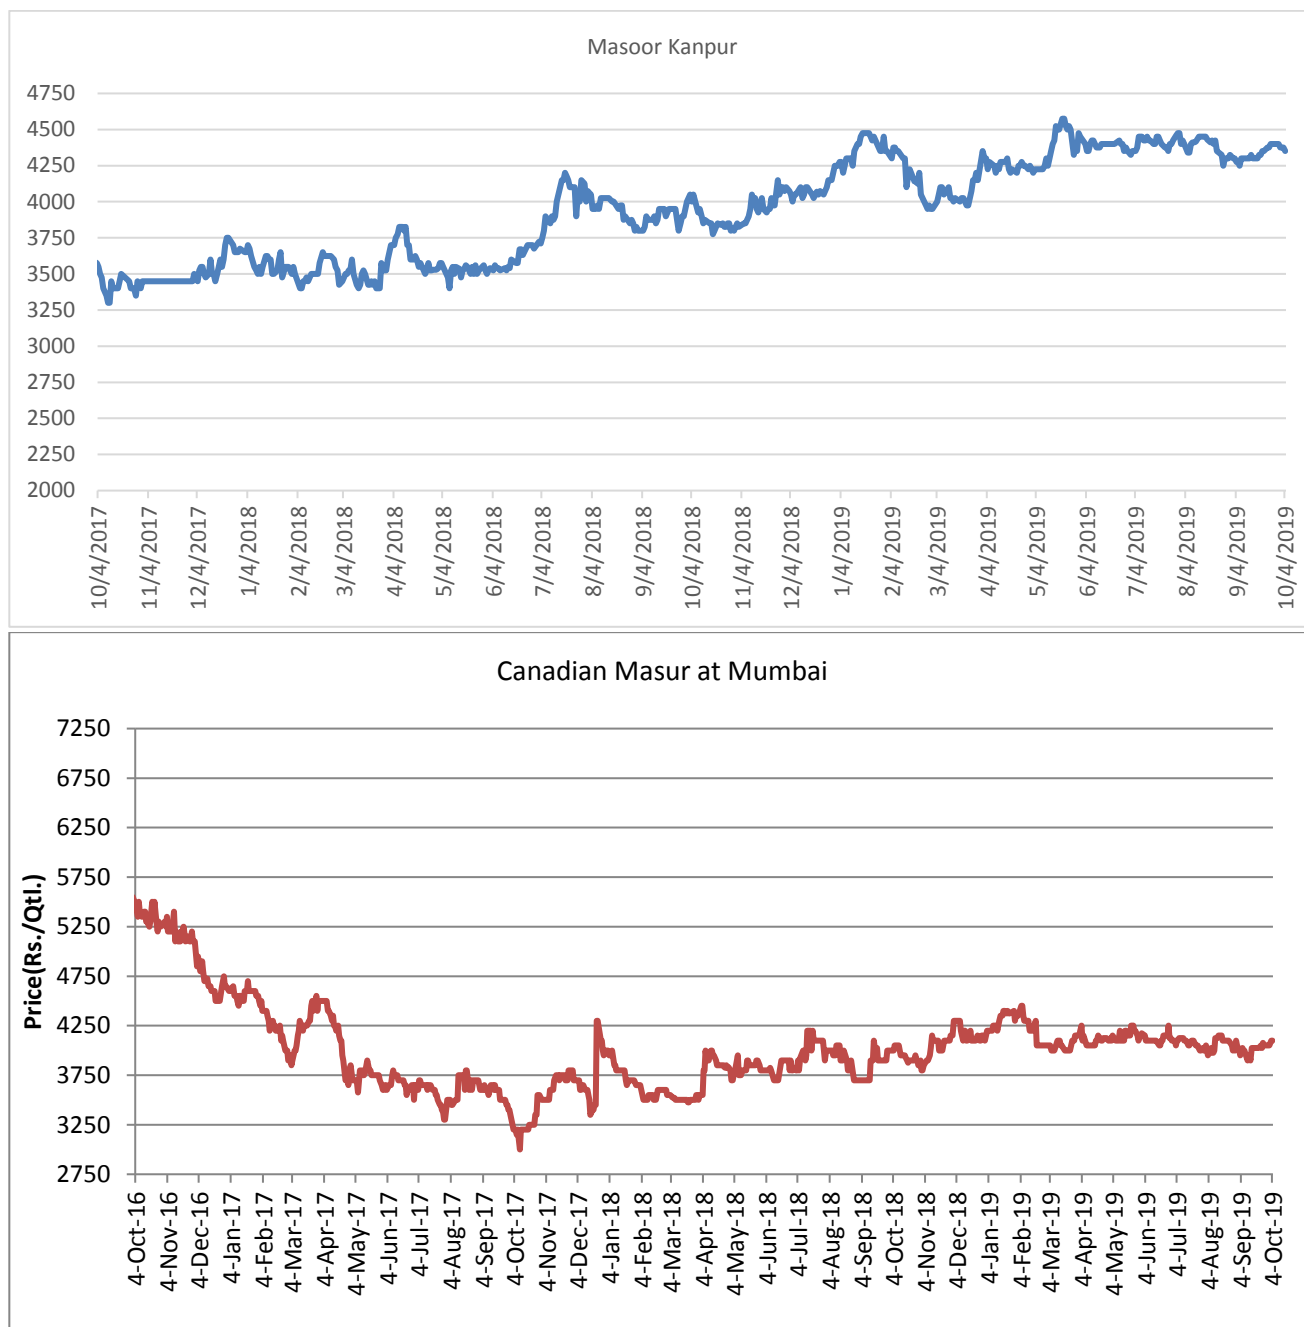

Price Dynamics:

In Sep-2019, average price in key market Kanpur was down slightly by 0.39 % from Rs 4409 to Rs 4350 per qtl. MoM basis. Prices are likely to trade range bound in Oct too.

Range bound movement is expected due to:

- Weak demand from bulk buyers
- Nafed intention to start selling
- Higher import flow at comparatively lower price
- Stable price in other pulses market specially tur, chana and moong

Price Trend In Cash Market:

Seasonality Index depicts steady to slightly firm movement in Oct-2019.

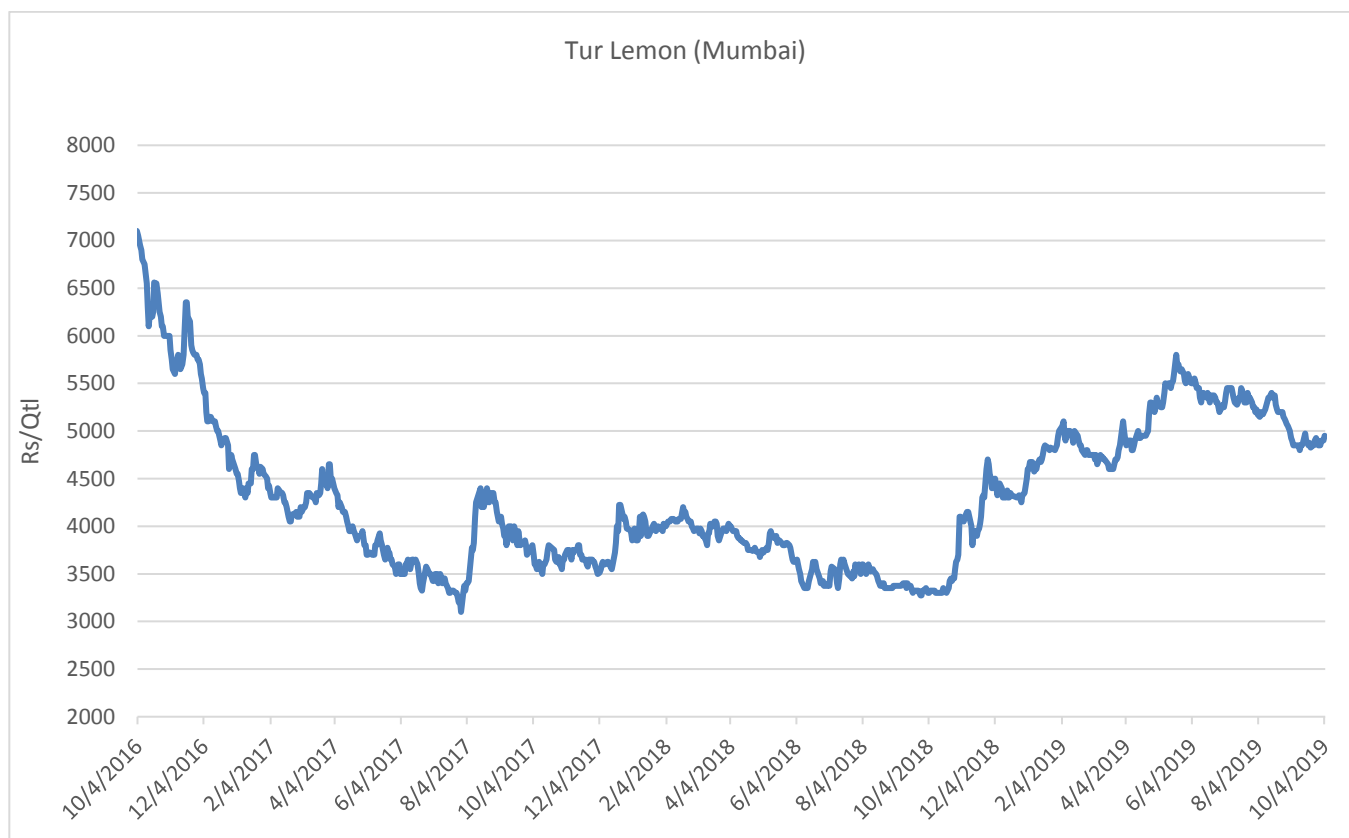

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

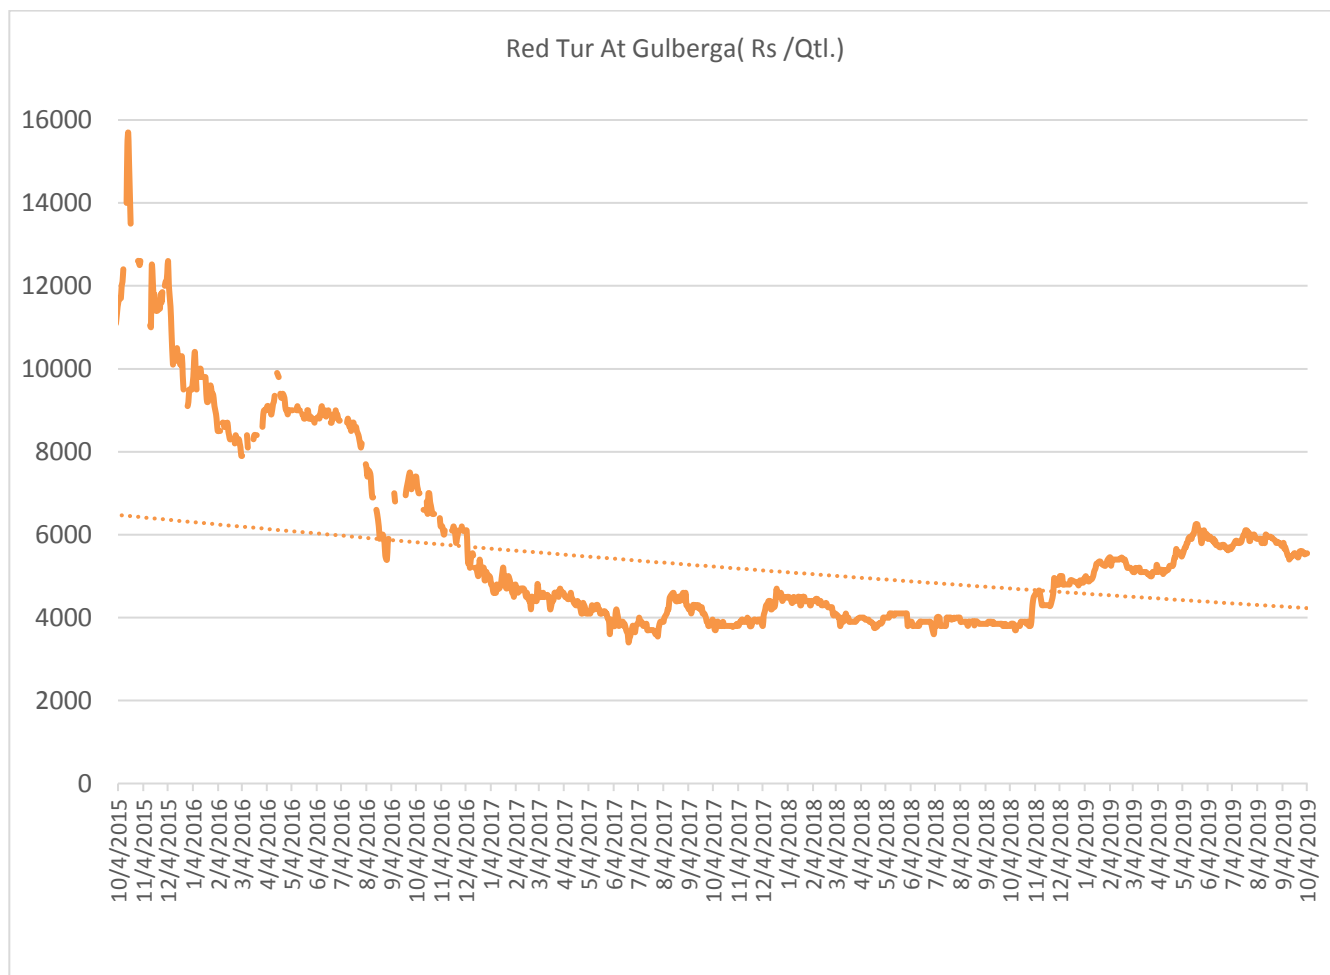

Fundamental Analysis and Outlook:

At planting front Indian farmers have covered 45.82 lakh ha as on 27th Sep-2019. It is up by 0.16% from last year. Normal area till date is 43.71 lakh ha and normal of the whole season is 43.00 lakh ha. Acreage in major growing state like Karnataka, Uttar Pradesh & Jharkhand so far is up by 2.02%, 0.04% and 0.02% respectively. Even A.P. area increased by 0.07 % to 2.27 lakh ha so far. However, area in Maharashtra and M.P. is running behind by 0.27 and 1.19%. With good rainfall overall area is expected to touch 46 lakh ha this year too. The season may end with 46 lakh ha, higher by 3 lakh ha from the normal. With good rainfall overall area is expected to touch of 46 lakh ha this year too. The season may end with 46 lakh ha, higher by 3 lakh ha from the normal. Import before 31st October might be over 2 lakh MT. It would restrict upward momentum in coming weeks. Besides govt has over 7.5 lakh MT stock, so any shortage in next four months is unlikely. Stakeholders should sell stock at every rise of 100 from current level.

Market Recap:

Tur market is expected to stay steady to slightly weak on the back of lower demand at higher level. Availability would increase due to enhanced import quota from 2 to 4 lakh MT and increasing volume of import. Besides, 2 lakh MT would be supplied from buffer stock. However, arrival in markets has decreased. So, any spike in tur market is unlikely. New crop would hit Indian market in Dec and govt has enough stock to handle next three months demand.

Price Dynamics:

In Sep-2019, average price in Gulberga market was down Sep from 5881 to Rs 5675 per qtl. due to higher import quota, decision of selling from buffer stock and good monsoon rains in producing regions in Sep. Tur price in Oct is likely to move down slightly due to

- Higher import quota
- Sale from buffer stock
- Rains in sowing regions
- Weak demand from mills and
- Hope for improvement in sowing area due to higher MSP&
- Decreasing quotes in Myanmar

Seasonality Index-depicts steady to slightly firm movement.

Market Outlook for Oct:

Fundamental remains unsupportive for Tur cash market in the near term.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

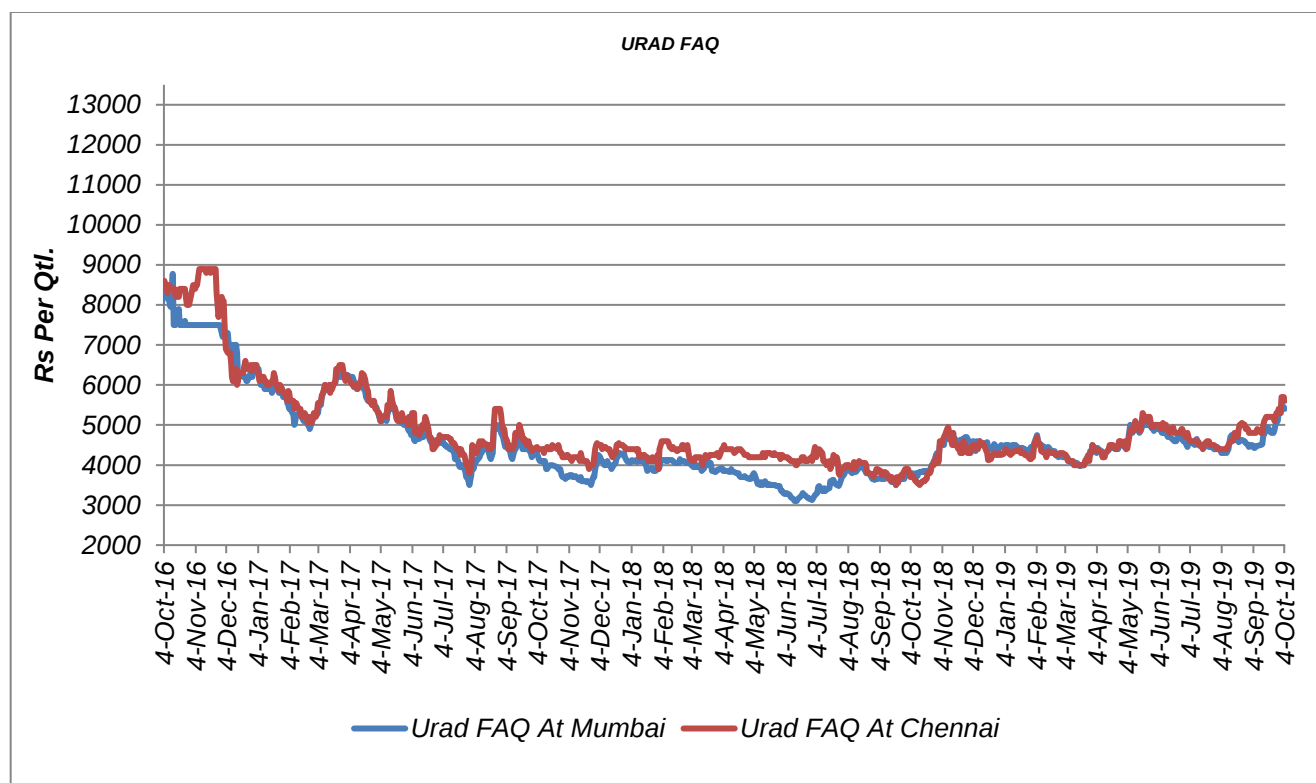

Market Recap:

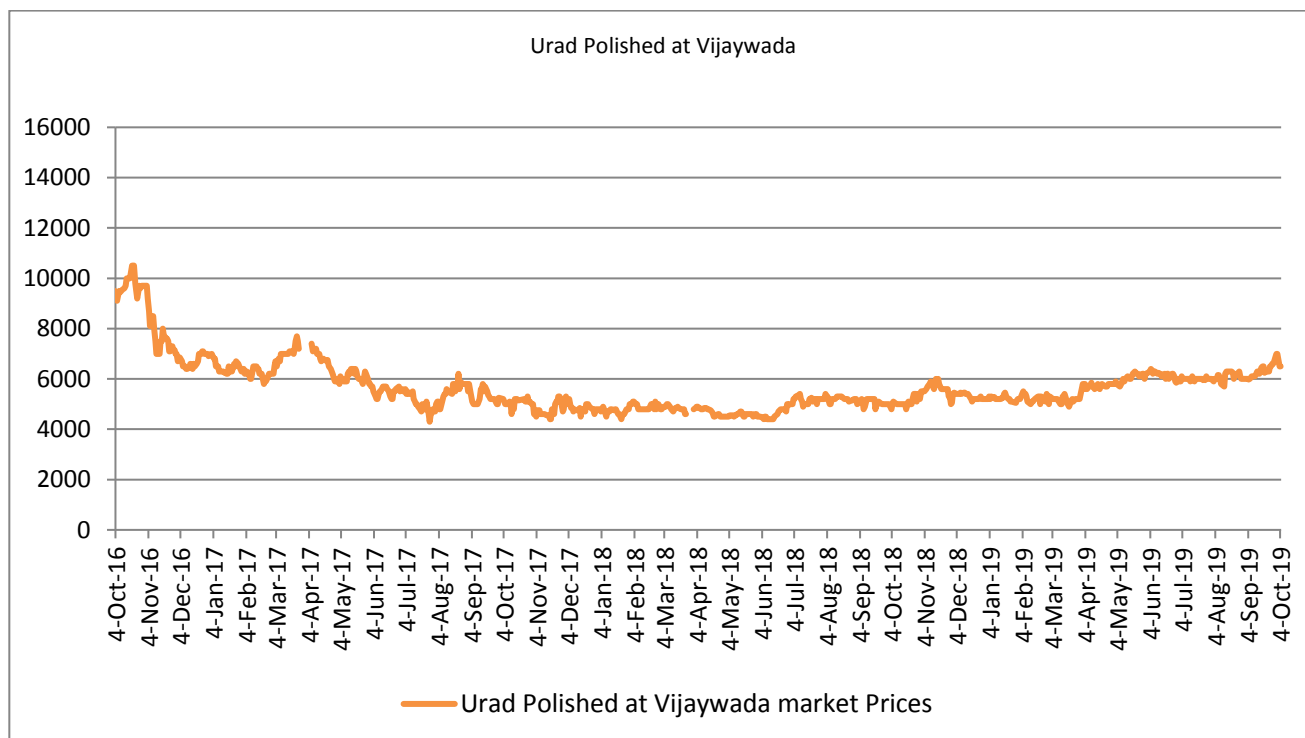

Market has adjusted the impact of flood loss, and opening of weather in major growing region has pressurized cash urad market once again. Besides, private trades are releasing old stock. New crop is hardly one month away now. Import remains restricted so any major decline is unlikely. Govt would procure urad at Rs.5700. So Agriwatch expects market to stay steady to slightly weak this week. Besides, Nafed has started auction in MP, Raj and U.P. It would restrict market to move further up. Demand –supply side is expected to be slightly tight. As sowing is delayed by 20-25 days, new crop would be available one month late i.e in Oct end. It may keep market well supported at current level in the medium term. At present urad Mumbai is being traded at Rs 5000, in Chennai it is being traded at Rs 5300 per qtl. Cash market may increase by Rs 100-150 more in coming weeks. New Urad from Gujarat and Maharashtra would hit market in Oct

Price Dynamics:

In Sep, average prices in key markets including Mumbai/was up by 12 % percent to 5201 per qtl. In Chennai it was up by 13.17% to 5300..Prices may stay steady to slightly firm in Oct due to

- Improved demand & decreasing stock
- Considerable loss due to flooding
- Lower acreage
- Lower import volume
- Quality loss and lower arrival
- Higher stock with Nafed (2.45 lakh MT)
- Restricted import

Seasonality Index depicts steady to slightly firm movement in the near to medium term.

Market Outlook for Oct : Prices are likely to trade firm .

Fundamental Analysis and Outlook For Moong:

Market Recap:

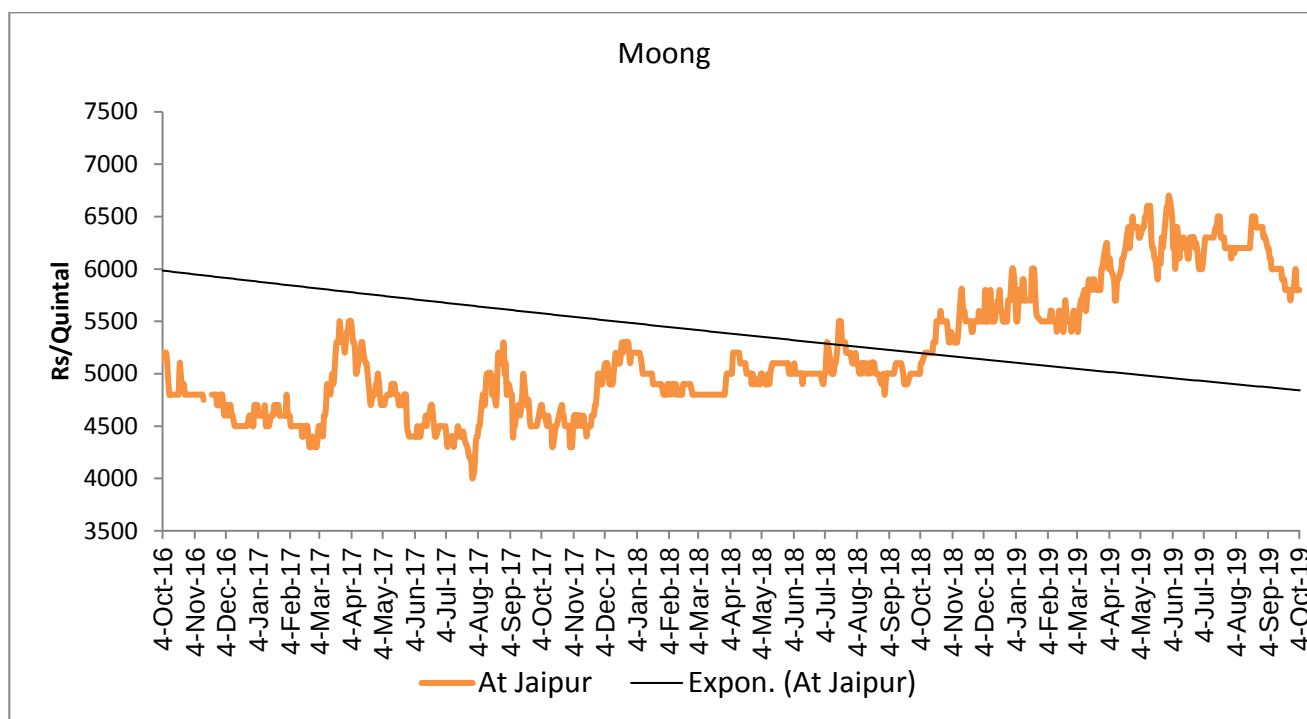

Despite some losses in some pockets of M.P. Mah & Raj crop condition in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and is expected to hit market by third week of Sep. Quality old moong price would continue to trade higher until pressure from Raj builds up. Overall, crop size is larger in Rajasthan. In Maharashtra moong crop in Akola and Khamgaon line is in very good condition. Summer crop in UP, Bihar, Jharkhand and MP, was lower. So, moong price increased from normal expected level. Now stockiest have resorted to release light quality stock at Rs 5400-5600. Mills are buying moong at this level. It is good time for traders and stockiest to start offloading moong now. In Jaipur market moong is being traded at Rs 5800. It may move down further by Rs 100-200 from current level as arrival started increasing.

Price Dynamics:

Moong arrivals have started increasing and arrival would continue till Nov. It would cap uptrend in cash market. Average price declined by 4.2 % to 5800 in Jaipur market in Sep. Nafed still has 1.45 lakh MT stock to release and auction started in many states.

Market is expected to trade range bound in Sep due to:

- Commencement of new arrival
- Commencement of auction by Nafed
- Higher stock in central pool
- Increasing pace of arrival
- Release of stock from private hands
- Improved area coverage.

Seasonality Index depicts weak movement in the near term

Market Outlook for Oct: Steady to slightly firm movement is expected.
