

**Pulses Monthly Research Report: April-2021**

**Contents:**

- **Pulses Sector-Highlights**
- Domestic & Global
- **Supply & Demand**
- **Area & Yield Estimates (Kharif)**
- **Kharif Progressive Sowing**

**Pulses-Wise Analysis**

- Chana (Chick Pea)
- Matar (Dried peas)
- Masoor (Lentils)
- Tur (Pigeon Pea)
- Urad (Black Matpe)
- Moong (Green Gram)

**Appendix:**

- Agri Commodity Indices Oct -2020:
- Indian Pulses- Wise Import- Monthly Analysis
- Price Trend ( Seasonality)
- Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
- India
- Australia
- Canada
- US

### Pulses Sector-Highlights

- **As per the latest update by BoM-bureau of Meteorology (Australia) has forecast normal monsoon season in India. This means Indian farmers will receive good rains in June, July, Aug & Sep. There is no chance of La Nina or Al-Nino. If it happens, it would be good for Kharif crops in general and India & Indian farmers in particular. Indian farmers are waiting for the IMD forecast, likely in the first-second week of April-2021. Urad & Moong including paddy is the main Kharif crops. The IMD will come with its own forecast soon, likely by the end of this month.**
- **The govt. has made it compulsory for new importers, exporters & customs brokers to verify their identity under the customs (Verification of Identity & Compliance) Regulations,2021. This includes verification of incorporation document, PAN, Aadhaar, and place of business. The regulation also gives customs authorities the power to undertake identity verification for existing traders.**
- **Chana production estimates for the crop year 2020-21 have been revised down from 110.63 lakh MT (preliminary estimates) to 95.58 lakh MT. The downward revision is due to lower yield in the major producing states like Rajasthan, M.P., Karnataka, U.P., except Maharashtra and Gujarat. The major loss has been recorded in Rajasthan, followed by M.P. & Karnataka. Lower production and stockiest buying at the current price may continue to support the cash chana market. Chana cash market may move to Rs 5500 in May. However, if COVID cases increase, lockdown is imposed & pulses are distributed free of cost, it may cap the uptrend. Good monsoon rains too may help to reign one-way momentum.**
- **The poor yield of tur this year and stockists' strong holding power amid no hope for immediate import due to unrest in Myanmar may push up tur price again. Crop in UP is in good condition and we expect around 2.50 lakh MT crop soon from this state. It may meet the immediate requirements of mills. In June import may take place. So, any big jump in the tur market unlikely. It may move up by 200 to 300. Apart from it mango season is about to start and it may check the price. In Maharashtra, mills are buying. Fundamental for tur market is firm and it may recover in coming weeks. It may continue to move in the range of 6900-7500 in April. Import may start from June despite early submission (online) of import application.**
- **Despite an extended timeline for urad import from backlog quota (31st March to 30th April-2021, and another import quota of 4 lakh MT for the ongoing financial year, the Urad market continues to trade firm. Some downward correction was seen in March, but it could not sustain due to short supply in the domestic market and the slower pace of import flow from Myanmar. Political unrest in Myanmar & the disrupted supply side there too may remain supportive for the cash urad market. Import from the new quota would not take place before June, while new big crop would not be available before August-September. So, the cash market may move up by 200-300 by the end of April. With increasing temperature demand too is bound to increase.**
- **Arrival from the summer moong crop is expected to hit the market from April. The crop condition of moong in Odisha, M.P. & Bihar is normal to good. Arrival from the rabi crop is decreasing now. Demand is weak and prices are expected to decrease in the coming weeks. As there is a shortage of quality crops, prices are ruling around MSP. Stockists too have started offloading stock just ahead of the summer crop. Steady to slight weak tone may be seen during the next two three weeks. Thereafter, monsoon rains in June and July would be the driving force for prices. Prices may come down below MSP.**

- **As lentil prices are ruling at the higher level, above MSP, Nafed may plan to buy lentils** at market price as prices are unlikely to decrease. The arrival pace may increase in the coming weeks as prices may cool down by Rs 250-300 from the current level. The crop size (11.73 lakh MT) is lower and import will continue despite 30 % duty and cess. Right now lentil is ruling at Rs 5700-5800, which may come down to Rs 5300-5400. With the rising temperature and likely marriage season demand may improve and it will not allow the market to decrease beyond a certain level.

**Global Market:**

- **According to the Pulses, Guidance Note issued last week by Pulse Australia (PA) and the Grains Industry Market Access Forum (GIMAF)** right now the monsoon season and India's political climate were being watched closely India's and Pakistan's production from rabi, or winter crop is slightly lower than expectations due to drier conditions. Despite low production expectations India is still blocking most pulses imports, hope existed that India would drop its tariff on Australian lentils from the current 30 percent. India would normally be the driver for Australia's pulse outlook, but tariffs and biosecurity challenges are currently keeping volume exports of Australian pulses out of the market. With Australian 2020 production at around 800,000t, it is debatable whether these markets can absorb the 2020 crop, so some growers are reporting to be holding stocks, waiting to see how the subcontinent production eventuates.
- **Bangladesh and Pakistan continue to buy Chickpeas from Australia and so prices hinge** around \$660-670 per MT basis CiF at destinations. Pakistan has been a regular buyer of the containerized Australian chickpeas, and its peak figure of recent years is believed to be 37,759t in December 2020, the biggest volume seen since 34,805t in April 2018. The February 2021 export figure could well be above that to reflect containerized exports as well as the 25,000t of bulk to Pakistan, and further bulk sales to Bangladesh.
- **Prices for Mung beans stayed steady at the previous month level at around \$1300/t for No. 1 grade, \$1200/t for processing, and \$1100/t for manufacturing.** Harvesting is expected to begin soon in Queensland. Recent rains are beneficial to standing crops in the field. Production prospects have improved a lot. Chinese buyers are active and most of the Mung beans booked for shipment from April onward. Containers are readily available for China right now.
- **Major pulses in Australia traded slightly firm as export demand is likely to continue in the second half of 2021.** Apart from it, freight for some destinations in the Middle East & South Asia too moved up and it too has helped to keep prices up of chickpeas & lentils for bulk exports volume. On the production front, most of Australia's moong growing areas in New South Wales & Queensland received good rains in recent days, and more rains are expected in northern South Wales, Victoria. The crop would be ready for harvest in April-May. It has increased better sowing prospects for winter crops like Chickpeas, Lentils, and Fava beans.
- **Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22** due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. To carry out stock would stay at same as last year at 1.5 MT. The average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.
- 
-

- Dry peas production in Canada is expected to decrease from 45.94 lakh Mt in 2020-21 to 44.00 lakh MT in 2021-22 due to the lower expected yield from 2.73 to 2.57 tonne in 2021-22. The total supply too would decrease from 49.22(2020-21) to 47.90 lakh MT in 2021-22. The export fig too is expected to decrease from 38 to 37 lakh MT in 2021-22. However, domestic usage may increase from 8.22 to 8.40lakhMT in 2021-22. The carry out would decrease from 3 to 2.5 lakh MT. The yearly average price may hover at \$300 per MT in 2021-22 against 4330 in 2020-21.**
- Lentils export from Australia increased sharply in Dec-2020 as per data released by the Australia Bureau of Statistics. Total movement in Dec increased to 101,148 MT up by189% from the previous month's total of 34,974. So far export sales have totaled 136,121 MT, up from 135,053 in the same period the last marketing year. India purchased 42,154 MT, Bangladesh 15,256 MT & Sri Lanka 14,970 MT.**
- Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh mt in 2020-21. Even field peas production would increase from 2.19 to 2.94 lakh MT-n 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.**
- Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres. Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres.**

\*AW estimates

Note (for chana and Masur crop year is 2020-21 and it will be marketed in FY 2021-22

**Kharif Pulses:****Urad:**

*MY 2020-21 started with 2.37 lakh MT carry in stock while production is up by 4.89 lakh MT to 24.19 lakh MT this year. It would increase supply to 30.06 lakh MT including imports. Supply side is hence expected to remain slightly tight. Crop condition is normal to good except some pockets of Maharashtra, Madhya Pradesh and Gujarat, so far. Rabi sowing passed the half way mark.*

**Moong:**

*The new season started with 2.10 lakh MT carry in while production is up by around 2.36 lakh MT to 21.42 lakh MT this year. Despite higher production total supply would increase slightly to 25.17 lakh MT due to lower carry in stock. So the prices should remain on the higher side in 2021 too*

**Tur:**

*Production of Tur is likely to increase from 37.19 to 37.28 lakh MT this year due to lower yield despite higher area coverage. Total supply would decrease from 49.56 to 48.14 lakh MT this year. Supply side seems contracting in the ongoing season in comparison to last year.*

**Rabi Pulses: Chana:** Agriwatch has revised Chana production down from 110.63 lakh MT to 95.58 lakh MT for crop year 2020-21, to be marketed in 2021-22. Supply side would decrease from 128.32 to 119.90 this year. Carryout would decrease from 21.32 lakh MT to 16.40 lakh MT this year. It may keep price well supported throughout the year.

**Masur:** AW has revised its lentils production down from 13.49 lakh MT to 11.73 lakh MT. As new crop is expected to hit market from May, price should soften, but unlikely to come near MSP. Carryout would decrease from 7.32 to 5.50 lakh MT. Lower carryout stock may encourage import this year too.

**Area & Yield Estimates For Kharif Tur, Urad & Moong-2020-21:**

Agriwatch APY Estimates Of Tur For 2020-21			
State	Harvested Area ('000' Ha)	Yield (kg /ha)	Production ('000' MT)
AP	209	518.95	108
Gujarat	226	1142.40	258

**Chana (Chickpeas /Bengal Gram):****Market Recap:**

Cash chana market traded up in March by 7.21 % from Rs 4700 to 5039 in comparison to February-2021. Australian chana too traded up by 3 % to 5646 per qtl. Lower crop size in Rajasthan, Madhya Pradesh and Maharashtra amid ongoing procurement drive under price support scheme and lower arrivals have lent support to cash chana market. Prices of chana may move further up and may cross 5600-5700 level in April. Govt. wants to procure over 2 MMT chana in 2021. Arrival pace is not up to the mark. Crop condition in Karnataka and Gujarat is average to good. AW has revised its chana production estimate down by 15 lakh MT from its preliminary estimates of 11 MMT. New season started with 21.31 MMT carry in stock. However, total availability would decrease from 128 to 119 lakh MT. It would keep price well supported. If demand improves, price may go further up.

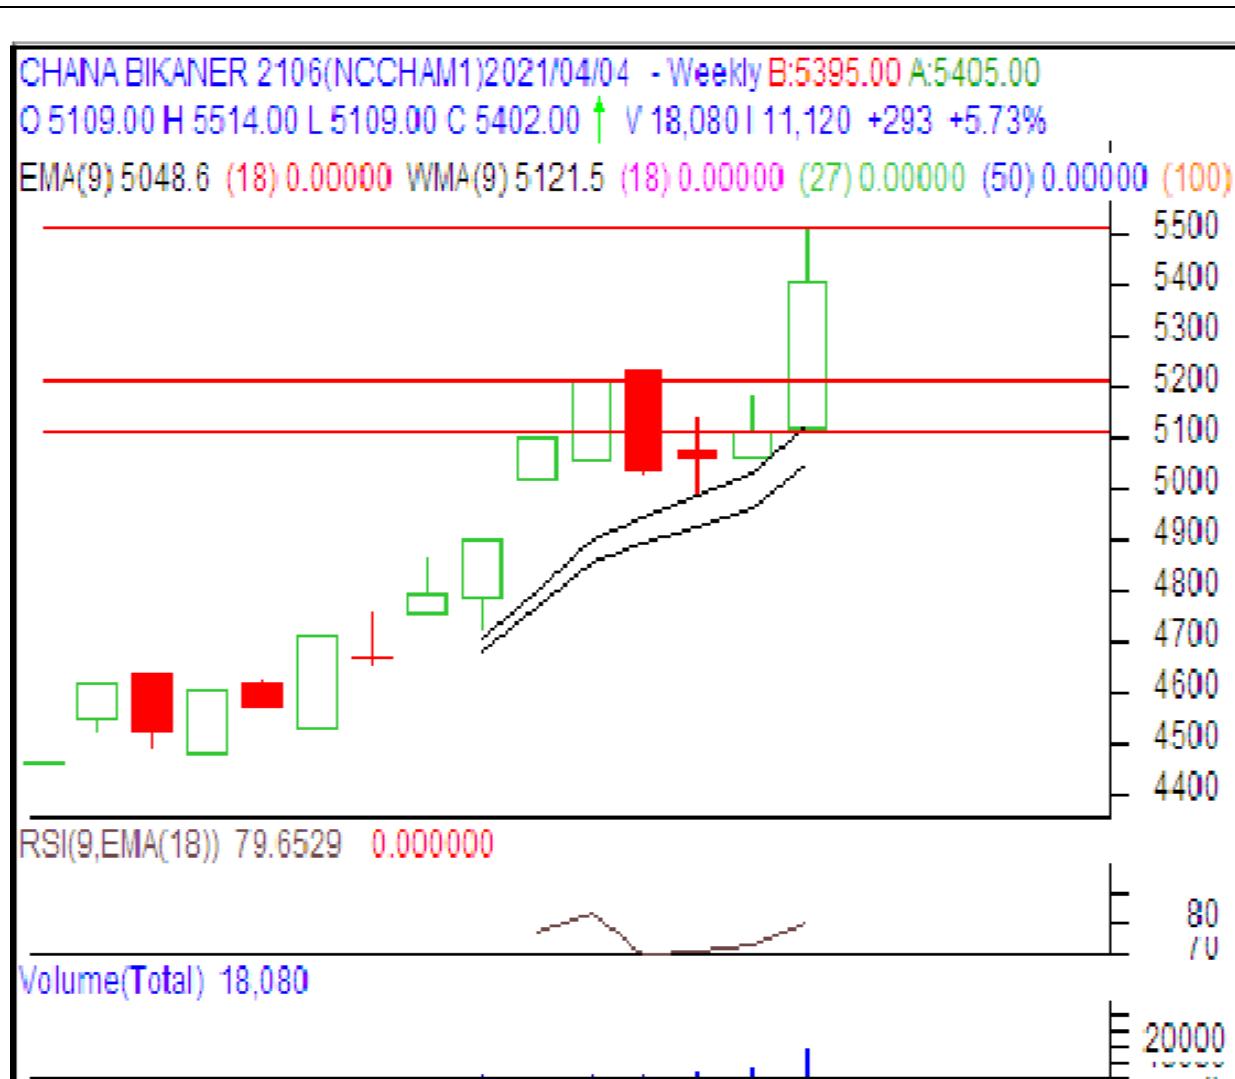

*Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from least developed countries as they enjoys benefit of zero duty. Following graph illustrates chana price movement in different markets:*

**Price Dynamics:** Prices are likely to trade firm in April-2021 due to:

- Low crop size including chickpeas(95.58 lakh MT)
- Major loss in Rajasthan, around 40%
- Target to procure over 2MMT under price support scheme
- Buying by stockists and mills in bulk volume
- Restricted import&
- Likely good demand in marriage season

**Seasonality Index:** hints slightly firm movement for spot market for April-2021.

**Chana Future Market Analysis:****Technical Commentary:**

- Increasing price & OI hint market to trade firm in the medium term.
- RSI is moving up in neutral region, hints caution to bears.
- Prices closed above 9 and 18 days EMAs

**Strategy: Buy on Dip**

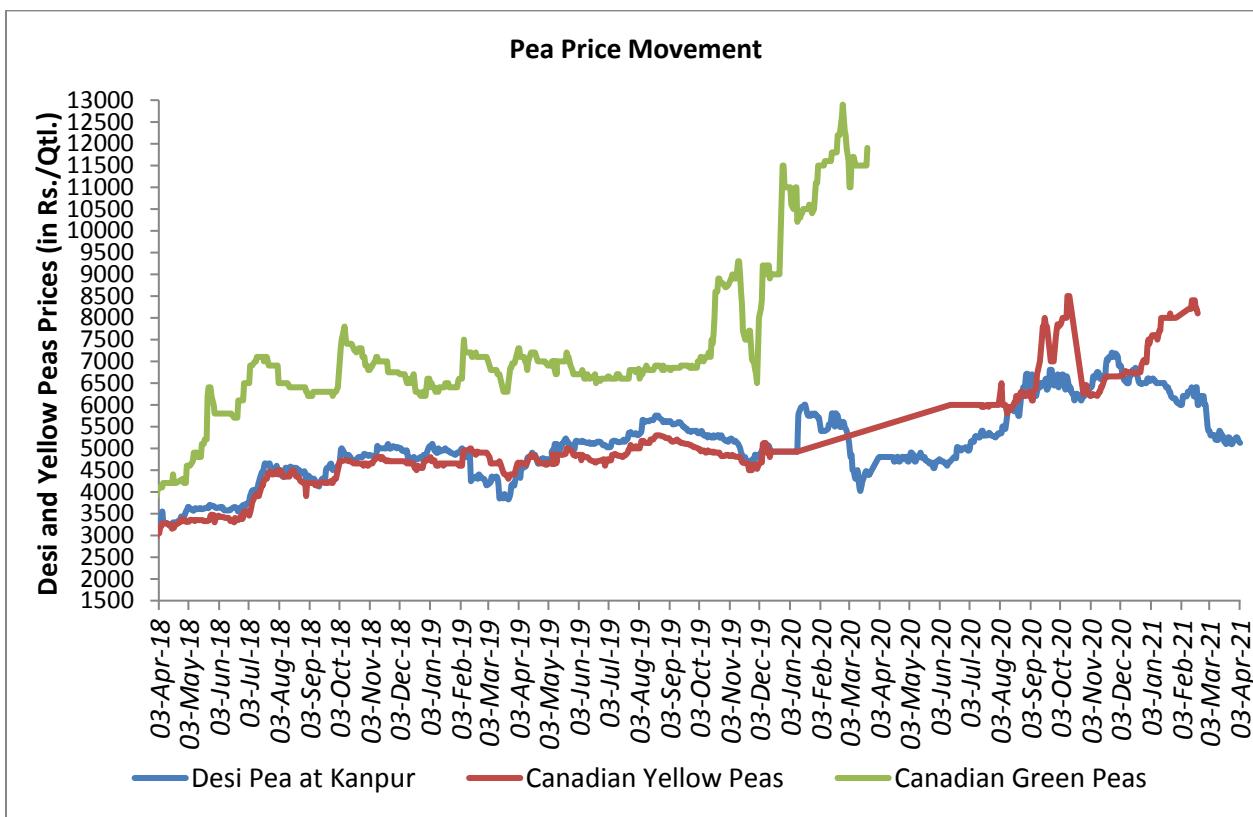

Supports & Resistances			S1	S2	PCP	R1	R2

Chana	NCDEX	Jun	Buy above	5350	5600	5750	5265

\*Don't carry forward position for the next month

**Field Pea (Matar/Dry Pea):****Fundamental Analysis and Outlook:**

Availability of imported stocks at ports are almost negligible and prices are ruling higher despite new arrivals from domestic crop. In Kanpur market peas is ruling at Rs 5200 while green peas is hovering at Rs 7000-7400. As prices of pulses in domestic market is ruling higher than normal expectation, govt. may allow 1.5 lakh MT import quota for this financial year, starting from April-2021 soon. As of now no decision has been made. As prices of other pulses is going up, pea too can recover after downward correction.

Despite stable demand for peas and daal, prices are expected to trade steady to slightly weak. Consumers have shifted from pea daal to other cheaper options. So govt.'s move is very crucial from pea price point of view. Following chart shows price movement in various markets:

For 2020-21, exports are forecast to rise to 3.8 million tonnes (Mt), with China and Bangladesh ranking as Canada's top three markets. Canadian dry pea exports to India are expected to fall sharply to marginal levels. Through August to January of this crop year, Canadian dry pea exports total 2.1 Mt, 0.2 Mt higher than the same period in 2019-20. Carry-out stocks are expected to rise, despite firm export demand and increased domestic use. The average price is expected to be higher than 2019-20, with higher yellow and feed pea prices offsetting lower green pea prices.

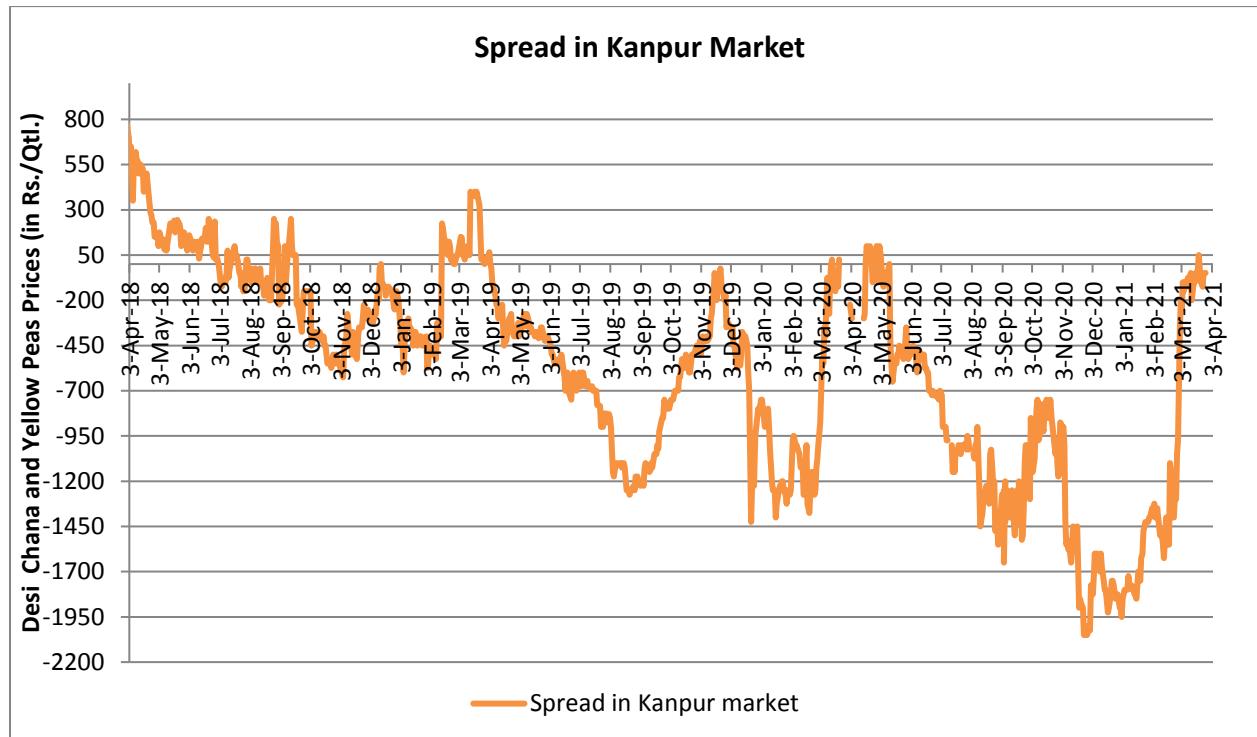

**Price Dynamics:**

**Pea market is expected to trade steady to slightly firm in April due to:-**

- Poor arrival from domestic crop
- Increasing price of other pulses
- Import restriction and
- Firm international market

**Spread With Chana:**

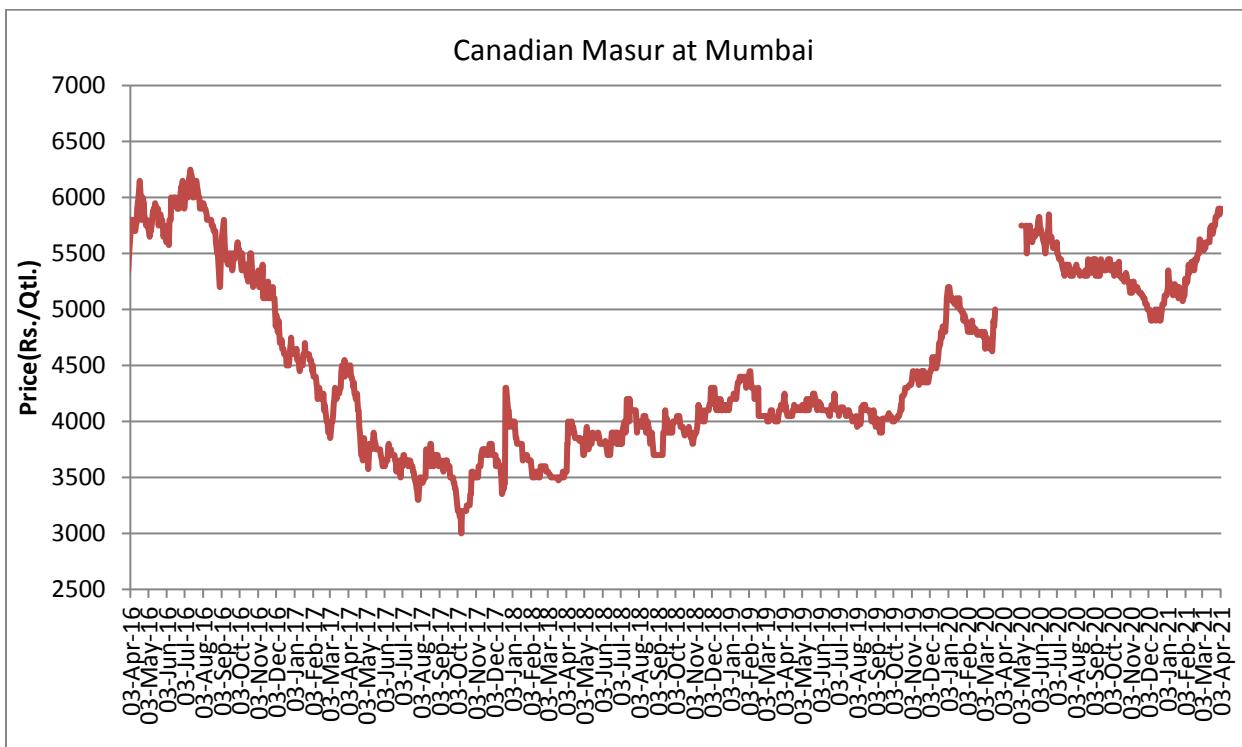

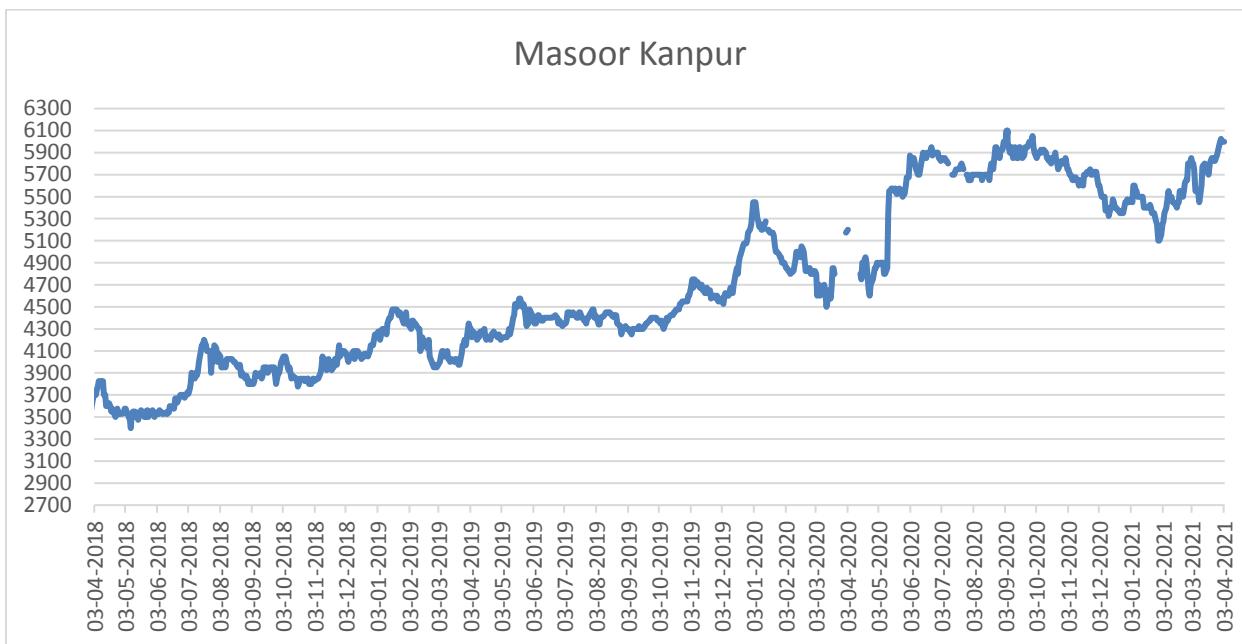

Gap has decreased from Rs 1070 to Rs 25 in March over February-2021, based on monthly average of the price. Spread is expected to remain in positive zone in April on relative movement in Chana prices.

**Market Outlook For April:** Steady to slightly firm movement is expected in April-2021.

**Masoor (Lentils):**

**Lentils prices are ruling higher than our normal expectation despite new arrivals in MP, UP and Bihar.** **Production size is below expectation.** Agriwatch has revised its production estimates down from 13.49 to 11.73 lakh MT. Demand is expected to cool down and arrival too may increase in May. So, any jump in lentils market is unlikely. However, price would not decrease to Rs5100 in any case. So Nafed, state procurement agency may start buying masoor at market price to build up its stock.

**Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22.**

**Price Trend In Cash Market:****Price Dynamics:**

In March-2021, average price in key market Kanpur was up by 5.19 % from Rs 5471 to Rs 5557 per qtl. MoM basis. Prices are likely to trade sideways in April-2021.

***Sideways movement is expected in April due to:***

- Arrival is yet to increase
- Higher quotes for imported stock at ports
- Nafed has low stock
- **Outlook for April:** Sideways tone may prevail

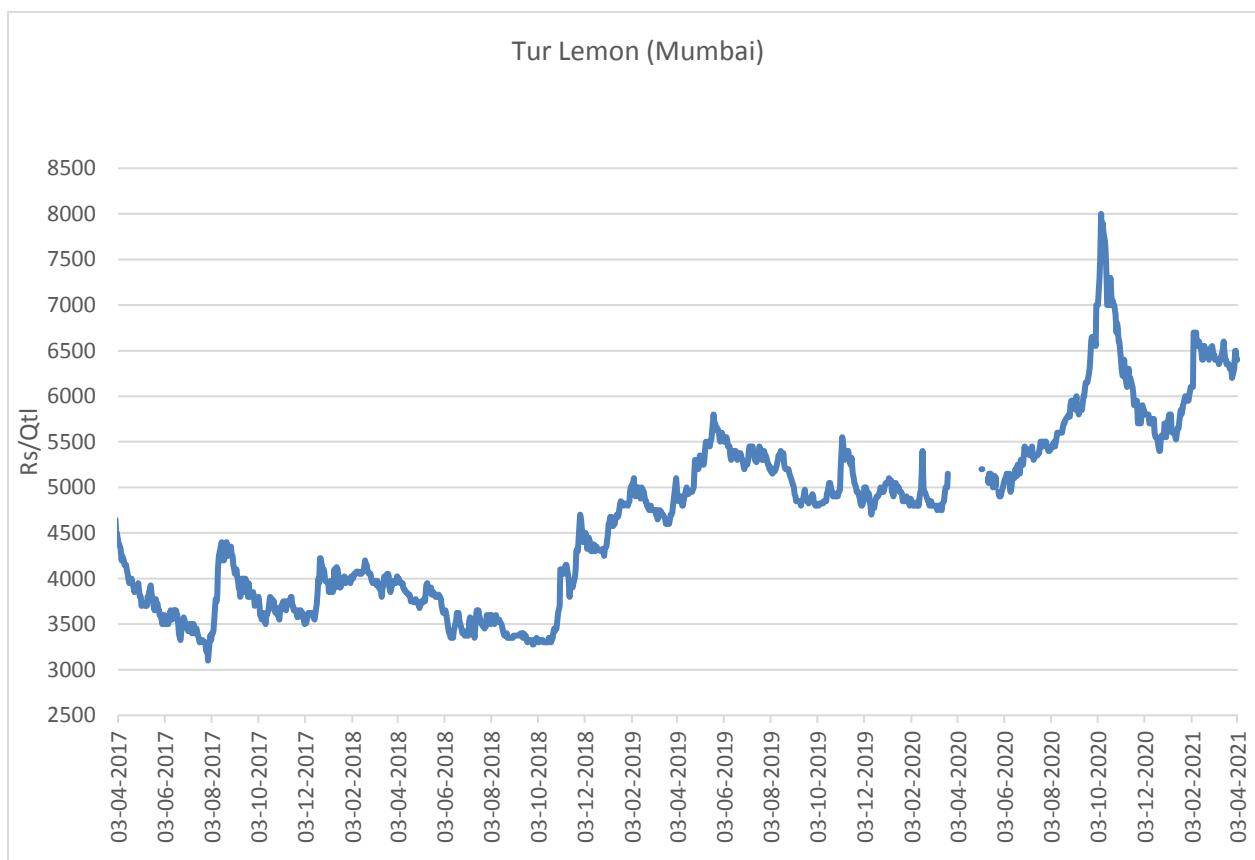

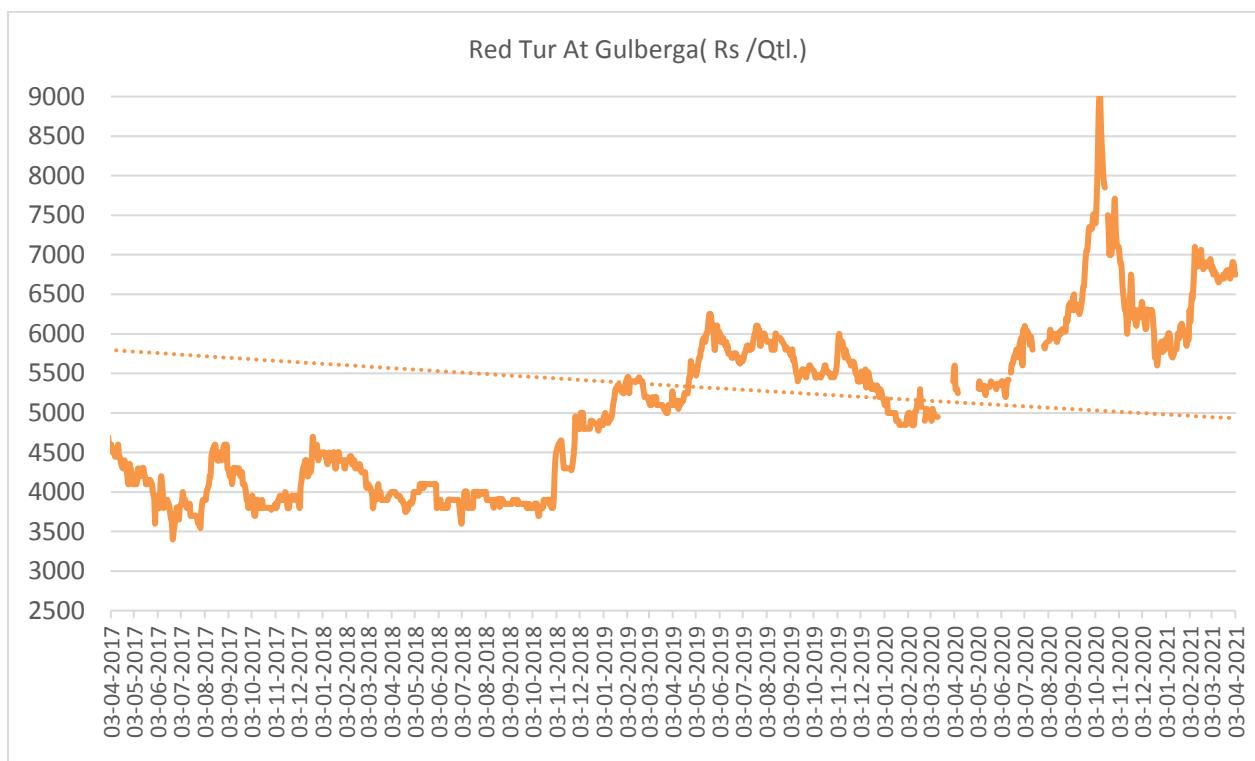

***Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):******Fundamental Analysis and Outlook:***

*Tur cash market may move further up as pace of arrival is comparatively lower even in April while import is not possible before June. Private trades are active and buying continues at increased price. Cash market is ruling Rs 1000 higher than MSP of Rs6000. Even farmers are unwilling to sell at prevailing price as they expect market to go up further. New crop is coming into markets of Karnataka and Maharashtra, Gujarat, MP and expected soon from Uttar Pradesh. So any downward correction is unlikely immediately. Even import from overseas market would not exceed above 4 lakh MT due to low availability. Nafed would have to face difficulty to get bulk quantity at MSP this year. It may hardly procure 0.25 to 0.30 lakh MT this year. In brief, overall outlook remains firm. Political unrest in Myanmar would continue to hamper cargo movement from Myanmar.*

***Market Recap:***

*Tur market continues to trade firm despite weak demand for daal at current price. Private trades have purchased around 15 to 20 % of crop this year while Nafed purchase is only 13,000 to 14,000 MT so far. Crop size is lower and experts have pegged it in the range of 34 to 37.00 lakh MT. Import flow is limited and cargo would remain disturbed from Myanmar due to political unrest there. Govt. has allocated 4 lakh MT quota for next financial year while 2.0 lakh MT import through G to G channel. However, lower availability in Myanmar and ongoing disturbance there, may restrict volume of import. Even in south African countries import may be in limited volume due to lower crop size there too. So, uptrend may continue once demand for daal improves.*

*Tur in Gulberga market traded at Rs 6900-7100 per qtl and may cross Rs 7500 soon. If yield loss is seen in U.P. crop too, prices may move further up. Crop from UP is expected in April. Nafed too has less than 1 lakh MT old stock. It shows tight supply side in the second quarter of this calendar year.*

**Price Dynamics:**

In March-2021, average price in Gulberga market decreased by 0.03 % from 6781 to Rs 6767 per qtl. due to weak offtake of daal from mills. However, with improved demand for daal prices are bound to go up. Apart from it low availability in global market too has lent support.

. Tur price in April is likely to trade firm due to:

- Lower crop size in Karnataka, Maharashtra
- Slower release by farmers/stockists/mills buying
- Lower availability in global market
- Higher quotes in Myanmar(\$710 per Mt)

**Seasonality Index**-depicts steady to slightly firm tone.

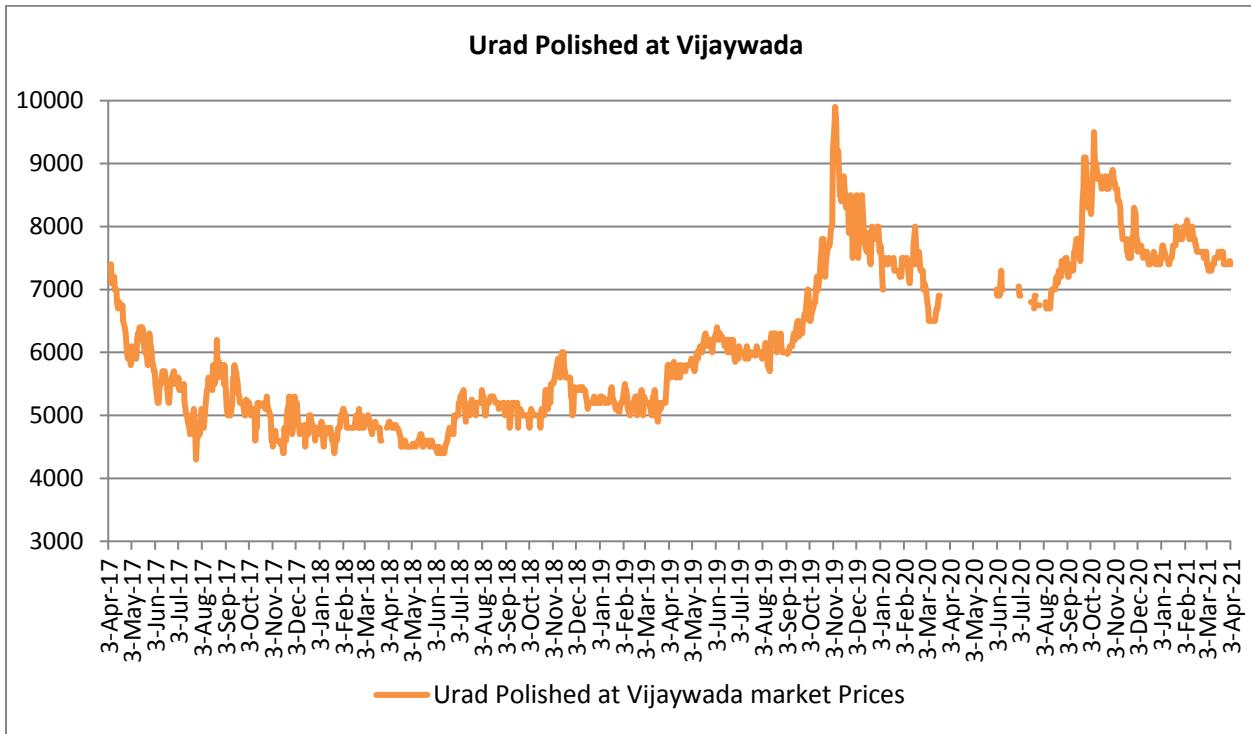

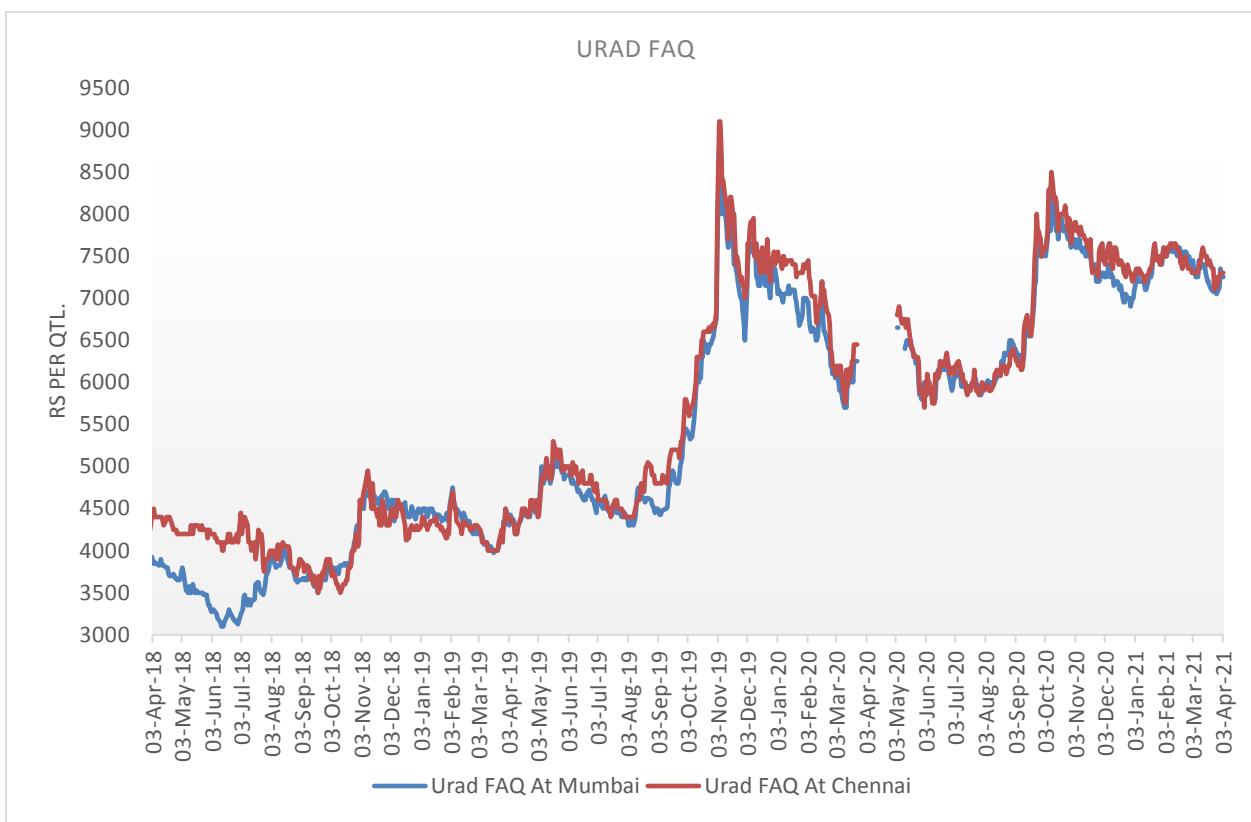

**Market Outlook for April:**

Fundamental remains supportive for Tur cash market in the near to medium term.

**Urad (Black Matpe/Black Gram)****Fundamental Analysis and Outlook:****Market Recap:**

Short supply of urad in domestic market due to lower availability in domestic as well as in Myanmar market would not allow market to cool down until new kharif crop hits market in Aug-Sep-2021. Import flow too would be limited due to political unrest in Myanmar. Sensing the short supply govt has allocated 4 lakhMT import quota one month earlier for next financial year. Besides, South Indian Pulses exporters and importers association has requested DGFT to extend import time line for back log quota from 31<sup>st</sup> March to 30<sup>th</sup> April-2021. Import would not take place before June. New crop in Myanmar is almost ready buy disturbance may disturb import cargo from there. It would take two months time to issue licenses after plant and capacity verification of the applicant.

Arrival from rabi crop has started drying now. The crop size too is small and so it would be consumed locally in Andhra Pradesh and Tamil Nadu. From other states, crop would hit market in April in limited quantity. So , any major decline in urad market is unlikely at this point of time .Major urad crop comes in kharif season. In Indian market urad is being traded at Rs 7400-7500. It may move up to Rs7700-8000, if demand improves in local market.

**Seasonality Index** depicts steady to firm movement in April-2021.

**Price Dynamics:**

In March-2021, average prices in key markets including Mumbai/was down by 4.85 % percent to 7350. In Chennai it was was ruling at 7500. Prices may stay steady to slightly firm in April due to:

- Lower rabi crop size and delayed arrivals
- Short supply in domestic market
- Vacant pipeline and limited volume of import
- Lower availability in global market&
- Delayed import from Myanmar.

**Market Outlook for April :** Prices are likely to trade steady to slightly firm .

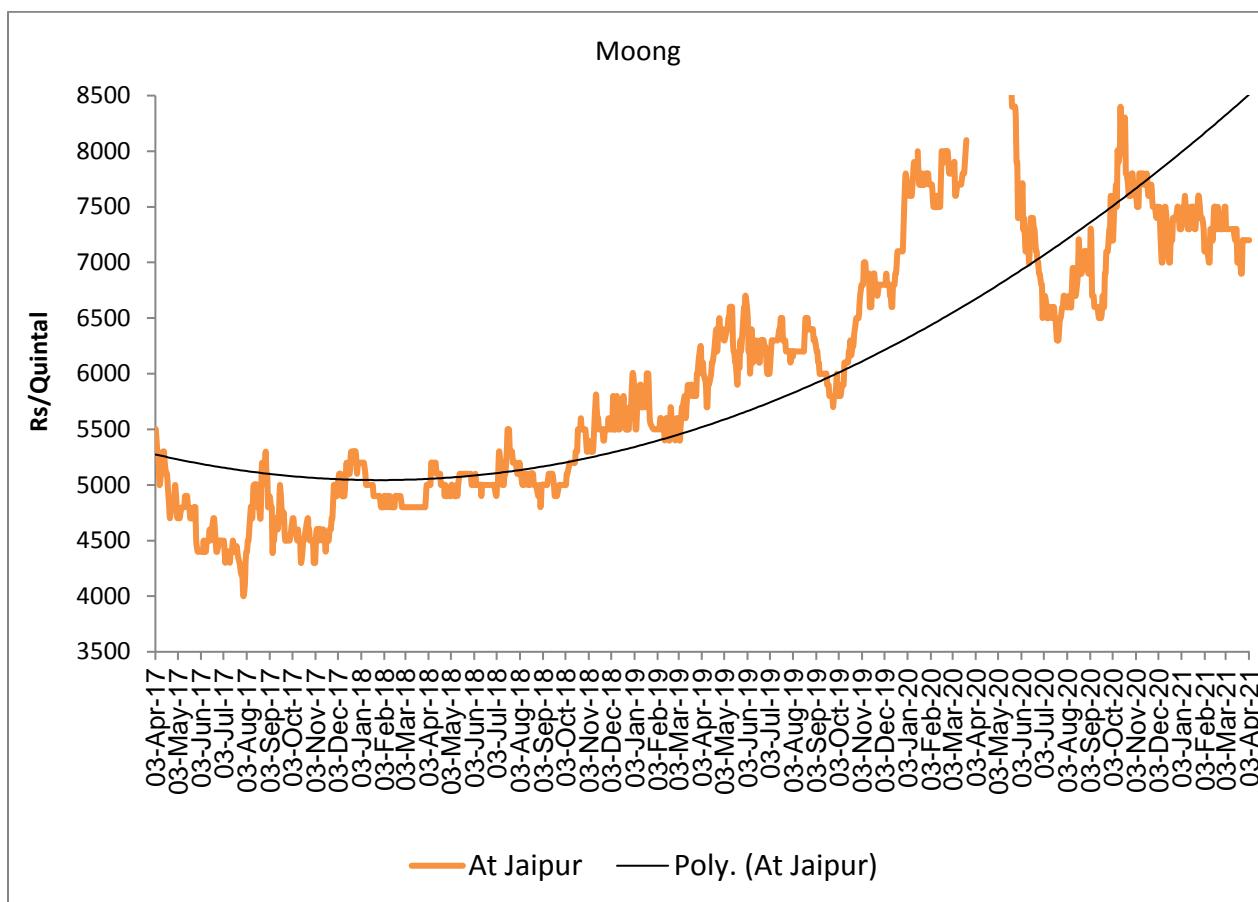

**Fundamental Analysis and Outlook For Moong:****Market Recap:**

Moong cash market is likely to trade range bound as supply demand side is almost balanced. Pressure might be felt when new arrivals from summer crop would start hitting market from Odisha in-April. Crop condition of moong is good in AP, Tamil Nadu, Orisha. Import flow would remain restricted as there is no parity at current level. Apart from it availability in Myanmar is weak this year. Prices in the market like Gannavaram traded down at 7400-7500 during the month. In north and central India, prices have decreased below MSP for low quality crop. Sideways movement is expected in March in Moong market. Arrival from rabi crop has started decreasing .In Jaipur market it is being traded at Rs 7200-7300.

**Price Dynamics:**

Pressure from the summer crop may be felt only from mid April- 2021. Agriwatch expects 14.95 lakh MT kharif production as per revised estimates after discounting the flood and higher rains generated loss. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year. As demand is weak , moong cash market may trade steady to slight weak.

**Price Trend:**

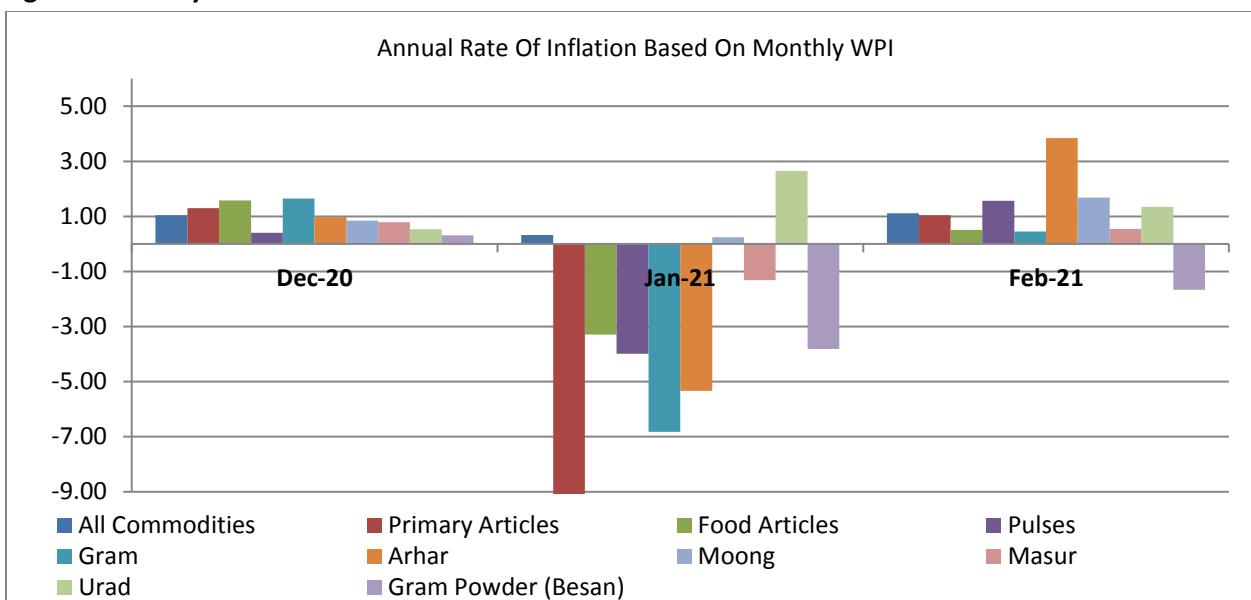

**Market is expected to trade weak in April due to:**

- Arrival in markets is about to start from summer crop
- Weak demand
- Availability of old stock in central pool and
- Good summer crop condition.

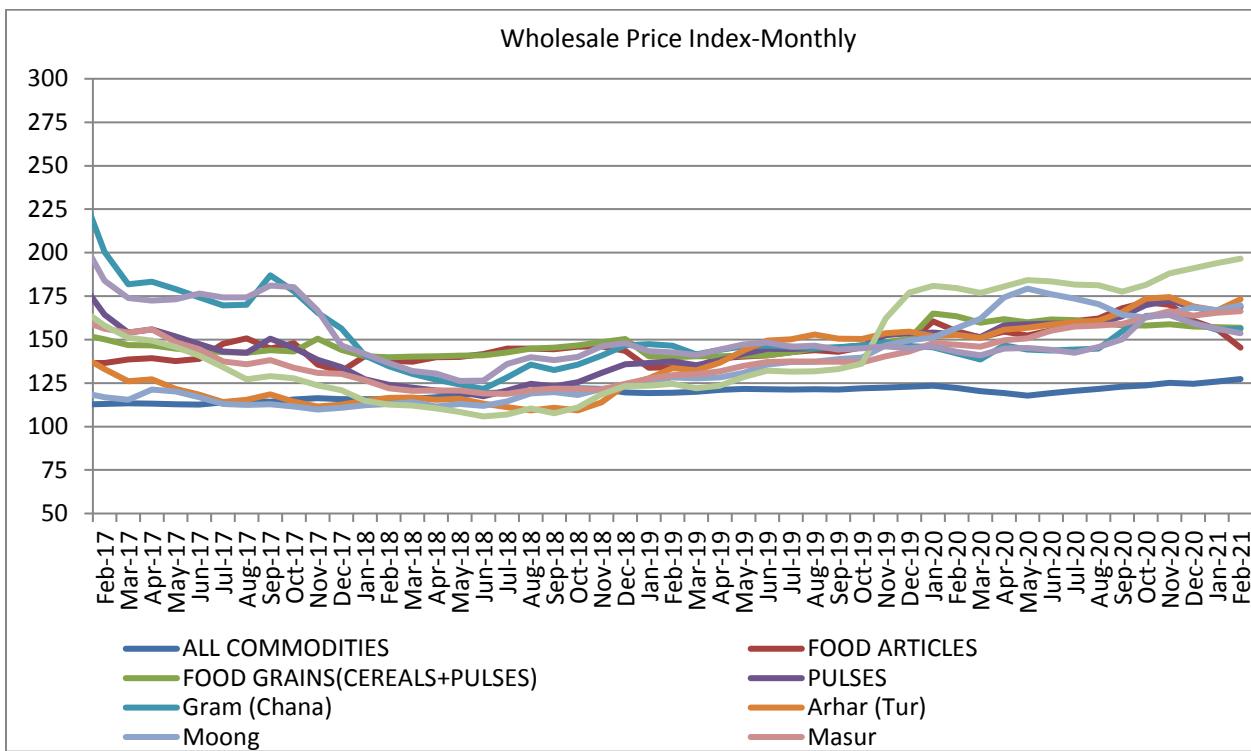

**Market Outlook for April:** Steady to slightly weak movement is expected.

## Agri Commodity Indices Feb -2021:

Pulses WPI: Pulses WPI increased by 2.6 points from 166.3 in Jan to 168.9 in Feb-2021
