## Pulses Sector-Highlights

**All India Kharif pulses area recovered last week as expected and was up by 1.86 % to 119.54 lakh ha against 117.36 lakh ha last year as on 6<sup>th</sup> Aug-2021.** Arhar area is up by 5.44 % so far while Moong bean and Urad bean are running behind by 2.58 and 1.45 %. Moong and Urad area recovered and may end with last year's level. However, excess rains in Rajasthan, South India, and Madhya Pradesh may slowdown sowing pace. In other states like Mha and Tamil Nadu, farmers would not be able to start re-sowing at least for one week. They may go for short duration crops like Moong and Urad. The loss of standing crop has been reported from Maharashtra, Gujarat and Karnataka and it may extend to some district of Rajasthan and Tamil Nadu too. Total area loss is said to be 50-60 thousand ha for pulses. Maharashtra is the worst affected state. Re-sowing started in Karnataka. In other states sowing activities is normal.

**Lentils market decreased slightly during last few weeks due to low offtake and rains generated disturbances amid poor demand.** With opening of weather it may move up again as demand is expected to improve in August. Availability in global market may decrease to 22 - 24 lakh MT this year as lentils production in Canada may decrease to 14-16 lakh MT against normal of 24 to 25 lakh MT. The heat wave has badly affected the standing crop in the in major growing state Saskatchewan and there is no respite till now. The crop is in pod filling stages and is facing extreme moisture stress. Crop in Australia too is not in good condition and the production there is expected to be around 5 to 5.5 lakh MT against the normal of 6 to 7 lakh MT. So, prices would remain at higher level and it would directly impact the prices in domestic market as India normally imports 8-10 lakh MT annually. The overall tone remains firm. Kanpur market moved down by 50 to 6750 now, while imported Masur is being offered at 6500 in Mumbai. The global market quotes may move up to \$800-850. As of now it is stable at \$750.

**Despite smart recovery in Kharif Moong planting area is lagging behind by 2.58 % to 30.24 lakh ha as on 06th Aug-2021.** As area in Rajasthan has recovered smartly, losses in other states may be neutralized. In Karnataka and M.P. area is slightly up from last year. Now, it would be interesting to see whether farmers would go for re-sowing or shift to other crops, wherever the new planting has been washed out, especially in Maharashtra and in parts of Rajasthan (Baran, Bundi region). As sowing would continue till the first week of Sept, the possibility of re-sowing is still there, but yield is certainly going to be down of re-sown crop. The prices of moong have decreased by 100 to 6600 in Rajasthan. Weather conditions remain the major price driving forces as of now. Myanmar is offering Moong at \$900-950 per MT basis Indian ports.

**Despite recovery in the Urad bean area last week the all India coverage is lagging behind by 1.45 % to 33.90 lakh ha so far.** The main growing state like M.P. the area is down by 5.48 % to 14.64 lakh ha. So gains in Raj, Mh and Guj would compensate the area gap in M.P. As per the latest information around 20,000-25000 Urad area has been lost in Maharashtra and Gujarat. Some losses in Rajasthan too is being reported. It may increase further if rains continues. Prices of Urad in the domestic markets stayed steady at all markets during last week. It traded flat at 6500 to 6600. It may move up again if area loss increases and rains continues in M.P. Rajasthan. Myanmar quotes moved up at \$885 & 1005 per MT basis Indian ports. The overall sentiments remain firm. Weather condition would remain the major price driving force in coming weeks.

**Chana cash markets could not maintain its firm momentum and decreased once again taking cue from the weak futures.** Demand is yet to improve and the cash market may improve again by Rs 200-300 in coming weeks despite comfortable supply side. Festive season has already started and demand for besan, dal is bound to improve. In Delhi market chana cash market moved down by 50 to 5000-5075. The overall sentiment seems firm in the coming weeks.

**Global Market:**

**As per General Customs Administration of China peas import in China increased by 10 % to 2.69 lakh MT in April-2021 against 2.45 lakh MT in March.** Imports so far total 978,833 MT, versus 399,515 in the same period the previous calendar year. Canada exported 2.53 lakh MT in April-2021 to China. United States was the second most important origin shipping 9,495 MT, followed by France at 3,511 MT.

**Peas harvest in US is 40% complete, compared to 14% at the same time last year.** Farmers in Montana made considerable progress with their harvest, with an estimated 61% of the crop now in the bin, triple progress by the beginning of August last year. Progress is also being reported in North Dakota, with 11% of that state's crop now in the bin, up from 8% at this time last year as per Statpub latest release.

**According to reports from USDA state level offices Peas harvesting started in the US.** In Montana around 20% crop has been harvested. Limited progress is also reported in Washington state and Oregon, suggesting around 101,000 acres of peas have been harvested, compared to roughly 10,000 at this time last year. Markets expect the first production estimate in September, but if yields are at least within 10% of their recent five year average around 88,000 metric tons (MT) of peas are now in bin, compared to roughly 7,000 at this time last year.

**Lentils markets in the North America continued to trade firm on the back of strong export sales and fear of low yield in major growing belts.** Millers, importers and traders are expecting reduction in duty as supply side is tight in the local market. Indian gov.t too is monitoring market very closely and taking necessary actions to control the price rise. In this regard 3 steps, like freeing import of Tur, Moong & Urad from restricted to free list till October-2021 on 15th May, stock declaration and stock limit on 2nd July-2021, have been taken. All these developments go against exporting countries as prices in the Indian markets have decreased by 10 to 20 %, barring lentils, from mid-May-2021.

**Global field peas market traded firm on increasing fear of low production in the North America.** Most of the producing region is facing dry and hot conditions, resulting in deteriorating crop ratings and accelerating plant development in parts of the growing area. Grain size may be small and the yield low. Export movement has slowed down. Buyers are in a wait and watch mood.

**Chickpeas market too traded up due to doubt over yields and quality in Canada and the US.** However, desi chickpeas traded low due to poor demand from Pakistan and the Asian countries. It has affected chickpeas value in Australia too. India is not taking interest to buy Chana as prices have come down here below minimum support price.

**Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres, up 26% from the previous year,** according to the USDA's annual seeded area report. Area harvested is forecast at 334,600 acres, 27% above 2020. Small chickpea area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

**The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-22 against 1722 thousand ha last year in Canada.** However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected uncondusive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

**Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield.** Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

**Monthly Outlook:** -Pulses are likely to trade steady to slightly firm in Aug.

**\*AW estimates**

**Note (for chana and Masur crop year is 2020-21 and it will be marketed in FY 2021-22)**

**Marketing year** (Urad: Aug to July, Moong: July to June, Tur: Dec to Nov. Chana: March to Feb and Masur: March to Feb) 2021-22 kharif preliminary production estimate is due and may be published by the end of the month.

**Kharif Pulses:**
**Urad:**

Agriwatch kharif Urad preliminary APY estimate for 2021-22 has been given below in tabulated form. MY 2020-21 started with 2.37 lakh MT carry in stock while production is up by 4.89 lakh MT to 24.19 lakh MT this year. It would increase supply to 30.06 lakh MT including imports. Supply side is hence expected to remain slightly tight. The total usage may decrease from 29.72 to 28 lakh MT.

**Moong:**

Agriwatch kharif Moong preliminary APY estimate for 2021-22 has been given below in tabulated form The new season started with 2.10 lakh MT carry in while production is up by around 2.36 lakh MT to 21.42 lakh MT this year. Despite higher production total supply would increase slightly to 25.17 lakh MT due to lower carry in stock. So the prices should remain on the higher side in 2021 too.

**Tur:**

Agriwatch kharif Tur preliminary APY estimate for 2021-22 has been given below in tabulated form Production of Tur is likely to increase from 37.19 to 37.28 lakh MT this year due to lower yield despite higher area coverage. Total supply would decrease from 49.56 to 48.14 lakh MT this year. Supply side seems contracting in the ongoing season in comparison to last year.

**Rabi Pulses:**

**Chana:** Agriwatch has revised Chana production down from 110.63 lakh MT to 97.67 lakh MT for crop year 2020-21, to be marketed in 2021-22. Supply side would decrease from 128.32 to 121.99 this year. Carryout would decrease from 21.32 lakh MT to 18.49 lakh MT this year. It may keep price well supported throughout the year.

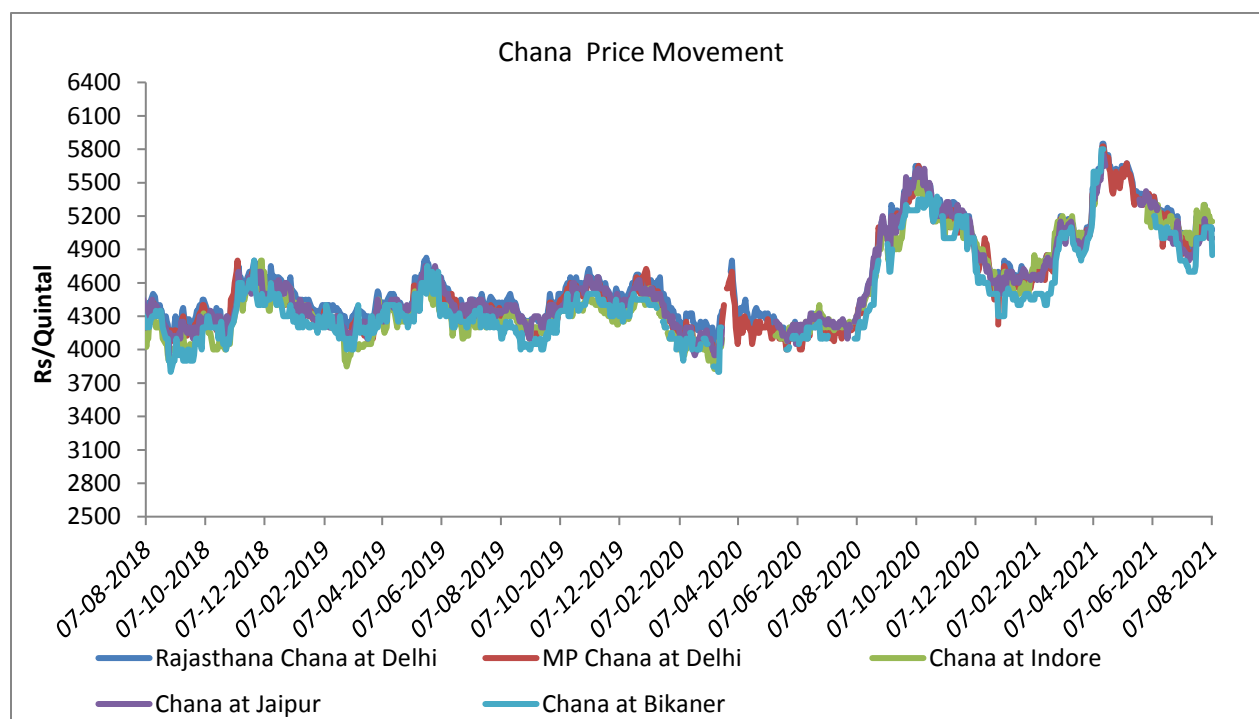

**Masur:** AW has revised its lentils production down from 13.49 lakh MT to 11.73 lakh MT. As new crop is expected to hit market from May, price should soften, but unlikely to come near MSP. Carryout would decrease from 7.32 to 5.50 lakh MT. Lower carryout stock may encourage import this year too.

### Chana (Chickpeas /Bengal Gram):

#### Market Recap:

Chana cash market traded down by 3.62% to 4993 in July from June-2021. Slight improvement is expected as demand is bound to improve in August. Nafed continues to sell Chana stock. So supply side seems balanced right now. As, govt.'s production estimate is at higher side, its impact will be neutralized and price would go up to a certain extent. Agriwatch expects market to go up by 200-300 in the coming weeks. Apart from it stock limit order may cap upward momentum. Chana is ruling below MSP and more downside is unlikely. As supply side would increase from Nafed's stock, any jump in Chana cash market is unlikely. New season had started with 21.32 MMT carry in stock. So, supply side would remain at comfortable level in the lean season. If prices start moving up unexpectedly, govt has option to change duty structure.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. Following graph illustrates chana price movement in different markets:

**Price Dynamics:** Prices are likely to trade up in Aug-2021 due to:

- Improving demand for besan and dal.
- Private trade's/farmers intention to retain stock
- Nafed's regular selling may cap upward momentum.
- Any change in import policy for Chan have potential to drive prices down.
- improving prices of other pulses and
- The low import flow from the LDC

Seasonality Index: hints slightly firm movement for spot market for August-2021.

## Chana Future Market Analysis:

### Technical Commentary:

- Decreasing price & OI hint market to trade weak in the short to medium term.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs

### **Strategy: Buy on dip**

| Supports & Resistances |       |     | S1         | S2    | PCP  | R1   | R2   |

### Field Pea (Matar/Dry Pea):

#### Fundamental Analysis and Outlook:

Peas cash market traded firm in the month of July and moved to 6000 in July before coming down to 5850 now. Chana market traded firm in July and decreased again as Nafed continues with active selling. It has impacted peas price too in India. As soon as Chana improves, peas too may go up again. Pea's prices traded slightly down due to falling chana prices. Matar in Kanpur market is being traded at Rs 5150 per qtl. There was no quotes for green peas as availability is negligible. As of now there is no intension to open peas import. Following chart shows price movement in various markets:

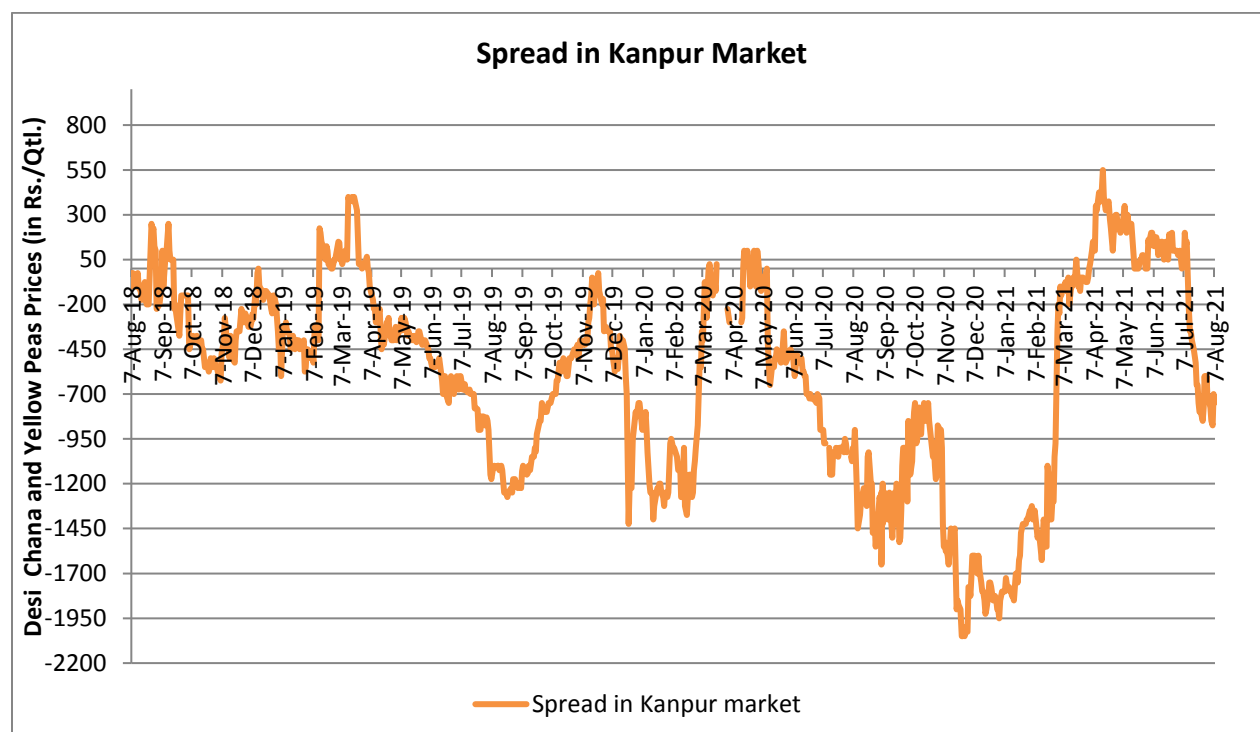

### Price Dynamics:

**Pea market is expected to trade steady to firm in Aug due to:-**

- Low availability of stock in domestic market
- Improvement expected in other pulses prices ,that may lend support to peas market.
- Commencement of festive season
- No import

### Spread With Chana:

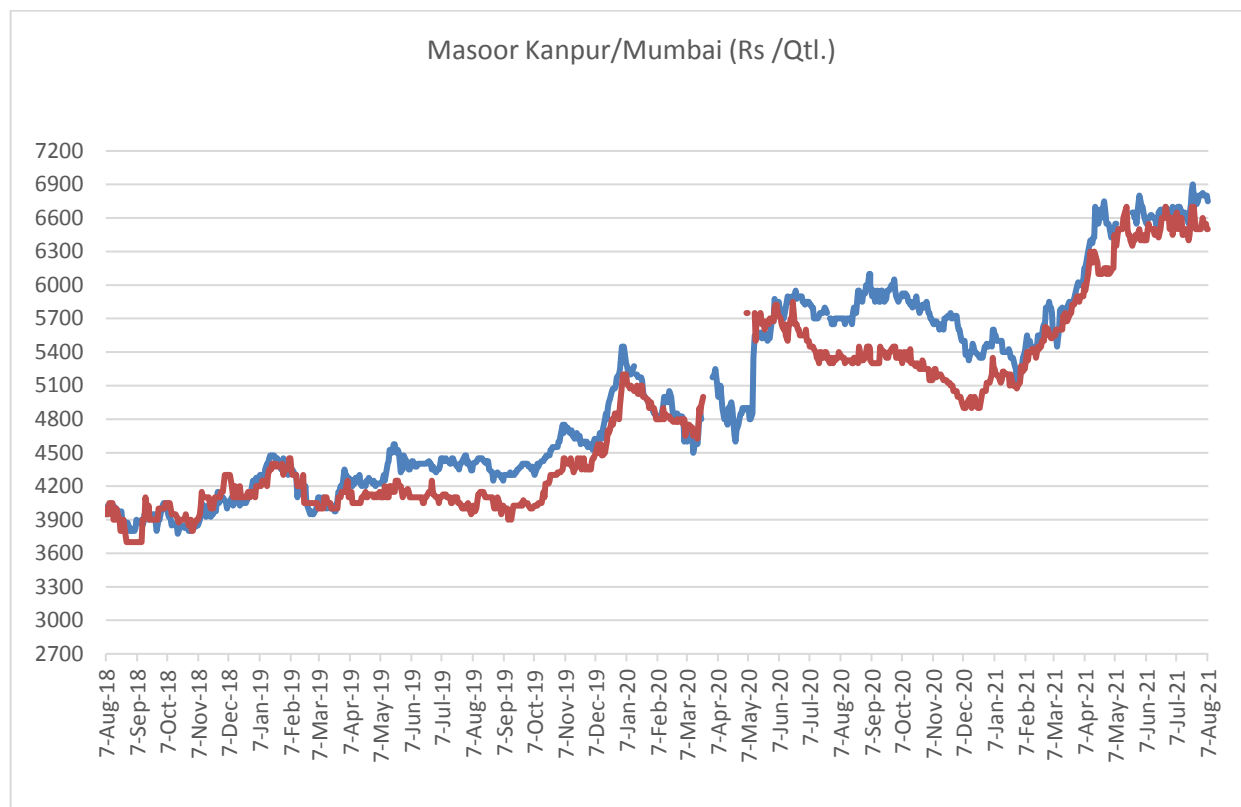

Spread between Chana and Peas, at Kanpur market moved in negative zone. The gap has increased from 200 to minus 750 now. Spread is expected to remain in the negative zone in August too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in August

**Market Outlook For Aug:** Steady to slightly firm movement is expected in August-2021.

### Masoor (Lentils):

The cash Masur market traded up by 0.83 5 to 6621 in August from June. Right now it is being traded at 6700 in Kanpur while 6500 in Mumbai. Demand has started improving and market may go up in August by Rs200 from the current level. New crop in Canada would hit market in Sep. However, dry condition may reduce crop size by 30 to 40 % and Canada may harvest 16-17 lakh MT Masur this year. Global Masur market may move up to \$850-900 level in Oct-Nov. So ,prices are bound to increase.

### Price Trend In Cash Market:

Note: Red colour shows Masur Canada:

### Price Dynamics:

In July-2021, average price in key market Kanpur was down by 7 % to Rs 6650 per qtl. MoM basis. Prices are likely to trade up in August-2021.

#### **Firm movement is expected in August due to:**

- Improved demand
- Low stock in domestic and global market.
- Likely lower production in Canada this year
- Negligible stock with Nafed

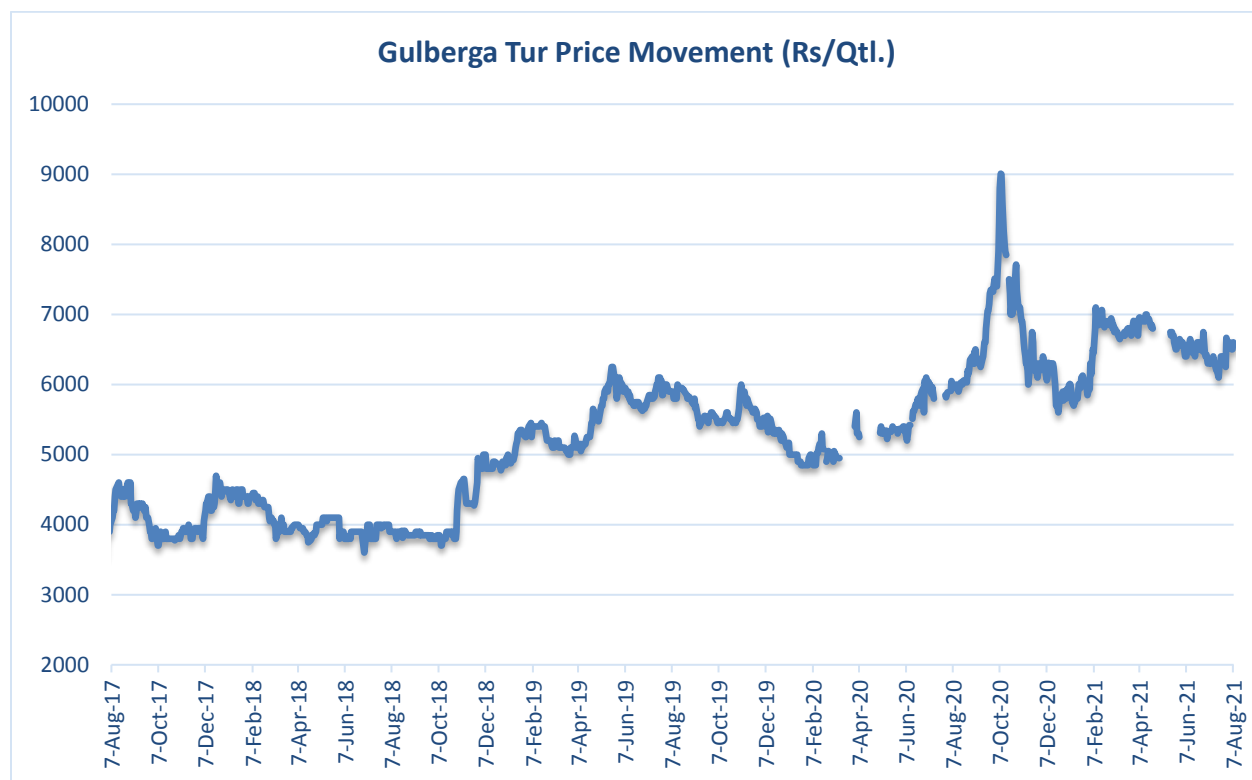

**Outlook for August:** Firm tone might be seen

### **Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):**

#### **Fundamental Analysis and Outlook:**

##### **Market Recap:**

Tur market traded down by 4% to Rs 6342 in July over June. Slight recovery might be seen as import is free and MSP increased from 6000 to 6300. It may encourage farmers to grow more. The import flow will increase so any spike is unlikely in August. Tur in Gulberga market traded at Rs 6600-6650 per qtl and may cross Rs 6800-6900.

### Price Dynamics:

In July-2021, average price in Gulberga market decreased by 1.78 % to Rs 6600 in August. As import flow remain at the low level. Crop size might be at last year's level.

. Tur price in August is likely to trade firm due to:

- Fear over low crop size despite better rainfall.
- Low yield from re-sown tur after flooding in Mha, Karnataka and Gujarat
- Improving demand

**Seasonality Index**-depicts steady to slightly firm tone.

### Market Outlook for Aug:

Fundamental remains supportive for Tur cash market in the near to medium term.

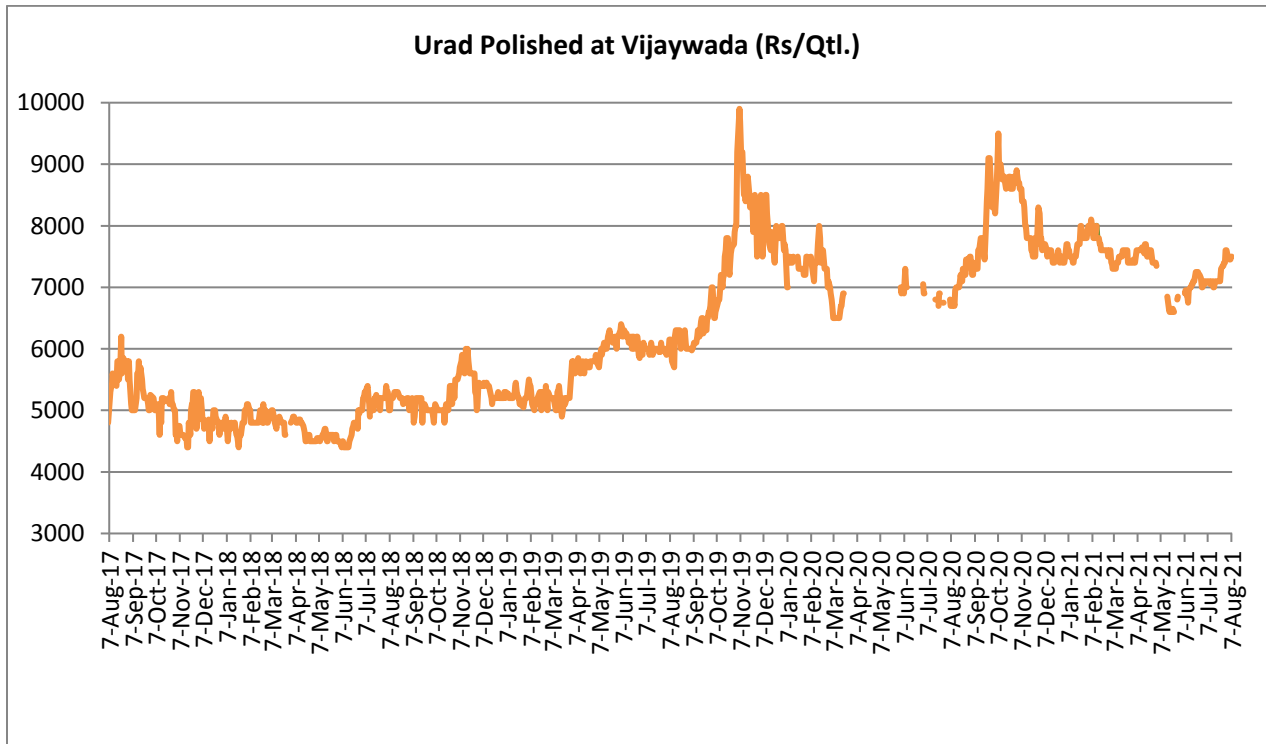

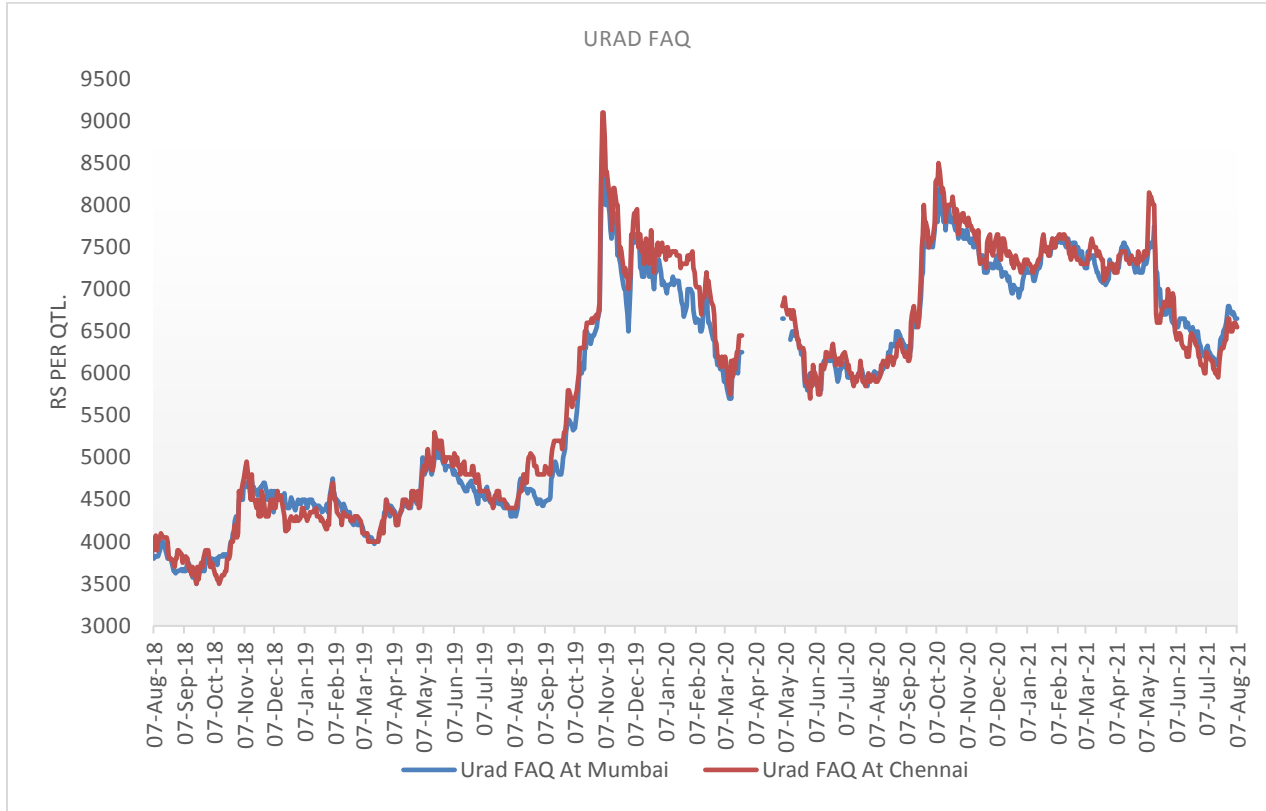

### Urad (Black Matpe/Black Gram)

#### Fundamental Analysis and Outlook:

#### Market Recap:

Crop loss from recent flooding and heavy rains, low import and improving demand in the local market may push up Urad price again.

Imported Urad stayed steady at Rs 6550 at Mumbai while the local crop in Tamil Nadu stayed steady at 6650. Import is coming but with the low volume. If weather turns rough in any major growing states, it would push up again. Myanmar is offering Urad FAQ at \$930 and SQ at \$1005.

**Seasonality Index** depicts steady to firm movement in August-2021.

**Price Dynamics:**

*In July-2021, average prices in key markets including Mumbai/was down by 2% to 6384. Prices may stay steady to slightly firm in Aug due to:*

- *Improved demand*
- *Fear of crop loss*
- *Low availability in Myanmar*
- *Higher MSP(6300)*

***Market Outlook for Aug:*** *Prices are likely to trade steady to slightly firm .*

#### **Fundamental Analysis and Outlook For Moong:**

##### ***Market Recap:***

Sowing of Moong too is lagging behind by 9.90 % to 26.47lakh ha as on 28 July-2021. All Moong growing states are lagging behind in area coverage except Karnataka, M.P. & Telangana. As the major producing state like Rajasthan is lagging behind by 17 % so far, the area gain in other states has been neutralized. If area recovers smartly in Raj, the crop size would be normal. It would be interesting to see whether farmers would go for re-sowing or shift to other crops, where new plant has been washed out. As sowing would continue till the first week of Sept, the possibility of re-sowing is still there, but yield is certainly going to be down of re-sown crop. The prices of moong too moved up by 200 to 6700 in Rajasthan. Weather conditions remain the major price driving forces as of now. Myanmar is offering Moong at \$900-950 per MT basis Indian ports.

##### ***Price Dynamics:***

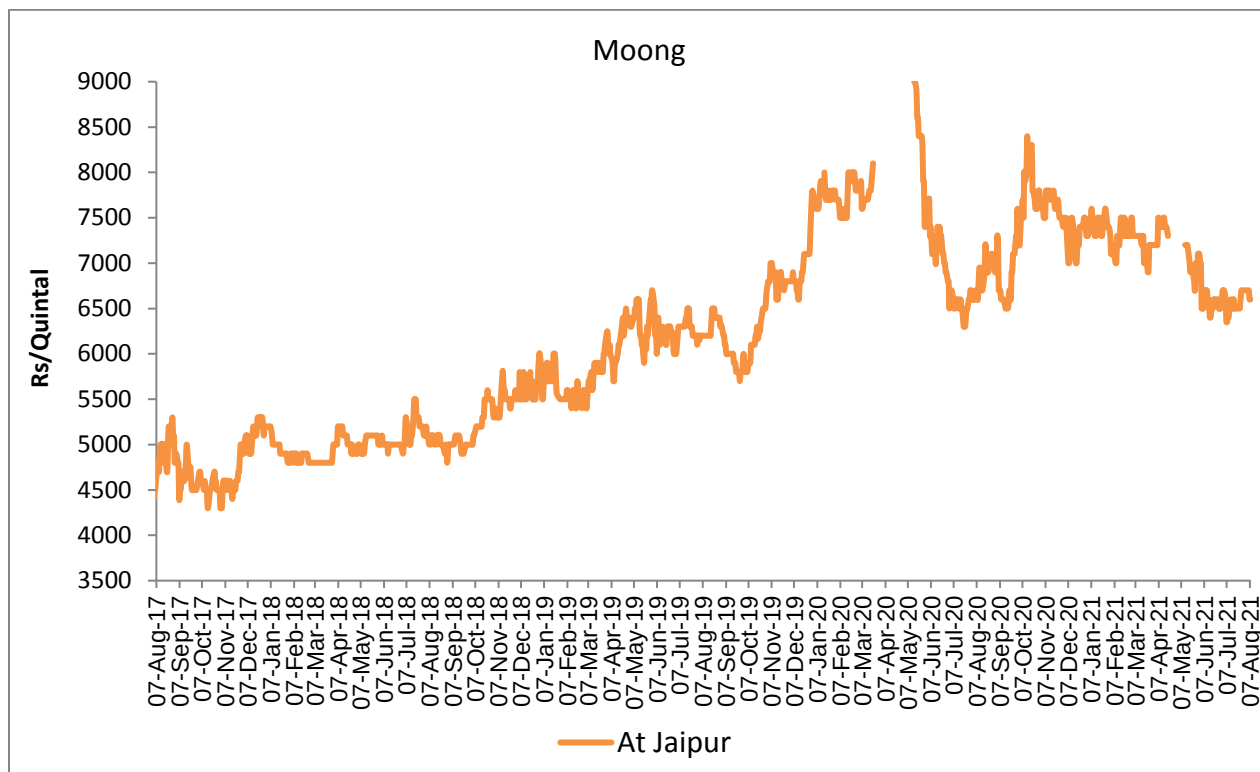

*Agriwatch expects 14.95 lakh MT kharif production as per revised estimates after discounting the flood and higher rains generated loss. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year.*

##### ***Price Trend:***

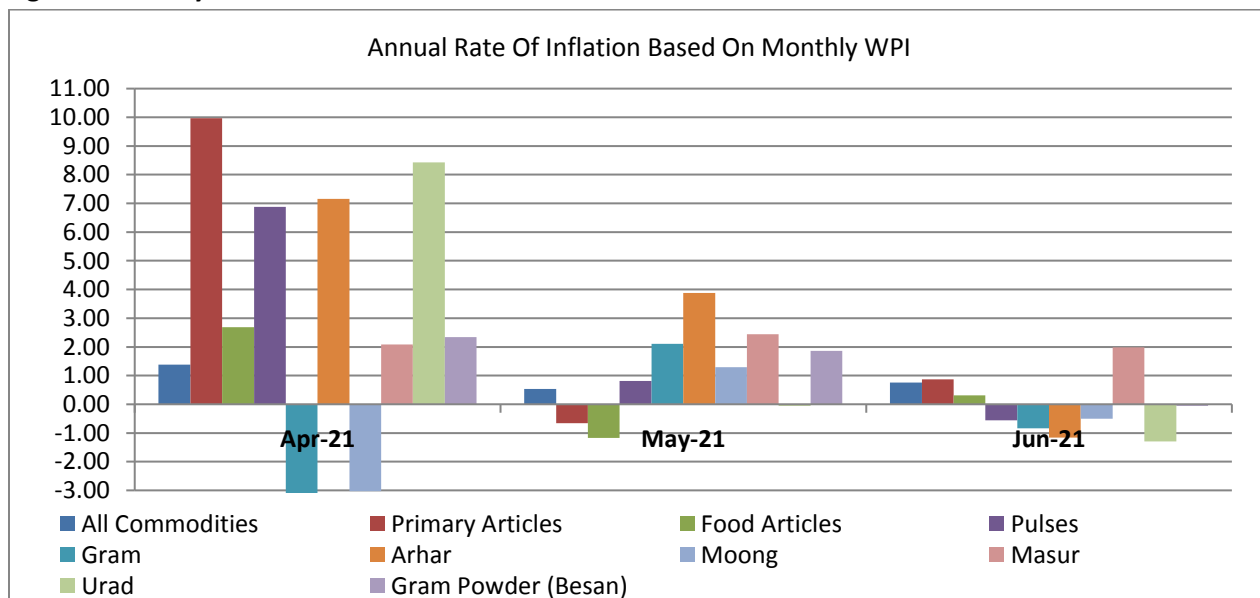

***Market is expected to trade firm in Aug due to:***

- *Uneven rainfall*
- *Increasing demand for Moong*
- *Low import volume*

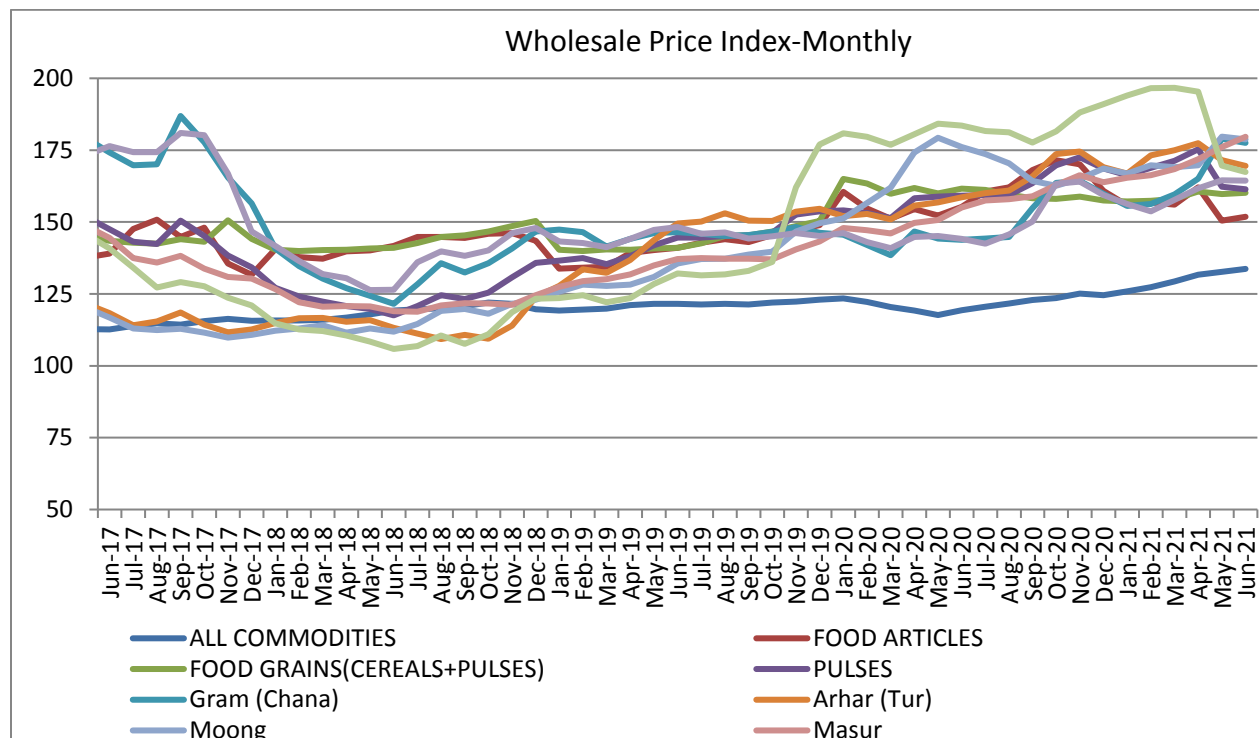

***Market Outlook for Aug:*** *Steady to slightly firm movement is expected*

### Agri Commodity Indices June -2021:

Pulses WPI: Pulses WPI decreased by 0.9 points from 162.3 in May to 161.4 in June-2021
