- India
- Australia
- Canada
- US

Pulses Sector-Highlights:

Despite delayed rains and sowing, area coverage is likely to improve in July as rains are occurring in major growing states. Sowing activities have already picked up and may match last year in the second phase of sowing. India expects good rainfall in July. the only concern is area shifting from pulses to other lucrative crops like Maize, Cotton, Paddy and Soybean to some extent. The period from July to mid-August is very crucial and it would decide the final size of all Kharif Pulses. AW preliminary estimates show that area under Tur may decline by 7 to 8 %, Urad by 12 to 14 % and Moong by 8% this Kharif season. The clear picture would emerge by August end.

With the revival of the monsoon across India, sowing activities have gained momentum and recovered significantly during the past week. Farmers have covered 3.455 lakh ha under the Urad which is still down by 9% from 3.793 lakh hectare as on 1st July, 2022. AgriWatch expects, farmers may reduce Urad sowing area by 5 to 8% and may shift toward more lucrative crops like Maize, Cotton and Soybean as realization from Urad is lower than these crops.

Farmers have covered 10.765 lakh ha under kharif Moong as on 1st July, 2022, up by around 32% from 8.167 lakh ha same time last year. Rajasthan is a major growing state, where sowing area was reported at 6.234 lakh ha followed by Karnataka at 3.02 lakh hectare.

Kharif Tur sowing continued to gain momentum in all States including Maharashtra. Farmers have covered 10.574 lakh ha as on 1st July, 2022. It is down by only around 14% from 12.266 lakh hectare same time last year. In Karnataka, Tur has been sown in 3.62 lakh hectare area while in Maharashtra it has been sown at 4.72 lakh hectare.

Moong price may stay stable at this level despite some support expected by ongoing procurement drive in MP and Punjab. Stocks are at comfortable level with bumper Summer production this year. Govt has fixed MSP of Moong at 7755 for 2022-23. It was 7275 for 2021-22. Despite the continuous increase in MSP, Moong prices are ruling below MSP by 4 to 10 % in various markets. As stocks are sufficient to cater the domestic demand, prices are unlikely to move up to MSP level. Nafed may start releasing stocks before the Kharif crop starts hitting the market. It would cap market price as stock is ample. In July, AW sees price to move in the range of Rs 6500-7100. It may move up by Rs100-200 in July from the current level.

Urad physical market traded firm on reports of lower stocks with private trades as well as Govt. agencies. Apart from it, increased quotes in Myanmar have lent support to cash market. Also, restricted arrival from the Summer/Rabi crops, the slow pace of import due to continuous depreciation in the value of Rs against Dollar & increased quotes for import, improved demand, tight supply and the fear of decline in kharif sowing area in the Kharif season have helped to push up market. Import in May declined to 20,400 MT and it may further decline to 10,000 MT in June due to high price in Myanmar. Stocks at Chennai and Mumbai ports are at bottom level right now while the kharif crop would not hit the market before August end and Sep. So, the supply side would remain tight in July and August too. With the revival of monsoon activities and

rains, area coverage has improved and the difference for sowing activities have now reduce to only 9%. However, prices of FAQ Urad in Mumbai and Chennai are expected to improve to Rs 7600-7700 in end July-August. SQ may move up to Rs 8400-8500. The long-term outlook depends on sowing progress and volume of rains. The overall inner tone is strong right now

Stocks of Lentils at ports has come down below 1lakh MT in June while bulk volume of import is unlikely to hit ports in July. Apart from it, arrivals in various markets too have started decreasing. It may push up cash market further from the current level. Stockists have restricted selling. So , AW expects market to move up by 200-300 from this level. Lentils availability in global market is bound to increase as crop condition in Canada is good so far while Australian farmers too may grow more Lentil due to lucrative price this year. The overall global availability of Lentil would increase by 9 to 10 lakh MT. Canada may harvest 25 lakh MT (last year 16.06 lakh MT) this year while Australian crop may be similar to last year at 6.5 to 7 lakh MT.

CiF quotes in Myanmar for Urad moved by \$85 at \$930 for FAQ & while SQ increased by \$80 to \$1040 per MT during the month under review. Tur quotes increased by \$30 to 870 per MT. Moong (Pedi Sheva) stayed steady to \$1040 per MT despite the absence of Indian importers in Myanmar markets. Importers are active in Myanmar, but for a limited quantity. As the fresh buying volume is low from the Indian importers, CiF quotes may continue to hinge in limited range.

Despite the increase in Tur price by 3 to 6% during last one month, farmers may prefer to reduce Tur area by 6 to 8 % this year. They may prefer to sow more Cotton, Maize, Paddy and other lucrative crops in the kharif season. They may reduce area under Soybean, while area under Maize, Paddy and Cotton may increase by 5 to 10 %. Monsoon rains might be the crucial factor for sowing in states like Maharashtra, Madhya Pradesh and Karnataka. Right now, loss in sown areas seems very much on the card based on farmers pre-sowing intentions. Demand for dal is weak and is unlikely to improve suddenly amid the continuous supply from import and domestic sources. The stocks of Tur is sufficient to cater the domestic needs. Tur is being traded at Rs 6300 to 6600. Tur market may continue to trade at the current level or move up slightly this month too. Prices may recover by Rs 100-150 by 2nd week of July, by then trend for Monsoon rains in the growing region would be clear. Demand for dal is normal and may pick up with the start of festive and marriage season. As the processing cost is increasing and INR weakening, price should improve by 200- 300 by July end.

Except Delhi, Chana cash market traded almost flat, where Chana prices improved by 0.52% to Rs 4850 per quintal during the previous week amidst easy availability of old stocks in private as well as govt.'s hand, weak demand and the fear of sale from Central Pool below the prevailing market price are restricting market to move up. Mills have restricted buying as demand from retail market is weak. Demand for Besan too is not improving. Higher rains in July and August too may pressurize stockists to release stock as the high moisture level affects quality of Chana. So, range bound movement is expected in Chana market this week too. If other Pulses continue to move up, Chana too may move up by 100-200. Chana is being traded at 4700-4850.Imported(Tanzania) Chana in Mumbai market is being sold at 4400-4450.Supply side seems comfortable for the whole year.

Global Market Updates:

According to the recent report by Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES), Chickpea production in Australia is expected to decrease to 6.06 lakh tonne, down by around 4.6% in 2022-23 from 10.62 lakh tonne last Year. Reason for this decline in production is mainly attributed to fall in sowing area to only 4,43,000 hectare, down by 28% from 616,000 hectares.

Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) recent report reveals that Pea production in Australia is expected to decrease to 2.38 lakh tonne, down by around 0.23% in 2022-23 from 2.38 lakh tonne last Year. Fall in yield is the main cause behind lower output estimate. However, Pea sowing area has increased to 2.05 lakh hectare, up by 6.7% from 1.92 lakh hectare.

Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) recent report reveals that Australia is expected to witness slightly lower Lentil production to 7.88 lakh tonne, down by 0.51% in 2022-23 from 8.39 lakh tonne last year. Even though, sowing acreage has increased for Lentil here to 5.46 lakh hectare, up by % from 4.95 lakh hectare, but production is likely to remain slightly short due to fall in yield.

Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 20th April -2022 for Lentil, Chickpea and Field Pea. As per the latest forecast Lentil production may increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term. The crop condition is good so far.

The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 toone per ha in 2021-22. The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year. Yearly average price forecast to has been revised down to \$860 per MT in 2022-23 against \$1065 for 2021-22. Yield has been revised up to 1.51 tonne per ha for 2022-23 against 1.04 tonne in 2021-22.

According to the United States Department of Agriculture (USDA) recent report, as on 1st June, 2022, pulses crops including Lentil, Chickpea, Pea stock at various warehouses in US remained down in comparison to same period in 2021. According to the data, edible Dry Pea stocks remained witnessed at 3.14 million cwt, down by 4% while Lentil stock was 1.05 million cwt, down by 36% and all Chickpea stock was 1.99 million cwt, down by 11%. Under the Chickpea category large and small chickpea stocks were at 401 thousand and 1.59 million cwt, down by 35% and 1% respectively.

Monthly Outlook: - Pulses market may trade stable to slightly firm in July but the scope seems limited except Urad

*AW estimates

Marketing year (Urad & Moong: Aug to July, Tur: Dec to Nov. Chana & Masur: March to Feb)

Kharif Pulses:

Urad: Agriwatch has estimated 23.20 lakh MT Urad production in 2021-22 including 16.60 lakh MT in Kharif season. Import volume would increase due to free import policy till March-2023. Higher import volume may ensure better supply side.

Moong: Moong production has been pegged at 26.53 lakh MT including rabi and summer. Kharif Moong production has been pegged at 15.60 lakh MT. Import increased to 1.95 lakh MT. Import remains restricted now. Prices may either stabilize at this level or decrease slightly.

Tur: AW Tur production estimate for the year 2021-22 is 37.11 LMT, slightly lower than(37.28LMT) last year. Higher import volume may cap uptrend in coming months. The Sowing for new season would start from 15th of June.

Rabi Pulses:

Chana: Agriwatch has pegged Chana production at 103.46lakh MT for crop year 2021-22 while Masur at 12.91 lakh MT. Supply side would increase to 125.93 LMT for Chana this year.

Masur: AW the final estimate for Masur pegged at 12.91 LMT for 2021-22, slightly higher than last year. Supply side would remain almost same as last year, so, prices may either remain stable or decrease slightly.

Chana (Chickpeas /Bengal Gram):

Market Recap:

At current price there is no parity for Chana from producing region. However, Chana sourced from Rajasthan is being traded at 4800-4825 per qtl. in Delhi. There is no parity for MP Chana in Delhi. Rajasthani Chana is being consumed in Akola Line. Price of Chana Chana is being sold at premium as there is short supply of ready stock. Cash market is expected to improve slightly as soon as demand comes. AW expects prices to improve by Rs100-200 in July end-August. Agriwatch advises to book profit at Rs 4900-5000. Beyond that level Nafed selling is expected and it would continue to cap uptrend as the new stocks accumulated in central pool have gone up to 25.25 lakh MT, higher than last year. Fundamental remains weak for Chana. Following graph illustrates Chana price movement in different markets:

Chana % Price Fluctuation Over Previous Week						
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over	% Ch. Over MSP
	02.07.22	25.06.22	02.06.22	02.07.21	25.06.22	From 02.07.22
Delhi Chana (Raj)	4850	4825	4750	5200	0.52	-7.27
Bikaner Chana	4700	4700	4700	4950	0.00	-10.13
Indore Chana	4750	4750	4500	5100	0.00	-9.18
Tan. Chana	4450	4350	4100	4480	2.30	-14.91
Price Projection For Bikaner During June-2022 (4500-4900)						

Price Dynamics: Prices are likely to trade steady to slightly firm in July-2022 due to:

- Decreased arrivals in major markets
- Likely demand with start of festive/marriage season
- Holding by trades
- Expected demand for besan in monsoon season.

Seasonality Index: hints steady to slightly firm movement for July-2022.

Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

Cash Peas market traded up by 7 to 8 % in major markets of Madhya Pradesh and Uttar Pradesh in June against May-2022. Increased Chana prices remain supportive to peas market in June. As prices of Chana is stable at this point of time, upside movement in Pea price is unlikely. It may continue to trade range bound as major consumers have shifted to Chana as it is available in plenty at same price. Prices should stabilize as this level. Improvement depends on Chana price movement. Domestic production(dry) this year is expected to be around 8 to 9 lakh MT. Peas in various market is trading in the range of Rs4650 to 4800. Following chart shows the price movement of peas.

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	02.07.22	25.06.22	02.06.22	02.07.21	25.06.22
Kanpur Desi Peas	4800	4850	4450	5150	-1.03
Kanpur White Peas	4700	4750	4350	5050	-1.05
Price Projection For Kanpur Desi During June-2022 (4700-5050)					

Price Dynamics:

Pea market is expected to trade range bound in July-2022 due to:-

- Stable Chana market
- Weak demand as Chana is available at same price
- Availability of domestic stock in M.P. & U.P.
- Consumer shifting from Matar to Chana

Overall tone: Stable market is expected in July.

Masur (Lentils):

Masur market may trade steady to slightly firm as demand is unexpectedly weak at this point of time. Apart from it, adv deals from Canada from new crop has been heard at \$780 per MT for Sep delivery. Crop condition is good so far and harvesting is expected in August. Even in Australia, good sowing intension seems in sight. So, availability in global market would increase by 9-10 lakh MT at least from last year. Besides, stockists too may prefer to sell stock in July end August. So spike in Lentil market is unlikely. AW advises to sell stock at every rise of 100. Right now Masur is being traded at Rs 7000-7250 in various markets

Price Trend In Cash Market:

Lentil % Price Fluctuation Over Previous Week						
Markets	Today 02.07.22	Week Ago 25.06.22	Month Ago 02.06.22	Year Ago 02.07.21	% Ch. Over 25.06.22	% Ch.Over MSP From 02.07.22
Kanpur	7175	7100	6900	6650	1.06	30.45
Mumbai	7250	7250	7150	6600	0.00	31.82
Raipur	7200	7200	6900	6550	0.00	30.91
Ashok Nagar	6650	6450	6200	6100	3.10	20.91
Price Projection For Kanpur During June-2022 (7000-7400)						

Steady to slightly firm tone is expected in July due to:

- Low import volume
- Likely improvement in demand
- Negligible stocks in Central Pool
- Decreased arrivals in domestic markets
- Declining stocks at ports

Outlook for June-2022: Steady to slightly firm movement might be seen

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):**Fundamental Analysis and Outlook:****Market Recap:**

Tur cash market is likely to improve as offtake from retail/stockists ends has improved. Apart from it, fear of lower area coverage and uneven distribution of rains is gaining its ground. Import pace is slow. So, prices may increase by 200 from this level. If weather generated loss occurs, rise may be even higher. Sowing activities have increased but rains in major growing districts like Gulbarga and Amrawati are badly required. Farmers may reduce area under Soybean and Tur, while area under Maize, Paddy and Cotton may increase by 8 to 15 %. Monsoon rains might be the crucial factor for sowing in states like Maharashtra, Madhya Pradesh and Karnataka. Tur is being traded at Rs 6300 to 6600. As per Agriwatch estimates, crop size of Tur is 37.11 lakh MT, revised down from 40.22 lakh MT. Prices of tur may trade slightly up in July. New season (2022-23) estimate would be published in August monthly report.

Tur % Price Fluctuation Over Previous Week						
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over	% Ch. Over MSP
	02.07.22	25.06.22	02.06.22	02.07.21	25.06.22	on Current Price
Gulbarga	6700	6600	6200	6400	1.52	6.35
Kadapa(A.P.)	6300	6200	6000	6500	1.61	0.00
Indore	6200	6100	5900	6700	1.64	-1.59
Mumbai	6450	6300	6050	6050	2.38	2.38
Price Projection For Gulbarga During June-2022 (6100-6500)						

Price Dynamics:

In July-2022, Tur price in is likely to trade firm due to:

- Fear of decreasing area
- Stable import quotes
- Decreasing arrival in markets
- Lower volume of import

Seasonality Index-depicts steady to slightly firm tone.

Urad (Black Matpe/Black Gram):

Urad cash market increased by 600 to 650 per qtl. In June as the import parity has gone up. Besides, weakening INR has increased the logistic costing. There is a short supply in the market and doubt over kharif crop size and area still looms large. Weather conditions are very crucial and rains in July and August and its impact on standing crop would be a main price driving force in coming months. Importers have restricted fresh deal at high price. If area decreases(likely) in Kharif season due to disturbance in weather pattern and rains, prices may move up more than our normal expectations. Old stocks in markets like Chennai and Mumbai are depleting fast. The stocks from imports have already been sold. Arrival from the new crop is over 2 to 3 months away. So, under the prevailing market fundamentals, Urad prices may move up by Rs200-300 in the near term after a correction of 100-200.

Seasonality Index depicts steady to steady to slightly firm movement in July-2022

Urad % Price Fluctuation Over Previous Week

Price Projection For Tamil Nadu During June-2022 (6500-7300)						

In July-2022, prices of Urad may trade stable slightly firm due to:

- Slow import flow
- Higher global price
- Fear of low area coverage in kharif season and
- Expected improvement in demand

Market Outlook for July-2022: Prices are likely to trade steady to slightly firm.

Fundamental Analysis and Outlook For Moong:

Market Recap:

Moong cash market, as expected last week, decreased by 1.5 to 3 % in various markets and traded in the range of Rs 6200-6800 in June. It may continue to trade range bound. Arrivals from the summer crop in MP, ample stocks in Central Pool and weak demand helped market to trade low. Pressure on price may continue in coming weeks. Ample availability in the Central pool, increasing arrivals from the summer crop, free distribution of Moong in M.P. may pressurize Moong market by Rs 100-200 from the current level. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. India imported 1.95 LMT Moong during last financial year against 81,842 MT in 2020-21. Prices of Moong may come down to Rs5700-6500 in the peak arrival season.

The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season.

Price Trend:

Moong % Price Fluctuation Over Previous Week						
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over	Ch. Over MSP
	02.07.22	25.06.22	02.06.22	02.07.21	25.06.22	on Current Price

Delhi (Mertacity)	6600	6700	7000	6400	-1.49	-9.28

Price Projection For Jaipur During July-2022 (6500-7100)

Market is expected to trade stable to slightly weak in July due to:

- Arrival pressure from the summer crop
- Ample stocks accumulated in central pool
- Mills restricted buying
- Fear of bulk selling by NAFED at prevailing market price

Market Outlook for July-2022: Steady to slightly weak tone is expected is expected

Agri Commodity Indices Apr -2022:

Pulses WPI: Pulses WPI decreased by 4 points from 175.1 in Mar to 174.7 in Apr-2022
