- Indian Pulses- Wise Import- Monthly Analysis
- Inflation
- Seasonality Index
- Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
- Pulses Snapshot
- Sowing Progress
- India
- Australia
- Canada
- US

Domestic Market Fundamentals:

- **As govt. purchase would increase further, chana price is expected to improve from** current level by Rs 100-150 to Rs 4350-4450 this week. Millers are active in Raj, MH, MP and Gujarat. Overall trend seems firm. If lockdown is relaxed, demand for chana would increase and it would support cash market price in coming days. Nafed would supply 1.95 lakh MT dal to 19.60 crores families in 36 states under PM Poor Welfare Yojna. Around 5.5 thousand MT dal has already been distributed. Nafed has procured 301,046.77 tonne chana so far on MSP in different states. With 1.15 lakh MT contribution AP leads, followed by Telangana and Karnataka. Procurement pace would increase in Major growing states in May. As old stock is higher with Nafed, any spike in chana market is unlikely.
- **New arrival from Jayed moong in MP continued and pressure is likely to build up from mid-May.** Around 600 bags were reported in Khirkiya market, while arrival in Harsud and Chhenara region too was increasing. Quality of moong is good. It was traded at Rs8700-8890 per qtl. depending on quality. During initial phase of lock down, demand was good, but now it has decreased considerably amid increasing pressure of new arrival. Peak arrival is expected between 15 to 30 th May and so prices of moong are expected to decrease. Jayed Moong area in Gujarat was 110 % higher to 44547 ha. Arrival of summer moong from Bihar and UP is expected in June. Under these conditions pressure may be seen on moong price. It may come down to MSP level soon.
- **With increasing arrivals in producing region and likely higher inflow of import at ports** amid stockiest selling strategy at higher level pressurized cash masur markets in the beginning of May. As demand is weak, more decline is expected in masur price. Masur in Kanpur market is being traded at Rs 4900 and it may decrease to Rs 4600-4700. At this level procurement would increase and it would lend support to masur market. Govt. would procure 1.21 lakh MT masur on MSP. As supply in the market would increase, steady to weak tone may prevail in May. Nafed still has 24,000 MT old stock and it would be distributed free of cost throughout the country up to June.
- **Indian urad importers/millers are active in Myanmar. Market sources say that importers** have brought 1200/1500 MT urad this week at \$710/720 per MT. There was no purchase for SQ variety. Market sources say that shipment of 12000- 13,000 MT may set for India after 5th May, anticipating relaxation in lock down. It may reach Chennai port at 15/16th of May. With same quantity vessel may set for India after 10th May, might reach here on 20th May-2020. Notably, higher import is expected as DGFT has increased import timing for 2.5 lakh MT urad from 30th April to 15 th Of May now.. Besides, 4 lakh MT import quota has been given for 2020-21 that may be imported till March-2021. So, supply side would be adequate in coming weeks.
- **The DGFT increased urad import quota from 1.5 lakh MT to 4 lakh MT and timeline for import** has been extended from 31st March to 30th April-2020. Now due to lock down millers have demanded to extend timeline for application and import till 15th of May. So supply side would increase in April and May. Sudden change in import timeline and likely extension have weighed on market fundamentals and the impact was reflected on price.
- **Continued lockdown due to COVID-19 from last week of March and further** extension till 17th May-2020 have continued to disrupt normal course of trading. Disturbed supply chain, improved demand due to fear of longer duration lockdown have given much needed support to tur cash market. More improvement is expected in coming weeks. Ongoing procurement drive too remains supportive. Lemon tur in Delhi market was quoted at Rs5300-5400. Selling by dal millers continued.. Demand for desi tur is being fulfilled from Kanpur line. Dal millers from Katni are buying tur from MP line. Lockdown continued to affect normal demand. Once it is relaxed, tur price may move up again. Sluggish off take by mills may suppress tur by Rs 100 more from current level. At this level price would stabilize and may move up with fresh bout of demand. Relaxation might be given in the third week of May.
- **Peas market traded steady to weak despite negligible import and lower stock in domestic market.** New arrival and bumper chana crop are restricting upward momentum. New arrival flow in domestic market would continue

till mid-May. So any firm momentum is unlikely. Green peas would continue to trade firm as stock in pipe line is almost nil.

International Market Update:

- **As per agri food Canada area seeded under lentils in Canada is expected to remain unchanged at 1.53 Mha, due to higher expected returns relative to other crops.** With higher yields, production is forecast to rise marginally to 2.2 Mt but supply is expected to decrease to 2.6 Mt due to a fall in carry-in stocks. Exports are forecast to be lower at 2.0 Mt. Carry-out stocks are expected to decrease which will be supportive for prices. The average price for all grades is forecast to rise from 2019-20. The USDA March Prospective Planting report showed that US area seeded to lentils is expected to decrease marginally from last year to 0.47 million acres. Area seeded is expected to fall in North Dakota but rise in Montana.
- **As per latest update by NASS, dry pea acreage may be down by 12-13% this year in US peas producing regions.** Farmers may plant total 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.
- **As per latest update by NASS lentil area may be down by 2-3% this year in US. Farmers may plant total 474,000 acres in crop year 2020., down 2 percent from 2019.** Lower area coverage is expected in Idaho, North Dakota, and Washington from last year, while planting intentions are above last year in Montana (7% increase).
- **Chickpeas area in the US is likely to decrease by 32% from last year.** Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41%. It is really a big surprise this year.
- **Dry peas production in Canada is expected to increase by 1.34 % to 43 lakh MT in 2020-21.** Harvested area has been considered at 1720 thousand ha with likely yield at 2500 kg per ha. In 2019-20 production forecast was 42.43 lakh MT. Thus total supply is expected to increase from 46.19 to 47.85 lakh MT in 2020-21. Despite higher production estimate export figure has been decreased from 35 to 33 lakh MT in 2020-21. However domestic use would increase from 6.94 to 8.60 lakh MT. Carryout too would increase from 4.24 to 6.25 lakh MT this year. Stock to use ratio would increase from 10 to 15 %, while average price might be in the range of \$ 245-275 per MT as per Agriculture and agri food Canada.
- **Dry peas area in Canada is likely to be same in Canada as was seen in 2019-20. It may be 1.75 million ha in 2020-21.** The reason behind it is likely good returns and better export demand. Dry peas production may touch at 43 lakh MT. Supply is expected to rise marginally due to higher carry-in stocks. Exports are expected to be lower than the current crop year and carry-out stocks are expected to rise. The average price in 2020-21 is expected to be unchanged (\$245-275) from the previous year.
- **As per the latest Australian Bureau of Statistics Chickpeas export volume from Australia increased in Jan-2020 in comparison to Dec-2019.** In January -2020, Australia exported 56,502 MT, up 2% from 55,296 the previous month. Bangladesh purchased 36,801 MT. Pakistan was the second most important importer taking 13,073 MT, followed by United Arab Emirates at 3,939 MT.
- **Chickpeas production in Canada in 2019-20 has been pegged at 2.0 lakh MT. It would decrease to 2 lakh MT in 2020-21.** Average price is expected to hover in the range of 455-485 per MT during 2020-21. Import too would decline from 53 to 50 thousand MT in 2020-21.
- **Area coverage under chickpeas in Australia in 2019-20 is expected to decline by 15% to 1.7 lakh ha.** Production has been pegged at 1.7 lakh MT this year, down by 11 % from last year. Decrease in area and production is mainly attributed to lower demand from India and weak price in global market. Slight increase in yield has been seen as mostly chickpeas are grown in central Queensland, where weather condition improved in comparison to last year.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak..

Note: Agriwatch 3rd adv Estimate For 2020-21 for Urad, Moong & Tur & preliminary estimate for Chana and Masur for crop year 2019-20, to be marketed in 2020-21 .

Urad: Urad production is likely to decrease by 21 % from 24.58 to 19.39 lakh tonne in MY -2019-20. Import is expected to increase by 0.5 lakh tonne to 3.5 lakh tonne due to higher import quota. . Total supply would decrease slightly from 36.55 to 31.64 lakh tonne in 2019-20. Export would decrease from 0.3 to 0.2 lakh tonne due to disparity. Consumption would increase from 27.8 to 28.2 lakh tonne in 2019-20. So, carryout out would decrease from 8.75 to 3.44 lakh tonne. As carryout has declined drastically, supply side is expected to be tight this year. Lower crop size is reflecting on price. It is likely to rule at higher level in-2020.

Moong: Moong production is likely to decrease by 10 % from 20.26 to 19.06 lakh tonne in 2019-20. Import is expected to stay steady at 1.5 lakh MT in 2020 too. Total supply is expected to decrease from 29.02 to 26.08 lakh tonne in MY 2019-20. As there is no demand from overseas market due to disparity, export is likely to decrease from 1 to 0.75 lakh tonne in the new season. Consumption would increase from 22.5 to 23 lakh tonne due to improved demand in domestic market. Total usage is expected to touch 23.75 lakh tonne. Carry out would decline from 5.52 to 2.33 lakh tonne. So, any major decline in moong price is unlikely in 2020.

Tur: Tur production is likely to increase by 2.7 % from 36.21 to 37.19 lakh tonne, in the new season (2019-20). Import is expected to increase by 3.5 to 4.0 lakh tonne due to eased restriction on quantity and G 2 G basis import. Total supply would decrease slightly from 48.02 to 49.6 lakh tonne due to improved crop condition. Export may decline to 0.25 lakh tonne due to lower availability in domestic market. Consumption may increase from 40. to 42 lakh tonne in 2020. With export, total consumption has been pegged at 42.25 lakh tonne. Due to lower production and import, carry out would decrease from 7.87 to 6.81 lakh tonne in 2020. Market is expected to find balance and no major spike is expected at this point of time amid commencement of new arrival. Procurement drive may help market to move up.

Chana: Chana production is likely to increase from 95.17 to 106.5 lakh tonne for MY 2020-21(2nd adv estimate). Sowing is over and area has increased over 11% this year. As new year is likely to start with hefty carry in of 18.22 lakh tonne, starting from March, supply side seems to be at ease. Total availability would increase from last year from 115.5 lakh tonne to 127.23 lakh MT. Consumption would increase from 95.5 to 99.5 lakh MT. The reason behind higher consumption is lower peas import this year.

Masur: MY 2020-21 is likely to start with 3.59 lakh tonne carry out amid expected production estimate of 13.1 lakh MT.. Sowing area is almost similar as last year. Import is likely to increase by 0.5 lakh MT as crop is expected to be lower in comparison to increasing consumption. Higher production estimate would keep availability slightly higher level at 24.19 lakh

tonne. Export would increase slightly from 0.1 to 0.2 lakh tonne this year. Consumption has been pegged, at 19.7 tonne in the new season.

Agri Commodity Indices Feb -2020:

Pulses WPI: Pulses WPI decreased by 9points from 154.1 in Jan to 153.2 in Feb-2020

Source: DES govt. of India (Rabi Sowing is at last phase now)

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

Demand for chana and arrival too have started improving now. So mixed trend was seen in cash chana market. As demand for dal improved, millers have started buying in bulk quantity. Procurement drive and bulk purchase by millers have lent support to chana cash market. As govt. purchase would increase further, chana price is expected to improve from current level by Rs 100-150 to Rs 4350-4450 this week. Millers are active in Raj, MH, MP and Gujarat. Overall trend seems firm. If lockdown is relaxed further, demand for chana would increase and it would support cash market price in coming days. Nafed would supply 1.95 lakh MT dal to 19.60 crores families in 36 states under PM Poor Welfare Yojna. Around 5.5 thousand MT dal has already been distributed. Nafed has procured 301,046.77 tonne chana so far on MSP in different states. With 1.15 lakh MT contribution AP leads, followed by Telangana and Karnataka. Procurement pace would increase in Major growing states in May. As old stock is higher with Nafed, any spike in chana market is unlikely.

Mostly market remained closed due to Covid-19 spread. So price are not available for every market in April. Available price is only for Delhi and average price increased by 3.41 % to 4271 in April against 4130 in March-2020. Even Australian chana average price increased by 12.16 % to Rs 5393 during the same period.

Price Dynamics: Prices are likely to stay steady to slightly weak in May due to

- Bumper production prospects and slower pace of procurement in April
- Availability of higher stock with Nafed and private hands
- Stockiest/millers are avoiding bulk buying at this point of time due to uncertainty over demand.
- Weak futures
- Weak international market.

Seasonality Index: hints weak movement for spot market in May-2020.

Chana Future Market Analysis:

Technical Commentary:

- Decreasing price & OI hint market to trade weak in the short term.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs

Strategy: Buy On Dip

Supports & Resistances			S1	S2	PCP	R1	R2

Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	June	Buy Above	4150	4250	4300	4100

Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

Pea import in India remains restricted and quota for import has been fixed at 1.5 lakh MT annual for 2020-21 like previous MY year. However, despite fixed quota peas import crossed the level of fixed quota due to illegal trade through Nepal and Bangladesh border. As new arrival is coming into markets desi pea is being traded at Rs 4800-4850 in Kanpur market. Demand of peas and its dalis weak due to lockdown and situation is unlikely to improve. Availability of chana is higher and people are turning to cheaper chana dal now. So, yellow pea market would not move up as demand is very weak at current price. However, green pea would continue to trade at higher level as stock in domestic market is declining fast. Overall, yellow pea may trade steady while green peas may trade up in May.

There is no price availability of yellow/white peas in Mumbai market as import is restricted and stock is almost nil. In Kanpur market yellow peas is being traded at Rs 4800-4850. It has decreased from Rs 5400 to Rs 4800 in last one month. However, green peas price has increased from 11900 to 12300 per qtl. It may stay steady to firm in May-2020.

Market Recap:

New arrival from local market continues despite decreasing arrivals in various markets. As demand at current price is weak, yellow pea would continue to trade steady in May. There is no demand for mixing in chana for besan. Chana is abundantly available right now. It would remain price restricting factor in coming months.

Price Dynamics: Pea market is expected to trade steady to slightly weak in May due to:-

- Continued new arrival from local markets
- Lower demand at higher level
- No demand for besan as chana availability is higher in domestic market
- Cheaper availability of other pulses

Spread With Chana:

Spread between Chana and Peas, at Kanpur market is at zero now as govt is procuring chana at MSP and both commodities prices are now at similar level. Gap has decreased from Rs 1000 to Rs 0 in last one month, based on monthly average of the price. Spread is expected to remain at same level in May on relative movement in Chana prices. Overall outlook seems steady to weak this month.

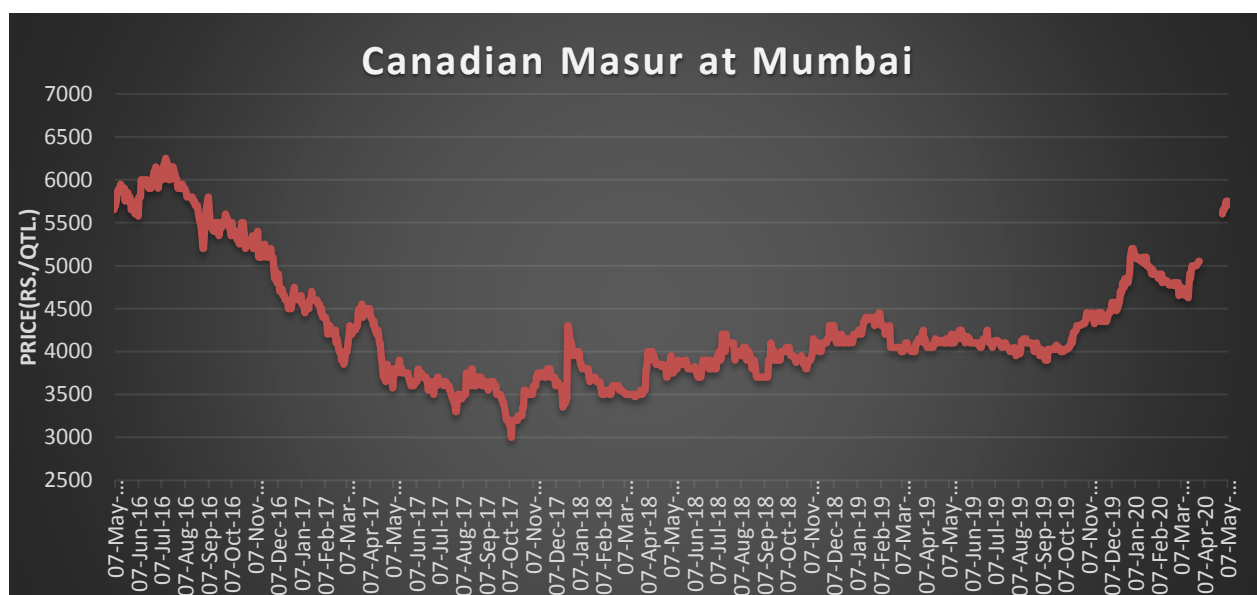

Seasonality Index depicts that pea prices are likely to notice slight decrease in May-2020.

Market Outlook For May:: Steady to slightly weak movement is expected.

Masoor (Lentil/Masoor):

Millers are facing shortage of masur as supply chain remains disrupted from producing regions. Stock with mills too is decreasing. Loading of imported stock at ports is unexpectedly lower while availability of old stock is decreasing fast. However, local stockiest have started releasing stock taking advantage of higher price ahead of procurement drive and import inflow. All these factors impacted masur price and it traded at Rs4900-4950 in various markets. Under prevailing condition masur cash market may improve once again. As prices are ruling higher than MSP, so govt.s agencies would not be able to procure 1.21 lakh MT, set target for the year.

Price Trend In Cash Market:

Price Dynamics:

In April-2020s, average price in key market Kanpur was up by 11 % from Rs 5000 to Rs 5625 per qtl. MoM basis. Prices are likely to trade steady to slightly weak in May-2020 .

Weak movement is expected due to:

- Selling by stockiest amid new arrival
- Availability of stock with Nafed/Selling in open market
- Imported stock/continuous import
- Weak demand in retail market due to free distribution of dal by central govt for three months u to June

Seasonality Index depicts steady to slightly weak movement in May-2020.

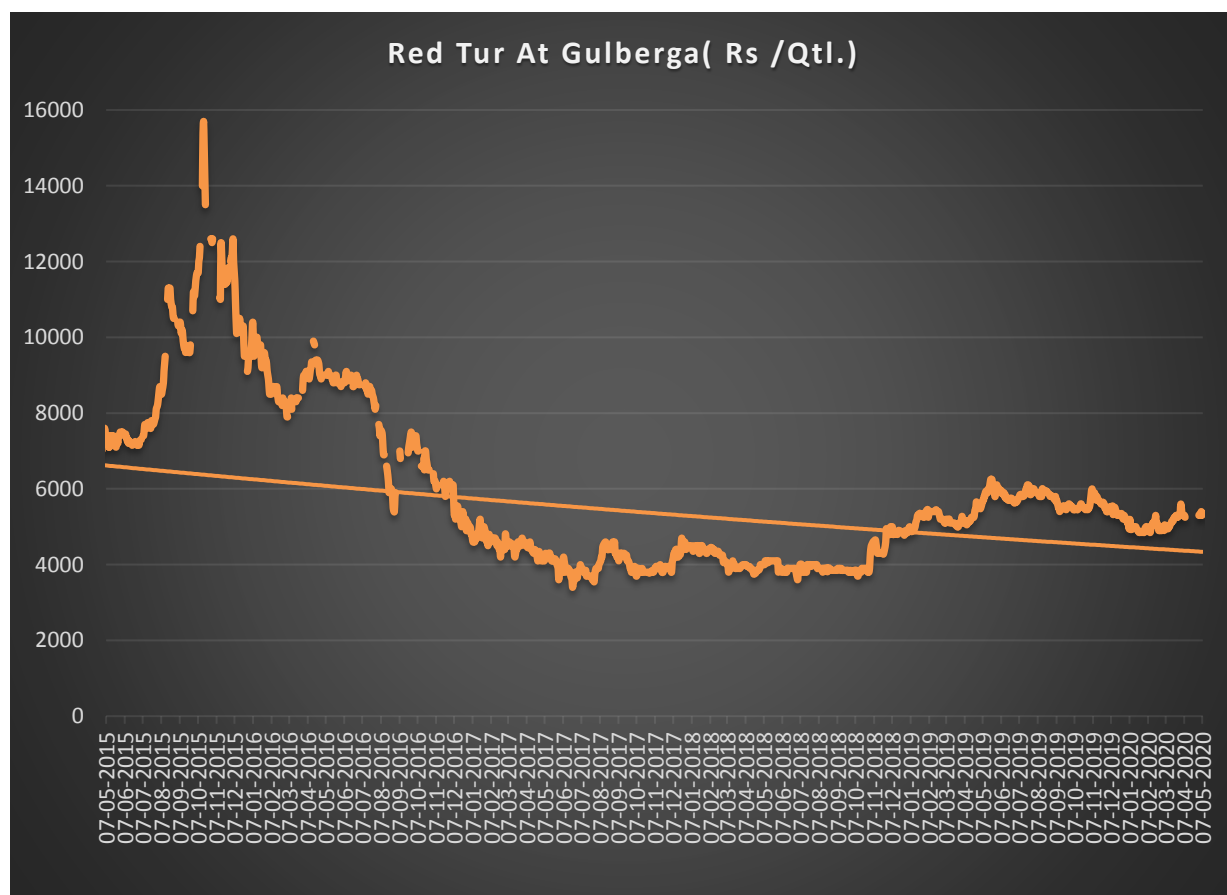

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

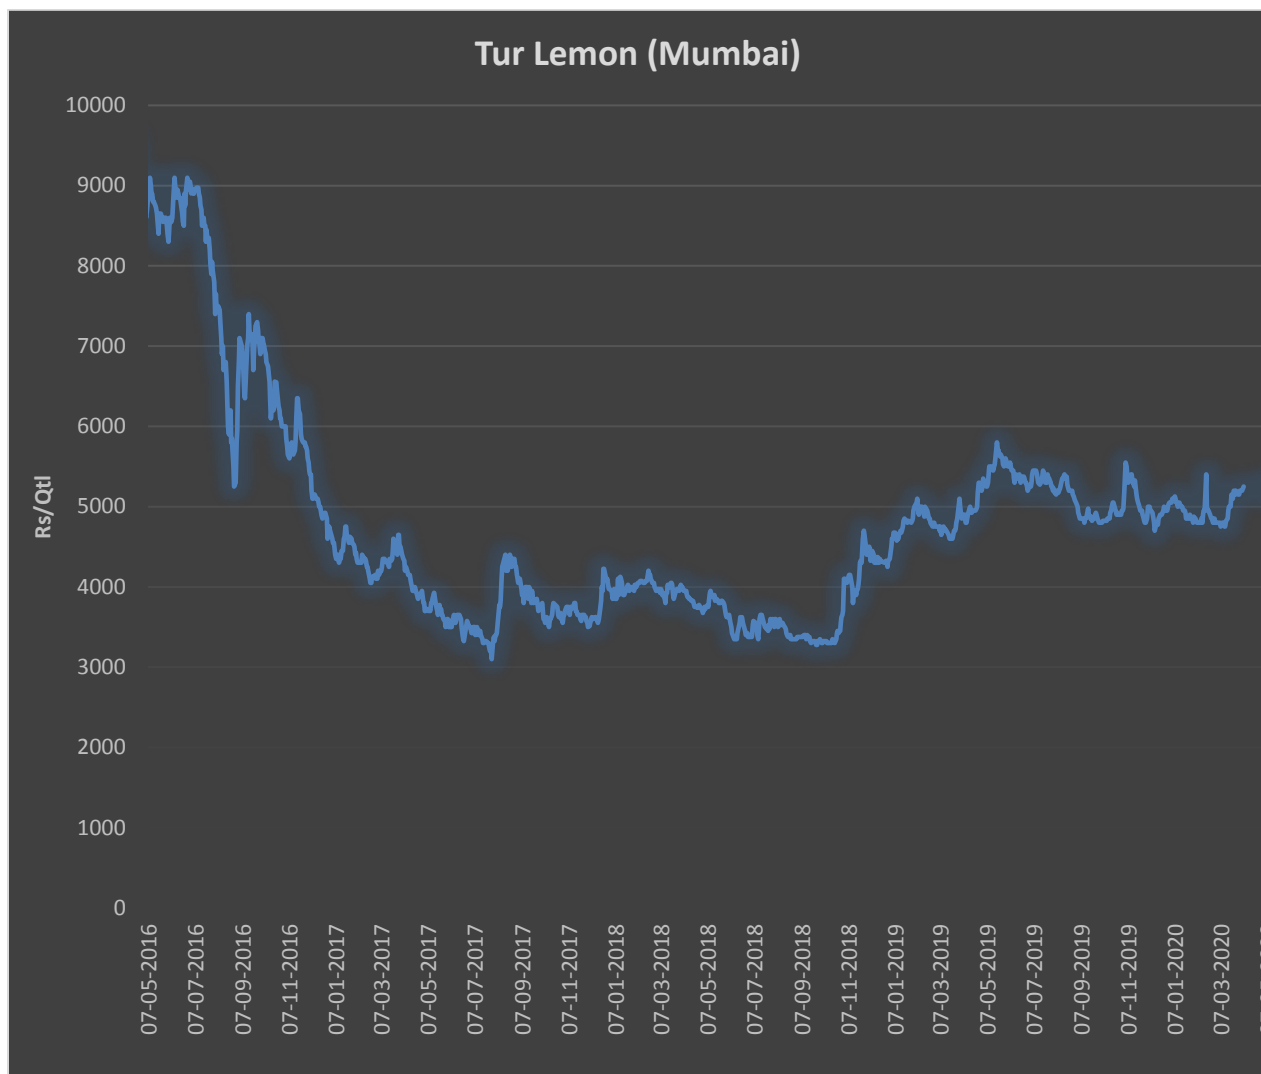

Fundamental Analysis and Outlook:

Weak upcountry and local demand for tur dal capped uptrend in tur market. Lemon tur in Delhi market was quoted at Rs5400. Dal millers too have started selling by giving discount of Rs100-200 due to sluggish demand. However, demand for desi tur is being fulfilled from Kanpur line. Dal millers from Katni are buying tur from MP line. Lock down too has affected normal demand. Once lockdown is relaxed, tur price may move up again. Sluggish offtake by mills may suppress tur by Rs 100 from current level. At this level price would stabilize and may move up with fresh bout of demand. Relaxation is expected in the second fortnight of May. Crop condition is good in Myanmar. Tur in Gulberga market is being traded at Rs 5100-5150 per qtl. Ongoing procurement drive may lend some support to tur cash market from mid- May..

Market Recap:

Tur procurement target has been fixed at 545573 MT. As of now (5th May-2020) 125338 MT tur has been purchased. With new purchase and old stock with Nafed combined is around 4.51 lakh MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up. Procurement target has been decreased this year due to lower kharif crop size, so that supply in open market would be lower. Crop size may cross 37 lakh MT. Import quota has been fixed at 4 lakh MT for 2020-21. Back log of last year would continue too till 15th May-2020. Cash market is expected to trade in the range of Rs 5200-5500 during May-2020..

Price Dynamics:

In Apr-2020, average price in Gulberga market was up by 2.50% from 5000 to Rs 5150-5200 per qtl. due to procurement drive and fresh demand from mills amid lower pace of import. Tur price in May is likely to improve due to

- Commencement of procurement
- Slower import through G2G basis
- Import by private trade may be delayed by one month
- Likely higher demand from retailers/mills and
- Below normal crop(average of 3 years is 40 lakh MT)

Seasonality Index-depicts steady to slightly firm movement.

Market Outlook for May:

Fundamental remains supportive for Tur cash market in the near term.

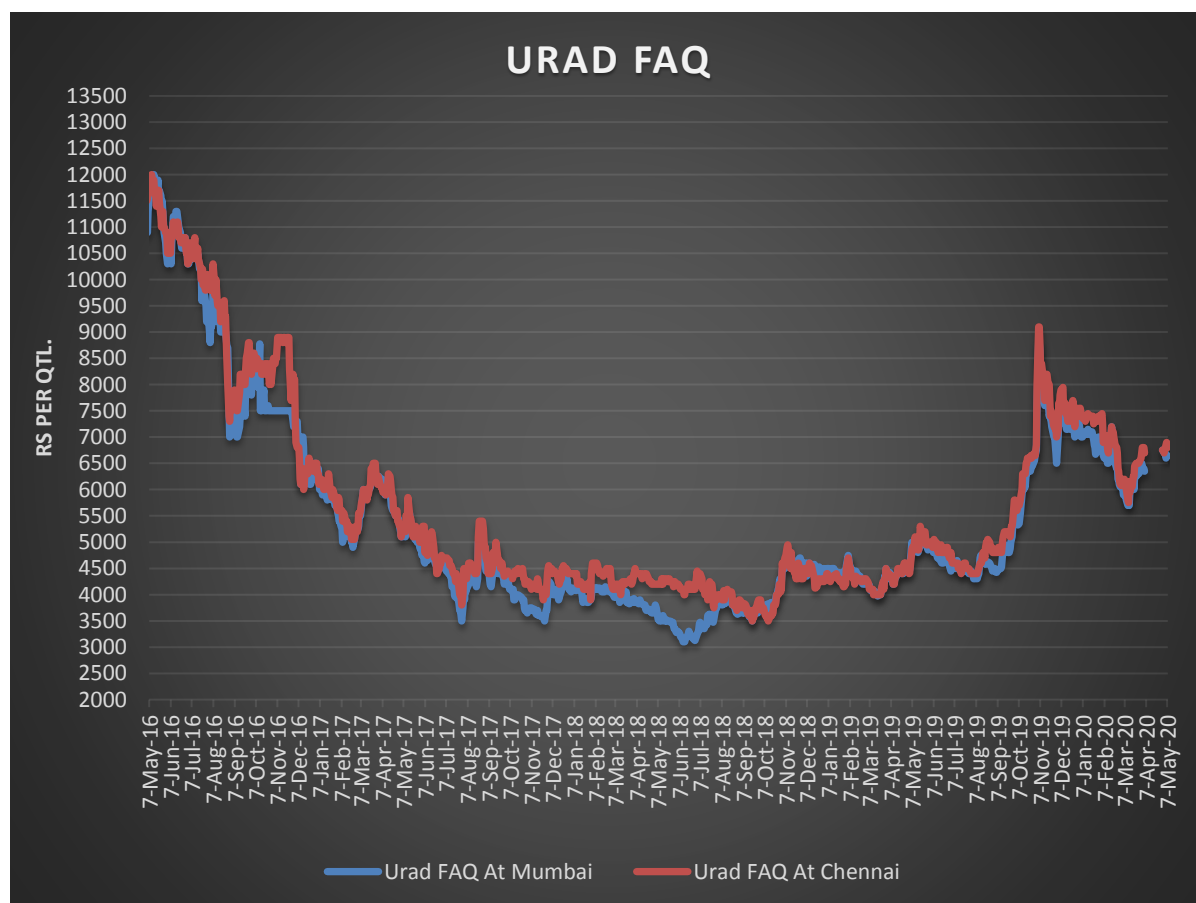

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

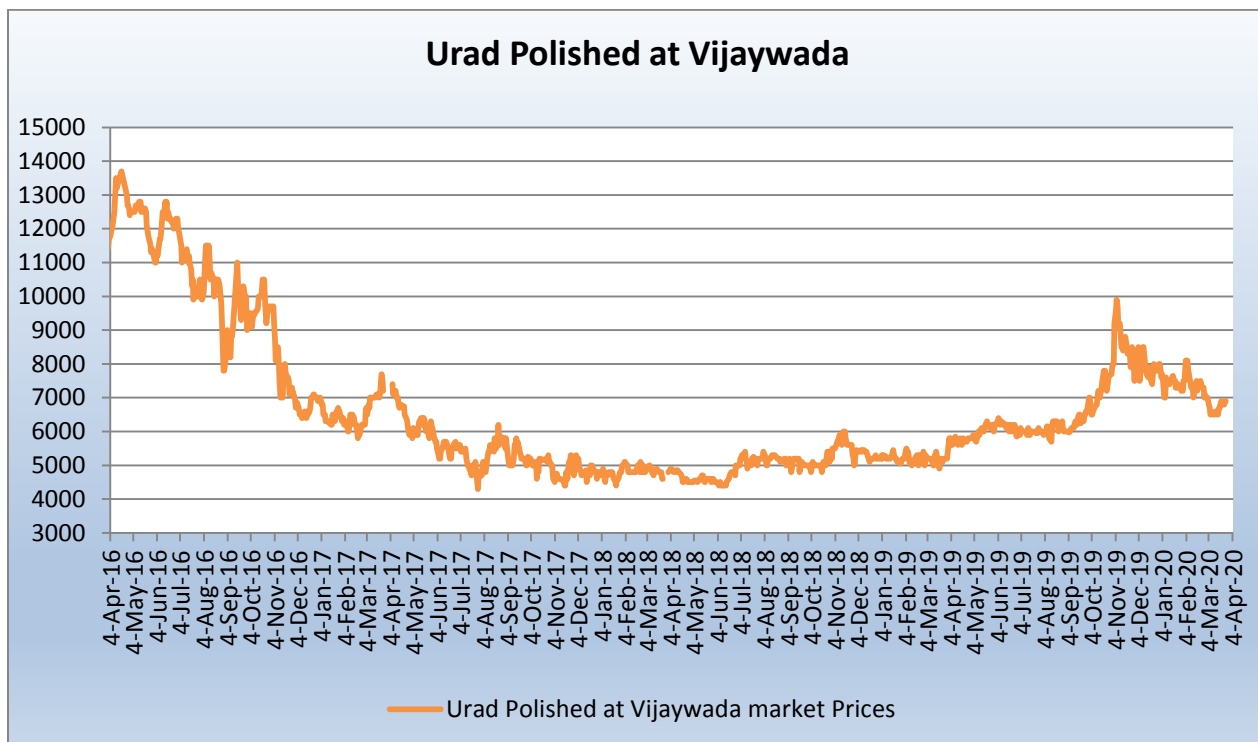

Market Recap:

Indian urad importers/millers are active in Myanmar. Market sources say that importers have brought 1200/1500 MT urad this week at \$710/720 per MT. There was no purchase for SQ variety. Market sources say that shipment of 12000- 13,000 MT may set for India after 5th May, anticipating relaxation in lock down. It may reach Chennai port at 15/16th of May. With same quantity vessel may set for India after 10th May, might reach here on 20th May-2020. Notably, higher import is expected as DGFT has increased import timing for 2.5 lakh MT urad from 30th April to 15 th Of May now.. Besides, 4 lakh MT import quota has been given for 2020-21 that may be imported till March-2021.

So, supply side would be adequate in coming weeks. Urad in Mumbai market traded at Rs 6600-6650 and may decrease to Rs 6000-6100. In Chennai market it is being offered at Rs 6700-6800 and SQ at Rs7300-7400 per qtl. Overall trend remains weak.

No price is available for Vijaywara market due to closure of market. Market remained closed in April and no trade is expected before mid-May.

Seasonality Index depicts range steady to slightly weak tone in the near to medium term.

Price Dynamics:

In April, average prices in key markets including Mumbai/was up by 5.5 % percent from 6450 per qtl. to 6750 in April. In Chennai it was up by 6.5% to 7300. Prices may stay steady to slightly weak in May due to

- Higher import quota(4.0lakh MT) and commencement new arrival from Rabi crop
- Selling of old stock from central pool
- Weak demand at higher level
- Good crop condition so far and
- Cheaper availability of other pulses.

Market Outlook for May : Prices are likely to trade steady to slightly weak .

Fundamental Analysis and Outlook For Moong:

Market Recap:

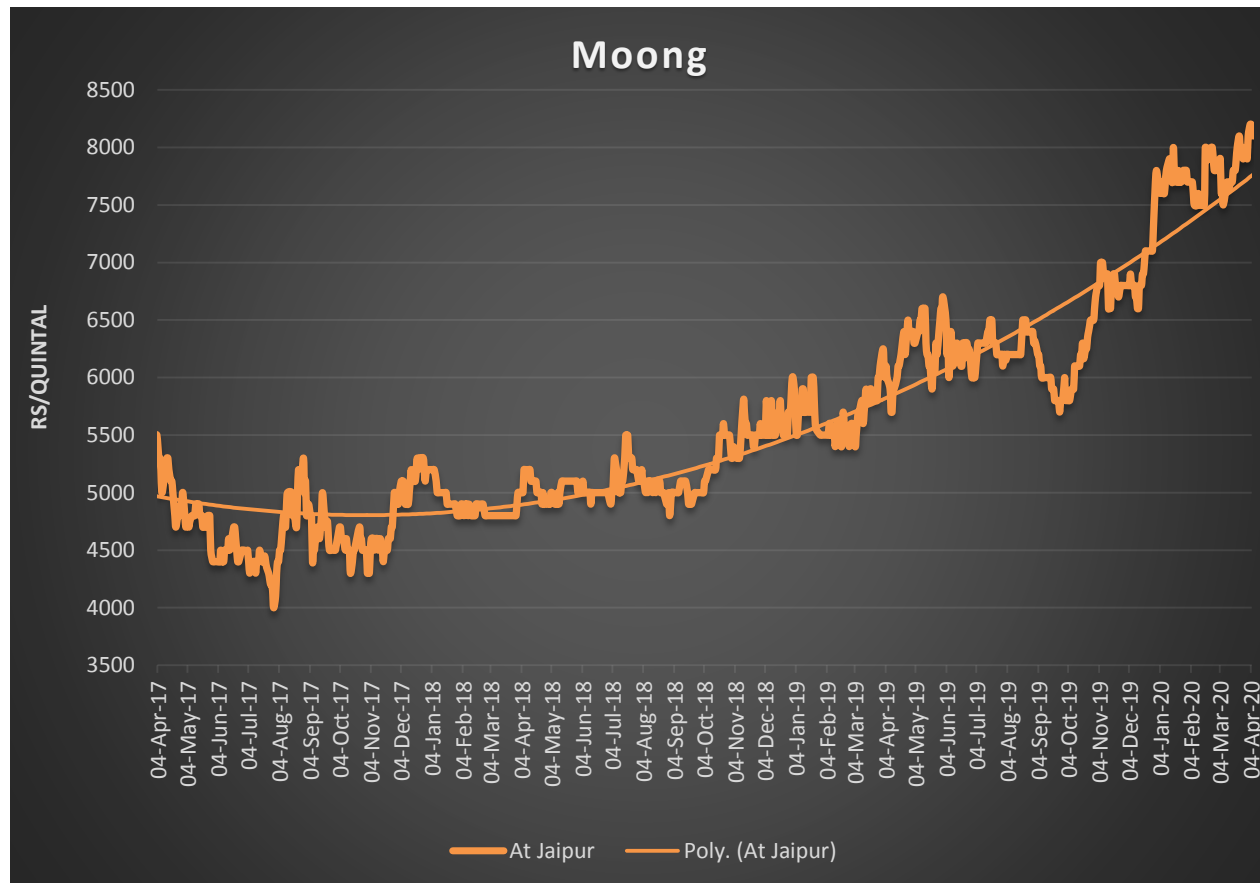

New arrival from Jayed moong in MP continued and pressure is likely to build up from mid-May. Around 300 bags were reported in Khirkiya market, while arrival in Harsud and Chhenera region in too was increasing. Quality of moong is good. It was traded at Rs8700-8890 per qtl., depending on quality. During initial phase of lock down, demand was good, but now it has decreased considerably amid increasing pressure of new arrival. Peak arrival is expected between 15 to 30 th May and so prices of moong are expected to decrease. Jayed Moong area in Gujarat was 110 % higher to 44547 ha. Arrival of summer moong from Bihar and UP is expected in June Under these condition pressure may be seen on moong price. It may come down to MSP level.

Price Dynamics:

Arrival of new summer moong in Khirkiya and adjoining regions begins. Quality of moong is very good and total arrival in these regions was reported at 2000 bags and may increase to 5000 bags in next one week. The new moong was traded at Rs 8500-8600 per qtl. With increasing arrival, prices are expected to decrease further by Rs300-400 from current level. Quality is good while moisture level is higher right now. Millers are active at this price. Apart from this new arrival in Saurashtra district begins and from UP and Bihar it is expected from 15th of May. So, moong price is bound to decrease from current level. With relaxation in lock down, supply side may ease in coming weeks.

\

Price Trend:

Market is expected to trade weak in May due to:

- Likely arrival in markets from Jayed (between rabi and kharif season) crop
- Quality of new crop is good and abundantly available in Rajasthan, UP, MP and Bihar
- Old stock in central pool
- Increased availability of moong in global market and
- Weak demand due to free distribution of pulses by central and state govt till June (Around 5.5 lakh MT pulses are likely to be distributed among people throughout country).

Seasonality Index depicts weak movement in the near term.

Market Outlook for May: Steady to slightly weak movement is expected.

Pulses Wise Technical Outlook for April -2020: -

Chana:

Outlook –We noticed steady to slightly weak movement in April-2020. Market may trade up in May due to:

- Procurement drive at MSP
- Holding of stock by farmers as cash market price is lower
- Weak demand/distribution of pulses free of cost
- Weak demand for besan due to closure of markets/other offices
- Restricted buying by private trades and weak futures
- Expected price band for Chana in Delhi is 4100 to 4450 levels in this month.

Trade Strategy: Buy on dip

Trade Recommendations: Go long around 4200 with the first target of 4350 and second target 4450 with stop loss at 4100 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3900	4100	4275	4450	4550

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart

Note: No price update available due to closure of markets/ports in April/May

Outlook - We expect prices to notice steady to slightly weak movement in this month.
