- India
- Australia
- Canada
- US

**Pulses Sector-Highlights:**

Pulses market continued to reel under pressure due to uncertain import policy and resultantly decreasing private participation for bulk buying. Ample old stock of Chana, Moong & Tur in domestic markets, import flow barring Moong and weak demand from the retail and wholesale end have put a cap on prices. Even Urad and Lentil have shown declining trend in May and may remain depressed in June too. Kharif sowing is about to start under the expectation of normal monsoon. As prices of Tur Moong are ruling below MSP, farmers may shift 5 to 10 % area from Moong and Tur to Maize, Cotton and Paddy. The first phase of monsoon rains would be crucial for better start of sowing. As of now, it seems that the sowing would start timely.

At price front, slight recovery in market might be seen as prices of Chana, Moong, Tur are ruling below MSP. Demand is expected to improve but limited in range as the availability of Moong, Tur and Chana is enough to take care of domestic demand. Even Urad and Lentil are unable to move up as the rest of the pulses are trading under pressure. Apart from free import policy for Tur, Urad till March-2023 and for Lentil till Sep-2022, monsoon rains, sowing progress and the percentage shifting of competing crops may be the major price driving forces in the medium term.

The extended timeline for Tur & Urad import for a year, up to 31st March-2023 has helped to maintain prices to move down in May against April-2022. The extended timeline is likely to ensure a regular supply throughout the year. The impact is already visible in domestic markets. Tur cash market traded down by 3.07 % to Rs 6300 in May against April-2022. If area declines by 5 to 10 % (likely this kharif season), prices may recover by 200-250 by end June-July, by then sowing trend will be clear. Tur may trade in the range of Rs 6000-6500 in various market in June. June onward prices of tur is likely to be directed by Monsoon rains and sowing progress. There is a fear in the market that farmers may shift some area to other lucrative crops like Maize, Cotton and Paddy of which relative return is higher than Tur and Moong. Under the prevailing market fundamental Tur price should improve, but in a limited range.

Urad cash markets too decreased by 2 to 6.5 %, on an average, in May over April-2022 due to good import flow during Jan to April (around 2 LMT) amid Rabi arrivals and good crop prospects in summer season. As the rabi and summer crop volume is low, it would be consumed locally. So, prices of Urad are expected to improve in June by 200 to 250 from the current level. In July, sowing progress, rains frequency in growing states and the import volume would be the key price driving forces. Supply side would remain tight until the new kharif crop hits the market. If prices get higher, import volume would increase too as the availability in Myanmar is still good and import would continue to take place till March-2023. Notably, A MoU with Myanmar had been signed on the 4th week of June-2021 for importing 2.5 lakh MT of Urad and one lakh MT of Tur every year for five years, starting from 2021-22 to 2025-2026 (April-March). Kharif area is important for Urad price. If farmers shift area to other lucrative crops and monsoon rains gets abnormal, prices may move up beyond our expected range. So spike in Urad cash market is unlikely in June-2022.

Chana cash market continues to trade under pressure in May and decreased by 4 to 7%, on an average, over April. Stocks in central pool have started building up again and the procurement volume has gone up

to 23.5 LMT while procurement drive would continue till June. Target for procurement is 29 LMT. Under the prevailing condition, procurement volume may exceed 26 LMT. This means conditions are same as was seen last year. The supply side is ample and Govt. may increase volume of release once the procurement gets over. In June, demand is unlikely to improve and so prices too would move in range of 4700-5000. July onward, regular release by agencies would not allow market to move beyond a certain level. Under the prevailing condition buy and sell strategy is good rather than to hold it for any spike. Chana in various markets is trading at Rs 4600-4800, may move up to Rs 5000, if there is a sudden jump(unlikely) in demand. As the stocks are ample, govt. may try to offer Chana to various states and distribute it through PDS. Normally farmers avoid to hold stock in rainy season.

Masur market traded down by 0.75 % In May over April and is expected to trade slightly up in June. Arrivals in markets have increased in various markets of producing centers. In the first week of June arrivals increased unexpectedly. Despite firm inner tone importers as well as stockists prefer to release stocks, taking cue from good crop condition in Canada and better sowing intension in Australia. Even crop size in Turkey may increase this year and availability of Masur in global market may increase by 1 to 1.2 MMT in comparison to last year. The Canadian crop would be available in Sep while Australian crop may hit Indian markets in Nov-Dec. So, chances of any spike seem limited. If demand improves, Masur market may recover by Rs200-300. Local farmers are holding 20 % stocks and would prefer to release once the prices increases by rs 200-250. If crop condition continues to remain good in June and July, it would cap the range of upward momentum. At Indian ports, around 0.80 LMT stock is available. So Lentils may continue to trade in the range of Rs6800-7400 in June. The decreased fuel cost too has limited the upward momentum.

Moong cash market traded down by 6 to 10 %, on an average, in May over April due to bumper summer production this year. Moong is being traded at Rs 5800-6800 in various markets. Sentiments remain weak due to bumper production, over 3 lakh MT stock in central pool and a good flow of arrivals in M.P. are keeping market depressed. The new season (from August) would start with 1.78 lakh MT Moong stock. Traders/stockists expect selling by Nafed below MSP/market price. So, the private buying participation is limited. The overall sentiments for June is weak. As prices are depressed, the overall area may decrease by 10 % in kharif season. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. The short-term outlook seems steady to slightly weak after Rabi arrival, summer crop is expected from this week. Import volume remains restricted due to ban. India imported 1.95 LMT Moong during last financial year against 81,842 MT in 2020-21. In April-2022(first fortnight) India imported around 4500 MT Moong.

Cash Peas markets traded down taking cue from weak Chana markets. Demand for pea is weak right now. Import remains restricted despite much lower production than domestic demand. Peas' prices decreased by 7 to 8 % in May over April to 4350-4450 in Kanpur market. As Chana is not moving up, peas prices too may remain stable in various markets. Scope of upward momentum is limited in June.

Global Market Updates:

Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 20th April -2022 for Lentil, Chickpea and Field Pea. As per the latest forecast Lentil production may

increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41 tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term. The crop condition is good so far.

The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 tonne per ha in 2021-22. The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year. Yearly average price forecast to has been revised down to \$860 per MT in 2022-23 against \$1065 for 2021-22. Yield has been revised up to 1.51 tonne per ha for 2022-23 against 1.04 tonne in 2021-22

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production in Australia is estimated as 6.56 lakh tonnes for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.

As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

Monthly Outlook: - Pulses market may trade stable to slightly firm in June but the scope seems limited.

*AW estimates

Note (For Chana and Masur crop year is 2021-22 and to be marketed in MY 2022-23

Marketing year (Urad & Moong: Aug to July, Tur: Dec to Nov. Chana & Masur: March to Feb

Kharif Pulses:

Urad: Agriwatch has estimated 23.20 lakh MT Urad production in 2021-22 including 16.60 lakh MT in Kharif season. Import volume would increase due to free import policy till March-2023. Higher import volume may ensure better supply side.

Moong: Moong production has been pegged at 26.53 lakh MT including rabi and summer. Kharif Moong production has been pegged at 15.60 lakh MT. Import increased to 1.95 lakh MT. Import remains restricted now. Prices may either stabilize at this level or decrease slightly.

Tur: AW Tur production estimate for the year 2021-22 is 37.11 LMT, slightly lower than(37.28LMT) last year. Higher import volume may cap uptrend in coming months. The Sowing for new season would start from 15th of June.

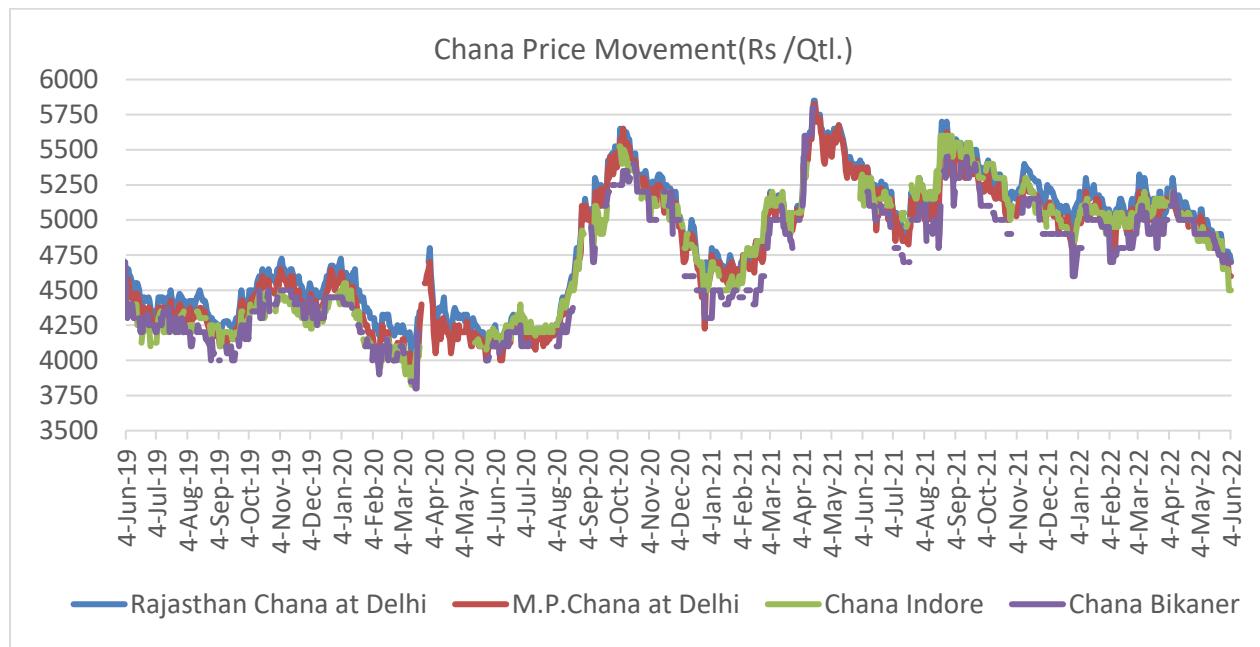

Rabi Pulses:

Chana: Agriwatch has pegged Chana production at 103.46lakh MT for crop year 2021-22 while Masur at 12.91 lakh MT. Supply side would increase to 125.93 LMT for Chana this year.

Masur: AW the final estimate for Masur pegged at 12.91 LMT for 2021-22, slightly higher than last year. Supply side would remain same as last year, so, prices may either remain stable or decrease slightly.

**Chana (Chickpeas /Bengal Gram):****Market Recap:**

Pressure of higher stock is visible on Chana cash market despite the ongoing procurement. Demand is weak while there is plenty of Chana stocks with govt's agencies and private hands. Availability is higher than last year while the stock accumulation is building up again. It would continue to cap Chana market. If demand recovers, it may move up to 5000 in July. At this level sale will start and it will depress again. Chana in various markets is trading in the range of 4600-4750. Fundamental remains weak for Chana. Following graph illustrates Chana price movement in different markets:

Markets	Chana % Price Fluctuation Over Previous Week				
	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	04.06.22	28.05.22	04.05.22	04.05.21	28.05.22
Delhi Chana(Raj)	4700	4750	5075	5325	-1.05
Bikaner Chana	4700	4700	4900	NA	0.00
Indore Chana	4500	4550	4850	5100	-1.10
Tan.Chana	4100	4150	4550	4585	-1.20
Price Projection For Bikaner During June-2022 (4500-4900)					

Price Dynamics: Prices are likely to trade steady to slightly firm in June-2022 due to:

- Improvement expected in demand
- Procurement drive on MSP (Rs 5230 per 100kg)
- Holding by farmers
- Likely buying interest by mills at lower level and
- Expected demand for besan in monsoon season

Seasonality Index: hints steady to slightly firm movement for June -2022.

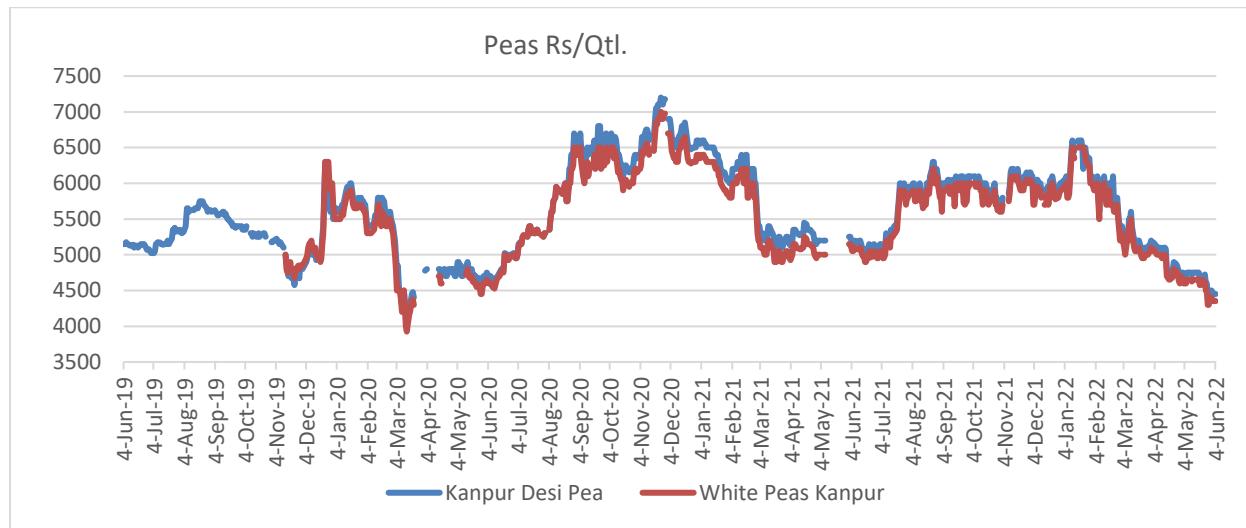

Summer Sowing Progress: As on 27th May-2022:

State-wise Area Coverage Under Summer Urad As On 27th May-2022 (Lakh ha)				
States	Target Area	Area covered		% diff from 2021
		2022	2021

***Field Pea (Matar/Dry Pea):******Fundamental Analysis and Outlook:***

Cash Peas market traded down by 6 to 7 % in major markets of Madhya Pradesh and Uttar Pradesh in May against April-2022. Chana prices remain unsupportive to peas market. Prices should stabilize at this level. Improvement depends on Chana price movement. As peas price is ruling below Chana price, more downside movement is unlikely. Domestic production(dry) this year is expected to be around 8 to 9 lakh MT. Peas in various market is trading in the range of Rs4350 to 4450. Following chart shows the price movement of peas.

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	04.06.22	28.05.22	04.05.22	04.05.21	04.05.22
Kanpur Desi Peas	4450	4450	4750	5250	-6.31
Kanpur White Peas	4350	4350	4700	5150	-7.44
Price Projection For Kanpur Desi During June-2022 (4200-4650)					

Price Dynamics:

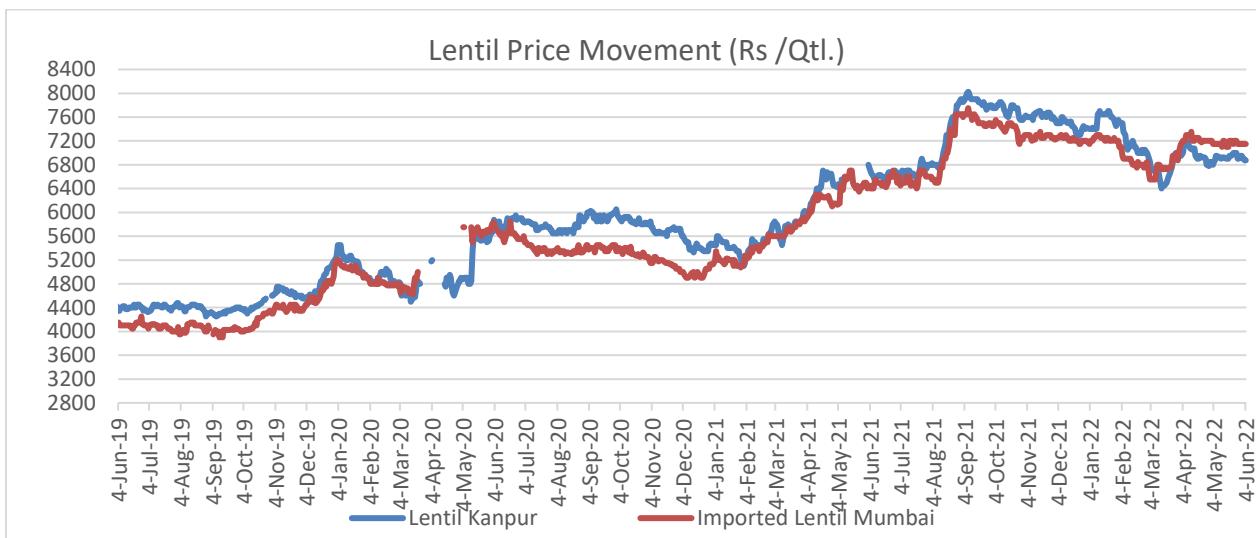

Pea market is expected to trade steady to slightly weak in June-2022 due to:-

- Chana trading down
- Weak demand from retail end
- Weak inner tone in other pulses market
- Consumer shifting from Matar to Chana

Overall tone: The overall tone is weak in June

**Masur (Lentils):**

Lentils availability in global market is bound to increase as crop condition in Canada is good so far while Australian farmers too may grow more Lentil due to lucrative price this year. The overall global availability of Lentil would increase by 10 to 11 lakh MT. Canada may harvest 25 lakh MT (last year 16.06 lakh MT) this year while Australian crop may be similar to last year at 6.5 to 7 lakh MT. Price may move in limited range in June. It is trading in the range of 6875 to 7100 in domestic markets. It may move slightly down in June. Slight recovery might be seen in July as stock is decreasing at ports.

Price Trend In Cash Market:

Lentil % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	04.06.22	28.05.22	04.05.22	04.05.21	28.05.22
Kanpur	6875	6900	6875	6650	-0.36
Mumbai	7150	7150	7150	6400	0.00
Raipur	6900	6900	7000	-	0.00
Ashok Nagar	6200	6400	6250	NA	-3.15%

Price Projection For Kanpur During June 2022 (6600-7100)

Price Dynamics:

In May-2021, average price in key market Kanpur was traded slightly down over April. The overall sentiments have weakened as the crop condition in Canada is good and the availability in global market may increase by 10-11 lakh MT this year. Prices in global market may come down to \$750-800 by August end. So the window for holding stock is contracting now. It may limit the scope for uptrend. Crop condition in Canada is good so far. Harvesting in Canada is expected in Aug-2022 and be available for India in Sep. Prices are likely to trade steady to slightly firm in June-2022.

Steady to firm tone is expected in June due to:

- Low import volume

- Improvement in demand
- Mills interest at lower level
- Govt.'s strategy to increase import
- Declining stocks at ports and stable CiF quotes

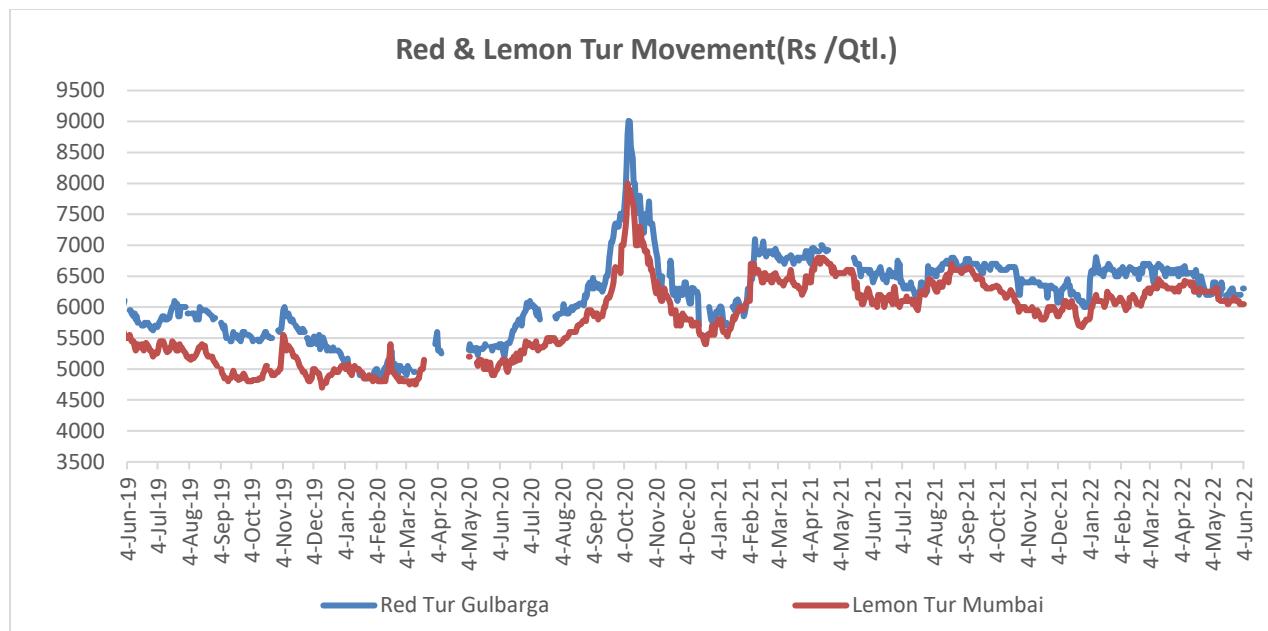

Outlook for June-2022: Steady to slightly firm movement might be seen

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Market Recap:

As the prices of Tur have decreased by 3 to 10% during last one month and hovering either at MSP or below MSP, farmers may prefer to reduce Tur area by 10 to 15% this year. They may prefer to sow more Cotton, Maize, Paddy and other lucrative crops in the kharif season. They may reduce area under Soybean, while area under Maize, Paddy and Cotton may increase by 10 to 15 %. Monsoon rains might be the crucial factor for sowing in states like Maharashtra, Madhya Pradesh and Karnataka. Right now, loss in sown areas seems very much on the card based on farmers pre-sowing intentions. Demand for dal is weak and is unlikely to improve suddenly amid the continuous supply from import and domestic sources. The stock of Tur is sufficient to cater the domestic needs. Tur is being traded at Rs 6000 to 6300. Tur market may continue to trade at the current level this week too. As per Agriwatch estimates, crop size of Tur is 37.11 lakh MT, revised down from 40.22 lakh MT. Prices of tur may trade slightly up in June.

Tur % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	04.06.22	28.05.22	04.05.22	04.05.21	28.05.22
Gulbarga	6300	6200	6210	6500	1.61
Kadapa (A.P.)	6000	6000	6050	6500	0.00
Indore	5900	6300	6400	6800	-6.35
Mumbai	6050	6100	6250	6050	-0.82

Price Projection For Gulbarga During June-2022 (6100-6500)

Price Dynamics:

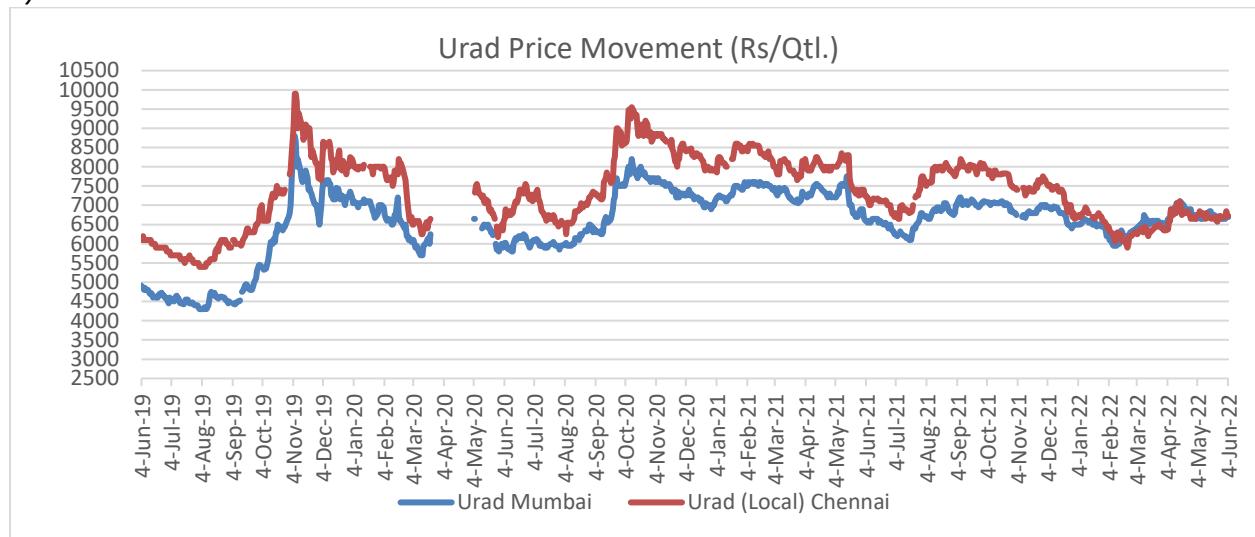

In June-2022, Tur price in is likely to trade firm due to:

- Fear of decreasing area
- Stable import quotes
- Decreasing arrival in markets

Seasonality Index-depicts steady to slightly firm tone.

Urad (Black Matpe/Black Gram):

Urad cash market recovered by 1 to 1.5 % as sellers restricted sale at the discounted price at Rs 6650-6725 in various markets despite the new arrivals in Andhra Pradesh and Karnataka during the last week, taking cue from the improved quotes in Myanmar. Urad quotes in Myanmar increased by \$5 to \$ 870 for FAQ and \$970 for SQ and its impact was visible in domestic market. Importers have restricted fresh deal on expectation of normal monsoon. If area decreases(likely) in Kharif season due to disturbance in weather pattern and rains, prices may move up more than our normal expectations. Old stocks in markets like Chennai and Mumbai are depleting fast. The stocks from imports have already been sold. Arrival from the new crop is over 2 to 3 months away. Under the prevailing market fundamentals, Urad prices may move up by Rs200-300 in the near term.

Seasonality Index depicts steady to steady to slightly firm movement in June-2022

Markets	Urad % Price Fluctuation Over Previous Week				
	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
04.06.22	28.05.22	04.05.22	04.05.21	28.05.22	
Mumbai FAQ Burma	6600	6650	6700	6550	-1.02
Chennai FAQ	6725	6675	6750	7200	0.75
Delhi FAQ	7050	6950	6750	7200	1.44
Delhi SQ	7650	7550	7750	7250	1.32

Price Projection For Tamil Nadu During June-2022 (6500-6900)

**Price Dynamics:**

Rabi and summer arrivals are fulfilling the local needs. However, crop size is small so its impact too would be for a limited period. After that kharif sowing progress and rains in major growing states may play a vital role in directing price trend. Right now supply from Myanmar continues and it may limit the scope for sudden jump in price.

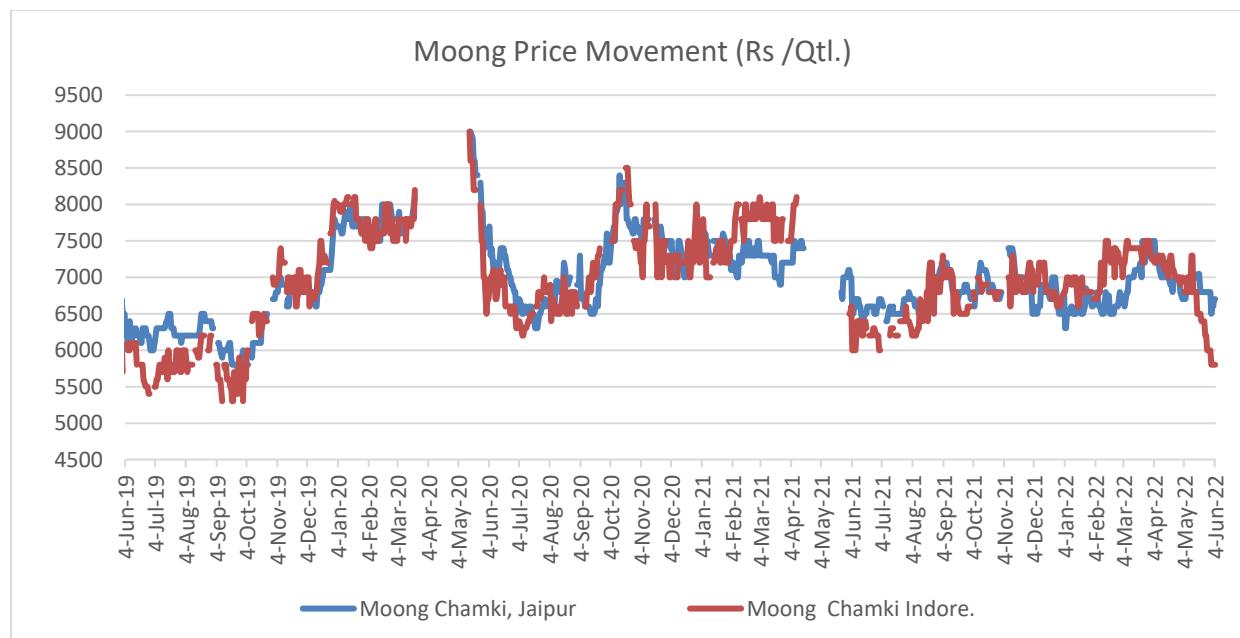

In June-2022, prices of Urad may trade stable slightly firm due to:

- Slow import flow
- Lower pace of arrival from Kharif and summer crop
- Fear of low area coverage in kharif season and
- Improvement in demand

Market Outlook for June-2022: Prices are likely to trade steady to slightly firm.

Fundamental Analysis and Outlook For Moong:**Market Recap:**

Moong cash market, as expected last week, decreased by 1.5 to 3 % in various markets and traded in the range of Rs 5800-6800 last week. It may decrease further by Rs200-300. New arrivals from the summer crop, ample stocks in Central Pool and weak demand helped market to trade low. Pressure on price may continue in coming weeks as arrivals from the summer crop has already started increasing in M.P. Summer sowing is over now and is up by 16.60 % to 19.15 lakh ha. so far. However, improvement in area may minimize the loss to some extent. Ample availability in the Central pool, increasing arrivals from the summer crop, free distribution of Moong in M.P. may pressurize Moong market by Rs 200-300 from the current level. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season.

Price Trend:

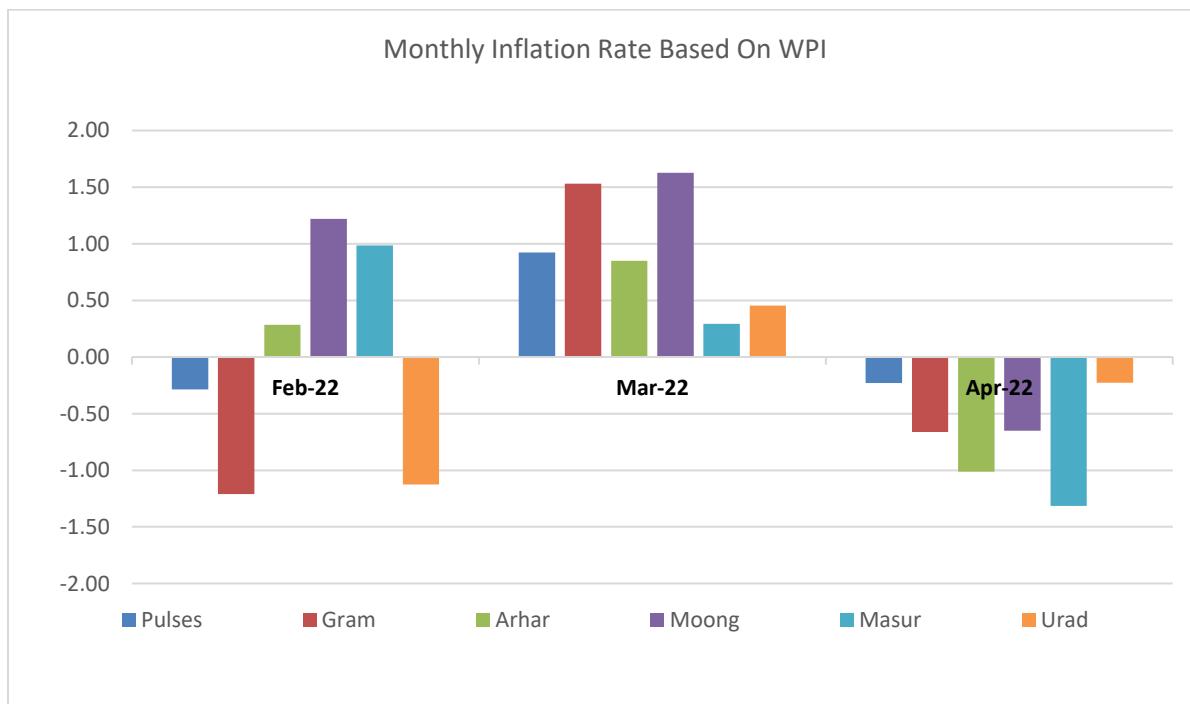

Moong % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	04.06.22	28.05.22	04.05.22	04.05.21	28.05.22
Jaipur	6700	6800	6700	6500	-1.47
Jalgaon	6800	7000	7000	6800	-2.86
Indore	5800	6000	6800	6000	-3.33
Delhi (Mertacity)	7000	7000	7300	6500	0.00
Price Projection For Jaipur During May-2022 (6100-6500)					

Market is expected to trade weak in June due to:

- Arrival pressure from the summer crop
- Ample stocks accumulated in central pool
- Mills restricted buying
- Fear of bulk selling by NAFED at prevailing market price

Market Outlook for June-2022: Steady to slightly firm tone is expected is expected

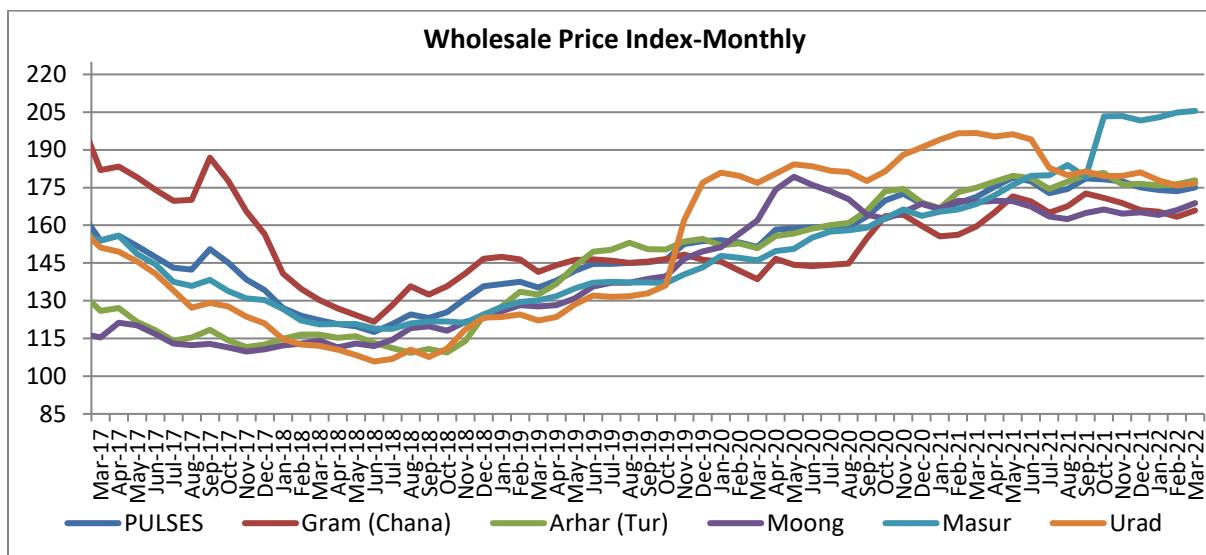

Agri Commodity Indices Apr -2022:

Pulses WPI: Pulses WPI decreased by 4 points from 175.1 in Mar to 174.7 in Apr-2022
