

**Pulses Monthly Research Report: June-2021**

## **Contents:**

- **Pulses Sector-Highlights**
- Domestic & Global
- **Supply & Demand**
- **Area & Yield Estimates (Kharif)**
- **Kharif Progressive Sowing**

## **Pulses-Wise Analysis**

- Chana (Chick Pea)
- Matar (Dried peas)
- Masoor (Lentils)
- Tur (Pigeon Pea)
- Urad (Black Matpe)
- Moong (Green Gram)

## **Appendix:**

- Agri Commodity Indices March -2021:
- Indian Pulses- Wise Import- Monthly Analysis
- Price Trend ( Seasonality)
- Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
- India
- Australia
- Canada
- US

### Pulses Sector-Highlights

- **The CACP has recommended to increase the Moong price from Rs7196 to Rs7275 for kharif season 2021-22.** Tur MSP has been increased from Rs 6000 to Rs 6300 & for Urad at Rs 6300. For Urad & Tur Rs300 has been increased from previous Rs 6000 to Rs 6300. For Moong, it has been increased nominal to Rs7275 from Rs 7196. It may support cash market to some extent in coming months.
- **As per the latest update pulses stock as buffer stock was recorded at 12.5 lakh MT in the beginning of June-2021.** Notably, govt had fixed buffer stock norm at 20 lakh MT for 2020-21. Out of total, 754688 MT Chana is available, Tur stock was 343940 MT, Moong stock was at 87309 MT, Urad-55315 Mt and Masur-3457 MT.
- **Despite weak demand and slightly higher flow of arrivals, Chana cash market traded range bound during May over April.** The Monthly average price in Delhi decreased slightly by 0.01% to Rs 5454 over the previous week. However, in the South Indian markets average monthly price increased slightly by 1.82 % to Rs 4802. As demand is weak, no major movement is expected in Chana & Chana daal prices in June. Market is awaiting for the fresh demand from bulk users. The higher Adv. estimate for Chana (11.6 to 12.61 MMT in the 3rd Adv. estimate from the 2nd) could not impact the market sentiment much as of now. The Trade sees it as not reflecting the “actual” production. Steady to slightly firm tone may prevail.
- **The impact of the new import policy, a close eye on the market movement and** stock by the govt. continue to affect the market sentiment of Tur. Import quotes at ports are coming down, resulting the downward movement in cash market too. Tur in Gulbarga market traded down by Rs 200 to 6400 from earlier Rs 6800-6900. Imported tur at Mumbai port too decreased by Rs 200 to Rs 6050 from earlier Rs 6550 despite decreasing arrivals, after the changed policy, in domestic markets. Demand is weak and the volume of import is expected to increase from mid-June up to July. If demand improves, some improvement is expected amid enhanced MSP from 6000 to 6300 for 2021-22 crop. Sowing of Tur may begin by 20th June. If volume of import increases, cash market may trade to the current level as parity is not there below 6000.
- **After a recent change in the import policy, the cash Urad market traded down by Rs 300 to Rs 6550 again after moving up to Rs 6900 in the beginning of June.** The uptrend could not sustain as around 30-35 thousand MT is on the way to India and they are quoting Rs 6200 for end –June–July delivery. It has weakened the sentiment in the markets. Millers had purchased 200 containers at Rs 6600 in end May. So, they would sell it in the market as soon as possible as importers are quoting low price for forward delivery. It would continue to pressurize cash market in coming weeks. The cash market may touch MSP soon if early sowing of Urad starts with the help of pre-monsoon rains. Over all inner tone remains weak. The CACP has increased MSP for Urad to Rs6300. It may cap downward trend.
- **The cash moong market could not sustain its firm momentum due to the restricted** buying by mills. Arrival is coming from the summer crop while early sowing is about to start in Karnataka due to good pre-monsoon rains. If it happens so, kharif crop in may hit Karnataka in August. There are reports of early sowing from M.P. & Maharashtra too in one-two districts. At the price front prices of Moong decreased by Rs 500 to Rs 6500 in Jaipur market from earlier of Rs 7000. It is already ruling below MSP in M.P. As the summer crop is coming and the kharif may start from mid-Aug, Pressure may continue on

the Moong cash markets. Demand is weak while the kharif sowing area may similar to last year. Market may improve if Nafed starts buying under the price support scheme.

- **The import policy for Lentil remains unchanged. Cash market traded almost unchanged** at previous level. Average weekly price moved slightly up to Rs 6433 from Rs 6425 in Mumbai market. After 10th May-2021, Masur cash market in Kanpur opened on 1st June. Prices decreased by Rs 175 from 6875 to Rs 6700 during the week. As arrivals are expected to increase, prices may decrease by 200 more in the short term. Demand is low. Lentil is being offered at Rs 6350-6400 at Mumbai port.

### Global Market:

- **Global chickpea markets traded almost firm during the past week. Markets remain** concerned with the production potential in North America and the possibility the region will need to import food grade product in the coming season. Supplies of marginal and feed quality chickpeas remain significant in Canada, but are no longer having a negative impact on markets-as per the news released by Statpub.
- **Global Lentil markets were softened to some extent during the week under review** against slowing sales and worries that India has yet to announce any changes to import duties for lentils. The trend may continue if fresh export demand starts.
- **The seeded area under dry peas is expected to be slightly higher at 1750** thousand ha in 2021-20 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected uncondusive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.
- **Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT** in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same las last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.
- **The seeded area under Chickpeas is expected to be slightly lower at 100 thousand ha** this year in Canada against 121 thousand ha last year. the yield too may decline from 1.79 to 1.75 t/ha this year. The production of Chickpeas may decrease from 214 to 170 thousand tonne in 2021-22. However, total supply and export may increase slightly from from 507 to 520 and 115 to 125 thousand tonnes respectively this year due to low domestic use. The carryout would increase slightly from 305 to 310 thousand tonnes this year. the yearly average price is expected to rule at \$545 per tonne against \$610 last year.
- **Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh Mt in 2020-21.** Even field peas production would increase from 2.19 to 2.94 lakh MT-n 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Weekly Outlook: -Pulses are likely to trade mixed.

**Monthly Outlook:** -Pulses are likely to trade steady to slightly firm except Moong and Urad in June.

\*AW estimates

**Note** (for chana and Masur crop year is 2020-21 and it will be marketed in FY 2021-22

### Kharif Pulses:

#### Urad:

MY 2020-21 started with 2.37 lakh MT carry in stock while production is up by 4.89 lakh MT to 24.19 lakh MT this year. It would increase supply to 30.06 lakh MT including imports. Supply side is hence expected to remain slightly tight. The total usage may decrease from 29.72 to 28 lakh MT.

#### Moong:

The new season started with 2.10 lakh MT carry in while production is up by around 2.36 lakh MT to 21.42 lakh MT this year. Despite higher production total supply would increase slightly to 25.17 lakh MT due to lower carry in stock. So the prices should remain on the higher side in 2021 too.

#### Tur:

Production of Tur is likely to increase from 37.19 to 37.28 lakh MT this year due to lower yield despite higher area coverage. Total supply would decrease from 49.56 to 48.14 lakh MT this year. Supply side seems contracting in the ongoing season in comparison to last year.

### Rabi Pulses:

**Chana:** Agriwatch has revised Chana production down from 110.63 lakh MT to 97.67 lakh MT for crop year 2020-21, to be marketed in 2021-22. Supply side would decrease from 128.32 to 121.99 this year. Carryout would decrease from 21.32 lakh MT to 18.49 lakh MT this year. It may keep price well supported throughout the year.

**Masur:** AW has revised its lentils production down from 13.49 lakh MT to 11.73 lakh MT. As new crop is expected to hit market from May, price should soften, but unlikely to come near MSP. Carryout would decrease from 7.32 to 5.50 lakh MT. Lower carryout stock may encourage import this year too.

### Area & Yield Estimates For Kharif Tur, Urad & Moong-2020-21:

### Chana (Chickpeas /Bengal Gram):

#### Market Recap:

No major movement was seen in Chana Cash chana market in May over April. The average price was down by Rs 1 from 5455 to 5454 in comparison to May-2021. Australian chana too traded down by 2.75 % to 6187 per qtl. As market is expected to start normal activities after relaxation in the lockdown, more down side movement is unlikely. The demand from hotel industries, railways and from retail sector is yet to improve. In some markets, chana is ruling below MSP or near MSP. Farmers have hold stocks as the most market remained closed. It would come out again as timing for the procurement drive has been extended till end of the month. The crop size is low and AW has revised its chana production estimate down by 15 lakh MT from 10.6 to 9.76 MMT. New season started with 21.32 MMT carry in stock. However, total availability would decrease from 128.32 to 121.99 lakh MT. It would keep price well supported at the current level.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. Following graph illustrates chana price movement in different markets:

**Price Dynamics:** Prices are likely to trade sideways in June-2021 due to:

- The demand is yet to pick up from bulk industry
- Restricted buying by mills due to the uncertain market conditions.
- Nafed has around 8.5 lakh MT old stock
- Softening prices of other pulses
- The import flow from the LDC and

**Seasonality Index:** hints slightly sideways movement for spot market for June-2021.

## Chana Future Market Analysis:

### Technical Commentary:

- Decreasing price & OI hint market to trade weak in the short to medium term.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs

### **Strategy: buy on dip**

| Supports & Resistances |       |      | S1         | S2    | PCP  | R1   | R2   |
|------------------------|-------|------|------------|-------|------|------|------|
| Chana                  | NCDEX | July | 5170       | 5080  | 5198 | 5340 | 5423 |
| Monthly Trade Call*    |       |      | Call       | Entry | T1   | T2   | SL   |
| Chana                  | NCDEX | July | Buy on dip | 5170  | 5270 | 5300 | 5120 |

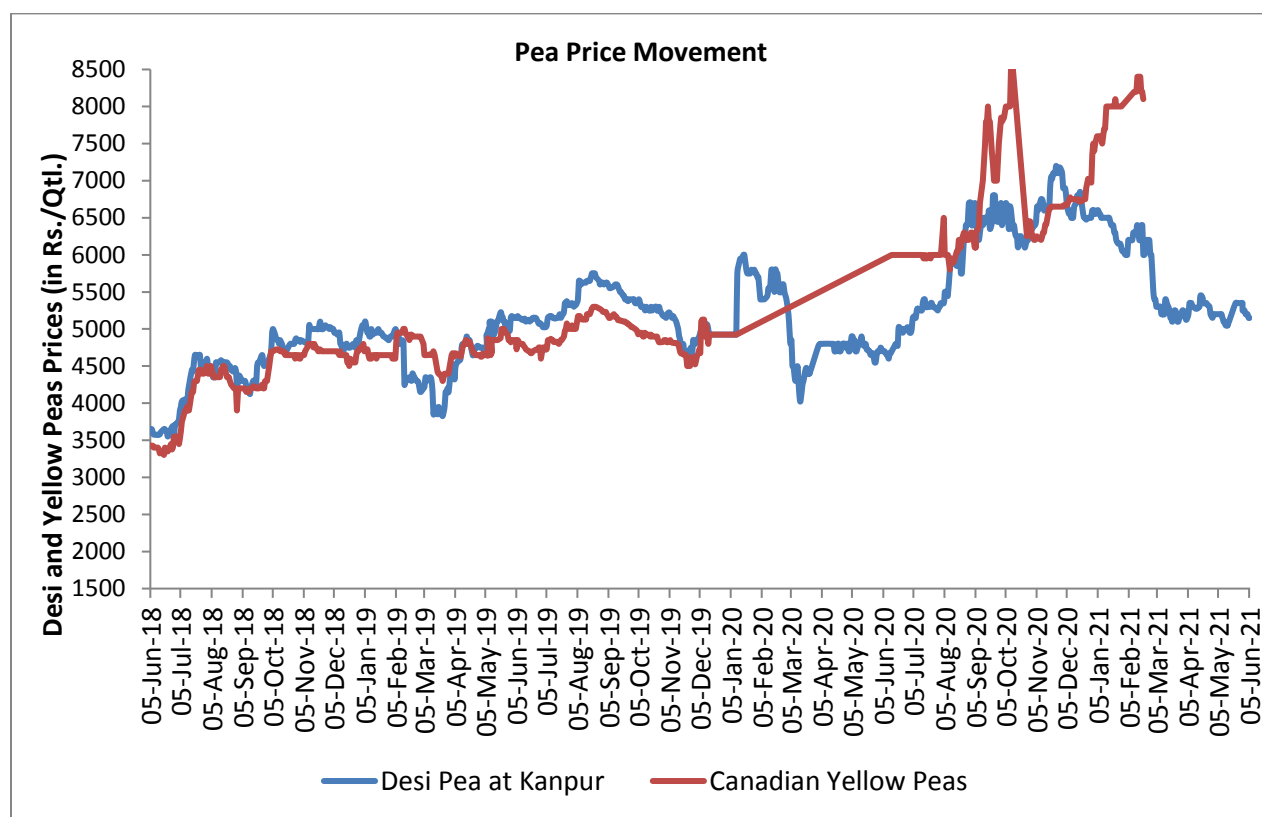

\*Don't carry forward position for the next month

### **Field Pea (Matar/Dry Pea):**

#### **Fundamental Analysis and Outlook:**

Despite the low availability of imported peas, peas prices decreased slightly and the pressure may continue in the coming weeks too.. The availability of chana at low price is capping peas price too despite the arrival from local markets is decreasing. In Kanpur market peas is ruling at Rs 5150--5200 while green peas is hovering at Rs 7200-7400. Govt has not taken any decision over peas import as of now. Steady to slightly weak tone may prevail in the cash peas market.

Despite stable demand for peas and daal, prices are expected to trade steady to slightly weak. Consumers have shifted from pea daal to other cheaper options. So ,the govt.'s move is very crucial from pea price point of view. Following chart shows price movement in various markets:

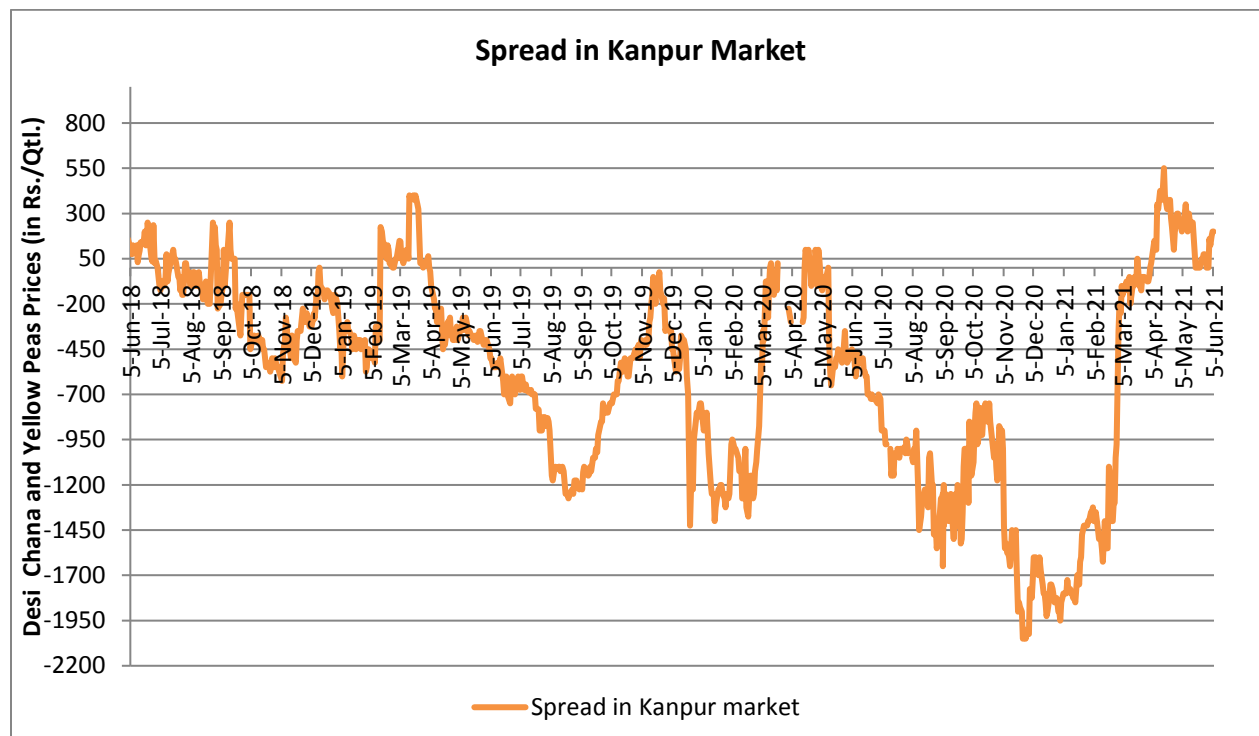

#### **Price Dynamics:**

**Pea market is expected to trade steady to weak in June due to:-**

- Weak demand at higher price
- Availability of mango at cheaper price
- Likely higher availability of green vegetable in monsoon season

#### **Spread With Chana:**

Gap has increased from Rs 125 to Rs 250 in April over March-2021, based on monthly average of the price. Spread is expected to remain in positive zone in May on relative movement in the Chana prices.

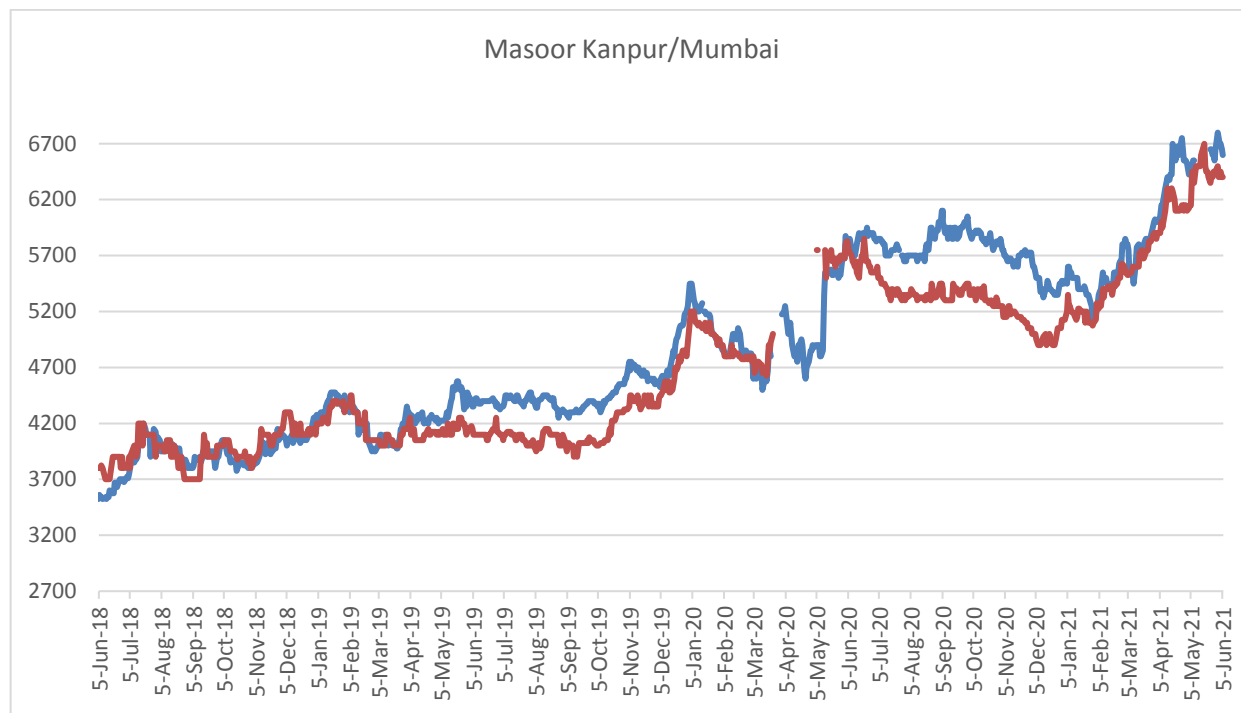

**Market Outlook For June:** Steady to slightly weak movement is expected in June-2021.

### Masoor (Lentils):

Masur market traded up by 2.72% to 6572 in May over April-2021. No major spike is expected in June as arrival is expected to increase. August onward Canadian crop would be available. If prices move up, govt. may reduce import duty as per the domestic requirements. Agriwatch has revised its production estimates down from 13.49 to 11.73 lakh MT. Demand is expected to cool down and arrival too may increase in June-2021. So, any jump in lentils market is unlikely. However, price would not decrease to Rs 6000 in any case. As the prices are ruling higher from MSP, Nafed is unable to procure at Rs 5100.

**Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22** due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22.

### **Price Trend In Cash Market:**

Note: Red colour shows Masur Canada:

### **Price Dynamics:**

In May-2021, average price in key market Kanpur was up by 2.72 % to Rs 6410 per qtl. MoM basis. Prices are likely to trade sideways in June-2021.

### ***Sideways movement is expected in June due to:***

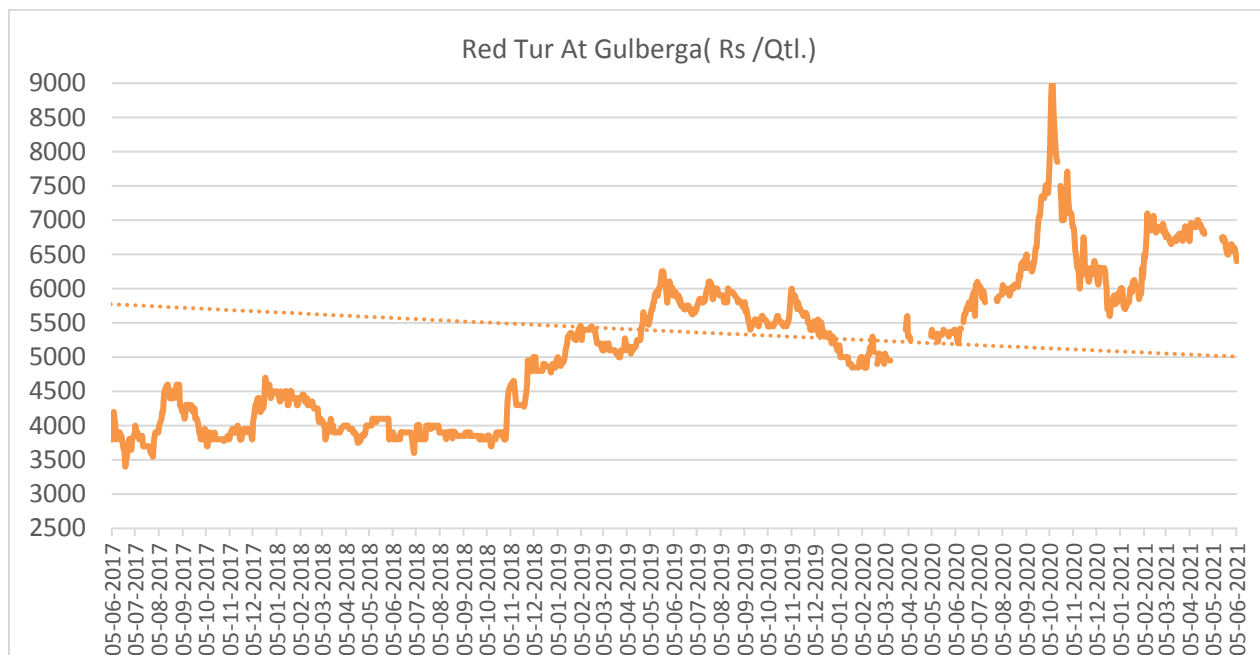

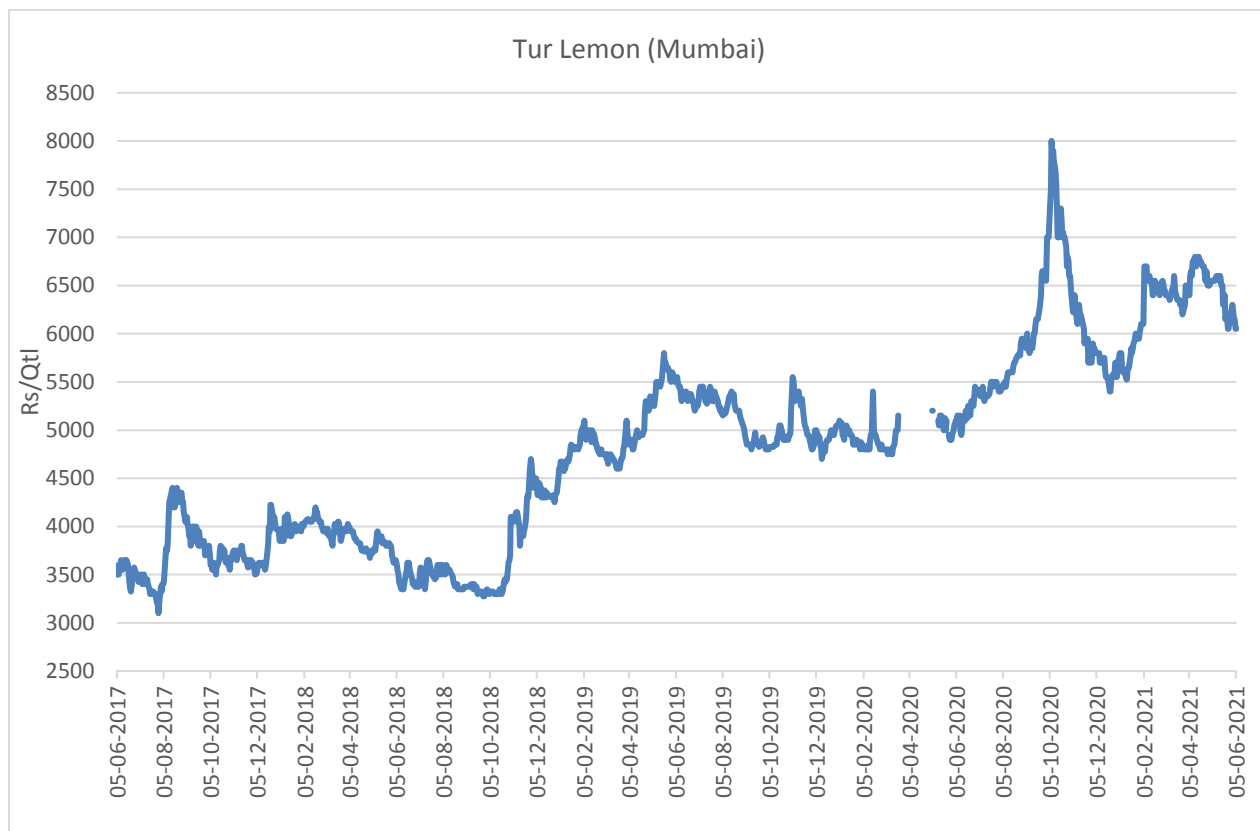

- Weak demand, arrivals may increase
- Normal trade is yet to start
- **Outlook for June:** Sideways tone may prevail

### ***Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):***

#### ***Fundamental Analysis and Outlook:***

##### ***Market Recap:***

Tur market traded weak by 3.78% to Rs 6630 in May over April. Slight recovery might be seen as import free and MSP increased from 6000 to 6300. It may encourage farmers to grow more. The import flow will increase so any spike is unlikely in June. Tur in Gulberga market traded at Rs 6500-6550 per qtl and may cross Rs 6700-6800. Nafed too has less than 3.44 lakh MT old stock. It shows normal supply side.

### Price Dynamics:

In May-2021, average price in Gulberga market increased by 3.78 % to Rs 6630 per qtl. due to new import policy where Tur was placed in free list. Slight improvement might be seen in June.

. Tur price in June is likely to trade firm due to:

- Slower pace of import
- New crop not available before November
- Arrival is decreasing in spite of changed import policy

**Seasonality Index**-depicts steady to slightly firm tone.

### Market Outlook for June:

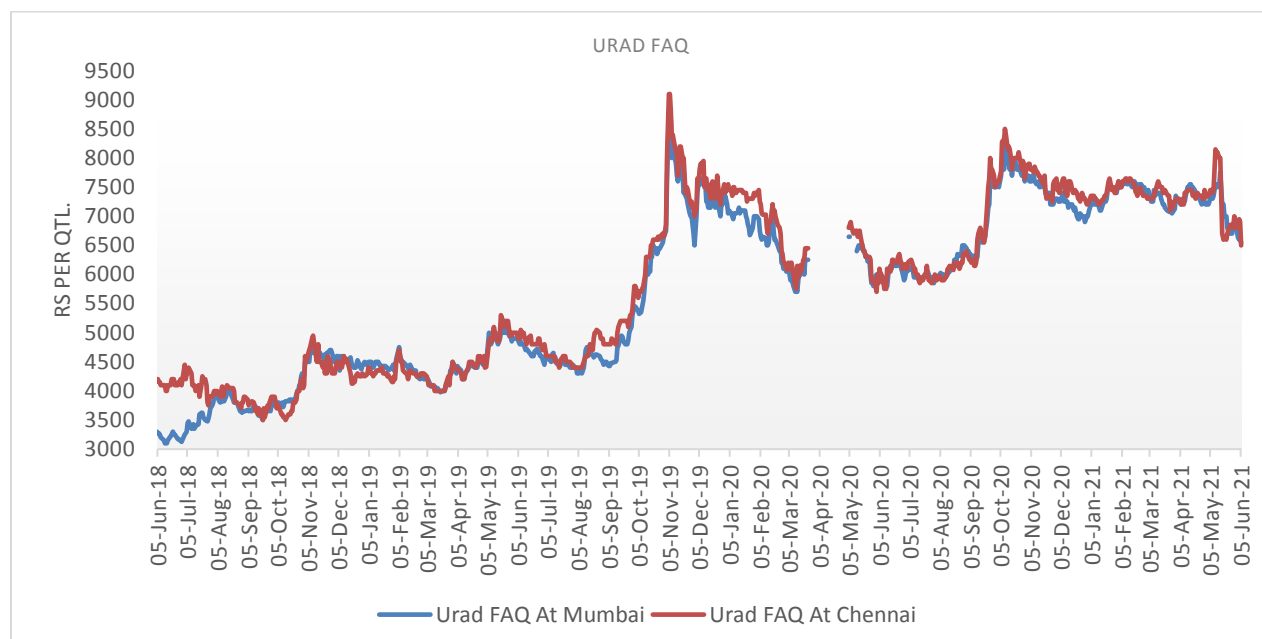

Fundamental remains supportive for Tur cash market in the near to medium term.

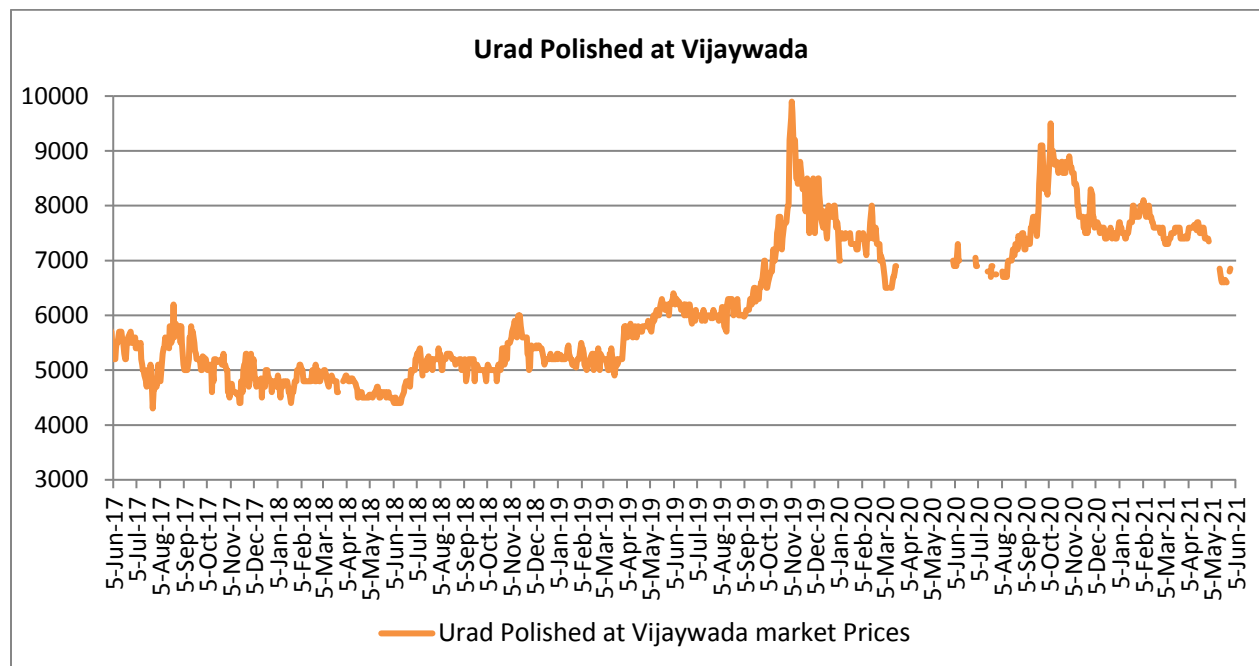

### Urad (Black Matpe/Black Gram)

#### Fundamental Analysis and Outlook:

#### Market Recap:

New import policy and stock verification order have changed the inner tone in the market. It decreased by around 12% in the second half of May. It is ruling now at Rs 6600-6650. However, some recovery was seen since then. As import flow is to increase, pressure on price would continue. Tone remains weak for the June month.

**Seasonality Index** depicts steady to firm movement in May-2021.

**Price Dynamics:**

In May-2021, average prices in key markets including Mumbai/was down by 12%% to 6550. In Chennai it was ruling at 6650. Prices may stay steady to slightly weak in June due to:

- Weak demand & eased supply side
- The volume of import may increase
- Consumer shifting from other cheaper sources
- Forecast for good monsoon rains &
- Higher MSP(6300)

**Market Outlook for June:** Prices are likely to trade steady to slightly weak .

**Fundamental Analysis and Outlook For Moong:**

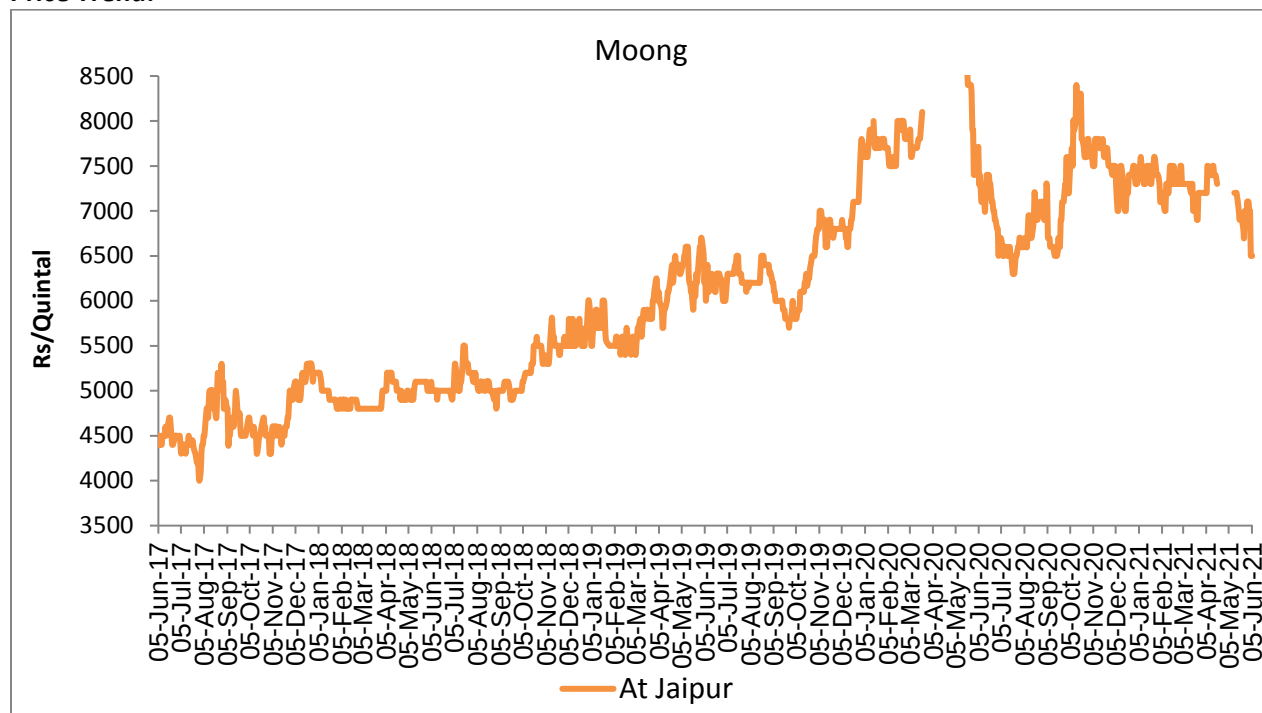

**Market Recap:**

Moong cash market is likely to traded down by 12 % in May-2021 due to new policy as supply demand side is almost balanced. Pressure might be felt with new import policy. Arrivals from the summer crop continue while cheaper import from Myanmar may start. Moong is being traded at Rs 6500-6600.MSP for kharif has been fixed at Rs 7275.it may help price to recover. Nafed too would start procuring.

**Price Dynamics:**

Agriwatch expects 14.95 lakh MT kharif production as per revised estimates after discounting the flood and higher rains generated loss. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year. As demand is weak , moong cash market may trade steady to slight weak.

**Price Trend:**

**Market is expected to trade weak in June due to:**

- Arrival continues from the summer crop
- Normal demand
- Availability of old stock in central pool and
- Good sowing prospects

**Market Outlook for June:** Steady to slightly firm movement is expected.

**Annual Rate Of Inflation Based On Monthly WPI**

| Month  | All Commodities | Primary Articles | Food Articles | Pulses | Gram | Arhar | Moong | Masur | Urad | Gram Powder (Besan) |

**Wholesale Price Index-Monthly**

The chart displays the monthly Wholesale Price Index (WPI) for various commodities from April 2017 to April 2021. The Y-axis represents the index value, ranging from 50 to 200. The X-axis shows the months from Apr-17 to Apr-21. The chart includes six data series: ALL COMMODITIES (blue), FOOD ARTICLES (red), FOOD GRAINS(CEREALS+PULSES) (green), PULSES (purple), Gram (Chana) (teal), and Arhar (Tur) (orange). The index generally shows an upward trend, with a significant peak in late 2020 and early 2021, reaching nearly 200 for some commodities.
