- Price Trend (Seasonality)
- Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
- India
- Australia
- Canada
- US

Pulses Sector-Highlights

- **Weather condition remains dry in the central and north India while some** cloudy weather with light rains were witnessed in south and eastern parts of India. In main growing land harvesting of rabi crops (moong, urad, lentils, peas and chana) continue. Yield is lower in Rajasthan, Madhya Pradesh and Maharashtra for chana while it is good in Karnataka, Gujarat, A.P. Chana yield in U.P. and Bihar is expected to be normal to good. Lentils yield in Uttar Pradesh may be lower for late sown crop due to increasing temperature and moisture stress in the field. Tur crop condition is good in U.P and Gujarat while yield realization is low in Karnataka, Maharashtra and A.P. Moong yield recovery from rabi crop is normal to poor while summer crop is in good condition. Rabi urad yield is average to normal. Production could not increase from rabi crop despite higher area coverage due to bad weather condition, moisture stress and closure of Canal in Rajasthan in main growing region. The impact of lower production reflects on price now.
- **Sensing the tight supply side Agriculture and Commerce Ministry has allocated 4 lakh MT urad import quota one month earlier for next financial year .It may help to ensure supply side June onward.** Licenses would be allocated to millers/processors after verification of mills premises and its capacity. It may take two month time. In another developments Tamil Nadu pulses exporters and importers association has requested to Agriculture and Commerce ministry to extend deadline for urad import for ongoing financial year quota from 31st March 2021 to 31st May 2021 as importers are unable to import due political unrest in Myanmar. Decision is awaited.
- **As prices are moving up in domestic market for all pulses, govt may consider to increase** peas quota and reduce MIP. Peas availability is almost negligible and its daal prices are ruling at all time high. Currently, local crop is being traded at Rs 6500-6600 per qtl in Kanpur market while green matar is hovering above 8000..New arrival of green peas is increasing. However, it would not help to keep domestic prices down due to low crop size.
- **Chana production is likely to be revised down by 8-10 lakh MT from AW preliminary estimates of 11 MMT.** AW survey is under process in various states and AW would publish the revised estimates in April's report. Procurement has started on MSP. Nafed and other state agencies would procure over 2MMT chana under price support scheme this year. Private buyers are active and AW expects prices to move up to MSP level soon. In major growing region it may hover in the range of Rs 4800-5200, depending on quality. Overall tone remains firm despite 1.8 lakh MT carry in. Prices in various market increased by Rs 150-200 during last 10 days.
- **Low crop size of tur and below 1 lakh MT old stock with Nafed are keeping prices up in local markets.** Private trades have stocked tur at higher level and they would not release it before August Sept. Apart from it import flow would be low as availability is not enough to fulfil Indian demand. So prices of tur may move further up and may touch Rs 8000 in next two months. Right now slight downward correction is expected as demand for daal is weak. Demand may improve April onwards when marriage season begins. In Gulberg market tur is being traded at Rs 6800-6900. Crop from U.P. is yet to start. Import flow from Myanmar too may disrupt cargo. Agitation is still on in Myanmar.
- **Even at urad front supply side is tight in domestic market despite new arrivals in south Indian states.** Import flow has not been up to the mark as low availability in Myanmar amid ongoing political unrest.

Sensing the short supply govt has allocated 4 lakh MT import quota one month earlier than normal expectation. However, import will not take before June end –July. Urad stock in India is in strong hands and it will keep prices well supported at current level. Prices are unlikely to decrease until new kharif crop hits the market in August –Sept. As demand for daal is weak, prices are ruling steady. Urad in Mumbai and Chennai market is being traded at Rs 7300 and Rs7400 respectively. It may continue to hover in the range of Rs 7100-7600 per qtl..

- **Moong may cool down in coming months as arrival from summer crop will start** from April. Crop condition in Odisha, U.P. and Bihar. Right now demand for moong daal is weak. Nafed may release stock to cool down price. As prices are ruling higher than MSP for quality crop, Nafed's procurement quantity is negligible this year from rabi crop. Import volume is limited due to quantity restriction and disparity at current level. Steady to slightly weak tone may prevail in moong cash market. In Jaipur market moong chamki is being traded at Rs 7300, may decrease to Rs 6800-7100.
- **Current uptrend in masur market is unlikely to continue as arrival from new crop started** in M.P. and Uttar Pradesh, followed by Bihar from Mid – March-2021. Importers may prefer to offload imported stock and so supply side is about to increase. Crop condition is good and Agriwatch expects 13.00-13.50 lakh Mt production this year under normal weather condition. Lentils price may decrease to Rs-4900-5000 by end March or until procurement starts in Bihar, MP and UP. In Kanpur market lentils is being traded at Rs 5300-5400 while in Mumbai at Rs 5400-5450.

Global Market:

- **Lentils export from Canada declined by 36% in January-2021 to 106,9031MT. It was 166538 MT in Dec-2020.** Canada had exported 1,015,138MT in Jan2020. The UAE & Turkey were major buyers in Jan-2021. India imported only 11,430MT In Jan-2021. As Ramadan is about to start muslim countries are importing pulses in higher quantity. Indian buying may remain restricted as new crop is coming into markets now. The bulk loadings for the marketing year goes up to 553,100 MT, compared to 358,300 MT during the same period last season.
- **According to statistics Canada peas export decreased by 15% to 278686MT in Jan-2021.** It was 327429MT in Dec2020. In jan 2020 Canada had exported 193,727MT up by 11%. China, Bangladesh and US were major buyers in Jan-2021, buying 216,036,31717 and 4887 MT respectively. China is fulfilling the demand gap created by India right now. Spain, Turkey and Italy too were buying peas from Russia.
- **Lentils export from Australia has posted slight gains (4%) in Jan-2021 over previous month.** It was 98071MT in Jan -21 against 94710 MT in Dec-20. Bangladesh, Egypt and Sri Lanka were major buyers of Australian crops, buying 33524, 31281 and 11260MT respectively. Demand may decrease in April-2021 as immediate needs of major buyers seem to be over by then.
- **Chickpeas export from Australia posted smart gains in Jan-2021 over Dec-20.** Shipment in the opening month was up by 74% to 186798 MT. It was 107113 MT in Dec-20. It was 150963 MT in Jan 2020. Bangladesh was top buyer purchasing 137,045 MT, followed by Pakistan (33,480 MT) and UAE purchased 7359MT.

- **Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22** due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.
- **Dry peas production in Canada is expected to decrease from 45.94 lakh Mt in 2020-21 to 44.00 lakh Mt in 2021-22** due to lower expected yield from 2.73 to 2.57 tonne in 2021-22. Total supply too would decrease from 49.22(2020-21) to 47.90 lakh MT in 2021-22. Export fig too is expected to decrease from 38 to 37 lakh MT in 2021-22. However, domestic usage may increase from 8.22 to 8.40 lakh MT in 2021-22. Carryout would decrease from 3 to 2.5 lakh MT. Yearly average price may hover at \$300 per MT in 2021-22 against 4330 in 2020-21.
- **Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh Mt in 2020-21.** Even field peas production would increase from 2.19 to 2.94 lakh MT in 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service
- **The USDA has released its final pulses production report of the year this Tuesday, Jan. 12, 2021** by the National Agricultural Statistics Service. As per new data dry peas are compiled by the National Agricultural Statistics Service. Dry peas production for 2020 has been pegged at 985,976 MT on 973,000 acres. Dry pea production as an average of all U.S. pea growing regions is down approximately 2% of last year, sitting at 21.7 million cwt in 2020, almost 986,000 MT, with planted acreage hitting 1 million acres.
- **Global field peas market traded slightly up on the back of higher buying by exporters** for meeting sales commitments. Whole green and yellow peas prices are increasing in Canada and USA too as they paid farmers higher prices. Maximum stock in Canada has been sold out by farmers. It leads to higher prices of peas.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.

*AW preliminary estimates, ** final estimate

Note (for chana and Masur crop year is 2020-21 and it will be marketed in MY is 2021-22

Kharif Pulses:**Urad:**

MY 2020-21 started with 2.37 lakh MT carry in stock while production is up by 4.89 lakh MT to 24.19 lakh MT this year. It would increase supply to 30.06 lakh MT including imports. Supply side is hence expected to remain slightly tight. Crop condition is normal to good except some pockets of Maharashtra, Madhya Pradesh and Gujarat, so far. Rabi sowing passed the half way mark.

Moong:

The new season started with 2.10 lakh MT carry in while production is up by around 2.36 lakh MT to 21.42 lakh MT this year. Despite higher production total supply would increase slightly to 25.17 lakh MT due to lower carry in stock. So the prices should remain on the higher side in 2021 too

Tur:

Production of Tur is likely to increase from 37.19 to 37.28 lakh MT this year due to lower yield despite higher area coverage. Total supply would decrease from 49.56 to 48.14 lakh MT this year. Supply side seems contracting in the ongoing season in comparison to last year.

Rabi Pulses: Chana: Agriwatch has projected 110.63 lakh MT chana production in crop year 2020-21,to be marketed in 2021-22.As of now supply side is at comfortable level. Total supply would increase to 133.95 lakh MT. Carryout would increase to 23.95 lakhMT

Masur: AW preliminary production estimate for masur is 13.49 lakhMT. As stock is ample with high carry in stock, prices would remain under pressure in new season starting from March-2021. Weather condition in March is still crucial.

Area & Yield Estimates For Kharif Tur, Urad & Moong-2020-21:

Agriwatch APY Estimates Of Tur For 2020-21			
State	Harvested Area ('000' Ha)	Yield (kg /ha)	Production ('000' MT)

**Chana (Chickpeas /Bengal Gram):****Market Recap:**

Cash chana market traded up in Feb by 2.28 % to 4700 in comparison to January-2021. Australian chana too traded up by 4.28% to 5481 per qtl. Lower crop size in Rajasthan, Madhya Pradesh and Maharashtra amid ongoing procurement drive under price support scheme and lower arrivals have lent support to cash chana market. Prices of chana may move further up and may touch MSP level of 5100. Govt wants to procure over 2 MMT chana in 2021. New arrivals in various states like Andhra Pradesh, Karnataka, Maharashtra and MP have started. Crop condition in Karnataka and Gujarat is average to good while crop in UP is expected to be good this year. However, AW would revise chana production down by 8 to 10 lakh MT from its preliminary estimates of 11 MMT. New season would start with 1.8 MMT carry in stock so availability would remain at comfortable level throughout the year. Peak arrival season is March and April in India. Higher carryin would compensate losses in other states. Steady to firm movement is expected in chana market.

Import flow would remain restricted as duty plus is 60%. Import flow may continue from least developed countries as they enjoys benefit of zero duty. Following graph illustrates chana price movement in different markets:

Price Dynamics: Prices are likely to trade steady to slightly firm in March-2021 due to:

- Ongoing procurement drive
- Low yield realization in Rajasthan, MP & Maharashtra
- Target to procure over 2MMT under price support scheme
- Buying by stockists and mills
- Restricted import
- Likely good demand in marriage season &
- Restricted sale by Nafed in procurement season.

Seasonality Index: hints slightly weak movement for spot market for March-2021.

Experts have different views over Canadian & Australian chickpea supply and demand estimates. They think Canada is underestimating domestic usage. As per federal agency there were 408,000 metric tons (MT) of chickpeas on hand in Canada, up sharply from 328,000 the same time the previous year at end of Feb-2021. Farm stock increased from 3.09 to 3.80 lakh MT while commercial position increased from 19,000 to 28,000 MT. Production in Australia has been pegged over 7.5 lakh MT. So availability is good at global market. Pakistan, Bangladesh and other Muslim countries are major buyers right now as Ramadan season is about to start.

Chickpeas export from Australia posted smart gains in Jan-2021 over Dec-20. Shipment in the opening month was up by 74% to 186798 MT. It was 107113 MT in Dec-20. It was 150963 MT in Jan 2020. Bangladesh was top buyer purchasing 137,045 MT, followed by Pakistan (33,480 MT) and UAE purchased 7359 MT..

Chana Future Market Analysis:

Technical Commentary:

- Increasing price & OI hint market to trade firm in the medium term.
- RSI is moving up in neutral region, hints caution to bears.
- Prices closed above 9 and 18 days EMAs

Strategy: Buy on Dip

*Don't carry forward position for the next month

**Field Pea (Matar/Dry Pea):****Fundamental Analysis and Outlook:**

Availability of imported stocks at ports are almost negligible and prices are ruling higher despite new arrivals from domestic crop. In Kanpur market peas is ruling at Rs 6000 while green peas is hovering at Rs 8200-8400. As prices of pulses in domestic market is ruling higher than normal expectation, govt may increase import quota and allocate quota for next financial year, starting from April-2021 soon. Govt may decrease duty on peas to increase supply and cool down other pulses price.

Despite stable demand for peas and daal, prices are expected to trade steady to slightly weak. Consumers have shifted from peas daal to other cheaper options. So govt.'s move is very crucial from peas price point of view. Following chart shows price movement in various markets:

Canada peas export decreased by 15% to 278686MT in Jan-2021. It was 327429MT in Dec2020. In jan 2020 Canada had exported 193,727MT up by 11%. China ,Bangladesh and US were major buyers in Jan-2021,buying 216,036,31717 and 4887 MT respectively. China is fulfilling the demand gap created by India right now. Spain,Turky and Itly too were buying peas from Russia.

Price Dynamics:

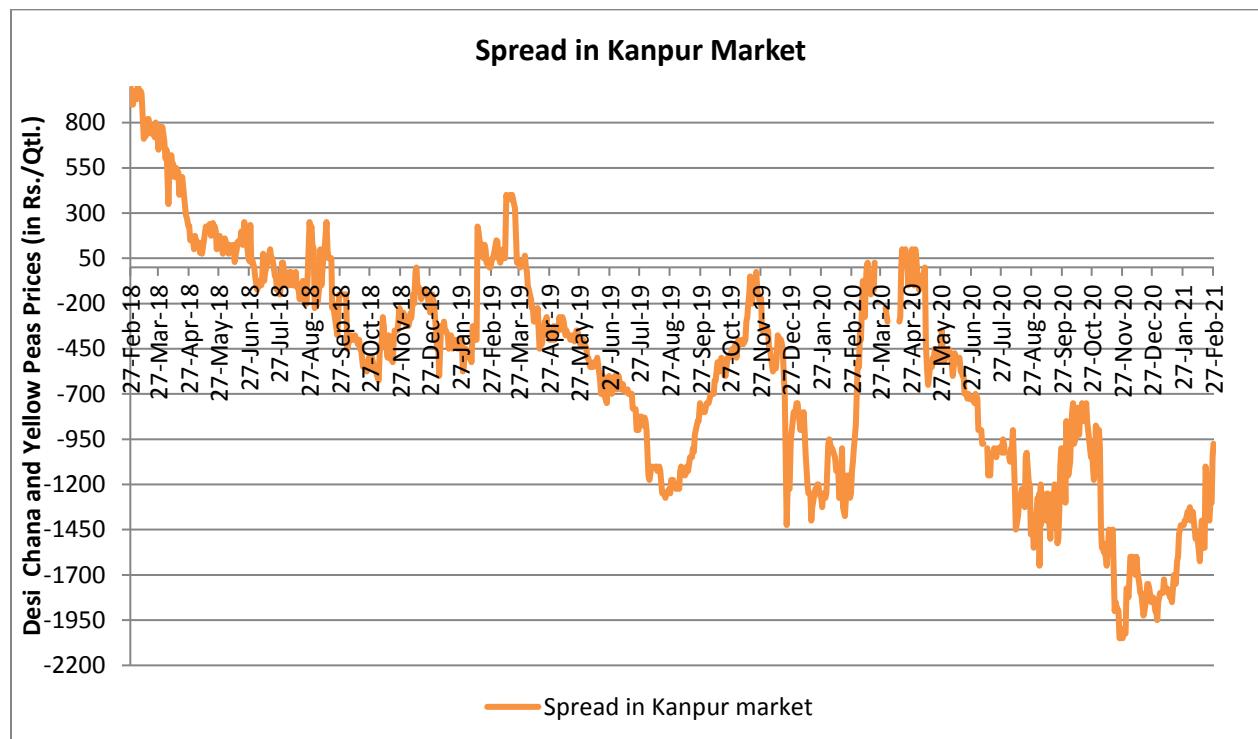

Pea market is expected to trade steady to slightly firm in March due to:-

- Stable demand in domestic markets despite higher price

- Higher availability of other pulses at cheaper prices.
- New arrivals from local markets and
- Stable international market

Spread With Chana:

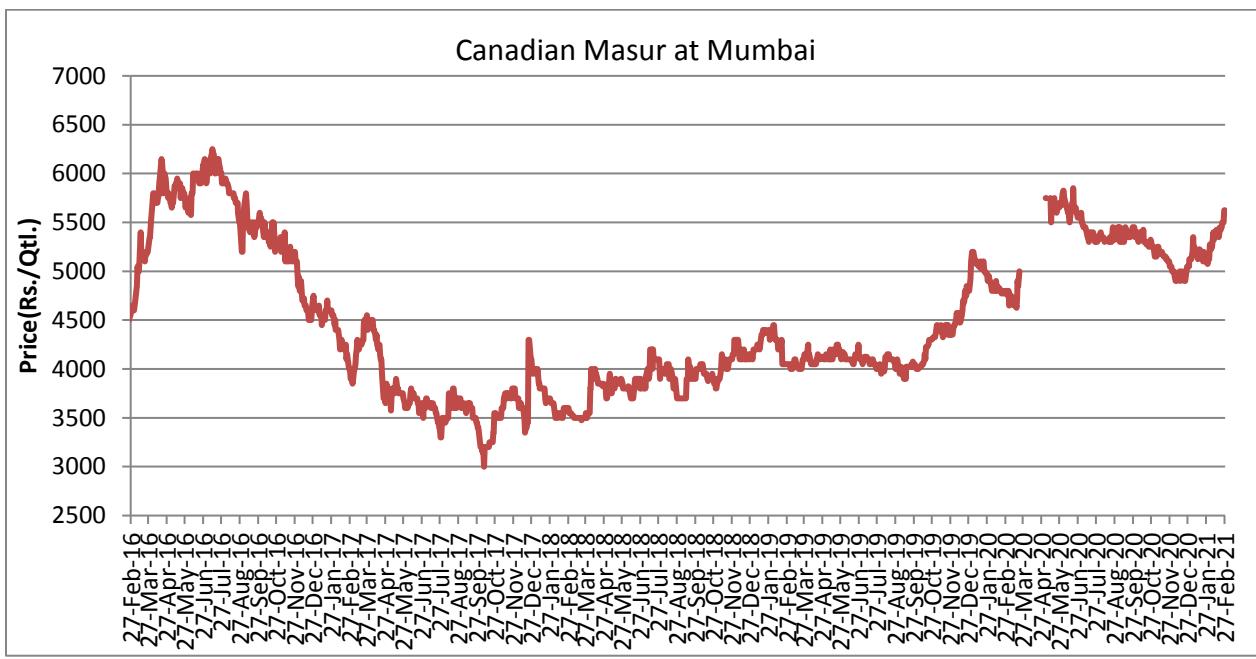

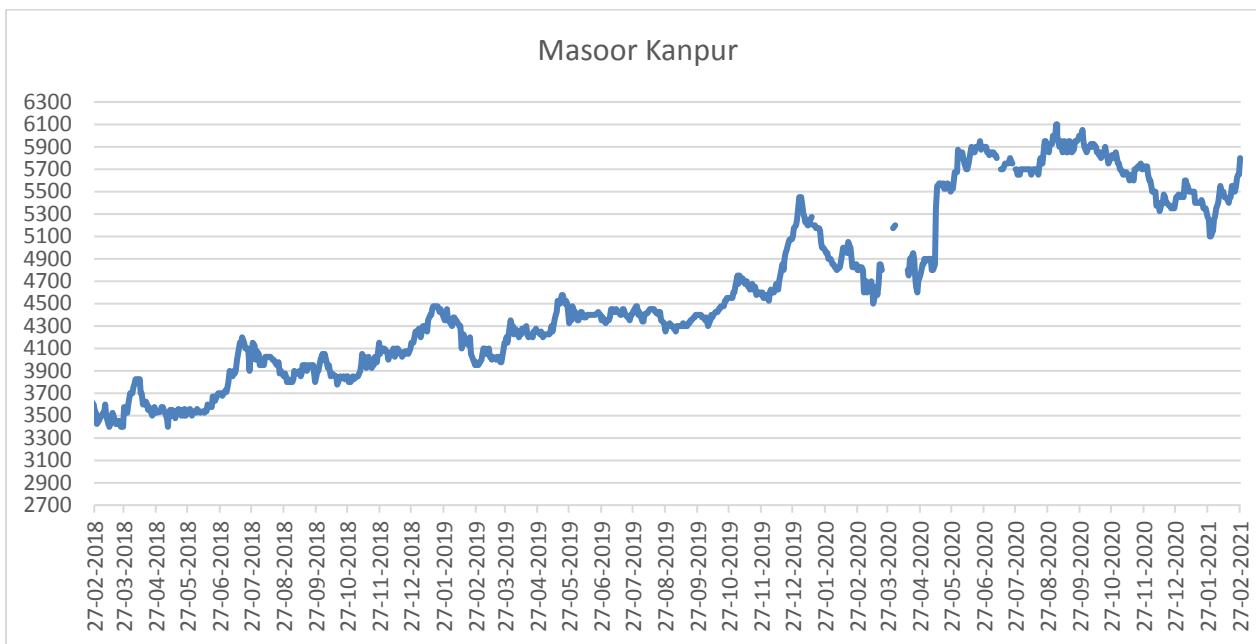

Gap has decreased from Rs 1692 to Rs 1070 in February over January-2021, based on monthly average of the price. Spread is expected to remain at negative zone in March too on relative movement in Chana prices.

Market Outlook For March: Steady to slightly weak movement is expected in March-2021.

Masoor (Lentils):

Lentils prices are ruling higher than our normal expectation despite new arrivals in MP and likely soon from UP and Bihar. Crop condition is good except fear of some yield loss in UP and Bihar. Agriwatch expects 13.0-13.50 lakh Mt production this year under normal weather condition. Major exporters like Australia and Canada are trying to sell as much as they can before Ramadan. By end March we expect to increase in Uttar Pradesh and Bihar. So prices should decrease and may come near MSP. It may trade near 4900-5200 by March end.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22.

**Price Trend In Cash Market:****Price Dynamics:**

In Feb-2021, average price in key market Kanpur was up by 0.99 % from Rs 5417 to Rs 5471 per qtl. MoM basis. Prices are likely to trade range bound to weak in March-2021

Range bound to weak movement is expected in March due to:

- Eased supply side with new arrivals

- Ample availability of imported stock
- Availability of 15000 Mt masur with Nafed
- **Outlook for March:** Steady to slightly weak tone may prevail

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

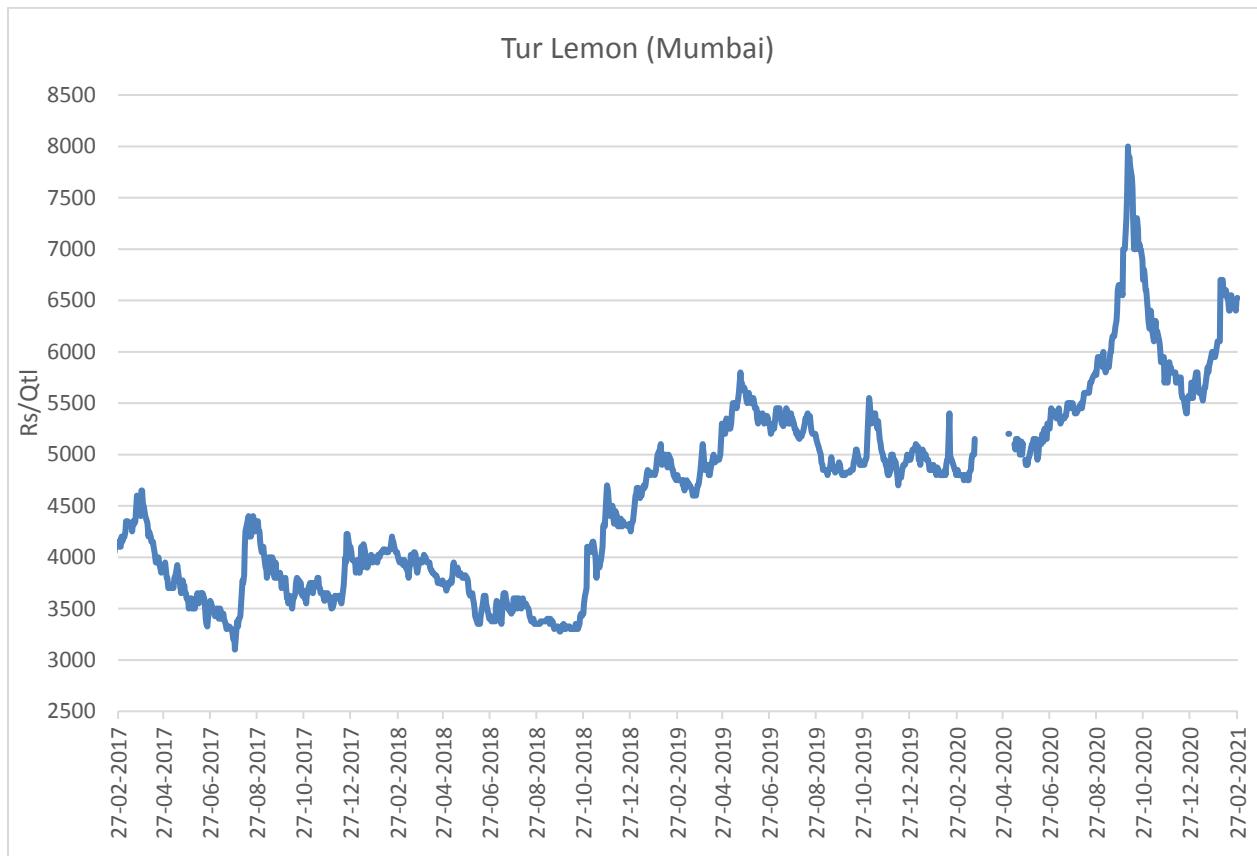

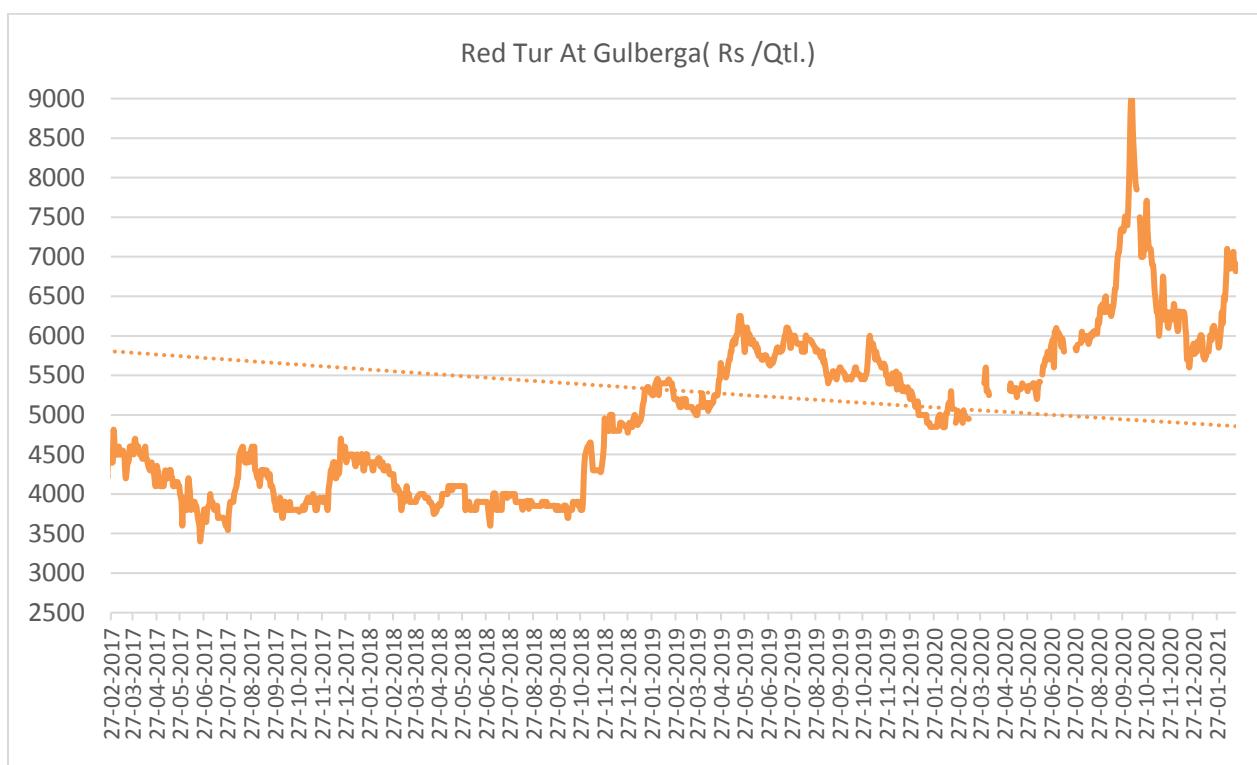

Tur cash market may move further up as pace of arrival is comparatively lower even in March. Private trades are active and buying continues at increased price. Cash market is ruling Rs 800-1000 higher than MSP of Rs 6000. Even farmers are unwilling to sell at prevailing price as they expect market to go up further. New crop is coming into markets of Karnataka and Maharashtra, Gujarat, MP and expected soon from Uttar Pradesh. So any downward correction is unlikely immediately. Even import from overseas market would not exceed above 4 lakh MT due to low availability. Nafed would have to face difficulty to get bulk quantity at MSP this year. It may hardly procure 0.25 to 0.30 lakh MT this year. In brief, overall outlook remains firm.

Indian farmers have covered 48.49 lakh ha against 45.88 lakh ha last year. As per Agriwatch estimate India may harvest 37.28 lakh Mt crop this year. Weather condition in March is very crucial from price point of view. Political unrest in Myanmar would continue to hamper cargo movement from Myanmar.

Market Recap:

Tur market continues to trade firm despite weak demand for daal at current price. Private trades have purchased around 15 to 20 % of crop this year while Nafed purchase is only 10,000 to 11,000 MT so far. Crop size is lower and experts have pegged it in the range of 34 to 37.00 lakh MT. Import flow is limited and cargo would remain disturbed from Myanmar due to political unrest there. Govt would allocate 4 lakh MT quota for next financial year while 1.5 to 2.0 lakh MT import through G to G channel. However, lower availability in Myanmar and ongoing disturbance there may restrict volume of import. Even in south African countries import may be in limited volume due to lower crop size there too. So, uptrend may continue once demand for daal improves.

Tur in Gulberga market traded at Rs 6800-7000 per qtl and may cross Rs 7500 soon. If yield loss is seen in U.P. crop too, prices may move further up. Crop from UP is expected in April. Nafed too has less than 1 lakh MT old stock. It shows tight supply side in the second quarter of this calendar year.

Price Dynamics:

In Feb-2021, average price in Gulberga market increased by 14.23 % from 5936 to Rs 6781 per qtl. due to lower crop size(10 to 15 %) from normal expectation and active buying by private trades. Apart from it low availability in global market too has lent support.

. Tur price in March is likely to trade firm due to:

- Lower crop size in Karnataka, Maharashtra
- Slower release by farmers/stockists/mills buying
- Lower availability in global market
- Higher quotes in Myanmar(\$770 per Mt)

Seasonality Index-depicts steady to slightly firm tone.

Market Outlook for March:

Fundamental remains supportive for Tur cash market in the near to medium term.

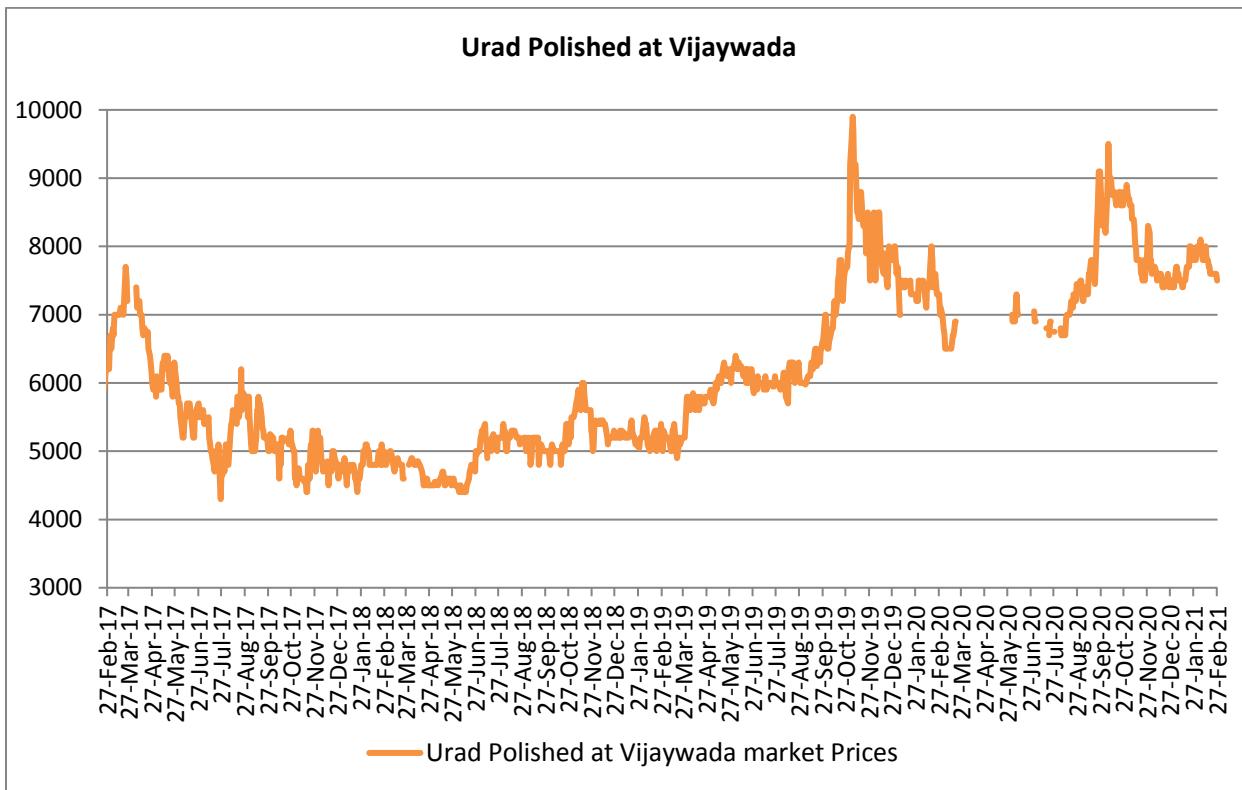

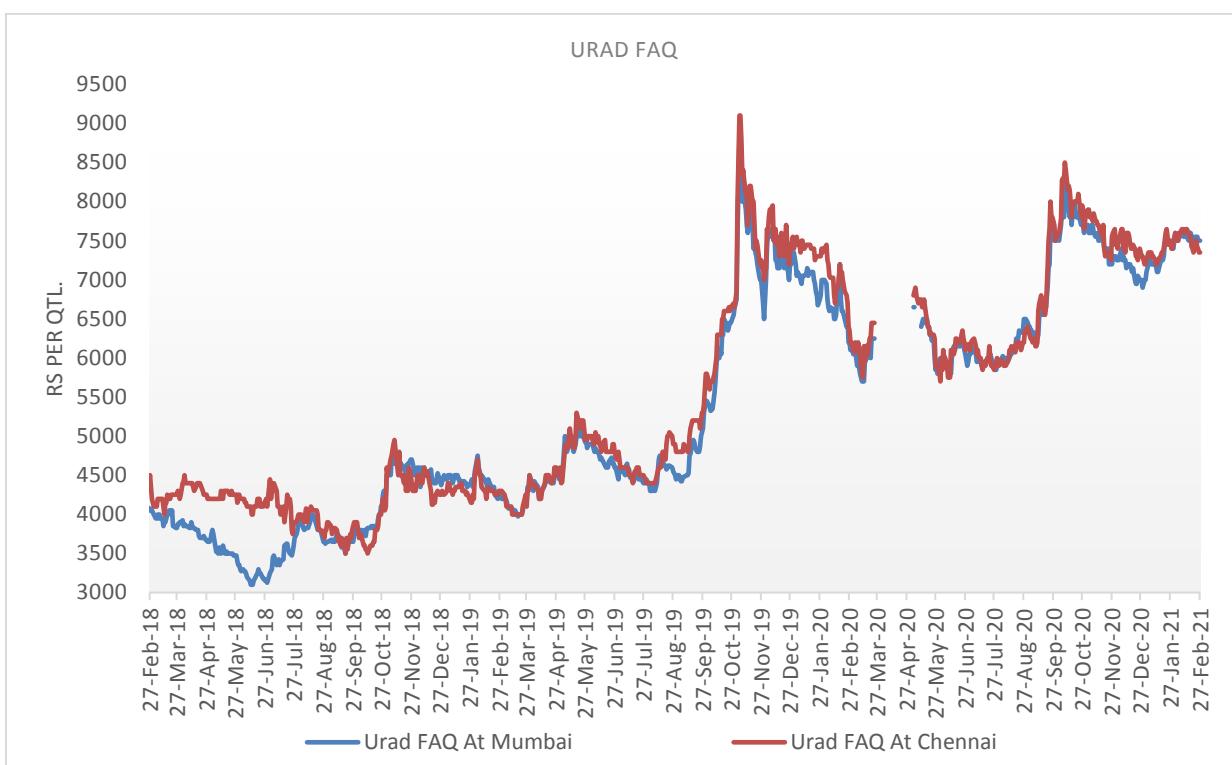

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

Market Recap:

Short supply of urad in domestic market due to lower availability in domestic as well as in Myanmar market would not allow market to cool down until new kharif crop hits market in Aug-Sep-2021. Import flow too would be limited due to political unrest in Myanmar. Sensing the short supply govt has allocated 4 lakhMT import quota one month earlier for next financial year. Besides, South Indian Pulses exporters and importers association has requested DGFT to extend import time line for back log quota from 31st March to 31st May-2021. Import would not take place before June. New crop in Myanmar is almost ready buy disturbance may disturb import cargo from there. It would take two months time to issue licenses after plant and capacity verification of the applicant.

Arrival from rabi crop has started . However crop size is small and so it would be consumed locally in Andhra Pradesh and Tamil Nadu. From states, crop would hit market in April. So , any major decline in urad market is unlikely at this point of time .Major urad crop comes in kharif season. In Indian market urad is being traded at Rs 7300-7400. It may move up to Rs7500-7600,if demand improves in local market.

Seasonality Index depicts steady to firm movement in March-2021.

Price Dynamics:

In Feb-2021, average prices in key markets including Mumbai was up by 1.76 % percent to 7779. In Chennai it was ruling at 7400. Prices may stay steady to slightly firm in March due to:

- Lower rabi crop size and delayed arrivals
- Short supply in domestic market
- Vacant pipeline and limited volume of import
- Lower availability in global market

Market Outlook for March : Prices are likely to trade steady to slightly firm .

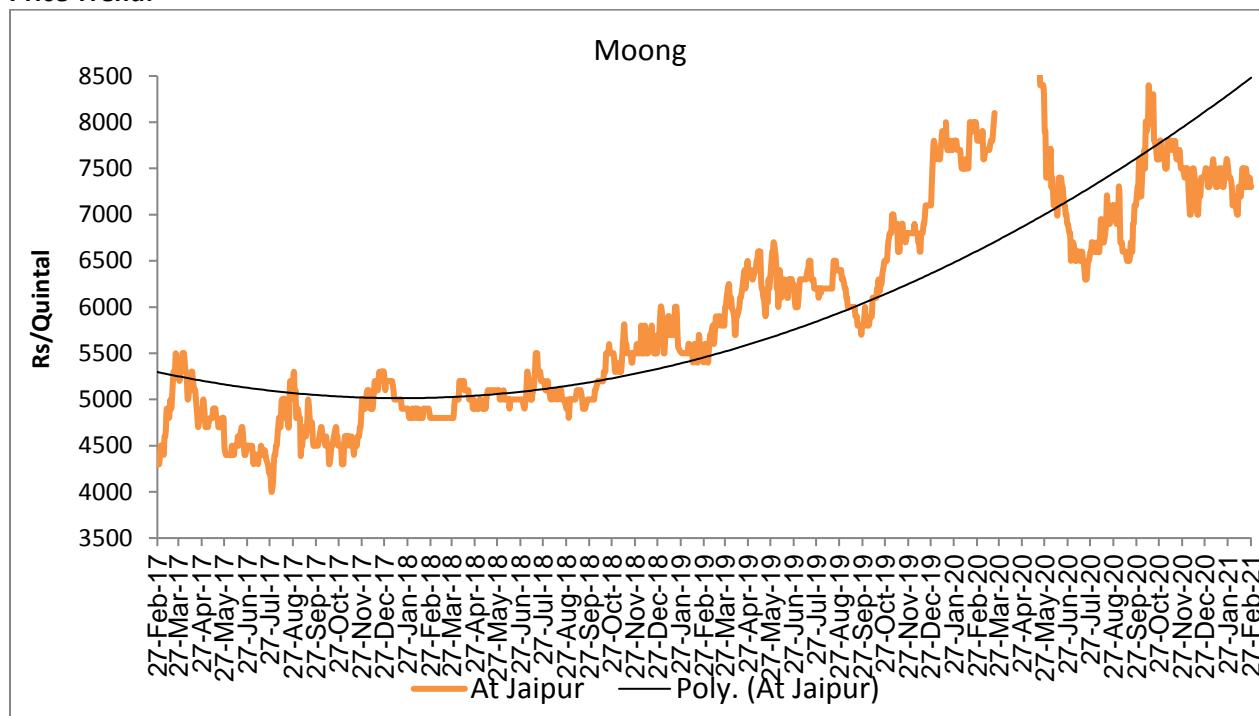

Fundamental Analysis and Outlook For Moong:

Market Recap:

Moong cash market is likely to trade range bound as supply demand side is almost balanced. Pressure might be felt when new arrivals from summer crop would start hitting market from Odisha in end March-April. Crop condition of moong is good in AP, Tamil Nadu, Orissa. Import flow would remain restricted as there is no parity at current level. Apart from it availability in Myanmar is weak this year. Prices in the market like Gannavaram traded down at 7400-7500 during the month. In north and central India, prices have decreased below MSP for low quality crop. Sideways movement is expected in March in Moong market. Arrival from rabi crop has started decreasing .In Jaipur market it is being traded at Rs 7300.

Price Dynamics:

Pressure from the summer crop may be felt only in end March 2021. Agriwatch expects 14.95 lakh MT kharif production as per revised estimates after discounting the flood and higher rains generated loss. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year. As demand is weak , moong cash market may trade steady to slight weak.

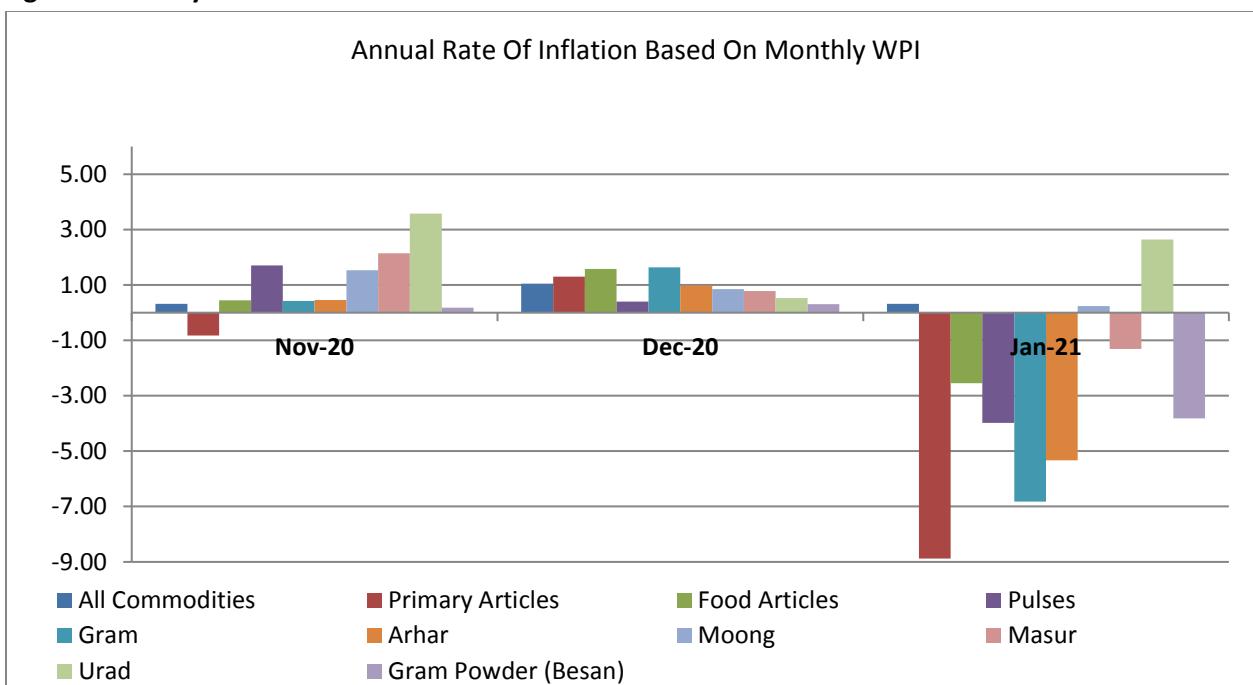

**Price Trend:****Market is expected to trade weak in March due to:**

- Arrival in markets may start from summer crop by the end of this month
- Weak demand
- Availability of old stock in central pool and
- Good summer crop condition.

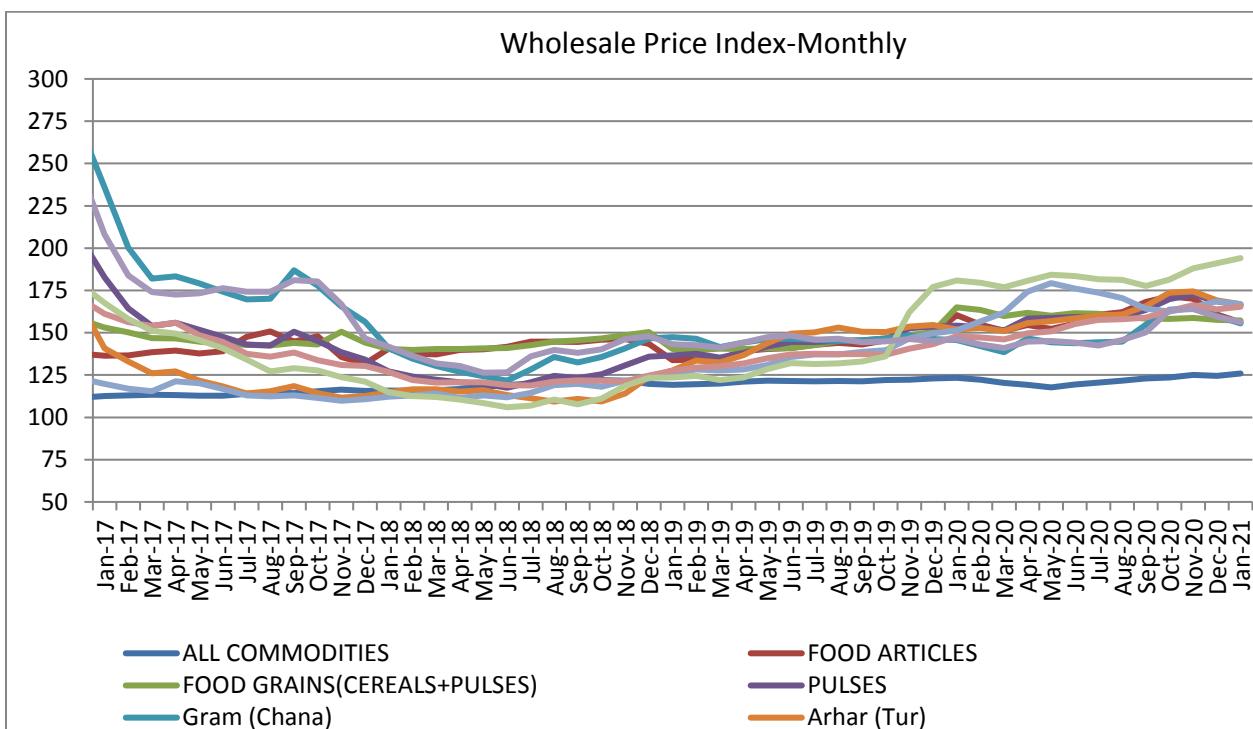

Market Outlook for March: Steady to slightly weak movement is expected.

Agri Commodity Indices Jan -2021:

Pulses WPI: Pulses WPI decreased by 2.3 points from 159.8 in Dec to 166.3 in Jan-2021
