- India
- Australia
- Canada
- US

Domestic Market Fundamentals:

- **Indian pulses market continues to hinge under uncertainty and pressure continues on cash market** despite restricted import, lower kharif crop size and improvement in demand. Higher stock, specially, chana and tur in central pool and import through illegal channel continue to weigh on market fundamentals despite procurement drive for moong and urad. Some spurt was seen in urad market due to non-clearance of imported stock at various ports recently. Urad may continue to trade firm if Nafed delays release of urad from its stock. Chana continues to trade under pressure on higher availability of stock. Lentils stays steady despite lower stock in domestic market. Import continues at regular interval.
- **Inner tone in urad cash market seems changing once again with declined clearance of imported urad** at various ports like Chennai, Mumbai and Kolkata. Actually, govt. has taken it seriously as importers are importing urad with help of taking stay order. Kharif urad crop in Karnataka, Tamil Nadu and Andhra Pradesh has suffered due to rains and arrival pressure is unlikely to build. It has started supporting market once again. Interestingly, importers in Myanmar are buying urad continuously and quantity is said to be 1500-2000 MT per week. If prices continue to move up, stock from central pool would be released by 50 %. In addition to quantity might be increased to cool down domestic price. Situation is tricky at urad front and policy regarding stock release from central pool and decision on import quota would be price driving factors in coming weeks. Right now sentiment remains firm.
- **Chana traded lower once again as mill's buying at higher level got affected. Nafed's pain to offload 8.80 lakh MT** in two-three months have weakened market sentiments. Besides, at sowing front area under chana is likely to cross 100 lakh ha, as condition for sowing remains favorable so far. Water availability this year is higher in growing regions. Apart from this new crop would start hitting the market from mid Feb. So, private trades too would prefer to release stock whenever prices move up. If Nafed accepts bids below Rs4400 (likely), firmness in chana market would not sustain. It may continue to trade at in the range of Rs4350 to 4650 in Dec under prevailing condition in central India.
- **Moong procurement in Rajasthan is about to start. Rajasthan govt. has increased the no of registration by 10 %** for selling moong on MSP (Rs7050 per 100kg). Likely higher volume of procurement would continue to support moong cash market at current level. As crop size is lower and availability of quality moong is lower, prices of moong would continue to hover in the range of Rs 6500-7000. As prices are comparatively higher rabi area under moong may increase by 10 % this year. Overall sentiment for moong remains firm. Arrival in markets are lower as prevailing price of moong is lower than MSP. Import quota remains restricted at 1.5 lakh MT and govt. is unlikely to increase quota. At current level there is no parity for moong import.
- **As new crop is at hand amid higher availability of stock in central pool, pressure seems to continue on tur market.** New arrivals started trickling in parts of M.P & U.P. Arrival from Gulberga is expected by the end of this month. Crop condition is average to good in Uttar Pradesh, Maharashtra, Madhya Pradesh, Gujarat and Bihar so far. Even private trades have started releasing stock. Demand is weak ahead of new crop. So, any spike is unlikely in tur market until procurement commences. Tur in Gulberga market is being traded at 5350-5400 per qtl. Import through G2G channel continues. Out of 1.75 lakh MT 65000 MT has been imported so far. The rest would continue to come at regular interval. Crop size may cross 37 lakh MT with prevailing good weather condition.
- **Stock of lentils in domestic market is lower. Despite lower stock import continues at cheaper price.** It is affecting market sentiments. Demand too is weak from mills at this point of time. As it is lean season and new crop is almost three months away from now, cash lentils market may improve. Nafed still has 2 lakh MT stock. Out of which, 50 % may be released before new crop hits the market in Feb. Sowing is running behind right now by 8%, however, farmers would cover it in next two weeks under favorable weather condition. Despite lower price realization area is likely to be similar as last year. Lentils in benchmark market is being traded at Rs 4400-4550. Import is taking place at Rs 4300-4400.
- **Pea market trades under pressure as chana trades lower. Import quantity remains restricted at 1.5 lakh MT** and govt is not going to relax quantity norms soon. Illegal import continues from Nepal and B, desh. It is hurting peas price. More downside trend is unlikely in peas market.
- **Myanmar is offering tur at \$590 old, at \$630 new and likely at \$650 per MT basis Indian ports. Urad** FAQ and SQ are being offered at \$ 690 & 755 respectively. Moong is being offered at \$900 per MT. Chana kabuli is offered at \$ 650 and FAQ urad gota at \$1350. And SQ at 4 1460 per MT

International Market Update:

- **Chana production in Canada may decrease by 26% to 2.3lakh MT in 2019-20.** Carryin Stock with latest production estimate hints availability to be around 3.7 lakh MT. rains have affected availability of quality chana. However, availability of no 2 quality chana may increase from 35 to 38 % this year.
- **Peas market traded firm due to demand from China. As demand decreased this week, prices stayed steady.** Yellow peas is being traded at \$6.5(Canadian dollar) per bushel while green peas are being traded at \$10.5-11 per bushel basis FOB.
- **Red lentils in Canada traded higher.** Farmers were able to get 20 cent/bushel for their crop. Demand from India weakened and it is being traded at 24 cent basis FOB.
- **Slight improvement was seen in pulses global market as offtake was seen increasing and may increase further in December.** Even demand from India is likely to go up as rabi crop size too expected to be lower. Demand for lentils, tur and urad from India is bound to go up in new year and it may support global pulses market.
- **Chickpeas production In US is expected to decrease sharply to 3.3 lakh MT in 2019-20 as area coverage declined to 4.5lakh acres despite higher yield realization this year in the initial stages of harvesting.** Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.
- **As per the latest report from dry pea & lentils council harvesting activities of pulses in US is coming to an end now.** Dry pea harvesting is over in 98% area while it is 90 % for lentils. Small Chickpeas harvest is over in 80% while it is 77% for large chickpeas. Total pulses harvesting on an average comes to 93% so far.
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47lakh MT, total chickpeas production has been pegged at 1.79 lakh MT.** Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues, yield has been down this year for all pulses in US.
- **Dry peas production in Canada is expected to increase by 30% from last year to 46.73 lakh MT in 2019-20.** It would be the second highest production. The rise in production is mainly attributed to higher area and yield this year. Main growing states like Saskatchewan and Alberta contribute 51 & 44% in total production in Canada. Manitoba contributes 3% in total production. Despite 30% increase in production, total supply is expected to increase only by 18% due to lower carryin stock. Export is expected to increase to 34 lakh MT. Canada had produced 35.81 lakh MT dry peas in 2018-19. Yield is expected to increase from 2.5 to 2.71 tonne per ha. Canada had exported 32.50 lakh MT last year. Carryout stock is expected to increase from 3.88 to 6 lakh MT in 2019-20. Average price would continue to hover in the range of \$245 to 275 per MT in 2019-20.
- **Lentils production in Canada is expected to increase from 20.92(2018-19) to 25.20 lakh MT in 2019-20** due to higher yield. Yield has increased from 1.40 to 1.68 tonne per ha this year. Despite higher production total supply is expected to increase slightly from 30 to 31.94 lakh MT due to higher domestic usage. It would increase from 3.14 to 5.94 lakh MT this year. Carry out stock would increase slightly from 6.54 to 7 lakh MT in 2019-20. However import and export is expected to decrease slightly this year. Average price is expected to rule \$375 to 405 per MT in 2019-20.
- **Chickpea production in Canada is expected to decrease this year from 3.11 to 2.63 lakh MT** due to lower area coverage. Farmers in Canada had covered 1.59 lakh Ha in 2019-20 against 1.79 lakh Ha last year. Despite lower production total supply would increase slightly from 3.71 to 3.81 lakh MT in 2019-20. Canada consumes 1.26 lakh MT locally. Carryout is expected to stay steady at 1.05 lakh MT. Average price of chickpea may rule at around \$ 425 to 455 per MT.
- **Chickpea area in Australia is expected to increase 22.11% from 303(2018-29) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79 % to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down by 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.

Note: Agriwatch 3rd Adv Estimate For 2019-20 for Urad ,Moong & Tur & premary estimate for Chana and Masur for crop year 2019-20, to be marketed in 2020-21 . * represents AW estimate.

Urad: Urad production is likely to decrease by 22 % from 24.58 to 19.17 lakh tonne in MY -2019-20. Import is expected to decrease by 0.75 lakh tonne to 2.25 lakh tonne despite quantitative restriction. Import took place illegally through various channels. Total supply would decrease slightly from 36.55 to 30.17 lakh tonne in 2019-20. Export would decrease from 0.3 to 0.2 lakh tonne due to disparity. Consumption would increase from 27.5 to 28 lakh tonne in 2019-20. So, carryout out would decrease from 8.75 to 1.97 lakh tonne. As carryout has declined drastically, supply side is expected to be tight this year. Lower crop size is reflecting on price. It is likely to rule at higher level in new year-2020.

Moong: Moong production is likely to decrease by 9.18 % from 20.26 to 18.40 lakh tonne in 2019-20. Import is expected to stay steady at 1.5 lakh MT in 2020 too. Total supply is expected to decrease from 29.02 to 25.42 lakh tonne in MY 2019-20. As there is no demand from overseas market due to disparity, export is likely to decrease from 1 to 0.75 lakh tonne in the new season. Consumption would decrease from 22.5 to 21.5 lakh tonne due to higher prevailing prices in domestic market. Total usage is expected to touch 22.25 lakh tonne. Despite decrease in consumption carry out would decline from 5.52 to 3.17 lakh tonne. So, any major decline in moong price is unlikely in 2020.

Tur: Tur production is likely to increase by 2.7 % from 36.21 to 37.19 lakh tonne, in the new season (2019-20). Import is expected to increase by 3.5 to 4.0 lakh tonne due to eased restriction on quantity and G 2 G basis import. Total supply would decrease slightly from 48.02 to 49.6 lakh tonne due to improved crop condition. Export may decline to 0.25 lakh tonne due to lower availability in domestic market. Consumption may increase from 40. to 42 lakh tonne in 2020. With export, total consumption has been pegged at 42.25 lakh tonne. Due to lower production and import, carry out would decrease from 7.87 to 6.81 lakh tonne in 2020. Market is expected to find balance and no major spike is expected at this point of time amid commencement of new arrival. Procurement drive may help market to move up.

Chana: Chana production is likely to increase from 91.93 to 96.66 lakh tonne for MY 2020-21 (preliminary estimate). Sowing is on right now and more than 70% area has been covered so far. As new year is likely to start with hefty carry in of 11.73 lakh tonne, starting from March, supply side seems to be at ease despite lower production size of 91.93 lakh tonne. Total availability would remain almost same as last year at 111.4 lakh tonne including 3 lakh tonne expected import. Consumption with import would remain same at 98.5 lakh MT. Consumption of chana increased due to higher usage for besan. Pea prices remained higher from last two years so mixing in besan is almost halted.

Masur: MY 2020-21 is likely to start with 2.84 lakh tonne carry out amid expected production estimate of 13 lakh MT. Sowing is on and area would be same as last year. Import is likely to decrease by 1 lakh MT as crop is expected to be higher this year as weather

condition is normal for lentils. Higher production estimate would keep availability almost at same level at 21.34 lakh tonne. Export would increase slightly from 0.1 to 0.2 lakh tonne this year. Consumption has been pegged, at 19.2 tonne in the new season. If prices continue to move up, stock from central pool may be released. Nafed has around 2.0 lakh MT stock.

Agri Commodity Indices –Oct -2019:

Pulses WPI: Pulses WPI increased by 10 point from 145.3 in Sep to 146.3 in Oct-2019

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

Weather condition for chana sowing remains favorable and farmers may cover area under chana in coming weeks. Despite lower price in domestic market area under chana would cross 100 lakh ha as farmers in Rajasthan, M.P, are using even unfertile land this year due to good moisture level in the field and higher MSP (Rs 4875 per qtl.). However, area in south India may decline slightly. Pressure on chana cash market continues as availability is higher in central pool and with private trades. Futures remains unsupportive and whenever prices moves up, sellers/stockiest become active. It pressurizes chana price. Nafed still has around 1.7 lakh MT chana stock. New crop would be available from Feb end so, the quantity with Nafed may easily take care of chana demand for next three months. Besides, private trades too would prefer to lighten its stock before new crop. In Delhi market chana is being traded at Rs 4400-4450. If demand improves and Nafed decides not to sell stock below 4400, it may move up to 4650-4750. Otherwise it would come down again. For chana market Nafed is on driver's seat. Weather condition in Jan and Feb too would play a crucial role as price driver. Under prevailing condition any spike in chana market is unlikely.

All India average price for Chana increased by 0.4 percent from Rs 4448 in Oct to 4360 per qtl. in Nov-2019. Australian Chana (imported) price too increased by 0.47 percent from Rs 4313 to Rs 4488 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics: Prices are likely to stay steady to slightly firm in Dec due to:

- Restricted selling by Nafed (Nafed would auction chana once in a week)
- Improved demand from bulk users/mills and seed industry.
- Decreasing stock in private/farmers hands.
- Firm futures
- Govt's strategy to regulate market by restricting sale and
- Increased holding by private trades sensing improvement in price in coming weeks.

Seasonality Index: hints firm movement for spot market in Dec-2019.

Chana Future Market Analysis:

Technical Commentary:

- Increasing price & OI hint market to consolidate in coming weeks.
- RSI is moving up in neutral region, hints caution to bears.
- Prices closed above 9 and 18 days EMAs

Strategy: Buy above

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Jan	4433	4387	4450	4561	4650
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Jan	Buy above	4430	4550	4600	4370

Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

After decline in cash peas market slight recovery is expected this month as stock in private hands is dwindling with restriction of import. Area coverage too is 3.48% to 3.24lakh ha so far against normal of 9.45 lakh ha for the whole season. However, illegal import from B'desh and Nepal continues to affect price in major consuming markets. Higher availability of chana too have capped uptrend in peas market. Under emerging scenario range bound movement is expected in Dec. Despite higher prevailing prices in comparison to chana in domestic market, the farm ministry is unwilling to relax quantitative restriction on imports of yellow peas as other pulses availability except urad in domestic market is ample and prices of these pulses are ruling lower. Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT. Earlier in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now, food minister has said that availability of pulses is ample at 2.5 MMT for 2019-20 in central pool any short fall can easily be met till March-2020..It hints that peas import quantity is unlikely to be increased further even in the fourth quarters.

Pea in Mumbai market is being traded down at Rs. 4500-4525, while in Kanpur market it is being traded at Rs 4800 per qtl. As chana price has started increasing, pea too may recover slightly in tandem with chana price. Arrival in local markets has decreased and it may support pea market to some extent. Stake holders should buy after downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again from mid Dec as demand starts improving at this point of time. If chana continues to trade firm, pea price might recover too. Under emerging scenario steady to slightly firm tone may prevail.

Market recap:

Pea market traded down due illegal supply from neighboring countries and decreased price of chana in domestic market. Kanpur market continued to trade down from 5150 to 4800 per qtl due to selling by private trades and illegal flow of import. Overall, all India average price decreased by 3%% from Rs5550 per qtl in Oct to Rs 5390 in Nov . In Mumbai market, pea traded at Rs 4515, down from Rs 310 in Nov. Stake holders should buy stock at Rs 4400-4450.

Price Dynamics: Pea market is expected to trade steady to slightly firm in Dec due to:-

- Lower area coverage
- Declining stock at port
- Attempt to curb illegal flow
- Likely improvement in demand from mid Dec and
- Limited volume of import

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has decreased from Rs 425 to Rs 325. Spread is expected to remain in the negative zone in Dec too on relative movement in Chana prices. Overall outlook seems steady to slightly firm this month.

Seasonality Index depicts that pea prices are likely to notice slight improvement in Dec-2019.

Market Outlook For Dec: Steady to slightly firm movement is expected.

Masoor (Lentil/Masoor):

Higher import flow in Oct and selling by stockiest at higher price depressed cash lentil market in Nov. However, import volume decreased in Nov and stockiest resorted to restrict selling ahead of lean season. It may help market to recover once again. Area is lagging behind as of now and may end with last year's level. New crop is expected after two months. So improvement in demand expected by mid-Dec may push up price. Higher MSP too would remain supportive in coming months. However, any spike is unlikely as import flow is likely to continue at current price prevailing in the market. Nafed still has 2.07 lakh MT old and new stock and it would start releasing lentil before new crop hits the market. So scope for firmness is limited. Even supply side is, expected to remain at comfortable level.. Prices in global market is lower, so import duty remains ineffective. Lentil vessel is being quoted at Rs 4350-4400 per quintal and container is being quoted at Rs 4450-4550 per quintal. In Kanpur market it is being traded at Rs 4500-4550 per qtl. Nafed selling would remain crucial apart from import flow and weather condition in Dec-Jan.

Price Dynamics:

In Nov-2019, average price in key market Kanpur was slightly down by 1.25 % from Rs 4447 to Rs 4400 per qtl. MoM basis. Prices are likely to trade steady to slightly firm in Dec.

Steady to slightly firm movement is expected due to:

- Lower area coverage
- Slower pace of import
- Restricted selling by stockiest & Nafed
- Production is likely to be at same level as last year and
- Fear of weather fury in Jan -Feb

Price Trend In Cash Market:

Seasonality Index depicts steady to slightly firm movement in Dec-2019.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Tur crop condition is good and new arrival commenced in parts of M.P. and U.P. and is expected from Gulberga by the end of this month. Private trades have started offloading stock and pressure is seen on the cash market right now. Any spike in cash tur market is unlikely as G2G import continues. Besides, central pool stock is said to be around 8 lakh MT, sufficient to meet the current demand. In Gulberga market tur is being traded at Rs 5350-5450 per qtl. As there is delay in procurement drive, pressure may continue on tur market. It may decrease by Rs 200-300 more in coming weeks. There is ample stock in central pool and Nafed may start selling old crop. Overall outlook for tur market seems weak with commencement of new arrival. Pressure may build up by the end of this month.

Market Recap:

Tur market may continue to trade lower as stockiest continues to release stock ahead of new crop. Besides, ample availability in central pool, import flow through G2G basis and improved crop condition weakens inner tone in the market. Procurement drive may lend some support by end Dec. However, procurement agencies may decrease procurement quantity to ease supply in the market during first quarter of the year.

Price Dynamics:

In Nov-2019, average price in Gulberga market was down from 5501 to Rs 5350 per qtl. due to higher supply from old crop weak demand and decision of selling from buffer stock. Tur price in Dec is likely to move down slightly due to

- Higher availability of stock
- G2G basis import
- Improved crop condition in major growing region due to recent rains
- Weak demand from mills and
- Lower quotes in Myanmar

Seasonality Index-depicts steady to slightly weak movement.

Market Outlook for Dec:

Fundamental remains un-supportive for Tur cash market in the near term.

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

Market Recap:

Inner tone in urad cash market seems changing once again with declined clearance of imported urad at various ports like Chennai, Mumbai and Kolkata. Actually govt. has taken it seriously as importers are importing urad with help of taking stay order. Kharif urad crop in Karnataka, Tamil Nadu and Andhra Pradesh has suffered due to rains and arrival pressure is unlikely to build. It has started supporting market once again. Interestingly, importers in Myanmar are buying urad continuously and quantity is said to be 1500-2000 MT per week. If prices continue to move up, stock from central pool would be released by 50 %. In addition to this import quantity might be increased to cool down domestic price. Situation is tricky at urad front and policy regarding stock release from central pool and decision on import quota would be price driving factors in coming weeks. Right now sentiment remains firm.

Price Dynamics:

In Nov, average prices in key markets including Mumbai/was up by 22 % percent to 7200 per qtl. In Chennai it was up by 19.50% to 7800. Prices may stay steady to slightly firm in Dec due to

- Improved demand amid decreasing stock
- Kharif crop failure
- Stockiest restricted selling
- Restricted import and
- lower arrival, new crop expected not before March

Seasonality Index depicts steady to slightly firm movement in the near to medium term.

Market Outlook for Dec : Prices are likely to trade firm after a slight correction. Any change in govt.'s policy may affect market sentiments.

Fundamental Analysis and Outlook For Moong:

Market Recap:

Moong market traded under pressure despite ongoing procurement drive. Progressive procurement quantity has already crossed 40,000 MT. Stock with Nafed is comparatively lower this year and maximum stock is said to be in private hands. Due to loss in kharif season in MP and Rajasthan, farmers are retaining 25 to 30% stock this year in expectation of higher price in Jan -Feb. Procurement pace remains slow as private trades are buying moong paying cash at price slightly lower than MSP. Price of moong has decreased due to weak demand for processed pulses. Besides, arrival of poor quality of moong too is disturbing price. Demand is awaited in moong market. Steady to weak trend may prevail in moong cash market this week too. In Rajasthan moong chamki is being traded at Rs 6600-6800 per qtl. It may come down to Rs 6400-6600. After that it may move up again and move towards MSP level.

Price Dynamics:

Moong arrivals have started decreasing and there is a shortage of quality crop. It would push prices up in cash market amid procurement drive. Average price increased by 1.5 % to 6650 in Jaipur market in Novt. Nafed still has 1.45 lakh MT stock to release and auction started in many states with procurement drive.

Price Trend:

Market is expected to trade firm in Dec due to:

- Commencement of procurement at MSP
- Decreasing arrivals
- Shortage of quality crop
- Decreasing stock in central pool
- Increasing disparity for import
- Shortage of moong in global market

Seasonality Index depicts firm movement in the near term.

Market Outlook for Dec: Steady to slightly firm movement is expected.

Pulses Wise Technical Outlook for Dec -2019: -

Chana:

Outlook –We expect prices to notice steady to slightly firm movement in Dec-2019. Market may trade up due to:

- Lower area coverage
- Festive demand
- Restricted sale by Nafed
- Higher demand for besan
- Improved buying by private trades and firm futures
- Expected price band for Chana in Delhi is 4400 to 4750 levels in this month.

Trade Strategy: Buy on dip

Trade Recommendations: Go long around 4300 with the first target of 4450 and second target 4550 with stop loss at 4250 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4200	4250	4350	4650	4750

Pea:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Outlook - We expect prices to notice steady to slightly firm movement in this month.

Technical analysis:

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4400- 5800 in this month.

Strategy: Buy on dip

Trade Recommendations: Go long around 4450 with the first target of 4550 and second target 4600 with stop loss at 4350 level

Support & Resistance				
S2	S1	PCP	R1	R2
