Pulses Sector-Highlights

*The overall sentiments in pulses market, barring lentils remain weak despite the **low area coverage** under kharif pulses so far. The uneven distribution of rains in Karnataka, Maharashtra, Madhya Pradesh and Rajasthan has slowed down the sowing activities. Revival of monsoon is expected from next week and Agriwatch expects the sowing activities to pick up again. The placing of tur, Moong and Urad from restricted to free list in mid-May (15th May), the stock limit order from 2nd July-2021 and the commencement of Chana release by Nafed from old crops in Maharashtra, Madhya Pradesh and Rajasthan have changed the market sentiments except lentils. Bulk buyers like mills, stockists have restricted buying. Demand is weak. After mid-July demand should recover and the pressure on Pulses price ease.*

Chana cash market traded down by 3 % from Rs.5078 to 4945 during the week under review. Steps taken by the govt. like stock limit, sales by Nafed amid weak demand for daal & besan pressurized the market and it may continue if the festive demand gets delayed by 10 days. Supply side is at comfortable level. Traders and stockists, who have more stock than stipulated limit, have started decrease their stock. So, the renewed demand, as expected, would be a price driving forces for the Chana cash market. Steps taken by the govt. would continue to rein in the prices. Chana in Delhi market traded at Rs 5025 while July futures closed at Rs.4807. The overall tone is bearish.

*Govt's steps taken in mid-May (changed import policy) and 2nd of July-2021(stock limit order) to reign in **Tur** spiraling prices worked well and prices have come down by 7 % from 6800 to Rs 6300 now in Gulbarga market. Prices in other market too decreased in the same ratio. Increasing possibility of the higher import flow from the African countries like Mozambique, Malawi September onward, the limited import from Myanmar may help to increase supply in the domestic markets. Quotes in Myanmar too decrease by \$20 to \$840 in last two days. Area is down right now, but is expected to improve in coming weeks with expectation of revival in monsoon advancement soon. So any spike is unlikely in July and marginal increase might be seen in Aug. Demand from bulk buyers is weak. State like Gujarat may cover the lag in area in other states. If monsoon remains de-active for the next 10 days, issues with crop size may surface again.*

*Sentiments in **Urad** market too remains weak as supply side is increasing through import and stockists due to stock limit order, free import and the stock declaration order. Stockists are releasing stock as new crop is hardly two months away now. The prices of Urad FAQ have decreased by 20 % from 7750 to 6200 from mid-May up to now. Sowing is lagging behind right now, may improve with likely rains in the growing states. Supply side seems at comfortable level and may continue to trade near current level. Myanmar is offering SQ Urad at \$940 and FAQ at \$845 per MT basis Indian ports. Farmers may maintain area at the previous year's level .if the monsoon plays truant, area may decrease. Demand remains weak.*

*Continued arrivals from the summer crop, free import, stock limit and likely good kharif crop have turned **Moong** market sentiment weak. The market has decreased by 10% from 700 to 6300 from mid-May to 10th of July. It may decrease further if prospect for kharif Moong improves. Myanmar is offering Moong at \$950(INR Rs 6600-6700 at Indian ports) per MT. Weather is favorable and higher MSP (7196 to 7275) for the new season may encourage farmers to maintain kharif area at previous year level. Supply side would ease further.*

Lentils market may trade up again as availability in the market is low despite the import flow. Global market is still ruling higher and the issue of the crop size in Canada continues. Crop in Canada is in dire need of rains. The next 10 days are very crucial for the standing crop. If it rains, forward quotes for the new crop may decrease. In the domestic market lentils price moved up by Rs 100 to 6700, imported lentils in Mumbai was quoted at 6600. It may further move up by Rs 200, as soon as demand starts.

Global Market:

Lentils markets in the North America continued to trade firm on the back of strong export sales and fear of low yield in major growing belts. Millers, importers and traders are expecting reduction in duty as supply side is tight in the local market. Indian gov.t too is monitoring market very closely and taking necessary actions to control the price rise. In this regard 3 steps, like freeing import of Tur, Moong & Urad from restricted to free list till October-2021 on 15th May, stock declaration and stock limit on 2nd July-2021, have been taken. All these developments go against exporting countries as prices in the Indian markets have decreased by 10 to 20 %, barring lentils, from mid-May-2021.

Green lentils exporters in Canada are paying heed to seeding progress for this summer's kahrif crop. Progressive area coverage is below the long term average but is higher than delayed seeding in 2019.

Global field peas market traded firm on increasing fear of low production in the North America. Most of the producing region is facing dry and hot conditions, resulting in deteriorating crop ratings and accelerating plant development in parts of the growing area. Grain size may be small and the yield low. Export movement has slowed down. Buyers are in a wait and watch mood.

Chickpeas market too traded up due to doubt over yields and quality in Canada and the US. However, desi chickpeas traded low due to por demand from Pakistan and the Asian countries. It has affected chickpeas value in Australia too. India is not taking interest to buy Chana as prices have come down here below minimum support price.

Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres, up 26% from the previous year, according to the USDA's annual seeded area report. Area harvested is forecast at 334,600 acres, 27% above 2020. **Small chickpea** area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-22 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected uncondusive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-

22. Against its domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

Monthly Outlook: -Pulses are likely to trade steady to slightly weak except Lentils in July.

*AW estimates

Note (for chana and Masur crop year is 2020-21 and it will be marketed in FY 2021-22)

Kharif Pulses:

Urad:

Agriwatch kharif Urad preliminary APY estimate for 2021-22 has been given below in tabulated form. MY 2020-21 started with 2.37 lakh MT carry in stock while production is up by 4.89 lakh MT to 24.19 lakh MT this year. It would increase supply to 30.06 lakh MT including imports. Supply side is hence expected to remain slightly tight. The total usage may decrease from 29.72 to 28 lakh MT.

Moong:

Agriwatch kharif Moong preliminary APY estimate for 2021-22 has been given below in tabulated form The new season started with 2.10 lakh MT carry in while production is up by around 2.36 lakh MT to 21.42 lakh MT this year. Despite higher production total supply would increase slightly to 25.17 lakh MT due to lower carry in stock. So the prices should remain on the higher side in 2021 too.

Tur:

Agriwatch kharif Tur preliminary APY estimate for 2021-22 has been given below in tabulated form Production of Tur is likely to increase from 37.19 to 37.28 lakh MT this year due to lower yield despite higher area coverage. Total supply would decrease from 49.56 to 48.14 lakh MT this year. Supply side seems contracting in the ongoing season in comparison to last year.

Rabi Pulses:

Chana: Agriwatch has revised Chana production down from 110.63 lakh MT to 97.67 lakh MT for crop year 2020-21, to be marketed in 2021-22. Supply side would decrease from 128.32 to 121.99 this year. Carryout would decrease from 21.32 lakh MT to 18.49 lakh MT this year. It may keep price well supported throughout the year.

Masur: AW has revised its lentils production down from 13.49 lakh MT to 11.73 lakh MT. As new crop is expected to hit market from May, price should soften, but unlikely to come near MSP. Carryout would decrease from 7.32 to 5.50 lakh MT. Lower carryout stock may encourage import this year too.

<i>Note: Production includes kabuli chana too. If we deduct retention(8 to 10 lakh MT) for seed, availability for market would be 85-86 lakh MT</i>			

Chana (Chickpeas /Bengal Gram):

Market Recap:

Chana cash market traded down by 5.04% to 5180 in June from May-2021. Sentiments remain weak as Nafed has decided to sell Chana stock to increase supply side in the market. Apart from it stock limit order may cap upward momentum. Demand is not improving as expected. As festive season has started so demand for besan should improve. Chana is ruling below MSP and more downside is unlikely. As supply side would increase from Nafed's stock, any jump in Chana cash market is unlikely. New season had started with 21.32 MMT carry in stock. So, supply side would remain at comfortable level.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. Following graph illustrates chana price movement in different markets:

Price Dynamics: Prices are likely to trade sideways in July-2021 due to:

- Low demand for besan and dal at this point of time
- Small investor may prefer to release stock as the high moisture level may affect quality.
- Commencement of release by Nafed
- Softening prices of other pulses and
- The import flow from the LDC

Seasonality Index: hints slightly firm movement for spot market for July-2021.

Chana Future Market Analysis:

Technical Commentary:

- Decreasing price & OI hint market to trade weak in the short to medium term.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs

Strategy: Buy on dip

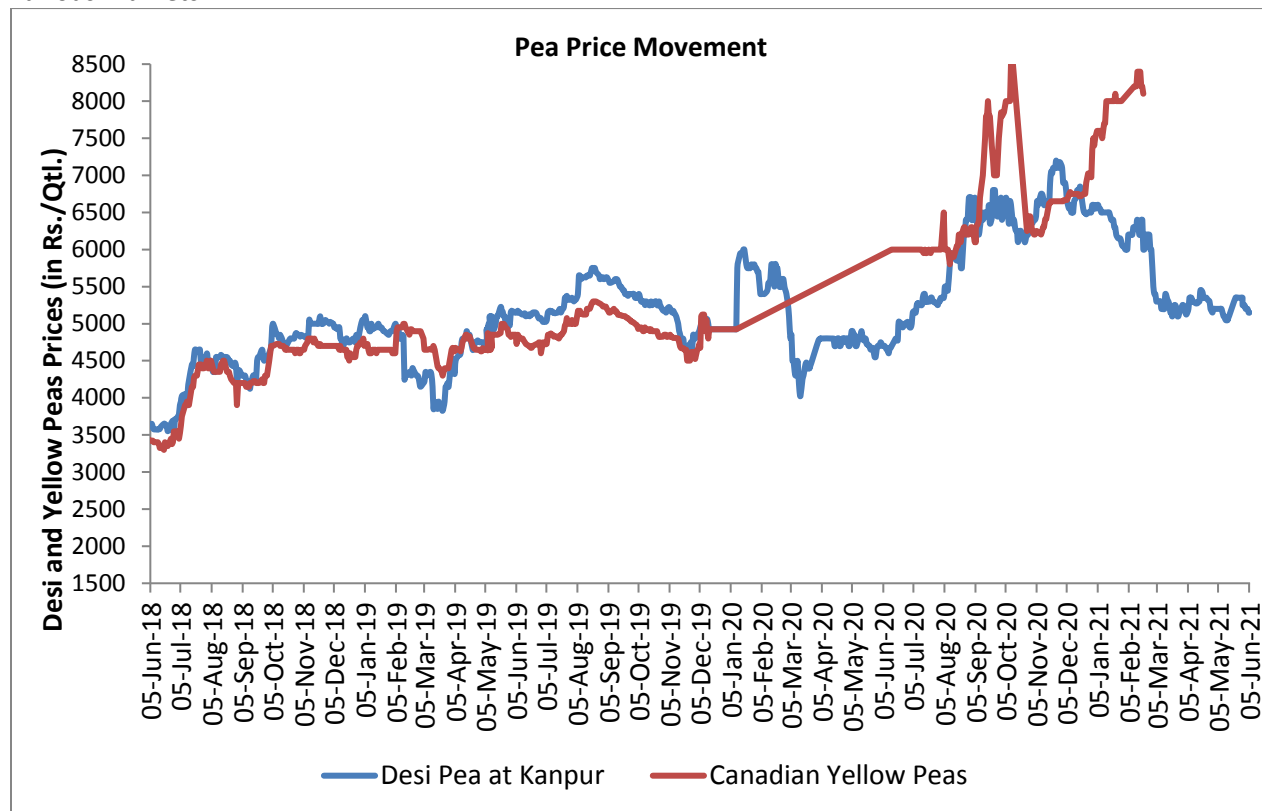

Supports & Resistances			S1	S2	PCP	R1	R2

*Don't carry forward position for the next month

Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

Govt. has not given any import quota for peas as of now. However, if prices of chana moves up(unlikely before 10 of July, when festive season starts,slight recovery might be seen in peas cash market too.If India saves itself from the third wave of COVID-19,demand is expected to improve. Pea's prices traded slightly down due to falling chana prices. Matar in Kanpur market is being traded at Rs 5150 per qtl. There was no quotes for green peas as availability is negligible .As of now there is no intension to open peas import. It may move further down taking cue from weak chana market.Following chart shows price movement in various markets:

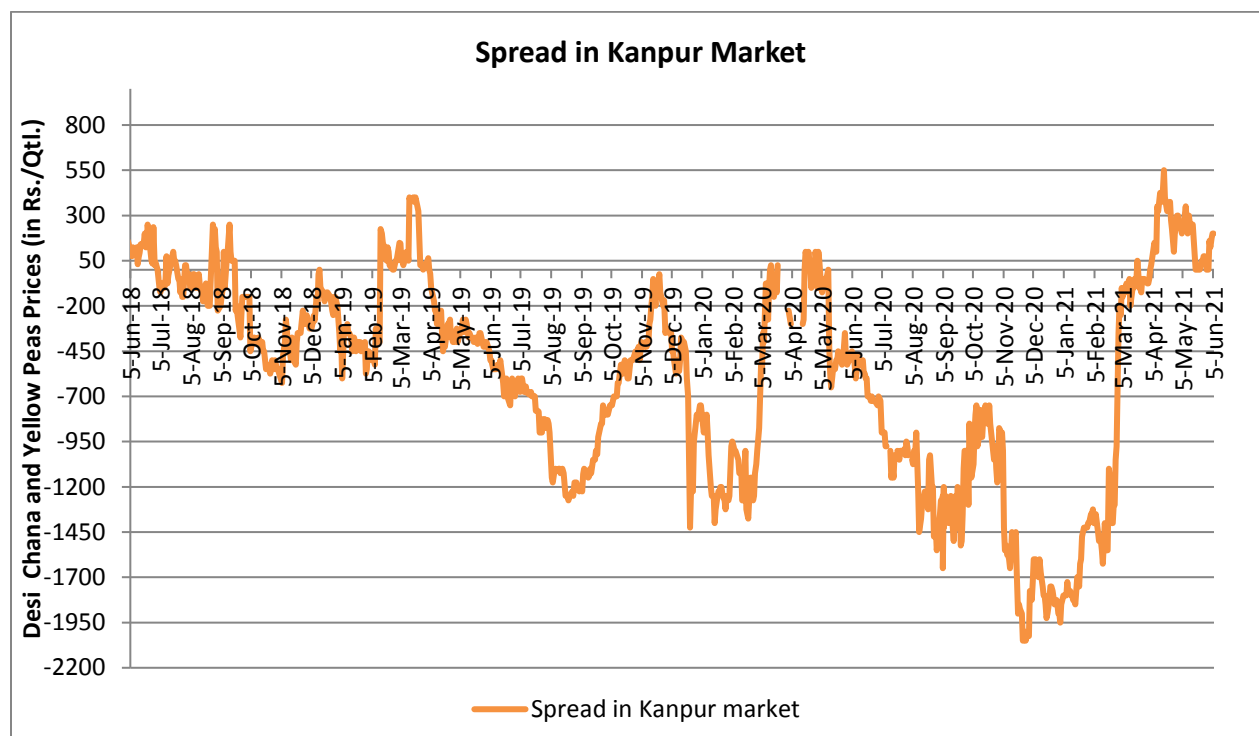

Price Dynamics:

Pea market is expected to trade steady to weak in June due to:-

- Demand is yet to pick up
- Availability of mango at cheaper price
- Likely higher availability of green vegetable in monsoon season

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved in positive zone. Gap has been fulfilled now and it is Rs 100 up now. Spread is expected to remain in the positive zone in July too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

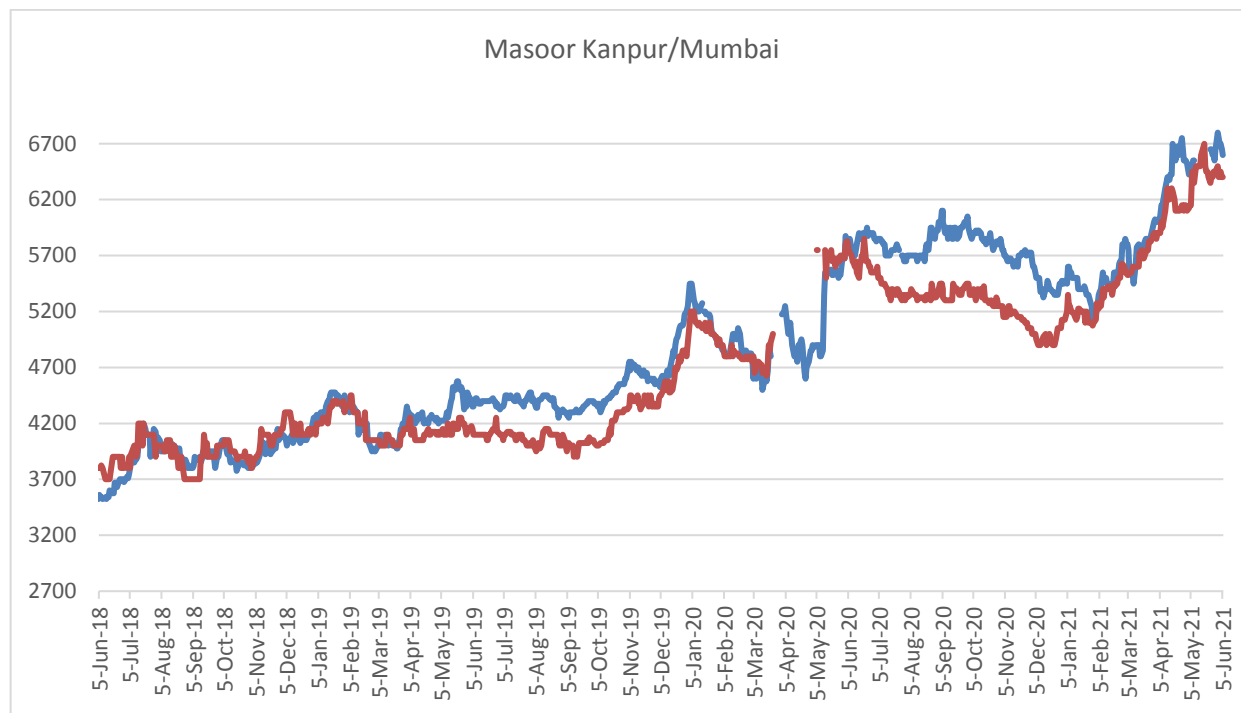

Market Outlook For July: Steady to slightly weak movement is expected in July-2021.

Masoor (Lentils):

The cash Masur market traded down by Rs100 to Rs 6600 in Kanpur market while imported stock traded at Rs 6450-6500 in Mumbai market. Demand is yet to increase. Imposition of stock limit too is pushing prices down. Trades association trades are opposing this move and if it is withdrawn, market may recover again however, it is unlikely that govt will withdraw this move immediately. New crop in Canada would hit market in Aug. However, dry condition may delay sowing activities in Canada and harvesting may be delayed by 15 days. If dry weather continues, production may decline. A vessel having 52000 MT Masur is expected in the second week of July. It may cap uptrend to some extent.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22.

Price Trend In Cash Market:

Note: Red colour shows Masur Canada:

Price Dynamics:

In June-2021, average price in key market Kanpur was down by 5 % to Rs 6200 per qtl. MoM basis. Prices are likely to trade up in July-2021.

Sideways movement is expected in June due to:

- Improving demand & weak arrival
- Low import volume
- Deteriorating condition of Canadian crop

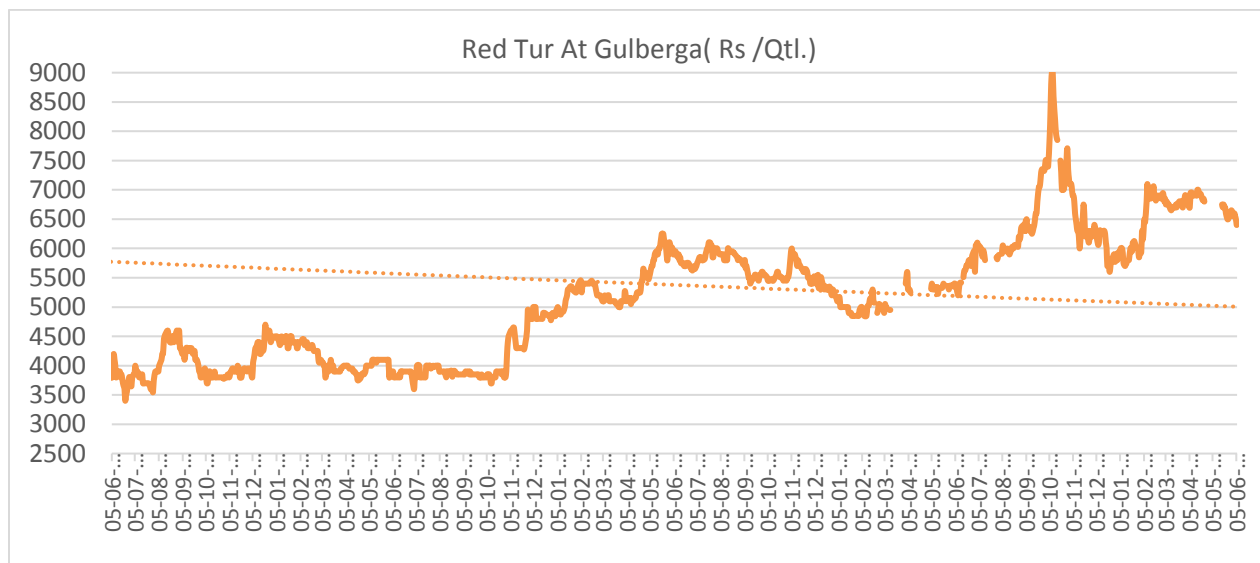

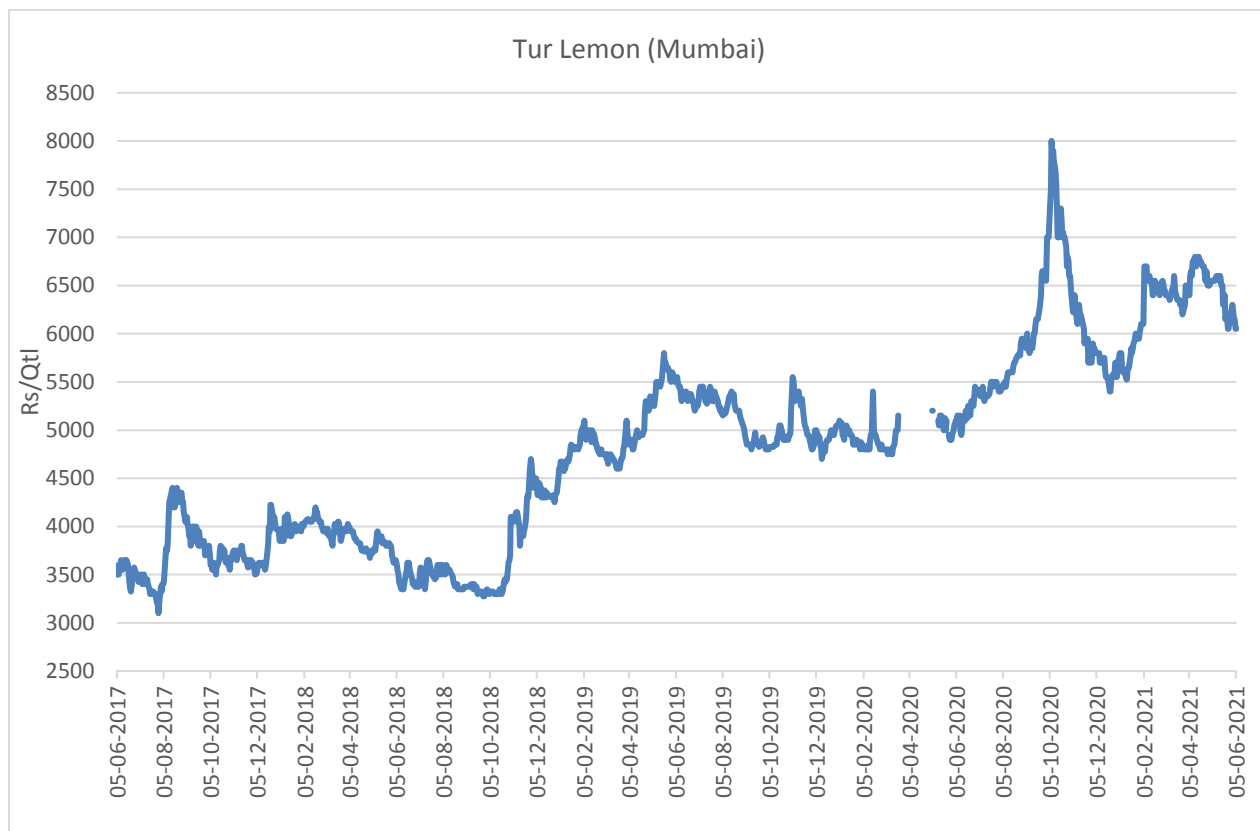

Outlook for July: Firm tone might be seen

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Market Recap:

Tur market traded weak by 9% to Rs 6100 in June over May. Slight recovery might be seen as import is free and MSP increased from 6000 to 6300. It may encourage farmers to grow more. The import flow will increase so any spike is unlikely in July. Tur in Gulberga market traded at Rs 6400-6500 per qtl and may cross Rs 6600-6700. Nafed too has less than 3.44 lakh MT old stock. It shows normal supply side.

Price Dynamics:

In June-2021, average price in Gulberga market decreased by 2.78 % to Rs 6450 per qtl. due to new import policy where Tur was placed in free list. Slight improvement might be seen in June. Apart from it stock limit too have turned sentiments down.

. Tur price in July is likely to trade sideways due to:

- free import till 31st Oct-2021
- Stock limit
- Weak demand

Seasonality Index-depicts steady to slightly firm tone.

Market Outlook for July:

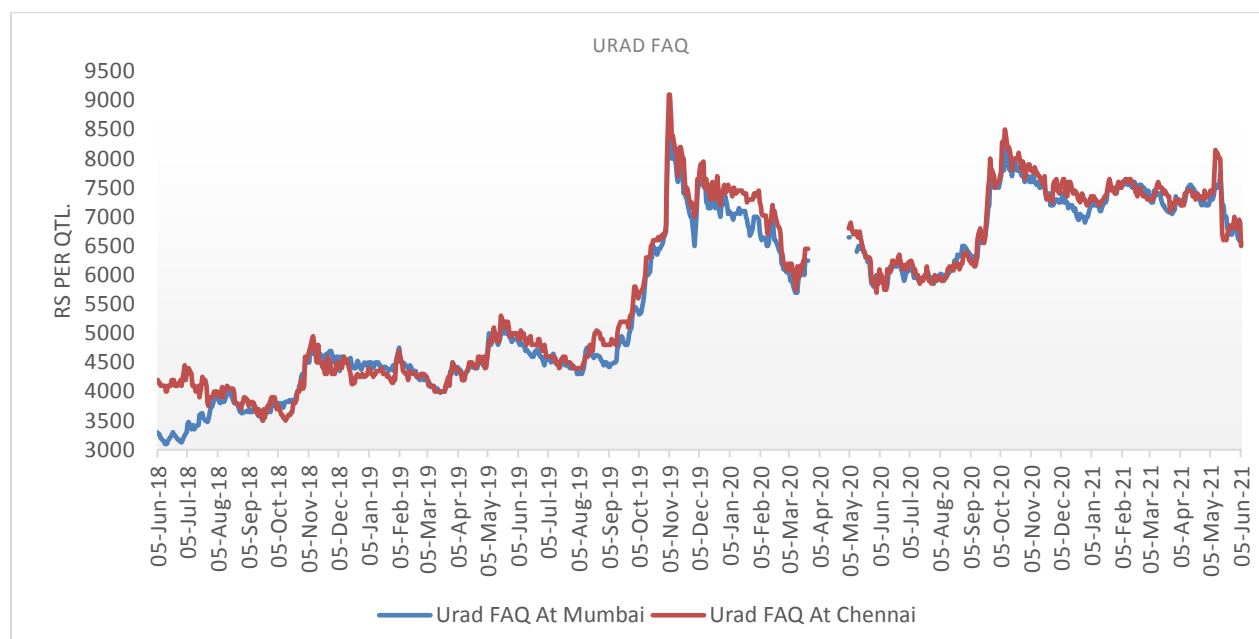

Fundamental remains supportive for Tur cash market in the near to medium term.

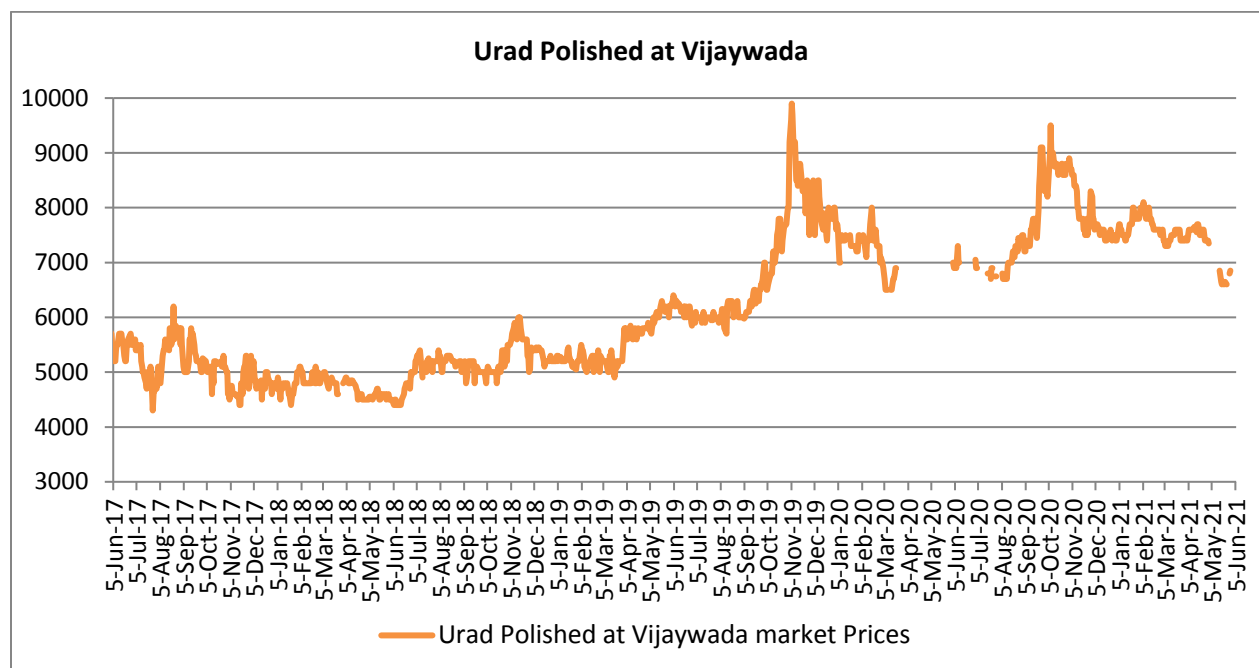

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

Market Recap:

Imported Urad stayed steady at Rs 6650 at Mumbai while the local crop in Tamil Nadu traded down by Rs 50 to Rs6300. Stockists continue to release stocks as the importers are offering Urad at Rs 6500-6650 (New crop) for forward months. So, the cash market is unlikely to move up. Apart from it, the enhanced MSP would encourage farmers to maintain area at previous year's level. so , the pressure may build up again. Myanmar is offering Urad FAQ at \$850 and SQ down by \$25 at \$915.Demand is low.

Seasonality Index depicts steady to weak movement in July-2021.

Price Dynamics:

In June-2021, average prices in key markets including Mumbai/was down by 6%% to 6150. In Chennai it was ruling at 6100. Prices may stay steady to slightly weak in July due to:

- Weak demand & eased supply side
- Stock limit
- Free import
- Revival in monsoon
- Higher MSP(6300)

Market Outlook for July: Prices are likely to trade steady to slightly weak.

Fundamental Analysis and Outlook For Moong:

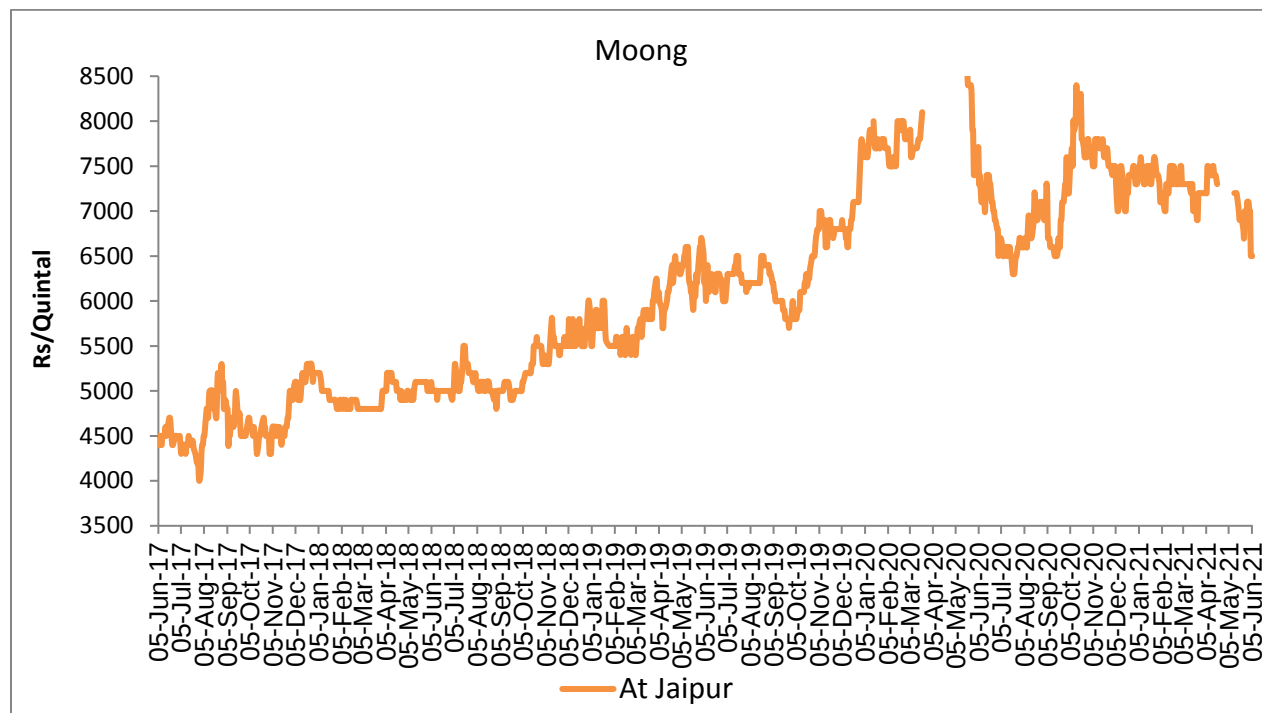

Market Recap:

Pressure on price seems building up again as the purchasing private participation would decrease due to strike in markets against govt's latest move on stock limit order for other pulses. Market may trade down in spite of slight recovery seen in the market. The Import flow may improve as the quotes in Myanmar is steady at \$950 for Annaseva. Kharif sowing progress, monsoon rains, import volume and the purchase volume at MSP would be the main price driving forces for Moong in coming weeks.

Price Dynamics:

Agriwatch expects 14.95 lakh MT kharif production as per revised estimates after discounting the flood and higher rains generated loss. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year. As demand is weak, moong cash market may trade steady to slight weak.

Price Trend:

Market is expected to trade weak in July due to:

- Arrival continues from the summer crop
- Normal demand, free import
- Availability of old stock in central pool and
- Good production prospects

Market Outlook for July: Steady to slightly weak movement is expected.

Annual Rate Of Inflation Based On Monthly WPI

Commodity	Mar-21	Apr-21	May-21
All Commodities	1.6	1.8	2.1
Primary Articles	7.3	3.8	1.8
Food Articles	0.8	1.6	2.2
Pulses	1.4	2.3	3.3
Gram	2.1	3.4	4.4
Arhar	1.0	1.4	4.0
Moong	-0.2	0.4	2.2
Masur	1.2	2.0	3.0
Urad	0.0	-0.5	4.4
Gram Powder (Besan)	2.6	2.5	3.3

Wholesale Price Index-Monthly

The chart displays the monthly Wholesale Price Index (WPI) for various commodities from May-17 to May-21. The Y-axis represents the WPI index, ranging from 50 to 200. The X-axis shows the time period in months. The legend identifies the following categories:

- ALL COMMODITIES (Blue line)
- PULSES (Purple line)
- Moong (Light Blue line)
- FOOD ARTICLES (Red line)
- Gram (Chana) (Teal line)
- Masur (Pink line)
- FOOD GRAINS(CEREALS+PULSES) (Green line)
- Arhar (Tur) (Orange line)
- Urad (Light Green line)

The chart shows a general upward trend in the WPI for most commodities, particularly in the food grains and pulses categories, which reached their highest levels in late 2020 and early 2021. The 'ALL COMMODITIES' index remained relatively stable, ending around 130 in May-21.
