- Seasonality Index
- Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
- Pulses Snapshot
- Sowing Progress
- India
- Australia
- Canada
- US

Domestic Market Fundamentals:

- **As against all normal expectations the DGFT has extended the import time line for tur to 15th of Nov.** Earlier it was 31st Oct-2019. Around one lakh MT tur is available at various ports and it may be released now till 15th Nov. It would pressurize tur market in the short term. As fresh import is not possible due to shorter period of time, tur may move up once again as soon as imported stock at ports exhausts. Besides, govt. has not increased urad/moong import limit beyond 1.5 lakh MT. Even no relaxation has been given in lime line fixed till 31st October. This means there would be no import beyond limit in coming months. It would lend support to urad and moong cash market in coming months. As prices are ruling higher, area is expected to increase in rabi season.
- **Pulses cash market traded almost range bound in the first half of Oct and started moving up** in the second half of the month taking clue from higher MSP, restricted selling by Nafed and crop loss in Aug-Sep due to heavy flooding. The major jump was seen in urad market and it moved up beyond expectation. However, prices decreased due to weak demand at higher level. Procurement drive for moong remains supportive and it would move up further as arrival is coming down. Overall outlook seems firm in pulses market..
- **Masur imported from Canada and US from Tuticorin was found mixed with foreign matters.** The custom officials from port declined to give clearance on the above ground. After request to Agriculture ministry for clearance by pulses import association it has issued order for clearance with some condition only for this consignment. This relaxation would be applicable on purchase bill till 24, October-2019 or before it. Some condition would be applicable too on it. These consignments have to go through cleaning at warehouse suggested by customs officials. It would be under official surveillance. It would be released after full satisfaction of the official. The cost incurred in this process would be borne by importers. As it is lean season, prices of lentil are expected to move up. MSP for new crop has been set at Rs4800.
- **Restricted sale of chana by Nafed have eased pressure on chana price.** Nafed still have 1.3 MMT stock. Nafed would invite tender once in a week on Thursday now. It may prefer to sell chana near 4400. So, any downward trend in chana is unlikely at this point of time. Apart from this demand for besan has improved and dal millers have shown interests in buying at current price. Arrival in markets have already declined while stockiest are waiting for further improvement. Even NCDEX is trading firm. Demand for seed too is visible in the market. Nafed may decide to sell chana in bulk volume from end-November. It may restrict uptrend in Chana market. As Nafed is on driver's seat, its selling decision would remain crucial for chana price in Nov, Dec and Jan-2020. Chana in Delhi market is being traded at Rs4500-4550. It may move up to Rs 4650-4750. New SMP for chana has been fixed at RS 4875. Sowing has started and area is likely to increase as there is good moisture level in the field.
- **Procurement drive and lower arrival is lending support to cash moong market. Steady to slightly firm tone** may prevail. Rajasthan govt. would procure 3 lakh MT moong on MSP this season from kharif crop. It would push moong market further up by 300 to 400 per qtl. In Jaipur market moong is being traded at Rs6700-6800 per qtl. As quality loss is higher and traders have restricted selling sensing firmness in coming weeks, cash market is bound to go up. Besides, there is no parity for import as availability in Myanmar is lower and prices continue to rule higher. Lower crop size, quality loss and stockiest restricted sale are likely to remain supportive for moong in coming weeks. Nafed still have 1.16 lakh MT moong. To keep price under check Nafed would continue to release old stock at regular intervals. This year water availability is good so Agriwatch expects higher acreage in Rabi season. It would make up production loss to some extent. Overall tone remains firm.
- **Urad cash market jumped suddenly as sellers restricted release of old stock and buyers remained active** at higher price. Import remained restricted while govt. did not increase import quota for urad from 1.5 lakh MT to 2.5 lakh MT. Despite stock in private hands and with Nafed, there is a short supply in cash market as stockiest are not releasing stock sensing uptrend to continue. Even importers are not ready to offer urad at current prevailing price. So cash urad market may move further up by Rs 500-800 after slight downward correction. However, at higher level demand for urad dal is likely to decrease.. New rabi crop would not be available before Feb-2020. In Chennai and Mumbai markets urad prices are ruling in the range of Rs8200-8600 per qtl, may cross 9000-9200 once again. Rabi area is bound to increase.
- **Continuous rains in Akola region and relaxation in import for shorter duration may lend support tur price again.** Besides Akola, some other parts of Maharashtra is receiving unseasonal rains and farmers are worried for their standing crops, almost approaching at maturity stage.. There is no good news from AP and Tamil Nadu too. If heavy rains occur in these states, loss

for tur crop would increase while new arrival too would be delayed by 15 days. After correction tur would go up again and cross MSP of 5800 in end Nov. Current decline is for a shorter duration. Buying tur after correction is good.

- **Myanmar is offering tur at \$740, old at \$680 and likely at \$700 per MT basis Indian ports.** Urad FAQ and SQ are being offered at \$ 900 & 980 respectively. Moong is being offered at \$900 per MT. Chana kabuli is offered at \$ 650 and red Rajma at \$ 1140 per MT.

International Market Update:

- **Dry peas production in Canada is expected to increase by 30% from last year to 46.73 lakh MT in 2019-20.** It would be the second highest production. The rise in production is mainly attributed to higher area and yield this year. Main growing states like Saskatchewan and Alberta contribute 51 & 44% in total production in Canada. Manitoba contributes 3% in total production. Despite 30% increase in production, total supply is expected to increase only by 18% due to lower carryin stock. Export is expected to increase to 34 lakh MT. Canada had produced 35.81 lakh MT dry peas in 2018-19. Yield is expected to increase from 2.5 to 2.71 tonne per ha. Canada had exported 32.50 lakh MT last year. Carryout stock is expected to increase from 3.88 to 6 lakh MT in 2019-20. Average price would continue to hover in the range of \$245 to 275 per MT in 2019-20.
- **Chickpeas production in US is expected to decrease sharply to 3.3 lakh MT in 2019-20** as area coverage declined to 4.5 lakh acres despite higher yield realization this year in the initial stages of harvesting. Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.
- **As per the latest report from dry pea & lentils council harvesting activities of pulses in US** is coming to an end now. Dry pea harvesting is over in 98% area while it is 90% for lentils. Small Chickpeas harvest is over in 80% while it is 77% for large chickpeas. Total pulses harvesting on an average comes to 93% so far..
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47 lakh MT, total chickpeas production** has been pegged at 1.79 lakh MT. Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues yield has been down this year for all pulses in US.
- **Lentils production in Canada is expected to increase from 20.92 (2018-19) to 25.20 lakh MT in 2019-20** due to higher yield. Yield has increased from 1.40 to 1.68 tonne per ha this year. Despite higher production total supply is expected to increase slightly from 30 to 31.94 lakh MT due to higher domestic usage. It would increase from 3.14 to 5.94 lakh MT this year. Carry out stock would increase slightly from 6.54 to 7 lakh MT in 2019-20. However import and export is expected to decrease slightly this year. Average price is expected to rule \$375 to 405 per MT in 2019-20.
- **Chickpea production in Canada is expected to decrease this year from 3.11 to 2.63 lakh MT** due to lower area coverage. Farmers in Canada had covered 1.59 lakh Ha in 2019-20 against 1.79 lakh Ha last year. Despite lower production total supply would increase slightly from 3.71 to 3.81 lakh MT in 2019-20. Canada consumes 1.26 lakh MT locally. Carryout is expected to stay steady at 1.05 lakh MT. Average price of chickpea may rule at around \$ 425 to 455 per MT.
- **Chickpea area in Australia is expected to increase 22.11% from 303 (2018-19) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79% to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89% from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chick-peas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick-peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down by 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019. It was 23,066 MT in March.** It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was

B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher Level in relation to prospective demand. So, Buyers are in no hurry to buy.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm after slight downward correction.

Note: Agriwatch 2nd Adv Estimate For 2019-20 for Urad ,Moong & Tur & final estimate for Chana and Masur for MY 2019-20.

Urad: Urad production is likely to decrease by 5.35 % from 24.58 to 23.33 lakh tonne in new season (2019-20). Import is expected to decrease by 1.5 lakh tonne to 1.5 lakh tonne due to quantitative restriction. Total supply would decrease slightly from 36.55 to 33.58 lakh tonne in 2019-20. Export would decrease from 0.3 to 0.2 lakh tonne due to disparity. Consumption would increase from 27.5 to 28 lakh tonne in 2019-20. So, carryout out would decrease from 8.75 to 5.38 lakh tonne. As carryout has declined considerably, supply side is expected to be tight this year. So, prices are likely to rule at higher level.

Moong: Moong production is likely to decrease by 0.98 % from 20.26 to 20.08 lakh tonne in 2019-20. Import is expected to stay steady at 1.5 lakh MT in new season too. Total supply is expected to decrease from 29.02 to 27.10 lakh tonne in 2019-20. As there is no demand from overseas market due to disparity, export is likely to decrease from 1 to 0.2 lakh tonne in the new season. Consumption would increase from 22.5 to 23.0 lakh tonne. Total usage is expected to touch 23.2 lakh tonne. Increase in consumption would pull carryout from 5.52 to 3.90 lakh tonne. So, any major decline in moong price is unlikely in the new season.

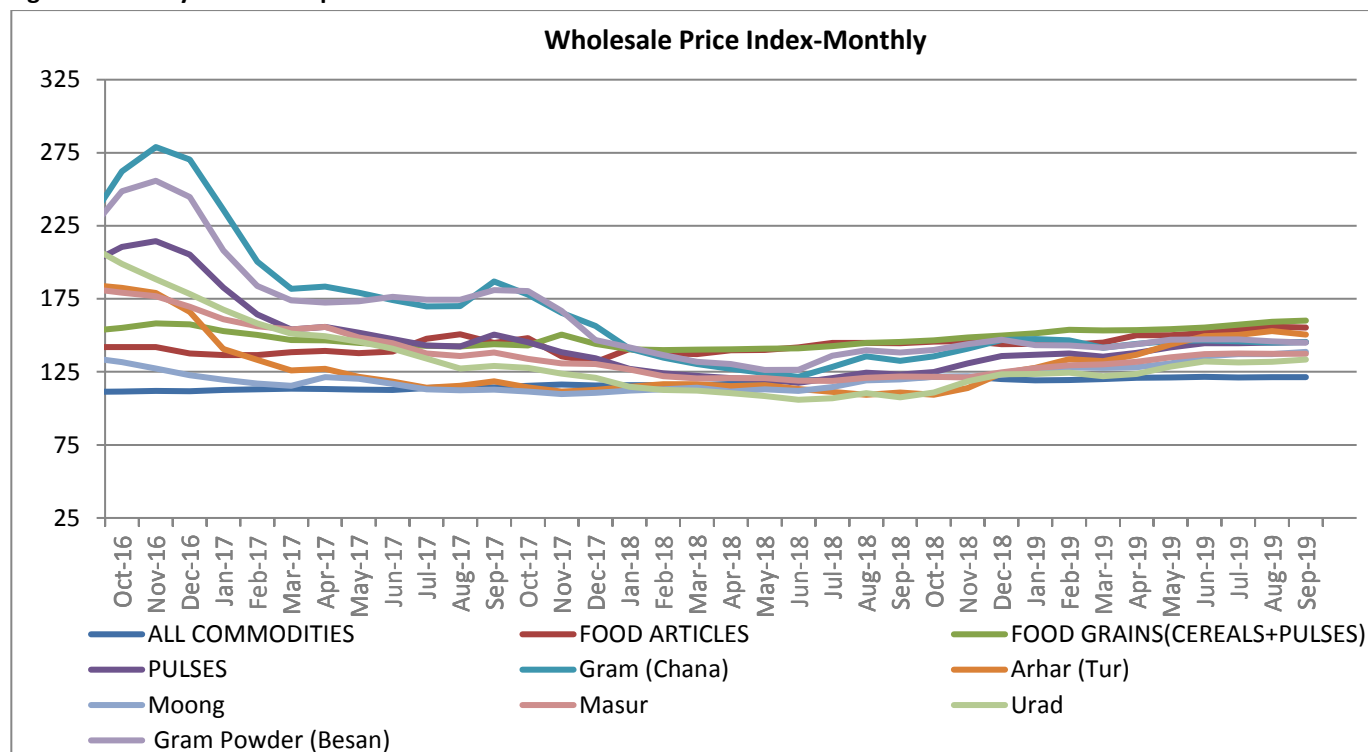

Tur: Tur production is likely to increase by 2.16 % from 35.21 to 35.99 lakh tonne, in the new season (2019-20). Import is expected to increase by 10.29% to 4.5 lakh tonne due to eased restriction on quantity. Total supply would decrease slightly from 47.02 to 46.19 lakh tonne due to crop loss in new season. Export may stay steady at 0.5 lakh tonne due to lower availability. Consumption may increase from 41. to 42 lakh tonne in 2019-20. With export, total consumption has been pegged at 42.5 lakh tonne. Due to lower production and import, carry out would decrease from 5.07 to 3.69 lakh tonne for next year. Market is expected to find balance and no major spike is expected at this point of time.

Chana: Chana production is likely to decline from 98.75 to 87.78 lakh tonne for MY 2019-20. It may improve further if light showers of rains continue in late planting areas. As new year started with hefty carry in of 20.01 lakh tonne, starting from March, supply side seems to be at ease despite lower production size of 87.78 lakh tonne. Total availability would decrease slightly from 114.01 to 111.79 lakh tonne including 4 lakh tonne expected import. Consumption with import would increase from 94 to 94.5 lakh tonne.

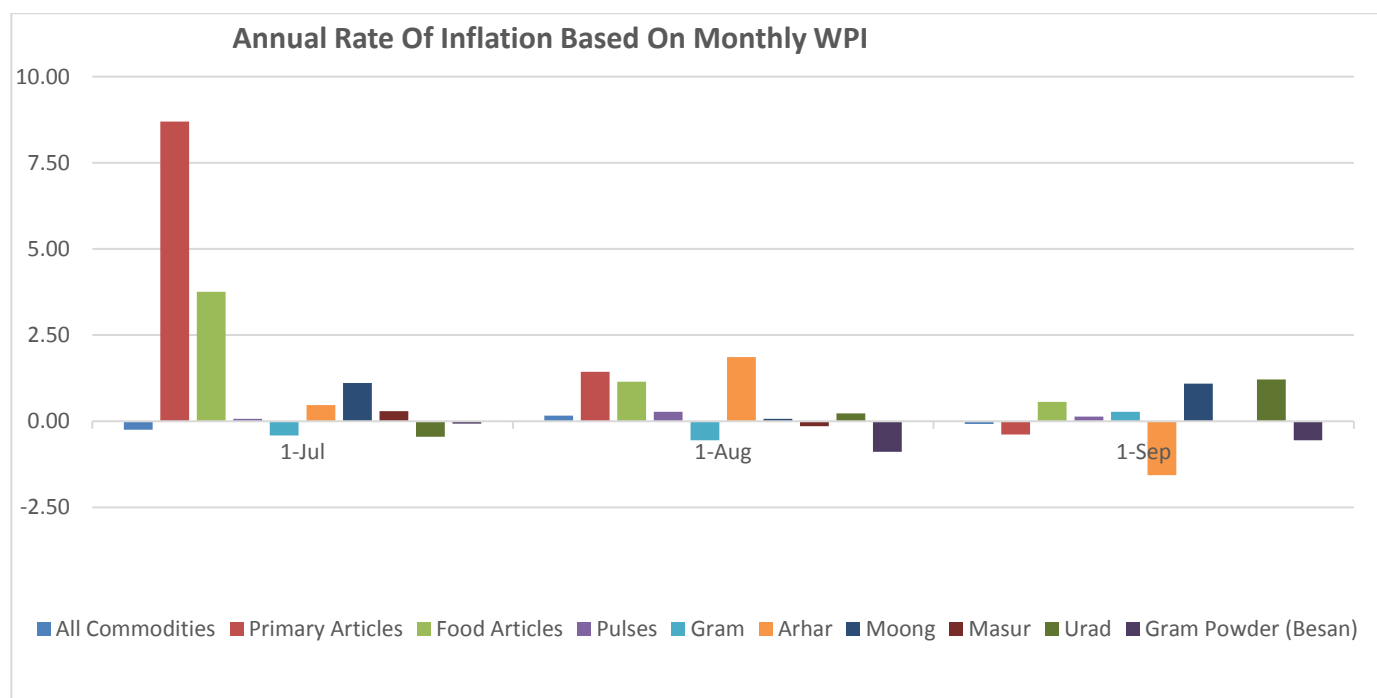

Masur: MY 2019-20 started with 2.44 lakh tonne carry out amid 11.5 lakh tonne production expectation for the new year. Import is likely to increase as crop size is expected to be lower for CY 2019-20 and touch 6.5 lakh tonne in new season. Lower production would drag down

total availability at 20.44 lakh tonne. Export would decrease slightly from 0.15 to 0.1 lakh tonne this year. Consumption has been pegged almost same, at 18.6 tonne in the new season. If prices continue to move up, govt has option to decrease import duty, currently applicable at 40%.

Agri Commodity Indices –Sep -2019:

Pulses WPI: Pulses WPI increased by 2 point from 145.1 in Aug to 145.3 in Sep-2019

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

With higher MSP (4875) for new chana area under chana is likely to increase amid higher water availability. Farmers in Rajasthan MP & Gujarat would prefer to sow chana in barren land too. Despite some improvement seen in futures, chana market is likely to trade steady to slightly firm. Demand from bulk users has improved taking clue from firm futures. However, once Nafed starts selling chana in bulk volume it would come down again. Market is aware of ample availability of chana in central pool as well as in private hands. After setting aside reserve stock of 1278453 MT, there is an availability of 1032136MT with Nafed for sale. In Delhi market chana is being traded at Rs 4500-4550. If demand improves and Nafed decides not to sell stock, it may move up to 4650-4750. If sowing is delayed, it may touch MSP maximum. Stake holders should buy near 4400-4500 and prefer to sell it at 4700-4750. Any unexpected spike in chana market is unlikely.

All India average price for Chana increased by 5.57 percent from Rs 4213 in Sep to 4448 per qtl. in Oct-2019. Australian Chana (imported) price too increased by 2.22 percent from Rs 4219 to Rs 4313 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

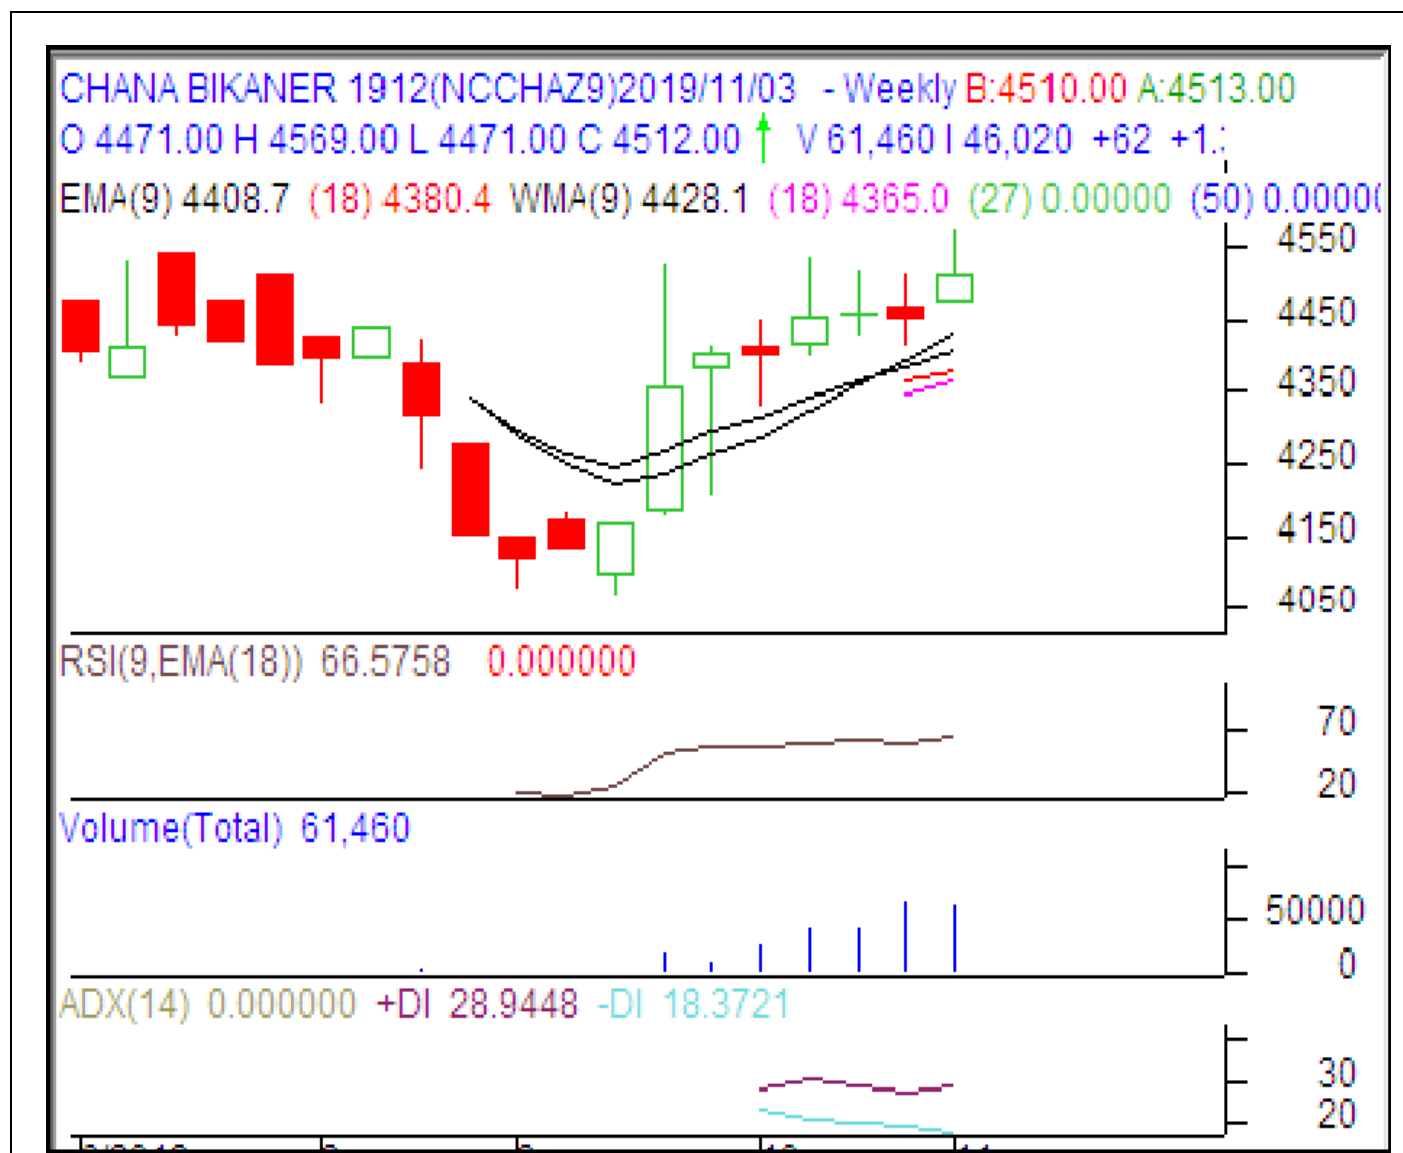

Price Dynamics: Prices are likely to stay steady to slightly firm in Nov due to:

- Restricted selling by Nafed (Nafed would auction chana once in a week)
- Improved demand from bulk users/mills and seed industry.
- Decreasing stock in private/farmers hands.
- Firm futures
- Govt's strategy to regulate market by restricting sale and import and
- Increased holding by private trades sensing improvement in price in coming weeks.

Seasonality Index: hints firm movement for spot market in Nov-2019.

Chana Future Market Analysis:

Technical Commentary:

- Increasing price & OI hint firm market.
- RSI is moving up in neutral region, hints caution to bears.
- Prices closed above 9 and 18 days EMAs

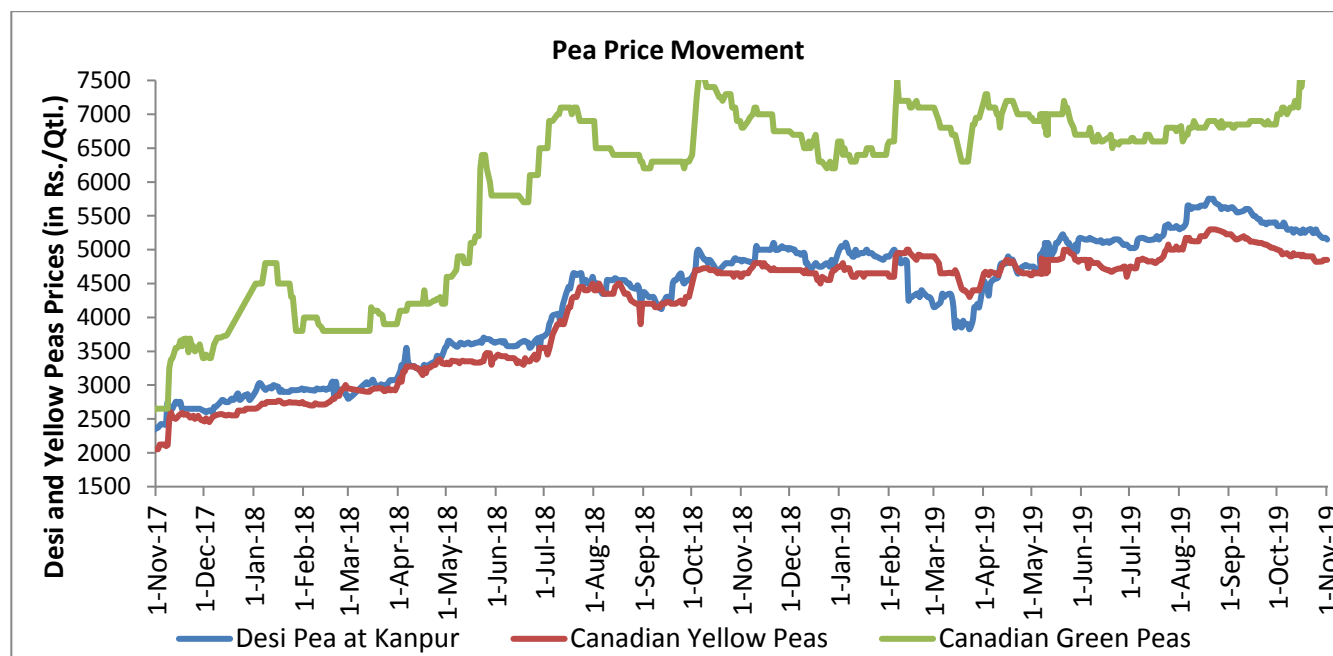

Strategy: Buy above

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Nov	4450	4413	4512	4750	4850
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Nov	Buy above	4455	4650	4750	4350

Field Pea (Matar/Dry Pea):
Fundamental Analysis and Outlook:

Slight improvement might be seen in pea market as stock in private hands is dwindling with restriction of import. However, illegal import from B'desh and Nepal has eased availability of peas in major consuming markets. Besides, availability of other pulses like chana at cheaper price is affecting pea market sentiments. So range bound movement is expected in peas cash market in Nov. Despite higher prevailing prices in domestic market, the farm ministry is unwilling to relax quantitative restriction on imports of yellow peas as pulses availability in domestic market is ample and prices of other pulses are ruling lower. Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT. Earlier in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now, food minister has said that availability of pulses is ample at 30.7 MMT for 2019-20. It hints that peas import quantity is unlikely to be increased further even in third and fourth quarters. If prices continue move up, govt may consider to relax quota norm in last quarter.

Pea in Mumbai market is being traded down at Rs. 4850, while in Kanpur market it is being traded at Rs 5150 per qtl. As chana price has started increasing, pea too might recover slightly in tandem with chana price.. Arrival in local mand has decreased as supply side is at comfortable level due to illegal flow of peas. It would keep market price under check. Stake holders should buy after downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again from end Nov as demand might improve. If chana continues to trade firm, pea price might recover too. Under emerging scenario steady to slightly firm tone may prevail.

Market recap:

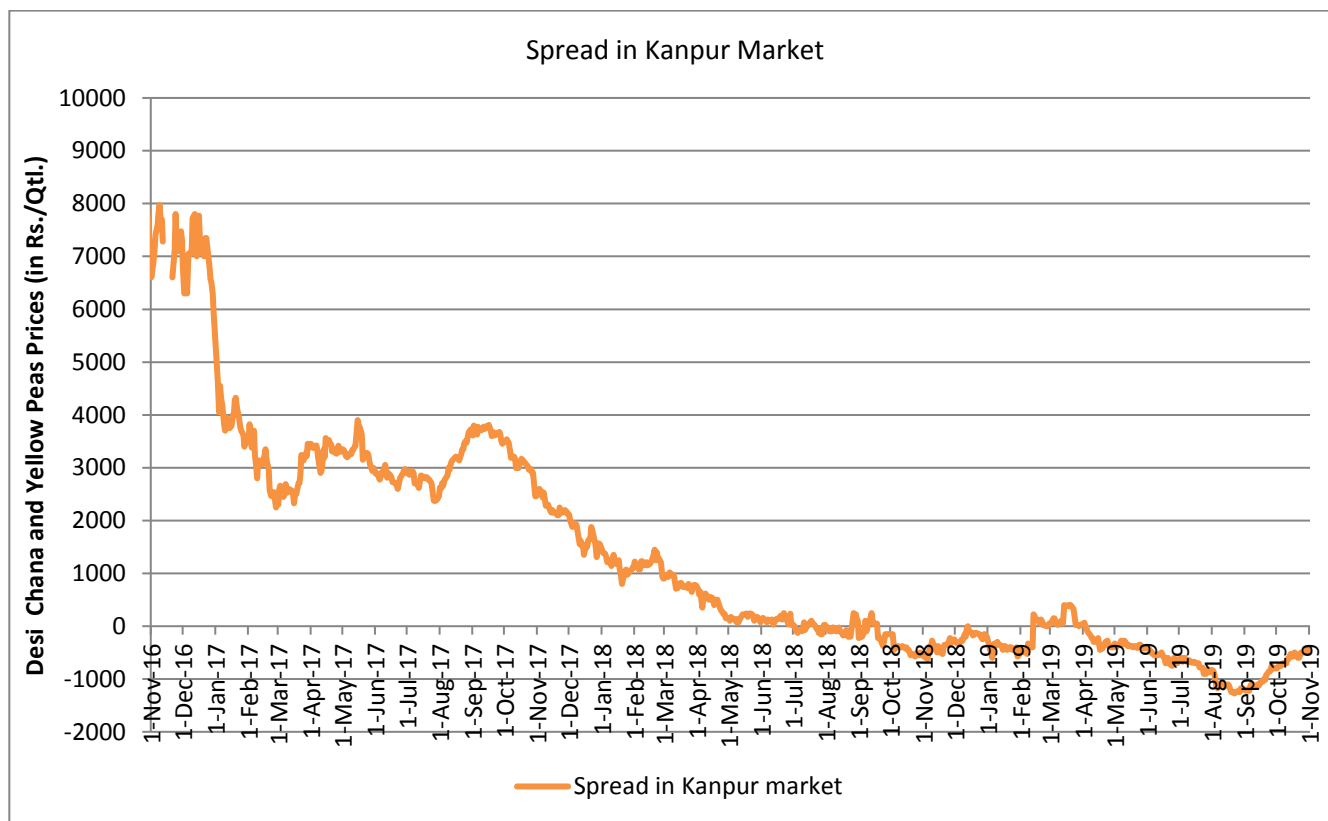

Pea market traded down due illegal supply from neighboring countries and selling of domestic stock. Kanpur market continued to trade down from 5350 to 5150 per qtl due to selling by private trades. Overall, all India average price decreased by 1.1% to Rs5550 per qtl in Oct. In Mumbai market, pea traded at Rs 4850, down from Rs 5150 in Oct. Pressure might be seen in Nov as supply from Nepal continues through illegal route. Stake holders should buy stock at rs4700-4750..

Price Dynamics: Pea market is expected to trade steady to slightly weak in Nov due to:-

- Illegal import through neighboring countries

- Cheaper availability of other pulses.
- Lower demand at higher price
- Increased selling by private trades in domestic market.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has decreased from Rs 800 to Rs 425. Spread is expected to remain in the negative zone in Nov too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this month.

Seasonality Index depicts that pea prices are likely to notice slight improvement in Nov-2019.

Market Outlook For Nov: range bound movement is expected.

Masoor (Lentil/Masoor):

Slight improvement is expected in masur market due to improved demand and lower volume of import. Besides, higher MSP for the next season too may support lentils cash market. However, Nafed still has 2.07 lakh MT old and new stock and it would start releasing lentil soon. It may cap any spike in the market in Nov/Dec. So, supply side is expected to remain at comfortable level. As other pulses are recovering, it too may move up towards MSP level. Prices in global market are lower, so import duty remains ineffective. Lentil vessel is being quoted at Rs 4400 per quintal and container is being quoted at Rs 4450-4500 per quintal. In Kanpur market it is being traded at Rs 4600-4625 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100-150 from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Cash market may trade in the range of Rs 4450-4750 in Nov.

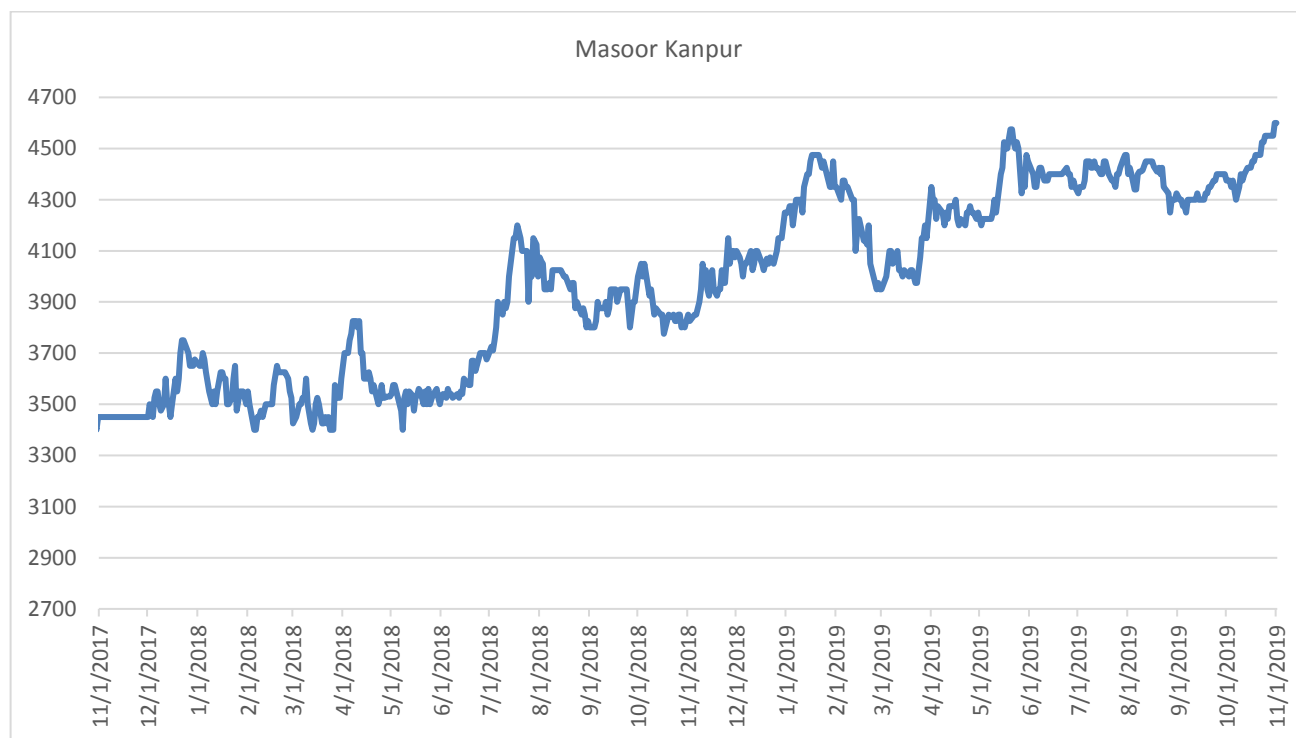

Price Dynamics:

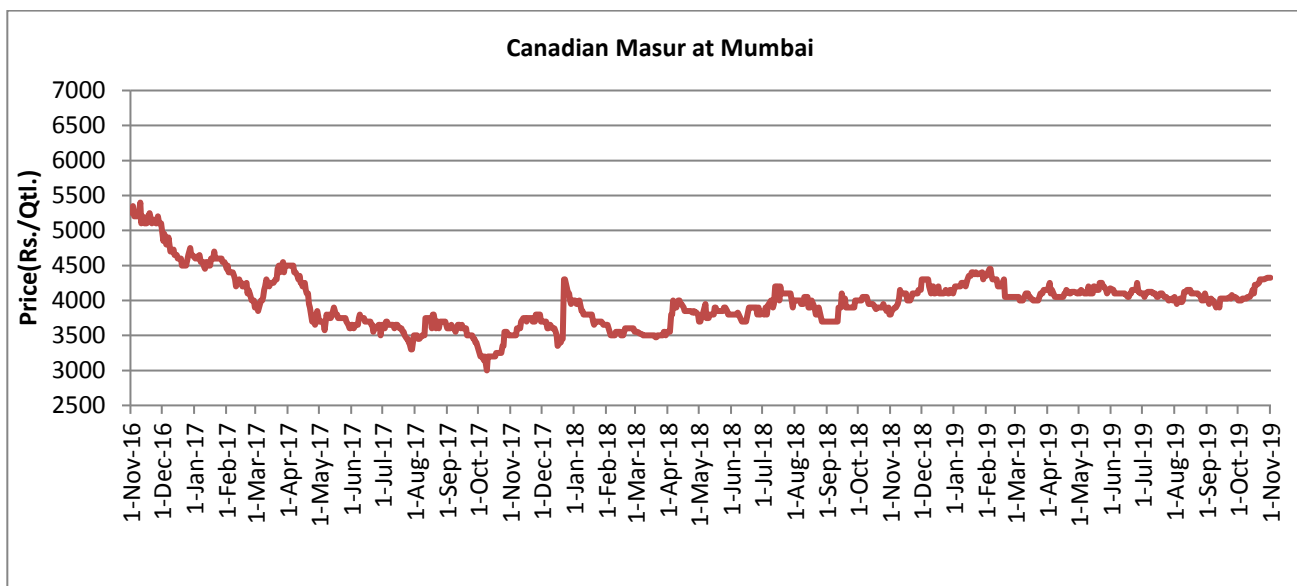

In Oct-2019, average price in key market Kanpur was up slightly by 2.70 % from Rs 4330 to Rs 4447 per qtl. MoM basis. Prices are likely to trade steady to slightly firm in Nov too.

Range bound movement is expected due to:

- Higher stock with Nafed
- Normal demand and illegal import
- Nafed intention to start selling
- Continuous import flow at comparatively lower price

Price Trend In Cash Market:

Seasonality Index depicts steady to slightly firm movement in Nov-2019.

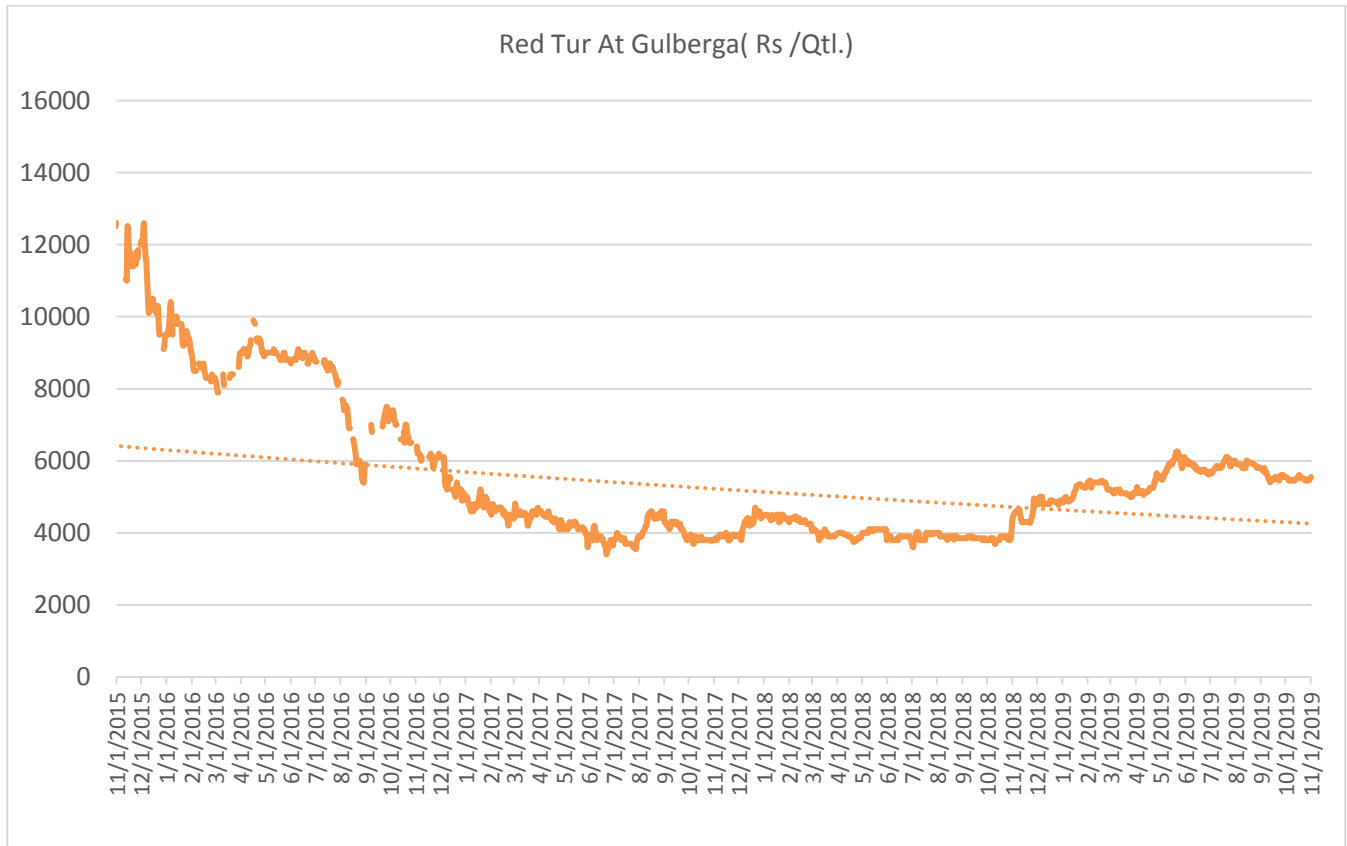

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Against normal expectation DGFT has extended time line only for 15days for tur importers. Now tur importers can import till 15th Nov-2019. With this notification slight pressure on tur market was seen and it decreased slightly. However, price would move up again and it would not affect long term price outlook. In this short period fresh import is impossible. However, tur imported after 31st Oct and is at ports would be released. Besides, there is no extension for urad and moong import. It's a good decision. Govt.'s stand is right step to stop import at the time of new crop arrivals. It would help market to move up again. Tur market traded down with relaxation of 15 days for import deadline. Urad market too declined as buyers stopped buying at higher level while chana market traded steady amid normal supply-demand side.

Market Recap:

Tur market may dip slightly due to stock (around 1 lakh MT) at port to be released in first half of Nov. DGFT relaxation for 15days allowed importers to clear their stock from ports. Fresh import is not possible in 15 days short time. Once the stock at port exhausts, price would move up again. There is also fear of bad weather condition and it may push up price to 5800-6000 level in Dec. Overall, outlook seems firm. Nafed has stock and it would contain market if it is released.

Price Dynamics:

In Oct-2019, average price in Gulberga market was down from 5570 to Rs 5501 per qtl. due to higher supply of old crop from private trades and , decision of selling from buffer stock .. Tur price in Nov is likely to move up slightly due to

- Higher MSP
- Restricted Sale from buffer stock
- Bad weather in sowing regions
- Improved demand from mills and
- No import after 15th Nov
- Increasing quotes in Myanmar

Seasonality Index-depicts steady to slightly firm movement.

Market Outlook for Nov:

Fundamental remains supportive for Tur cash market in the near term.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

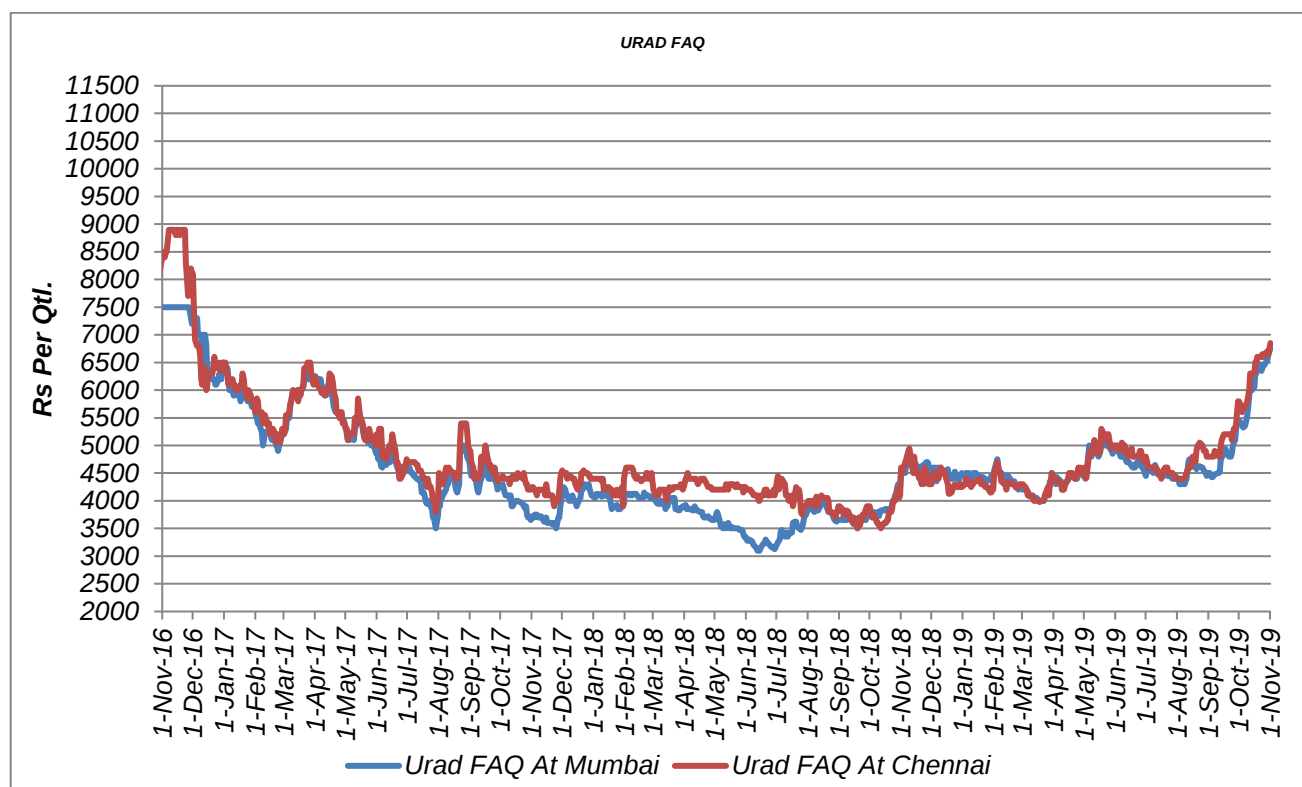

Market Recap:

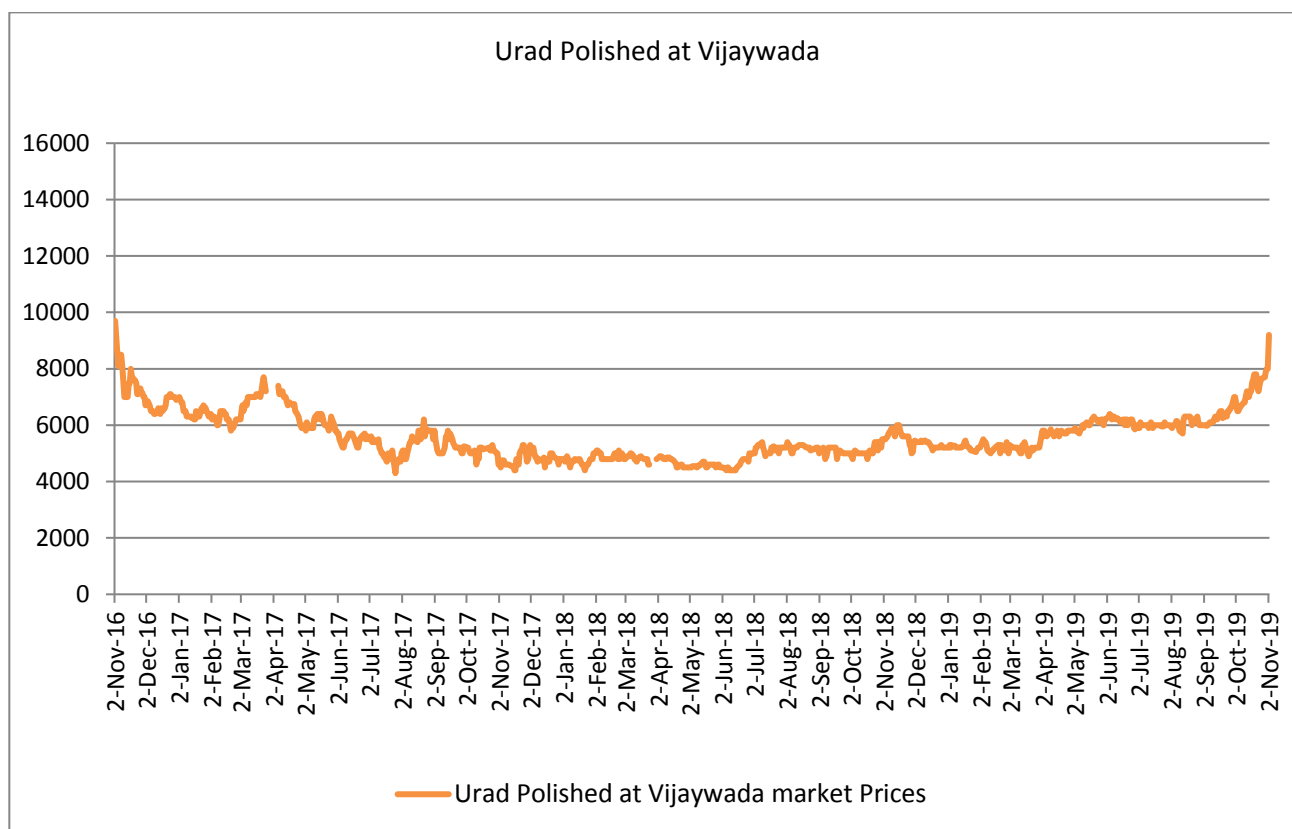

Punters and stockiest are active in cash urad market and sellers/importers have restricted selling sensing uptrend to continue due to heavy loss of kharif urad. Higher price may encourage govt to increase import quota from 1.5 to 2.5 lakh MT soon. There is no seller of urad at ports. If quota is not increased and bulk selling from central pool is not started, urad may move further by Rs 500 per qtl more. Large portion of stock is with private trades and they are unwilling to sell it. Availability in global market two is lower and exporters are continuously increasing quotes. New rabi crop would not be available before Feb-2020. So urad would recover again. Nafed should start selling urad crop at this stage to curb increasing price in domestic market. Import quota has not been increased and import has not been allowed beyond limit of 1.5 lakh MT.

Price Dynamics:

In Oct, average prices in key markets including Mumbai/was up by 25.84 % percent to 6250 per qtl. In Chennai it was up by 22.50% to 665000..Prices may stay steady to slightly firm in Nov due to

- Improved demand & decreasing stock
- Considerable loss due to flooding
- Lower acreage
- Lower import volume
- Quality loss and lower arrival
- Lower stock with Nafed (1.45 lakh MT)

Seasonality Index depicts steady to slightly firm movement in the near to medium term.

Market Outlook for Nov : Prices are likely to trade firm after a slight correction .

Fundamental Analysis and Outlook For Moong:

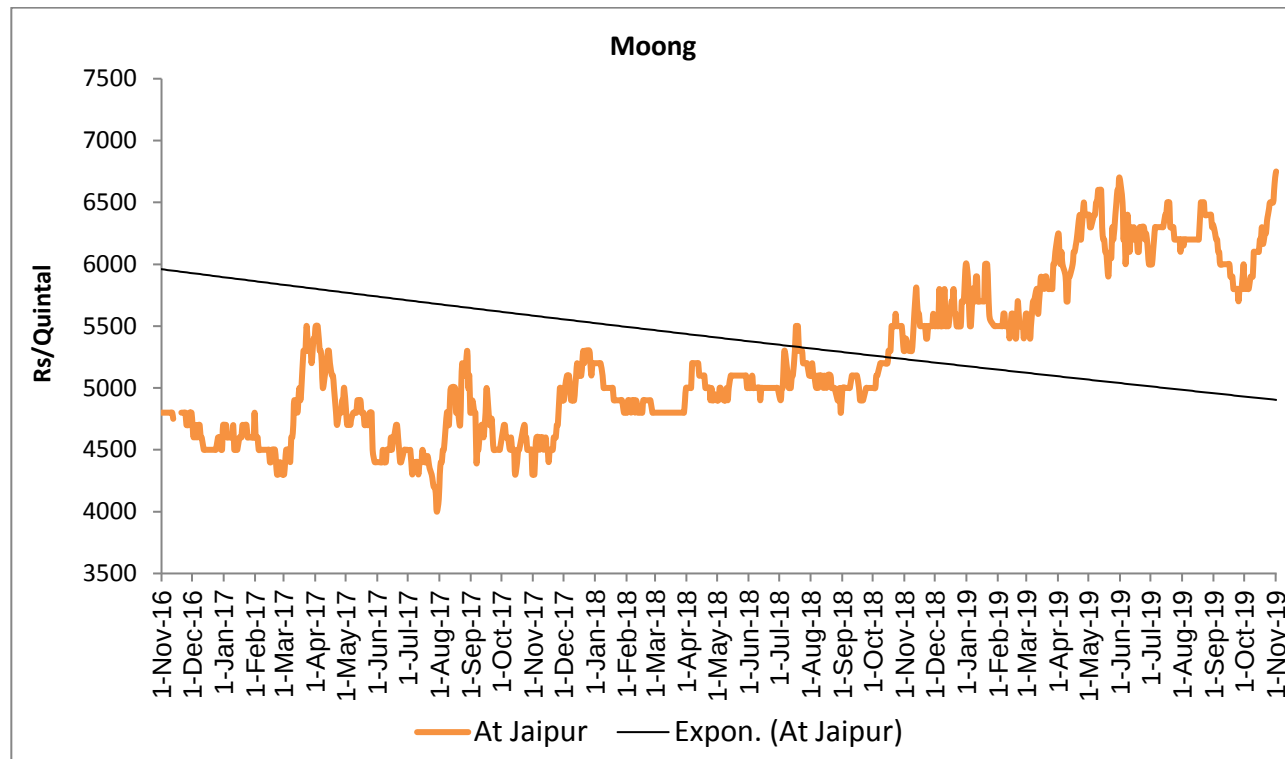

Market Recap:

Rajasthan govt has started moong procurement with 3 lakh MT buying target. Procurement started in many states. However, volume of FAQ arrival is lower than expectation. Private mills are active and it is supporting moong price at current level. As arrival is lower and import quantity remains restricted due to quota restriction, moong may trade steady to slightly firm in the near term. It would push moong market further up by 300 to 400 per qtl. In Jaipur market moong is being traded at Rs 6700-6800 per qtl. As quality loss is higher and traders have restricted selling sensing firm momentum in coming weeks, cash market price is bound to go up near MSP level. Besides, there is no parity for import as availability in Myanmar is lower and prices continue to rule higher. Lower crop size, quality loss is likely to remain supportive for moong in coming weeks. Nafed still have 1.16 lakh MT moong. To keep price under check Nafed would continue to release old stock at regular intervals. Availability of water is good this year. So, Agriwatch expects higher acreage in Rabi season. It would make up production loss to some extent.

Price Dynamics:

Moong arrivals have started decreasing and there is a shortage of quality crop. It would push uptrend movement in cash market amid procurement drive. Average price declined by 13 % to 6500 in Jaipur market in Oct. Nafed still has 1.45 lakh MT stock to release and auction started in many states.

Price Trend:

Market is expected to trade firm in Nov due to:

- Commencement of procurement at MSP
- Decreasing arrivals
- Shortage of quality crop
- Decreasing stock in central pool
- Increasing disparity for import
- Shortage of moong in global market

Seasonality Index depicts weak movement in the near term.

Market Outlook for Nov: Steady to slightly firm movement is expected.

Pulses Wise Technical Outlook for Nov -2019: -

Chana:

Outlook –We expect prices to notice steady to slightly firm movement in Nov-2019. Market may trade up due to:

- Festive demand
- Restricted sale by Nafed
- Higher demand for besan
- Improved buying by private trades and firm futures
- Expected price band for Chana in Delhi is 4400 to 4750 levels in this month.

Trade Strategy: Buy on dip

Trade Recommendations: Go long around 4450 with the first target of 4600 and second target 4700 with stop loss at 4350 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4200	4350	4525	4750	4950

Pea:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slightly firm movement in this month .

Technical analysis:

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4700- 5300 in this month.

Strategy: Buy on dip

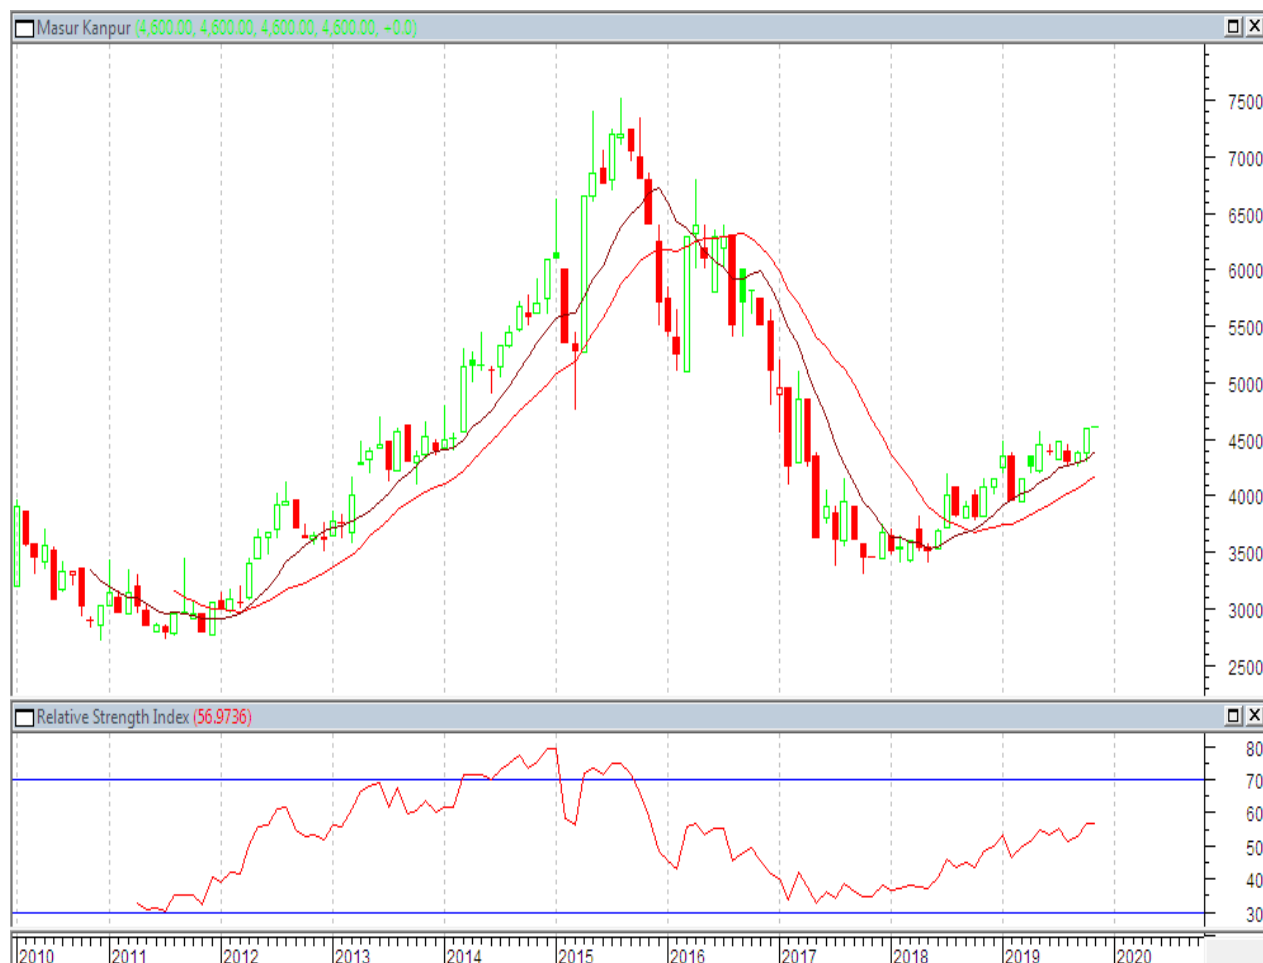

Trade Recommendations: Go long around 5050 with the first target of 5200 and second target 5300 with stop loss at 4900 level
