Pulses Sector-Highlights

All India Kharif pulses sown area continued to recover as expected and was up by 1.18 % to 136.85 lakh ha against 135.26 lakh ha last year as on 02nd Sep-2021. Arhar area is up by 4.30 % to 49.49 lakh ha so far while Moong bean is running behind by 2.0 % to 34.22 lakh ha. Urad bean area recovered slowly and is slightly up by 0.24% to 37.94 lakh ha against 37.85 lakh ha last year till date. Despite higher production forecast in the 4th Adv Est., prices of Urad, Tur, Lentils and Moong have gone up again and may move up further as arrivals of Moong and Urad are yet to pick up. Apart from this higher quotes in Myanmar for Urad and Tur, and in Canada for Lentils amid improved demand from mills in the domestic markets have mostly lent support to the cash dal market. Weather remains favourable as of now for pulses crops and the production in Kharif season may improve.

Lentils cash market continued to trade firm and moved up by 3.15 % to 7904 during the week under review against previous week, in Kanpur cash market while it moved up by 2.58 % to 7642 in Mumbai. Prices would move up further as the crop size in Canada is expected at around 18.85 lakh MT this year against 28.68 lakh MT last year, as per the latest release by Agriculture & Agri-Food Canada. It has fuelled lentils prices in Canada from \$950-1000 to \$1100-1110 in Canada, while Australian Nugget (red lentils) moved up from \$950-60 to \$1050-1060. As arrivals from the new crop just started, the volume for ready delivery is low right now. Australian (Nugget) red lentils is available at cheaper price, but may move up in tandem with Canadian prices. With last year carryout of 4 lakh MT, Canada would not be slow able to export 20 lakh MT this year against 24 lakh Mt last year. Supply side would remain tight in global market and so prices would remain at higher level. Around 2 lakh MT imported Masur is available at Indian ports, including Mundra right now. Demand for Masur dal may squeeze in India and the consumer may shift to Chana and Tur dal in coming month.

Recent rains in major moong growing states may help boosting yield in Rajasthan, Gujarat while in other states crop condition is normal to good. Harvesting has started in Rajasthan, Maharashtra, Gujarat, and Madhya Pradesh. Arrival is low due to recent rains and it may slow down for a week if rains in these states continue. As of now there is no reports of damage, infestation. However, fear is growing that if rains continue, quality of matured crop may deteriorate. Rains volume in Sep. month remain crucial for the moong crop. Kharif Moong area sowing is nearing completion now and the Indian farmers have covered 34.22 lakh ha against 34.92 lakh ha last year till 2nd Sep-2021. Normal area under Kharif Moong is 33.48 lakh ha. Under normal condition 16 to 18 lakh MT crop is expected this year. Moong prices in Rajasthan moved up by 2.75 % to 7116 due to the disturbed harvesting and arrivals by rains. Apart from it, likely procurement drive from Kharif season and mill's buying interest have supported the prevailing inner tone in the market. Myanmar is offering Moong (Anna Seva) at \$860, Pokako at \$890 and Pedisheva at \$910. As availability is likely to increase, prices of Moong may Soften until procurement starts. Moong is being traded at Rs 7200 in Jaipur market.

Urad area continued to recover during last three weeks and has crossed last year's level marginally till 2nd Sep-2021 to 37.94 lakh ha. Sowing is nearing to over now. Harvesting has started but with slower pace due to recent rains. As of now there is no report of any major losses except in Ashok Nagar region of M.P. due to Mosaic infestation. M.P. contributes 30-35 % in total kharif production. Overall crop size in M.P.

may decrease by 3 to 5 %. As crop is matured and harvesting has just started, heavy rainfall may affect the matured crop the most. Next 15 to 20 days are very crucial for the standing Urad crop. Stakeholder needs to have a close eye on it. As arrivals are expected to increase, prices would soften in coming weeks. Prices of Urad decreased by 0.24% to 6887 in Mumbai and Chennai combined and move down further by Rs300-400 from current level. Import may continue as Myanmar has 1.5 lakh MT old stock. Myanmar is offering FAQ Urad at \$925 and SQ at \$1025.

As of now Tur crop is in good condition and the recent rains are considered to be beneficial to the standing crop. Area under tur has moved up to 49.49 lakh ha and may touch at 50 lakh ha. Under normal condition production may cross 40 lakh MT. demand is expected to increase as consumer may shift from Masur, Urad to Tur & Chana. Indian consumers are price sensitive and their shifting may support Chana and Tur prices to some extent in coming weeks. Weather condition during Sep, Oct & Nov are crucial for the Tur crop. As of now supply and demand side seems balanced. Myanmar is offering Tur at \$880 basis Indian ports. At this price importers would not prefer to buy in bulk volume as the new crop is two and a half month away. Nafed too has stock (2.5 to 2.75 lakh MT) that can be released if prices starts to move up before new arrival starts. So steady to slightly firm tone might be seen in the coming weeks. Under prevailing condition no spike is expected. Price of Tur in Gulbarga market decreased by 1.55% to 6645. It may recover again as demand is likely to improve.

Chana cash market could not sustain its firm tempo and decreased by 2.14 % to 5396 on all India basis. Market may dip by Rs 100-200. Demand is expected to improve from the second fortnight of Sep and by then it may start improving again. Nafed has stock and its continuous release at regular interval would not allow cash Chana market to move beyond a certain level. Supply side is ample and the fresh demand for besan and dal is awaited. If consumers of Masur and Urad dal move towards Chana & Tur dal, prices should recover by 200 to 300. Festive demand may restart again and it may support Chana to some extent. In Delhi market Chana market traded up by Rs 50 to Rs 5575 while in Jaipur market it decreased by 5500 to 5350. The overall tone remains firm.

Global Market Updates:

According to Agriculture and Agri Food Canada (AAFC) August report, the production of lentil is projected at 18.85 lakh tonnes for 2021-22. July production estimate was 27.50 lakh tonnes while last year's production was 28.68 lakh tonnes. Huge decline in lentil production due to weather and drought. The end stock for season 2021-22 is expected to be only 50,000 tonnes against 4 lakh tonnes last year. Market expects production of Canadian lentil not more than 15 lakh tonnes.

According Agriculture and Agri Food Canada (AAFC) August report, the production of Chickpea is projected at 0.87 lakh tonnes for 2021-22. July production estimate was 1.26 lakh tonnes while last year's production was 2.14 lakh tonnes. Decline in production is due to weather and drought.

In Manitoba grasshopper population thrive in some area due to hot and dry conditions. It is an additional threat to the pulses production along with heat wave condition. Due to prolonged record breaking heat this summer has deteriorated crop growing conditions in Alberta. Alberta and Saskatchewan government doubled low yield appraisal threshold for farmers who salvage cereal/pulse crop as feed. Saskatchewan, Alberta and Manitoba are major lentil growing states in Canada.

The heat damage to crops is broader in Manitoba, Saskatchewan, Alberta. As middle of Jul U.S. Department of Agriculture rated subsoil moisture in the state as 80% short to very short. Lentil production in Canada may decrease by 50% from normal 24-25 LMT to 12-13 LMT this year. In Saskatchewan lentil crop condition was 18% good, 40% fair and 42% poor till last week. Crop is in pod filling stage and facing extreme moisture loss. The current quotes for lentil are at \$750. It may move up to \$800-850.

Australia's first crop production forecast for a current season for five major pulses including chickpeas, field peas and lentils released by Pulse Australia (PA), it is 2.28 Mt which is 23% below the 2.96 Mt produced last year. Chickpea area is forecast to increase by 11% to 5.65 lakh ha with production estimate 6.62 LMT. Forecasted area for peas is 2.38 lakh ha with production estimate of 2.7 LMT while forecasted area for lentils is 3.04 lakh ha with production estimate of 4.54 LMT. Australia's production is down this year on dry conditions.

Global field peas market traded firm on increasing fear of low production in the North America. Most of the producing region is facing dry and hot conditions, resulting in deteriorating crop ratings and accelerating plant development in parts of the growing area. Grain size may be small and the yield low. Export movement has slowed down. Buyers are in a wait and watch mood.

Chickpeas market too traded up due to doubt over yields and quality in Canada and the US. However, desi chickpeas traded low due to poor demand from Pakistan and the Asian countries. It has affected chickpeas value in Australia too. India is not taking interest to buy Chana as prices have come down here below minimum support price.

Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres, up 26% from the previous year, according to the USDA's annual seeded area report. Area harvested is forecast at 334,600 acres, 27% above 2020. Small chickpea area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-22 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected uncondusive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm in Sept.

***AW estimates**

Note (For Chana and Masur crop year is 2020-21 and it will be marketed in FY 2021-22)

Marketing year (Urad: Aug to July, Moong: July to June, Tur: Dec to Nov. Chana: March to Feb and Masur: March to Feb) AW kharif preliminary production estimate for Tur, Moong & Urad published.

Kharif Pulses:

Urad: Agriwatch has estimated 24.03 lakh MT Urad production in 2021-22 including 17.95 lakh MT in the ongoing Kharif season. Import volume would increase as 2.5 lakh MT annual import contract has been sign between India and Myanmar for the next 5 years, starting from April-2021.As carryout is low, price may continue to rule firm. New crop has already started while condition remains a concern, which has potential to ruin the crop at the matured stage.

Moong: AW has published its preliminary Kharif production estimate for 2021-22.Production has been pegged at 23.25 lakh MT including rabi. Kharif Moong production has been pegged at 15.75 lakh MT. Import may increase to 2 lakh MT .Import is free. If parity turns in favour of Indian importers, import may continue. As carryout is low, price may continue to rule at higher level.

Tur: AW has published its Tur preliminary estimates for 2021-22 and expects it to increase to 39.43 lakh MT and the figure may move up as weather condition is favorable for the standing crop right now. Higher production would ensure better supply side next season. Govt has signed a contract with Myanmar to import 1lakh MT tur annually for the next 5 years, starting from April-2021 like Malawi and Mozambique. So, any spike in Tur market is unlikely at this point of time.

Rabi Pulses:

Chana: Agriwatch has revised Chana production down from 110.63 lakh MT to 97.67 lakh MT for crop year 2020-21, to be marketed in 2021-22. Supply side would decrease from 128.32 to 121.99 this year. Carryout would decrease from 21.32 lakh MT to 18.49 lakh MT this year. It may keep price well supported throughout the year.

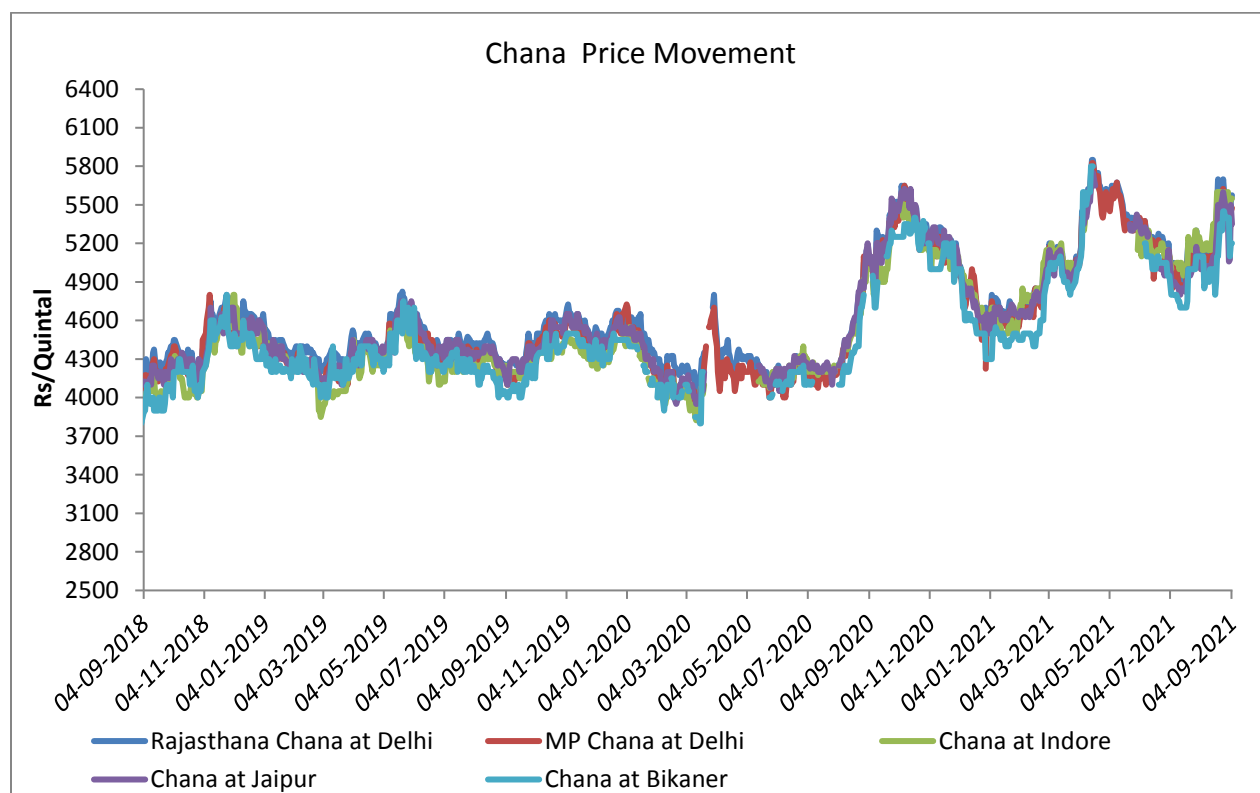

Masur: AW has revised its lentils production down from 13.49 lakh MT to 11.73 lakh MT. Prices are higher as import scenario is not very comfortable due to the low crop size in Canada. Low carryout and domestic production are keeping prices up. New crop in India comes in Feb end. So availability would be tight and the price firm.Sowing for Chana and Masur for the crop season 2021-22 would start from mid-Oct.

Chana (Chickpeas /Bengal Gram):

Market Recap:

Fundamental remains firm for the cash Chana market despite ample availability of stock with Nafed. MSP for 2021-22 Rabi season, to be marketed in 2022-23, has been increased to 5230 from 5100. It would help Chana cash market to move up. The sowing of Chana starts in mid-Oct. It may encourage farmers to maintain area at least at previous year's level. As it is lean season for Chana and demand for dal and besan is expected to improve, cash market may trade firm. Nafed continues to sell Chana stock and more new centers might be included for release, so that supply side might be ensured. Agriwatch expects market to go up by 200-300 in the coming weeks. Chana is ruling near MSP (5100) right now move up. Agriwatch expects normal trade in coming weeks. New season had started with 21.32 MMT carry in stock. So, supply side would remain at comfortable level in the lean season too.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. Following graph illustrates chana price movement in different markets:

Price Dynamics: Prices are likely to trade up in Sep-2021 due to:

- Higher MSP for 2021-22 crop (5230 against 5100) per qtl.
- Improving demand in lean season for besan and dal.
- Firm tone in other Pulses like Lentils, Tur, Urad
- Restricted sale by Nafed
- Change in import policy unlikely

Seasonality Index: hints slightly firm movement for spot market for September-2021.

Chana Future Market Analysis:

Technical Commentary:

- Increasing price & OI hint market to trade firm. Short build up is being seen
- RSI is steady in neutral region, hints caution to bulls.
- Prices closed above 9 and 18 days EMAs

Strategy: Buy on dip

Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

Peas cash market in Kanpur traded up by 8.62% to 5984 in August. Imported peas are not available at ports due to restricted import. In Kanpur market white Canadian peas (old) are available in Kanpur market and is being traded at Rs 5950. Desi peas are available at Kanpur at 6050. As prices of pulses are moving up, slight recovery in Desi pea price is expected in Sep. Govt. would not allow import of peas. Demand for peas in local market is low as other pulses dal like Chana is available at cheaper prices and consumers have shifted to Chana dal from pea dal.

Following chart shows price movement in various markets:

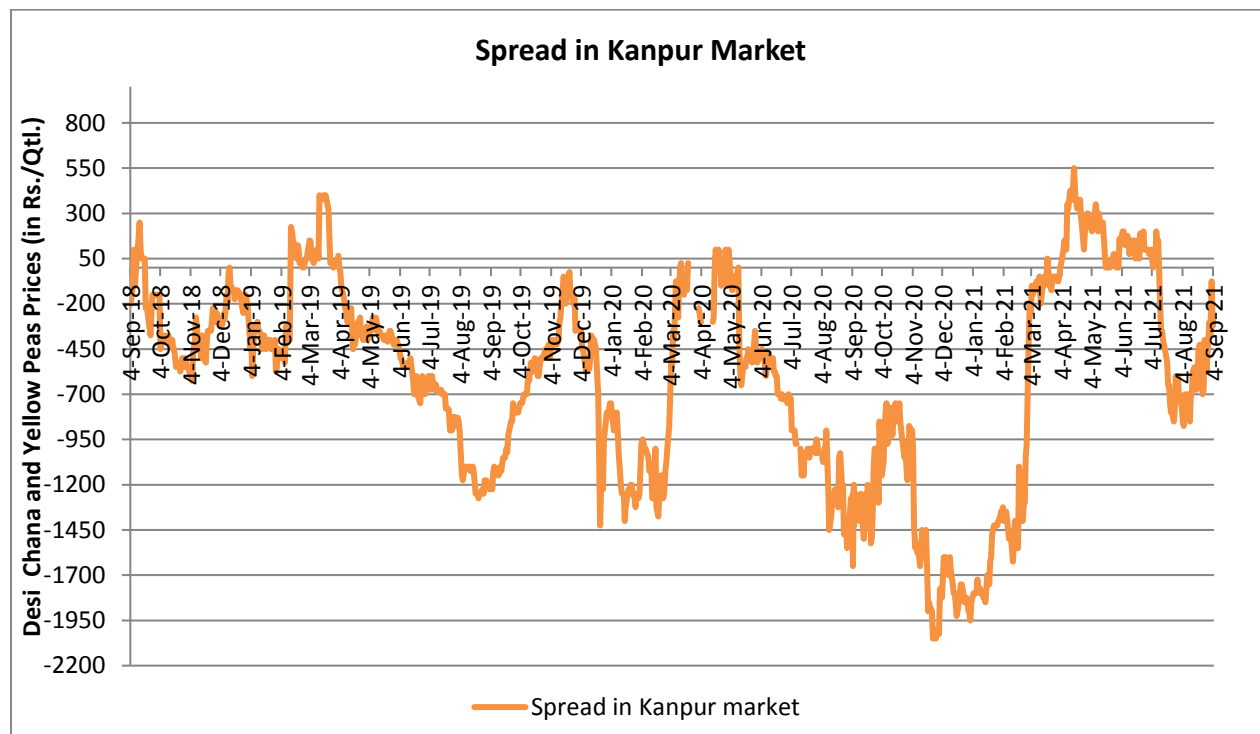

Price Dynamics:

Pea market is expected to trade steady to firm in Sep due to:-

- Low availability in domestic market
- Restricted import
- Firm trend in Chana and dal
- Commencement of festive season

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved in negative zone. The gap has increased from minus 362 to minus 635 now. Spread is expected to remain in the negative zone in Sep too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in Sep-2021

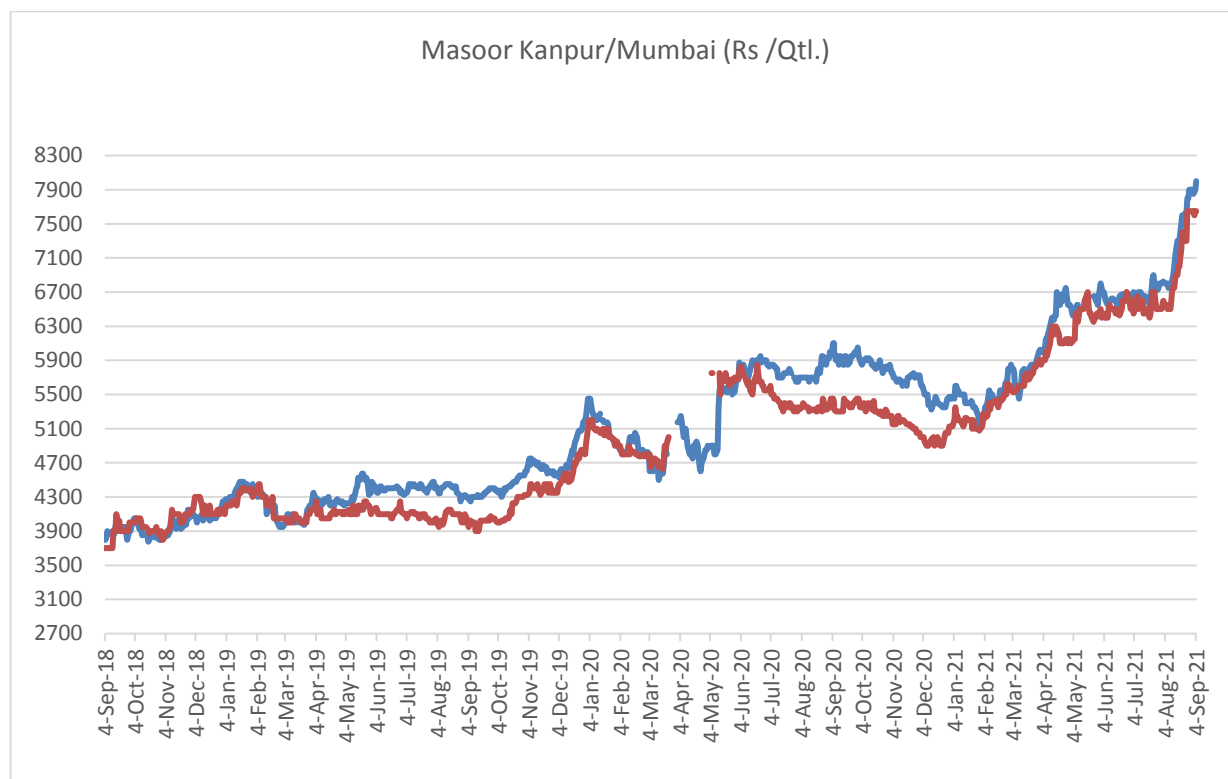

Market Outlook For Sep: Steady to slightly firm movement is expected in Sep-2021.

Masoor (Lentils):

The cash Masur market continued to trade firm in the national and international markets. Prices are increasing when the new crop in Canada is coming. As crop size in Canada is 18.85 lakh against 26 lakh MT annual average. As crop size in India too was low, the supply side is tight and its continuous impact on price is visible. Canada is quoting \$ 1010-1125 for new Lentils while Australia quotes \$1080-1090 per MT. It may move further up by \$100 as the Indian importers are likely to enter into the market soon. Sensing the uptrend to continue, govt too is taking preemptive action to tackle the bite of increasing prices. Govt has allowed import from Russia for the next six months. Actually, govt wants to end over dependency on

Canada. In Kanpur market local crop moved up by 8.24 % to 7251. Right now Lentils are being traded at Rs 7900. At this price consumer of dal may shift to other available pulses like Tur. Masur Bareli is being traded at 8000 while imported Masur at Mumbai port is being traded at 7300 in the first week of Sep. Now importers are not quoting prices as they think market to move further. Overall sentiments remains firm. Nafed too is inviting tenders to buy imported material lying at Ports. Around 2 lakh MT stock is said to be available at ports, including SEZ. Lentils dal price have gone up to 100 per KG now. So, demand may decrease. Farmers in India may increase area under lentils as govt has increase MSP by 400 per qtl. against 5100. It is considered a good hike for Masur. It would be important to see the import quantity from Russia in coming six months.

Price Trend In Cash Market:

Note: Red colour shows Masur Canada:

Price Dynamics:

In August-2021, average price in key market Kanpur was up by 8.24 % to Rs 7251 per qtl. MoM basis. Prices are likely to trade up in Sep-2021.

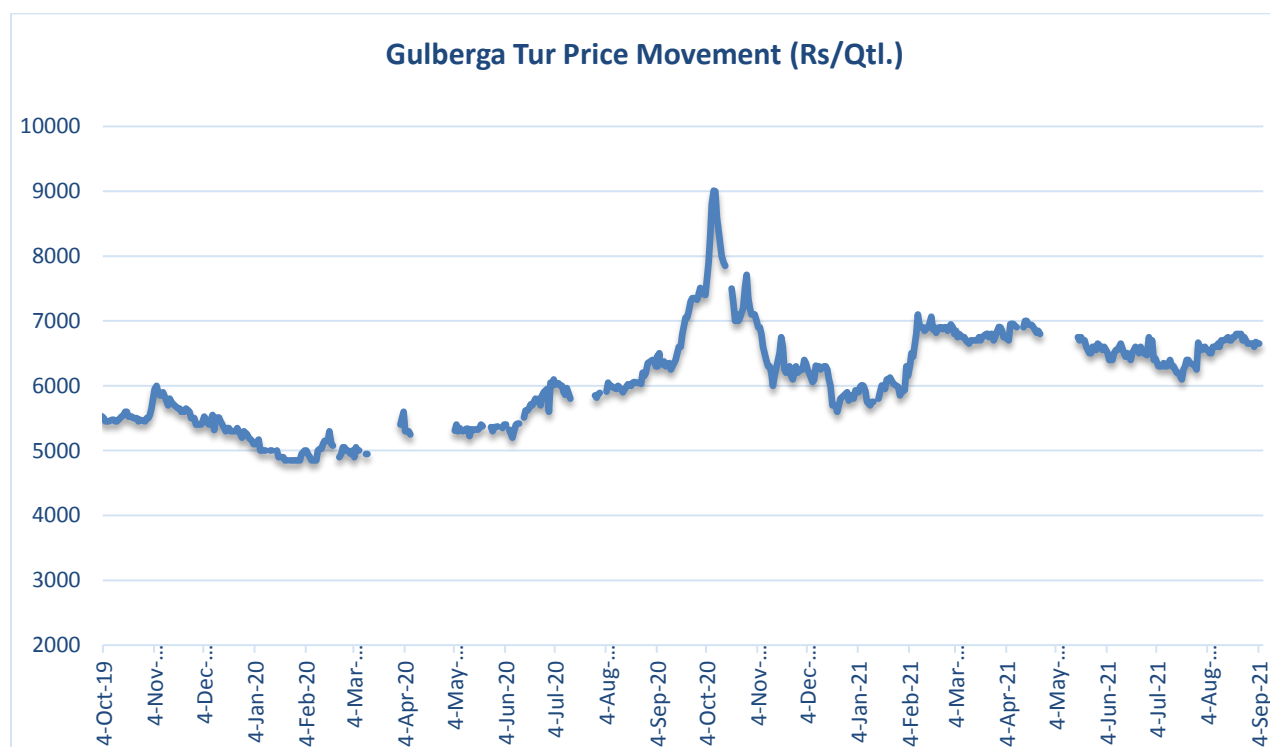

Firm movement is expected in Sep due to:

- Firm global price
- Low stock in domestic and global market
- Negligible stock with Nafed

Outlook for Sep: Firm tone might be seen

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):**Fundamental Analysis and Outlook:****Market Recap:**

Slight recovery was seen in the Tur dal market and it may improve further despite higher area coverage and congenial weather condition for Tur as of now. However, the next two months are very crucial for the standing crop. Tur prices in Gulbarga market moved up by 4.41% to 6647. It may move up further by 200-250 in Sep. New crop is in good condition and it will hit in Dec. Import would continue till Nov, dealt in till 31st Oct-2021. As Nafed has stock over 2.5 lakh MT, it can interfere into the market if prices start moving up beyond expectation. Some support to dal cash market might be seen as lentils consumers may shift to Tur dal due to price rise. In Gulbarga market Tur traded at 6650 and may move up to 6800-6900. Overall sentiments remain firm.

**Price Dynamics:**

In August-2021, average price in Gulberga market increased by 4.41 % to Rs 6747. As import flow remain at the low level. Prices may move up in Sep

. Tur price in Sep is likely to trade firm due to:

- Lean season and new crop away three months now
- Low import volume
- Improving demand

Seasonality Index-depicts steady to slightly firm tone.

Market Outlook for Sep:

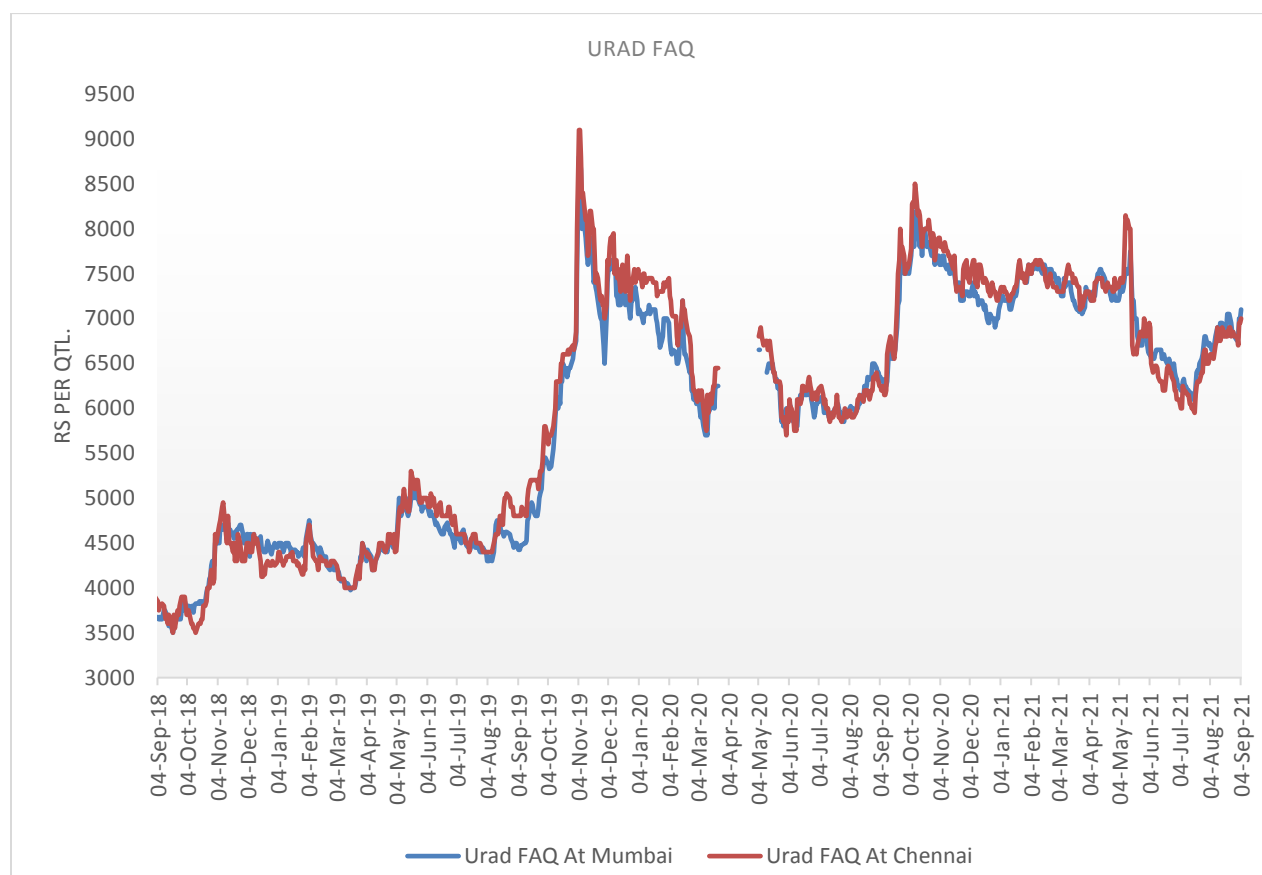

Fundamental remains supportive for Tur cash market in the near to medium term.

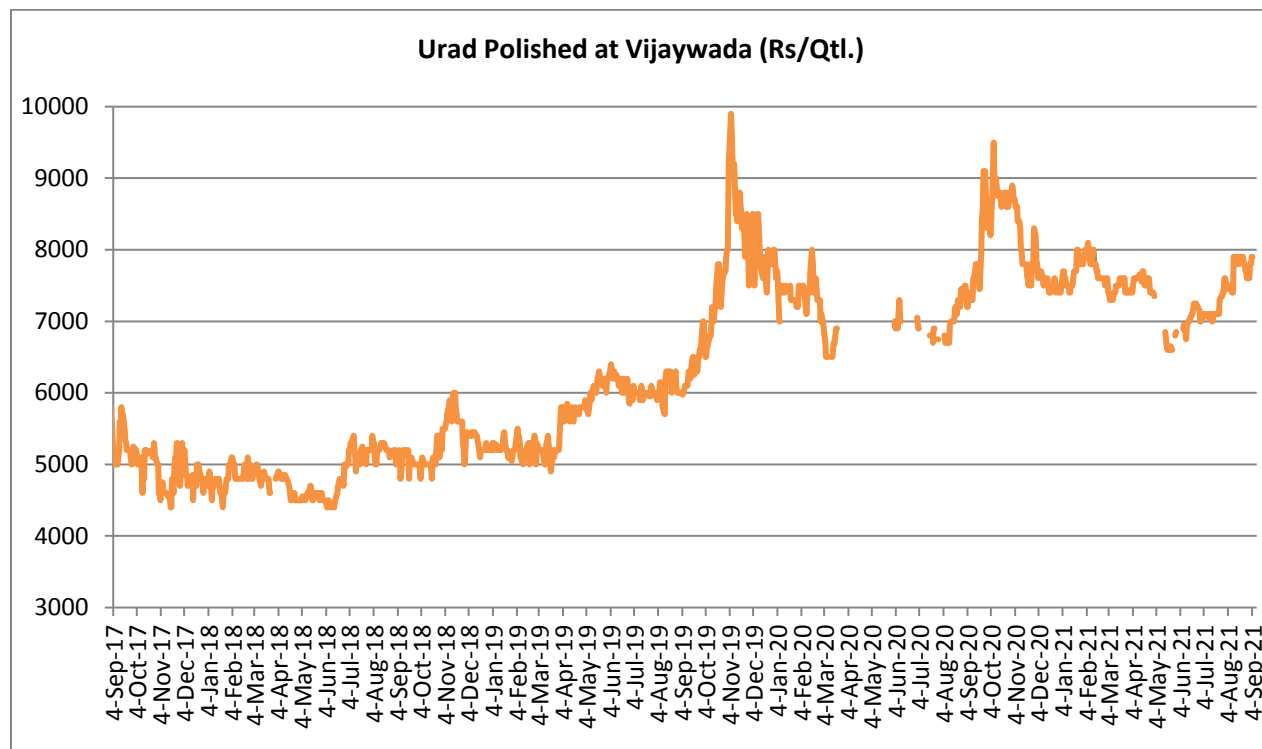

Urad (Black Matpe/Black Gram)

Fundamental Analysis and Outlook:

Market Recap:

Despite recovery in area and the import flow urad cash market moved up once again due to growing fear of lower yield. Rains in major growing states may damage crop moving towards maturity stages. New crop is expected now and prices may soften in the coming weeks. Imported Urad traded up to 7000 at Mumbai port, while the local crop in Tamil Nadu stayed steady at 6650. Import is coming but with the low volume. If weather turns rough in any major growing states, it would push up again. Myanmar is offering Urad FAQ at \$915 and SQ at \$1080. Downward correction in the market is expected if weather remains normal.

Seasonality Index depicts steady to firm movement in Sep-2021.

Price Dynamics:

In Aug-2021, average prices in key markets including Mumbai/was down by 3% to 6750. Prices may stay steady to slightly firm in Sep due to:

- Delayed arrivals
- Fear of loss at maturity stages due to heavy rains forecast in Sep by IMD
- Low availability in Myanmar

Market Outlook for Sep: Prices are likely to trade steady to slightly firm .

Fundamental Analysis and Outlook For Moong:

Market Recap:

Sowing of Moong too is lagging behind by 2 % to 34.22lakh ha as on 02nd Sep-2021. As new crop is coming into markets, no spike is expected. Even it may slip below MSP in some centres where procurement drive gets delayed. Sowing has entered in last phase now. Availability would increase with new arrivals while demand for dal is still awaited. In Jaipur market Moong is being traded at 7200. The prices of moong too moved up by 200 to 6900 in other centers in Rajasthan. Weather conditions still remain the major price driving forces in coming weeks. Myanmar is offering Moong at \$860 per MT basis Indian ports.

Price Dynamics:

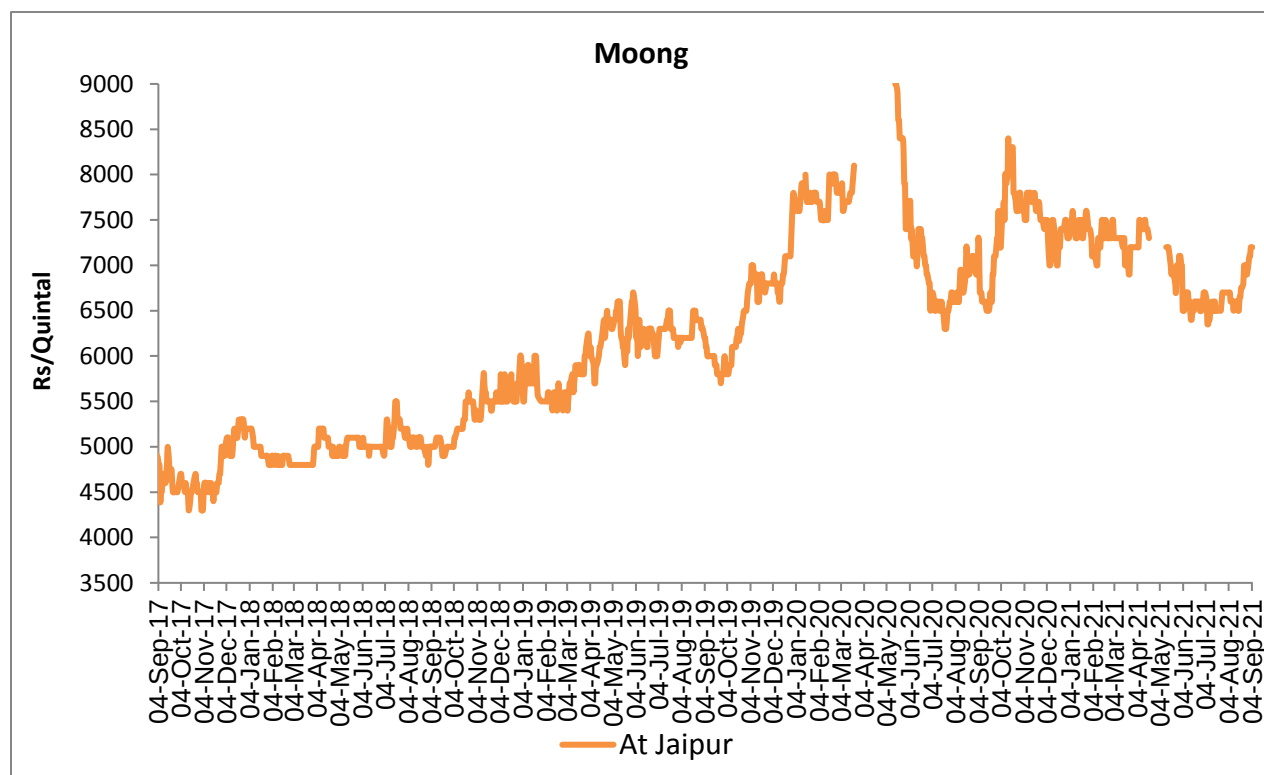

Agriwatch expects 14.95 lakh MT kharif production as per revised estimates after discounting the flood and higher rains generated loss. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year.

Price Trend:

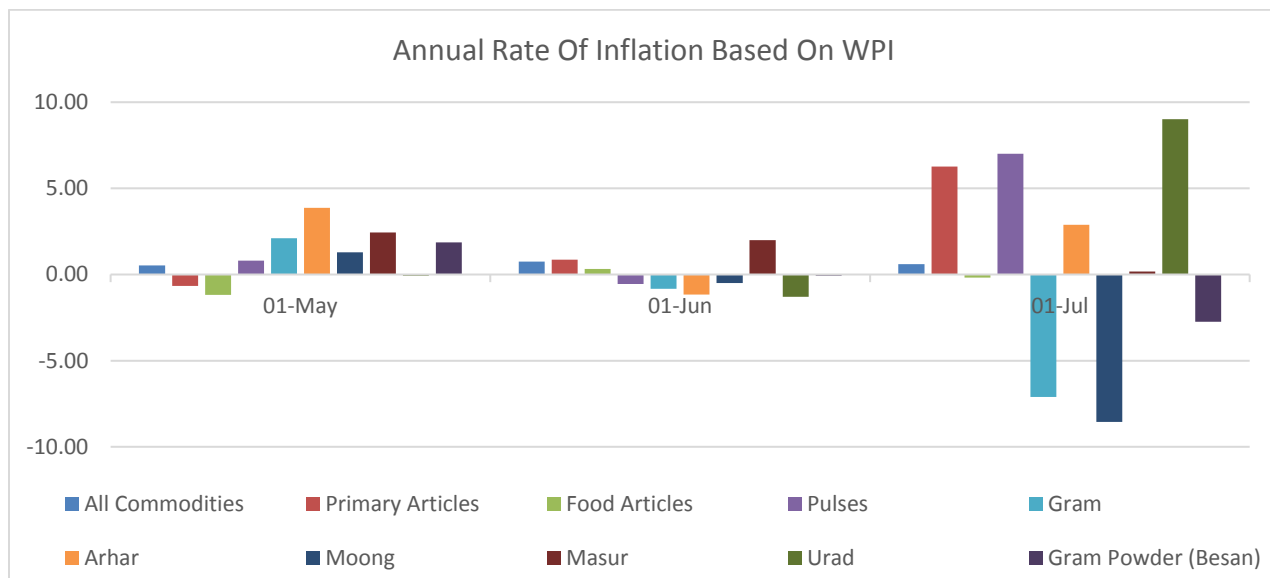

Market is expected to trade steady to slightly weak in Sep due to:

- Increasing new arrivals
- Mills poor interest in buying
- Import parity from Myanmar

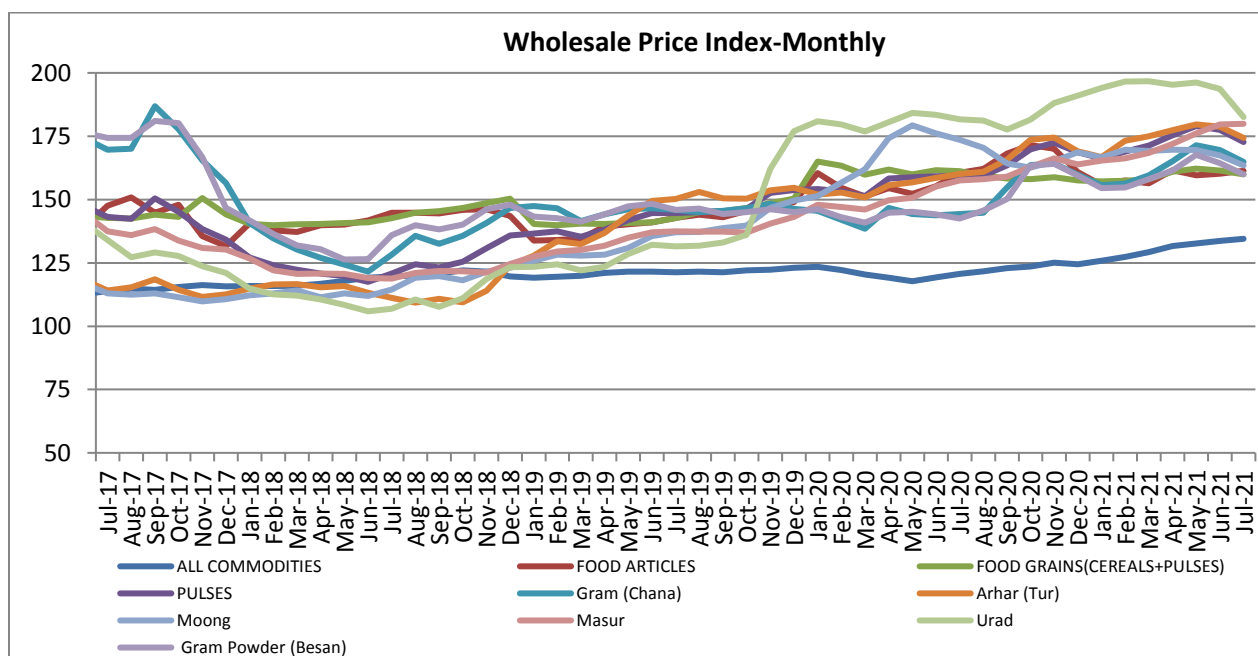

Market Outlook for Sep: Steady to slightly weak movement is expected

Agri Commodity Indices July -2021:

Pulses WPI: Pulses WPI decreased by 5.2 points from 177.5 in June to 172.7 in July-2021
