- Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
- India
- Australia
- Canada
- US

### **Pulses Sector-Highlights:**

**Pulses cash markets traded down by 2 to 4 % during April against March-2022, taking cue from Rabi arrivals, weak demand and the unwillingness of mills for bulk buying.** Apart from it, the improving area coverage under summer Moong and Urad, expectation of higher import flow may continue to restrict market to move up beyond a certain limit. Despite weak demand for dal, offtake from mills and stockists is likely to improve amid ongoing procurement drive, that may lend support to all pulses markets except Moong. Arrivals from summer Moong is likely go up from mid-May and the size of crop is almost double from the last year. Ample stock is available in Central Pool. So, all pulses markets, except Moong, may trade either steady or slightly up in May. Monsoon rains, sowing progress and the percentage shifting of competing crops may be the price driving forces in the medium term.

**Summer Urad sowing continued to gain momentum in all states. Farmers have covered 3.66 lakh ha as on 05<sup>th</sup> May-2022.** It is up by 40 % from the last year same time. The normal area under summer Urad is 3.87 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh. Farmers have covered 16.24 lakh ha under summer Moong so far, up by 14 % from 14.24 lakh ha last year same time. M.P. is a major growing state, where it is down by 74 % to 8.33 lakh ha so far.

**The extended timeline for Tur & Urad import for a year, up to 31<sup>st</sup> March-2023 has helped to maintain prices to move in a range despite short supply, especially for Urad.** The extended timeline is likely ensure regular supply throughout the year. Below the normal offtake of Tur dal during April and the pressure of higher import volume (8.4 lakh MT) during last financial year weighed on the market fundamentals. Prices of Tur declined by 1.5 to 4.75 % in various markets during April. More downside movement is unlikely at this point of time. Offtake is likely to improve while supply through import would continue to check one way upside movement. Tur may trade in the range of Rs 6200-6600 in various market in May. June onward prices of tur is likely to be directed by Monsoon rains and sowing progress. There is a fear in the market that farmers may shift some area to other lucrative crops like Soybean, cotton which relative return is higher than Tur. Under the prevailing market fundamental Tur price should improve, but in a limited way.

**Urad cash market is likely trade either stable or slightly down during May-2022, as arrival from the summer crop has started and may pick up by the end of this month. It traded down by 1 to 3.5 % in April against March. As price have decreased, fresh buying by stockists/mills may help market to recover by 3 to 5 % in May and then may trade range bound** despite tight supply side in domestic market. The medium term outlook depends on import flow, Kharif area and monsoon rains. The smooth import flow is expected to cap upward momentum in May again. Notably, A MoU with Myanmar had been signed on the 4th week of June-2021 for importing 2.5 lakh MT of Urad and one lakh MT of Tur every year for five years, starting from 2021-22 to 2025-2026 (April-March). Kharif area is important for Urad price. If farmers shift area to other lucrative crops and monsoon rains gets abnormal, prices may move up beyond our expected range.

**Taking cue from the smooth procurement drive and the active buying by mills and stockists, Chana cash market may trade stable to slightly firm in the short to medium term.** Nafed has already procured around 14 LMT so far against target of 24 LMT this year. Target is likely to be met as an aggressive procurement drive is on and the dateline for the buying on MSP too has been extended now. Import flow continues from

LDC (Least developed countries) and it may cap spike in Chana market in May. After procurement drive, NAFED may increase volume of sale through auction, that may restrict an unexpected price rise too. Under the normal condition Chana cash market is likely to trade in the range of Rs 4900-5300 in May-2022. NAFED & other states agencies have procured 14 lakh MT Chana till the 2<sup>nd</sup> week of May.

**Moong cash market traded stable in various markets, as expected last week. Prices stayed steady at Rs 6800 to 7000. New arrivals, ample stocks in Central pool and weak demand helped market to trade down or stayed steady.** Summer sowing is running smoothly and is up by 14 % to 16.24 lakh ha. so far. The only concern is a rising temperature, which may affect yield of the summer crop, grain size may be small. However, improvement in area may minimize the loss to some extent. Ample availability in the Central pool, the arrival from Rabi crop and the smooth sowing in summer season would continue to pressurize the Moong cash market. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. The short-term outlook seems steady to slightly weak after Rabi arrival, summer crop is expected from this week. Import volume remains restricted due to ban. India imported 1.95 LMT Moong during last financial year against 81,842 MT in 2020-21. In April-2022 (first fortnight) India imported around 4500 MT Moong.

**Masur market recovered slightly during the week under review. It traded up by 1 to 1.5 % to Rs 6950-7150. However imported Masur decreased by Rs 50.** As local prices have recovered, price for imported Masur too may trade up next week. Arrival pace is slow and not increased as expected last week. Farmers are not releasing stock in bulk volume. The current declining trend may be arrested as the costing of import has gone up. Stockists are active again at the current price. Canada and Australia have already increased quotes to 980 per MT. Apart from it, ready stock at Canadian ports has come down. More downward correction is unlikely this week. The overall tone seems strong. Maximum stocks from mandis are going to go-downs, so tight supply side seems very much in the cash market. Masur is being traded at in the range of Rs 6800 to 7200 per qtl. As per the market source total stock at various ports is around 1.25 lakh MT. It may decrease to 1 LMT in May.

#### Global Market Updates:

**Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 18 Feb -2022 for Lentil, Chickpea and Field Pea.** As per the latest forecast Lentil production may increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41 tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term.

**The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 toone per ha in 2021-22.** The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

**The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year.** Yearly average price forecast to has been revised down

to \$860 per MT in 2022-23 against \$1065 for 2021-22. Yield has been revised up to 1.51 tonne per ha for 2022-23 against 1.04 tonne in 2021-22

**According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production** in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

**According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production** in Australia is estimated as 6.56 lakh tonnes for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

**The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22** (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.

**As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22.** The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

**Monthly Outlook:** - Steady to slightly firm tone may prevail in May, barring Moong

\*AW estimates

**Note (For Chana and Masur crop year is 2021-22 and to be marketed in MY 2022-23)**

**Marketing year** (Urad & Moong: Aug to July, Tur: Dec to Nov. Chana & Masur: March to Feb)

#### Kharif Pulses:

**Urad:** Agriwatch has estimated 23.20 lakh MT Urad production in 2021-22 including 16.60 lakh MT in Kharif season. Import volume would increase due to free import policy till March-2023. Higher import volume may ensure better supply side.

**Moong:** Moong production has been pegged at 24.70 lakh MT including rabi. Kharif Moong production has been pegged at 15.75 lakh MT. Import increased to 1.95 lakh MT. Import remains restricted now. As the summer area has increased smartly, production size is expected to go up to around 25 LMT this year. Prices may decrease by Rs500-700 in coming months.

**Tur:** AW has published its final. Production estimates for Tur for 2021-22 and expects it to stay at 37.11 lakh MT, slightly lower than last year. Higher import volume may cap uptrend in coming months despite the lower crop size.

#### Rabi Pulses:

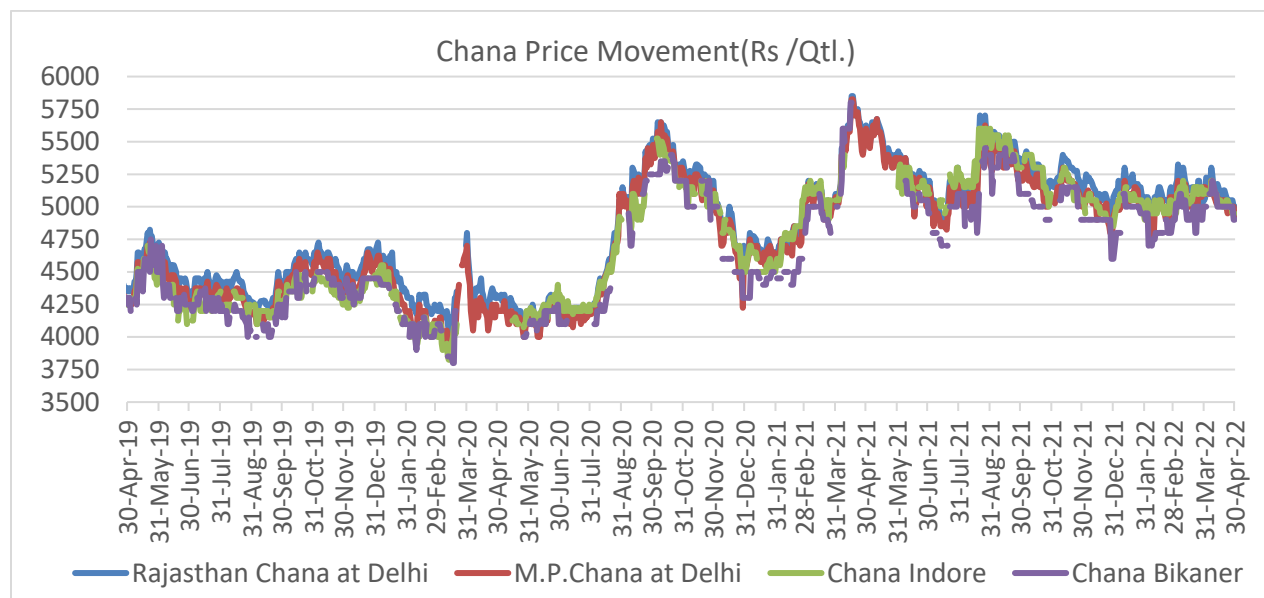

**Chana:** Agriwatch has pegged Chana production at 103.46lakh MT for crop year 2021-22 while Masur at 12.91 lakh MT. Supply side would increase to 126.11 for Chana this year.

**Masur:** AW preliminary estimate for Masur pegged at 12.91 LMT for 2021-22, slightly higher than last year. Supply side is almost similar to last year, so, prices may remain stable to slightly firm

### Chana (Chickpeas /Bengal Gram):

#### Market Recap:

Chana cash market traded weak by 2 to 6 % in April in comparison to March-2022 due to arrival pressure and weak buying by stockists and mills. Stockists and mills too are expected to be active and it may push up Chana prices to MSP level in May. However, spike in Chana cash market is unlikely as NAFED has old stock and the higher carry in may cap uptrend in May. India has harvest over 103 lakh MT this year, considered to be ample for the domestic consumption. Following graph illustrates Chana price movement in different markets:

| Chana % Price Fluctuation Over Previous Week              |          |          |           |          |            |
|-----------------------------------------------------------|----------|----------|-----------|----------|------------|

|                                                           | 07.05.22 | 30.04.22 | 07.04.22  | 07.05.21 | 30-Apr-22  |
| Delhi Chana(Raj)                                          | 5000     | 4925     | 5300      | 5625     | 1.52       |
| Bikaner Chana                                             | 4900     | 4900     | 5100      | 5550     | 0.00       |
| Indore Chana                                              | 4950     | 4950     | 5100      | NA       | 0.00       |
| Tan.Chana                                                 | 4450     | 4525     | 4525      | 5200     | -1.66      |
| Price Projection For Bikaner During May-2022 ( 4900-5250) |          |          |           |          |            |

**Price Dynamics:** Prices are likely to trade steady to slightly firm in May-2022 due to:

- Festive demand for besan and dal
- Procurement drive on MSP (Rs 5230 per 100kg)
- Restricted release by NAFED
- Restricted import flow from the least developed countries.
- Mills buying at low price

**Seasonality Index:** hints steady to slightly firm movement for May -2022.

**Summer Sowing Progress: As on 06<sup>th</sup> May-2022:**

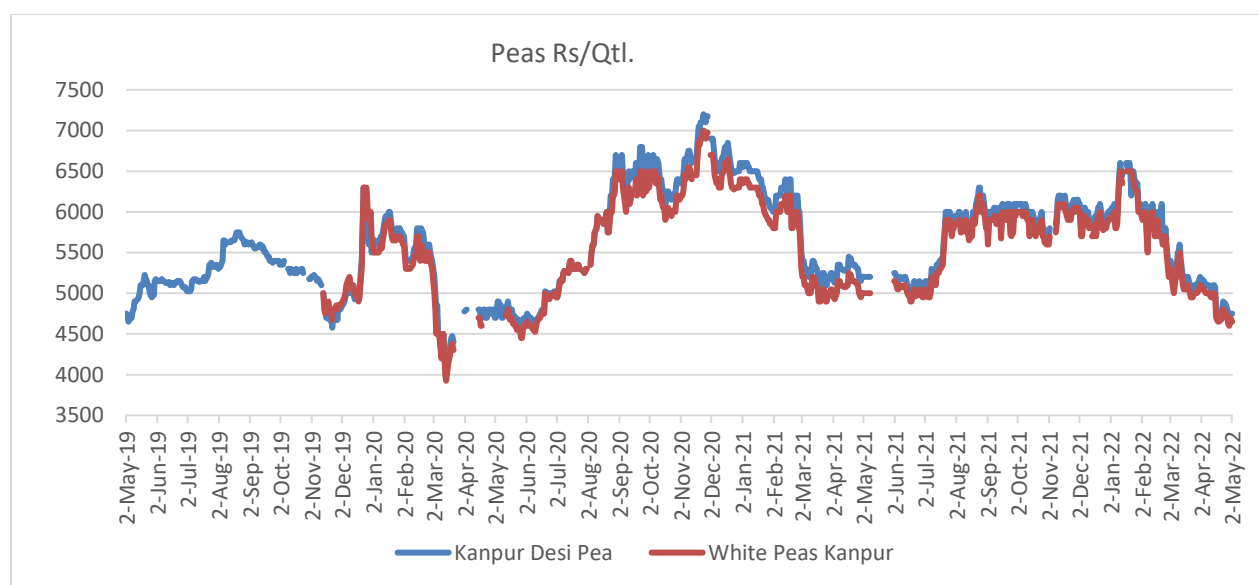

| State-wise Area Coverage Under Summer Moong As On 06th May-2022 (Lakh ha) |             |              |        |                  |
|---------------------------------------------------------------------------|-------------|--------------|--------|------------------|
| States                                                                    | Target Area | Area covered |        | % diff over 2021 |
|                                                                           |             | 2022         | 2021   |                  |

### Field Pea (Matar/Dry Pea):

#### Fundamental Analysis and Outlook:

Cash Peas market traded down by 6 to 7 % in major markets of Madhya Pradesh and Uttar Pradesh in April against March-2022, as Chana prices remained suppressed. Apart from it, new arrivals and weak demand from the hotel industry remained unsupportive to cash pea market. Prices may recover from the current level as Chana prices have started improving. Indian farmers had covered 10.18 lakh ha this season, down by 1.93 % from the last season. So production (dry) is expected to be around 8 to 9 lakh MT. Import remains restricted, so sentiment remains strong. Under prevailing condition steady to slightly firm movement is expected. Market may reverse from the current level. Peas in various market is trading in the range of Rs4650 to 4750.

#### Price Dynamics:

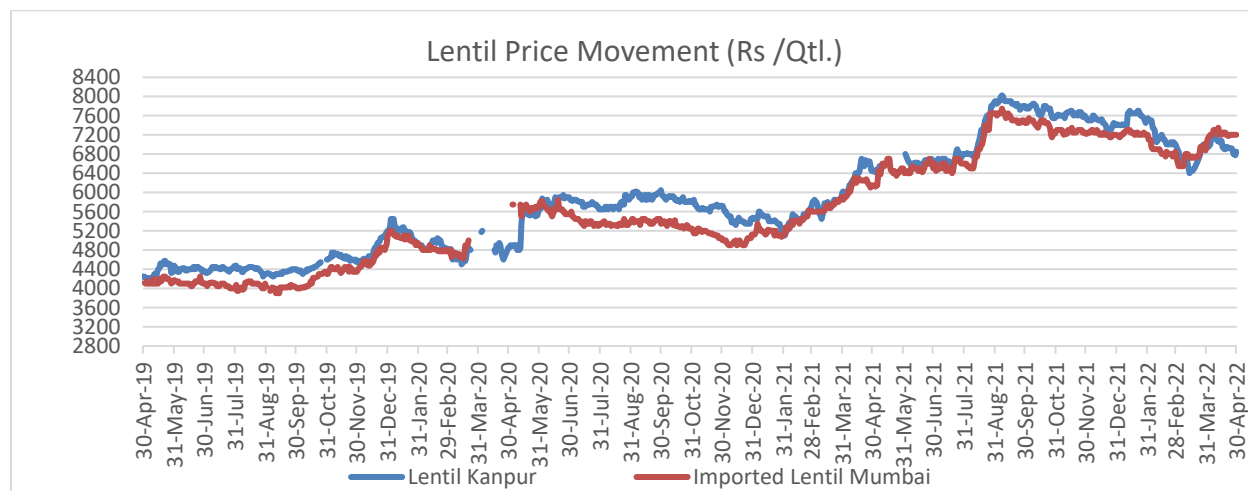

**Pea market is expected to trade steady to slightly firm in May-2022 due to:-**

- Declining arrival flow
- Firm tone in Chana
- Declining availability of green vegetables
- Stockists' active buying & restricted import and
- Weak demand from hotel industry

### **Masur (Lentils):**

Masur market recovered slightly during the week under review. It traded up by 1 to 1.5 % to Rs 6950-7150. However imported Masur decreased by Rs 50. As local prices have recovered, price for imported Masur too may trade up next week. Arrival pace is slow and not increased as expected last week. Farmers are not releasing stock in bulk volume. The current declining trend may be arrested as the costing of import has gone up. Stockists are active again at the current price. Canada and Australia have already increased quotes to 980 per MT. Apart from it, ready stock at Canadian ports has come down. More downward correction is unlikely this week. The overall tone seems strong.

### **Price Trend In Cash Market:**

### **Price Dynamics:**

In April-2021, average price in key market Kanpur was traded slightly up, normally seen in March-2022. Despite good crop size prices improved by 1 to 1.5 % at the end of April. Prices are likely to trade steady to slightly firm in May-2022.

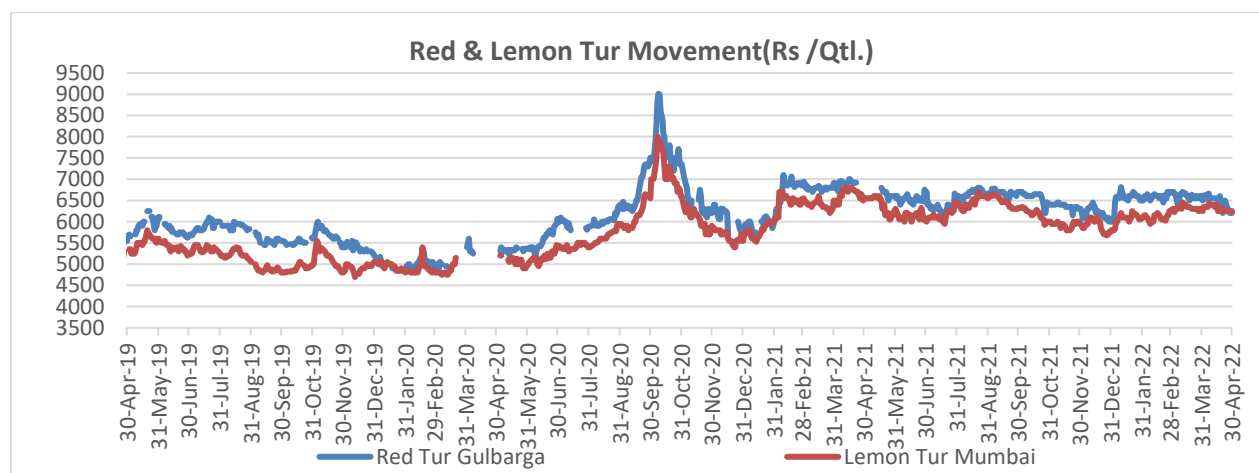

Steady to firm tone **is expected in May due to:**

- Restricted arrival
- Increasing cost of import &
- Stockists active buying and
- Decling stocks at ports

**Outlook for May-2022:** Steady to slightly firm movement might be seen

**Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):****Fundamental Analysis and Outlook:****Market Recap:**

Tur cash market too recovered by 1 to 3.25% last week on fresh buying interest and the low pace of arrivals in cash markets. It may trade range bound this week as availability of imported stock in the market is good. India imported around 8.4 LMT import during last financial year while the old stock is still available. Import volume was recorded at 60,000 MT in the last four weeks of April, the first month of the new financial year. Notably, the extended timeline for Tur import for a year up-to 31<sup>st</sup> March -2023 has capped the upward movement in cash market. Regular supply from the overseas markets is expected now as per requirement throughout the year. With this changed import policy, stockists of Tur may not hold their Tur stocks for a longer time. It would ensure a regular supply from the overseas and local stockists. So, any spike is unlikely. As per Agriwatch estimates, crop size of Tur is 37.11 lakh MT, revised down from 40.22 lakh MT. Freight has gone up due to the increasing fuel price and other logistical issues due to the ongoing conflicts between Russian and Ukraine. Availability is good in Myanmar and African countries.

| Tur % Price Fluctuation Over Previous Week                 |          |          |           |          |            |

**Price Dynamics:**

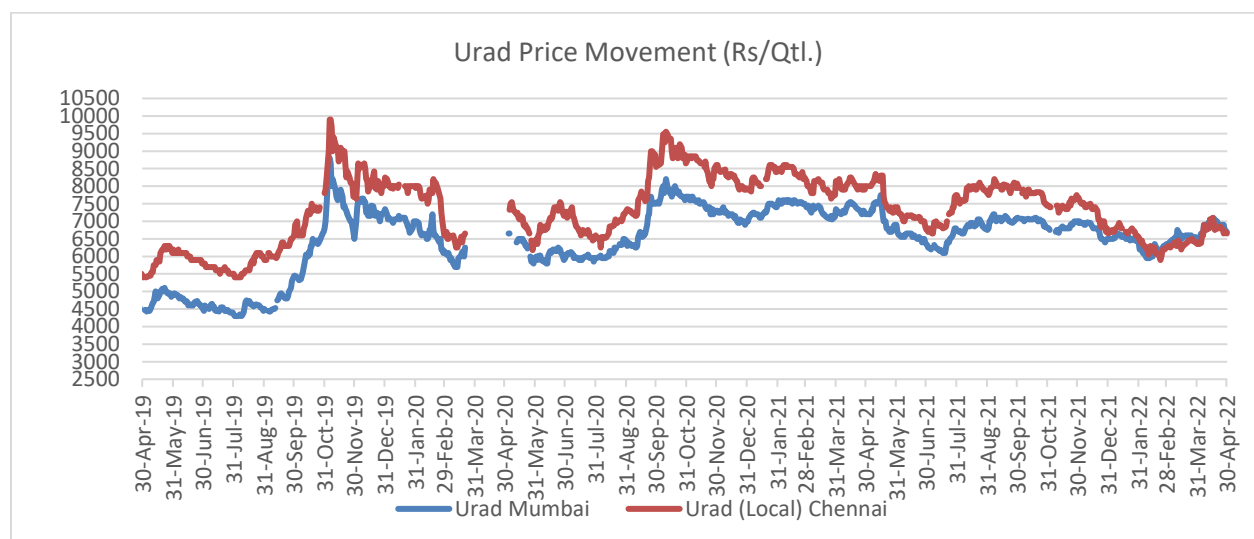

In May-2022, Tur price in is likely to trade firm due to:

- Increasing import quotes
- Decreasing arrival in markets
- Rising fuel prices
- Stockists' holdings

**Seasonality Index**-depicts steady to slightly firm tone.

### Urad (Black Matpe/Black Gram)

The cash Urad markets too recovered by 1.5 to 2% last week as the quotes in Myanmar stayed at the previous level. Urad FAQ offered at \$870 and 970 per MT last week. Availability in Myanmar is ample and the better supply is expected in the coming weeks. More recover is unlikely this week as the new arrival started in M.P. region. Summer area is already up by 40%. Supply from Myanmar has already started. Sensing the short supply and increasing prices of Urad in the local markets, govt. had extended the import timeline for Urad to 31<sup>st</sup> March-2023. It would ensure a regular supply as per the requirement from Myanmar and help to cap upward momentum. The medium-term outlook would depend on sowing area under Kharif season and the monsoon rains. If farmers shift area to other lucrative crops, price may move beyond our expected level of Rs 6600-7200. It may increase by Rs 100-200 more and should stabilize.

**Seasonality Index** depicts steady to steady to slightly firm movement in May-2022

### Price Dynamics:

In May-2022, average prices in key markets including Mumbai/was increased by 1 to 2.25% to 6650-6850. Prices may stay steady to slightly firm in May due to:

- Slow import flow
- Increasing fuel cost
- Higher import quotes and
- Delayed arrival from summer crop

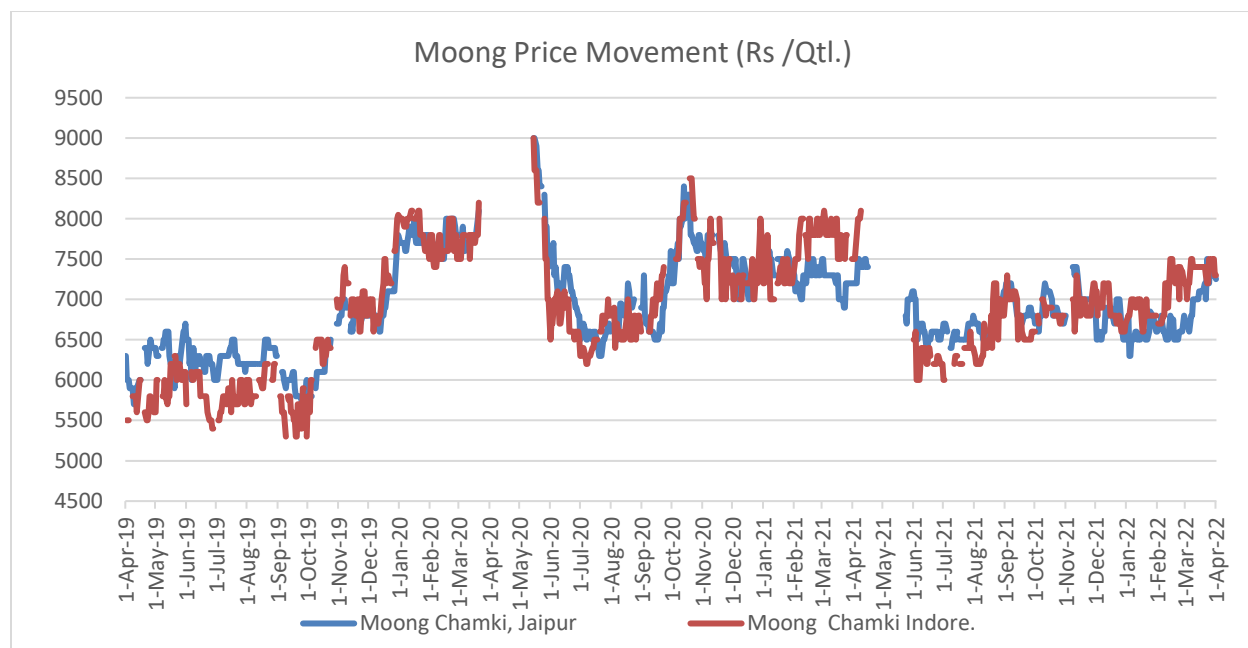

**Market Outlook for May-2022:** Prices are likely to trade steady to slightly firm.

### Fundamental Analysis and Outlook For Moong:

#### Market Recap:

Moong cash market traded stable in various markets, as expected last week. Prices stayed steady at Rs 6800 to 7000. New arrivals, ample stocks in Central pool and weak demand helped market to trade down or stayed steady. Summer sowing is running smoothly and is up by 14 % to 16.24 lakh ha. so far. The only concern is a rising temperature, which may affect yield of the summer crop, grain size may be small. However, improvement in area may minimize the loss to some extent. Ample availability in the Central pool, the arrival from Rabi crop and the smooth sowing in summer season would continue to pressurize the Moong cash market. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season.

#### Price Trend:
