- India
- Australia
- Canada

Pulses Sector-Highlights:

Heavy rains in South India, Karnataka, Maharashtra and other eastern states have not only started affecting the sowing activities but also the standing crop's health. Water logging, continuous rains and the excess moisture level in upper land remain a cause for concern. If rains continue for a week (likely), the growth of the standing pulses crops like Moong, Urad and Tur may be affected adversely and it may ultimately result into low yield. Urad and Tur area is already down by 6 and 10.42 % so far. Even Moong area may decline by 10 to 12 % from last year despite good start in the beginning. Weather conditions in Aug and Sep would be very crucial and the fate of kharif crop size would depend on it. The emerging conditions are not favorable for a good crop size and it may drive markets further up by 5 to 10 % in coming months.

The overall Kharif pulses sowing is down by 3 % to 116.4 lakh ha as on 5th August-2022. It was 119.43 lakh ha last year same time. Farmers have covered 39.80 lakh ha under Tur, down by 10.42% from 44.44 lakh ha last year. The weather conditions in two major states-Karnataka and Maharashtra are not congenial to the standing crops. Tur area in Karnataka has recovered and almost matched to last year, it is still lagging in Maharashtra by 11.50 %. At present weather in both the states, including South India, is not good and the concerns over the crop size have started surfacing its head once again. In Karnataka, districts like Gulbarga, Bidar, Bijapur, Raichur, Bagalkot Gadag and Koppal are receiving heavy rains. Here crop growth seems to be in danger now. Prices of Tur in domestic market have increased by 4 to 8%, on an average, during the week under review. It may move up by Rs200-300 more from the current level. Preliminary estimate shows that crop size may decrease to 35 to 37 LMT in 2022-23, if weather opens up and plant receives good sunshine. Local crop is being traded at Rs 8000-8500 while lemon is being traded at Rs7500.

Report of crop loss for Urad crop is coming from Maharashtra, South Indian states and Madhya Pradesh. Farmers have covered 31.83 lakh ha so far, down by 6 % from last year. As the sowing activities are almost halted due to rains, the % decrease may go up to 10%, as expected earlier by AgriWatch. Crop conditions are good so far in Madhya Pradesh, Rajasthan and Uttar Pradesh. But continuous rains have increased concerns in these states too. Reports of crop damage are coming from South India, Maharashtra and Gujarat. Given the prevailing weather conditions, the loss ratio is bound to increase and may push cash market up by Rs 300-400 from the current level. Currently, Urad is being traded at Rs7600 in Chennai and Mumbai markets decision. Myanmar's latest decision of depreciating value of Kyat from 1850 to 2100 per Dollar has decreased the cost of import. But the impact would be negated by higher import demand from India soon.

The Central Bank of Myanmar's decision to revised down its reference exchange rate from 1,850 Kyat to 2,100 Kyat per Dollar impacted Urad and Tur quotes there also. Myanmar quotes decreased by \$20 to \$1065 per MT for SQ and by \$25 to \$935 per MT for FAQ and by \$20 to \$720 for Lemon Tur. Market would adjust this change by the end of Aug.

Despite the good pace of sowing of Kharif Moong at the start of the season, growth margin of sowing activities has decreased considerably during last two-three weeks. In coming weeks, it may decrease further and may be less than 8 to 10 % at the end of the sowing season. Farmers have covered around 31 lakh Ha area, up by only 2.5 % from last year. Excessive rains have not only disturbed the sowing activities but also started decaying the root of plants where the fields are inundated. As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely to continue. Procurement of Moong in M.P. is on and some support is expected in local markets at current level. Moong production in Kharif season is expected to be in the range of 16 to 17 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Aug and Sep would be crucial for the Kharif crop size. Prices of Moong decreased by

4 to 6 %, on an average, in local markets. Out of 31Lakh Ha, Rajasthan has contributed 20.24 Lakh Ha, up by 12 % from last year. The overall sentiments remain weak for the cash Moong markets.

Chana cash markets traded in limited range despite decreasing arrivals in major markets and expectation of higher demand in coming weeks. Ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop have put a cap on Chana cash market. It traded at Rs4600-4900 in various markets. As demand is likely to improve, recovery in market is expected. If demands improve, it may move towards MSP level. Govt.'s selling activities too would be a price driving factor. There is a common view in the markets that govt would not release new crop before Nov, as Chana sowing would start from mid-Oct and if prices remain below MSP, farmers may divert Chana area to other crops. So, some improvement is expected in Chana market in coming months.

Lentil cash market traded down by 1 to 2 %, on an average, during the week under review. It traded at Rs 6700 in Mumbai and Rs 7025 in Kanpur. Pressure on price might be seen as quotes (FoB) in Canada have decreased to \$790 per MT. It may decline further by \$50 in end-August ahead of bumper crop (25 LMT) in Canada this year. Harvesting is expected from mid Aug-2022. Crop condition is good so far. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase not only from Canada but also from Australia in coming months. Farmers in India too have 10 to 15 % stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak.

Global Market Updates:

Australia can harvest 7.88 LMT in 2022-23 crop. It would be available for India in Dec. Apart from it, demand in domestic market is normal and farmers still have 20 % stocks. So, cash market may trade steady to slightly weak this week too. It may come down to Rs 6700-6800 by end Aug. Supply from the Black Sea Region is still uncertain due to Ukraine -Russia conflict.

Lentil Prices in Canada continued to soften as export volume declined in June as compare to May-2022. It exported 186376 MT in June, down by 25% to 248,547 MT in May-2022. Total export sales till June recorded at 14.85 LMT against 21.83 LMT last year till June-2021. Turkey brought 74000 MT while India purchased 39609 MT in June. UAE brought around 14500 MT.

Total export sales for the month reached 186,376 metric tons (MT), down 25% from the previous month's total of 248,547. So far movement has reached 1,485,608 MT, down from 2,183,398 during the last marketing year.

According to the recent report by Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES), Chickpea production in Australia is expected to decrease to 6.06 lakh tonne, down by around 4.6% in 2022-23 from 10.62 lakh tonne last Year. Reason for this decline in production is mainly attributed to fall in sowing area to only 4,43,000 hectare, down by 28% from 616,000 hectares.

Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) recent report reveals that Pea production in Australia is expected to decrease to 2.38 lakh tonne, down by around 0.23% in 2022-23 from 2.38 lakh tonne last Year. Fall in yield is the main cause behind lower output estimate. However, Pea sowing area has increased to 2.05 lakh hectare, up by 6.7% from 1.92 lakh hectare.

Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) recent report reveals that Australia is expected to witness slightly lower Lentil production to 7.88 lakh tonne, down by 0.51% in 2022-23 from 8.39 lakh tonne last year. Even though, sowing acreage has increased for Lentil here to 5.46 lakh hectare, up by % from 4.95 lakh hectare, but production is likely to remain slightly short due to fall in yield.

Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 20th April -2022 for Lentil, Chickpea and Field Pea. As per the latest forecast Lentil production may increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41 tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term. The crop condition is good so far.

The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 toone per ha in 2021-22. The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year. Yearly average price forecast to has been revised down to \$860 per MT in 2022-23 against \$1065 for 2021-22. Yield has been revised up to 1.51 tonne per ha for 2022-23 against 1.04 tonne in 2021-22.

Monthly Outlook: - Pulses market may trade mixed in August. Urad and Tur may recover again while Masur, Moong and Chana would trade in limited range.

Supply & Demand:

Note: Preliminary APY estimates for Pulses Kharif for 2022-23 are under progress. It would be published in Sep-2022 report.

AW estimates *

Marketing year (Urad & Moong: Aug to July, Tur: Dec to Nov. Chana & Masur: March to Feb)

Kharif Pulses:

Urad: Agriwatch has estimated 23.20 lakh MT Urad production in 2021-22 including 16.60 lakh MT in Kharif season. Import volume would increase due to free import policy till March-2023. Higher import volume may ensure better supply side.

Moong: Moong production has been pegged at 26.53 lakh MT including rabi and summer. Kharif Moong production has been pegged at 15.60 lakh MT. Import increased to 1.95 lakh MT. Import remains restricted now. Prices may either stabilize at this level or decrease slightly.

Tur: AW Tur production estimate for the year 2021-22 is 37.11 LMT, slightly lower than (37.28LMT) last year. Higher import volume may cap uptrend in coming months. The Sowing for new season would start from 15th of June.

Rabi Pulses:

Chana: Agriwatch has pegged Chana production at 103.46lakh MT for crop year 2021-22 while Masur at 12.91 lakh MT. Supply side would increase to 125.93 LMT for Chana this year.

Masur: AW the final estimate for Masur pegged at 12.91 LMT for 2021-22, slightly higher than last year. Supply side would remain almost same as last year, so, prices may either remain stable or decrease slightly.

Preliminary Kharif area estimates have already been published and can be seen below:

Chana (Chickpeas /Bengal Gram):**Market Recap:**

Chana cash markets traded up by 1.5 to 5 % , on an average, in July against June. Demand for festive season has started improving while arrivals in markets are coming down. It may help market to recover and move towards MSP level in Aug-Sep. Beyond that level market may face resistance as stockists would prefer to release stocks in parts before NAFED starts selling from 2021-22 crop. As quantity in Central Pool is above 25 LMT, supply side seems to be at comfortable level throughout the year. Right now Chana is being traded at Rs4800-5000 per qtl. Continuous improvement(likely) in demand may push up price to 5200-5250. Tanzania Chana is still being traded at Rs 4700 in Mumbai. Apart from it, sale of old crop by Nafed too would limit the upside movement. Fundamental remains firm for August.

Following graph illustrates Chana price movement in different markets:

Chana Prices per Quintal						
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over	%Ch. Over
	06.08.22	30.07.22	06.07.22	06.08.21	30.07.22	MSP From 23.07.22
Delhi Chana(Raj)	4950	4950	4875	5100	0.00	-5.35
Bikaner Chana	4800	4800	4800	4850	0.00	-8.22
Indore Chana	5050	4950	4800	5150	2.02	-3.44
Tan.Chana	4700	4650	4550	4420	1.08	-10.13

Expected Range of Chana In August-2022:4800-5200

Dynamics: Prices are likely to trade steady to slightly firm in August-2022 due to:

- Low arrivals in market
- Festive/marriage season demand
- Restricted sale by NAFED
- Stockists' holding

Seasonality Index: hints steady to slightly firm movement for August-2022.

Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

Cash Peas market traded up by 6 to 6.5 % in major markets of Madhya Pradesh and Uttar Pradesh in July against June-2022. Improving Chana prices remain supportive to peas market in July. As prices of Chana is moving up, upside movement in Pea market is likely to continue. The upside movement might be contained if Chana prices stay steady or slightly move up. Demand for Peas has decreased as Chana prices are ruling at similar level. Production of white Peas this year has been normal while Green Peas production was up from last year. Low demand, normal production size and competitive price for Chana have put a cap on Peas cash markets. As Chana prices are likely to improve, it may lend some support to Peas markets too in August. Domestic production(dry) this year is expected to be around 9 to 10 lakh MT. Peas in various market is trading in the range of Rs4900 to 5000 and may move to Rs 5200-5300 per qtl. Following chart shows the price movement of peas.

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	06.08.22	30.07.22	06.07.22	06.08.21	30.07.22
Kanpur Desi Peas	5000	4800	4700	5850	4.17
Kanpur White Peas	4900	4700	4600	5750	4.26
Price Projection For Kanpur Desi During August-2022 (5000-5400)					

Price Dynamics:

Pea market is expected to trade steady to slightly firm in August-2022 due to:

- Firm Chana market
- Seasonal demand
- Low arrivals
- Stuckist's holding

Overall tone: Firm market is expected in August.

Masur (Lentils):

Weak tone may prevail in cash Masur markets as the supply side is likely to increase from Canada from Sep. Adv. deals have been struck at discounted price ahead of bumper crop there. Canada is going to harvest 25LMT crop this year. Harvesting is due from the third week of Aug-2022. Apart from it, bumper crop (7.50 LMT) is expected in Australia too and shipment is expected from end Nov-Dec. With this background Stockist's in domestic markets too may prefer to offload stocks before import takes place from the new crop from Canada. Even farmers in India too may release stocks before Oct, when rabi field preparation starts. All these factors may pressurize cash market further. Lentils cash market may decrease by 200-300 in August from the current level. It may come down to Rs 6400-6800 by end Aug-Sep. Right now it is ruling around 6700 imported and 7000 in Kanpur markets. Following chart shows the market movement:

Price Trend In Cash Market:

Lentil Prices per Quintal						
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over	%Ch. Over
	06.08.22	30.07.22	06.07.22	06.08.21	30.07.22	MSP From 23.07.22
Kanpur	7025	7100	7250	6800	-1.06	27.73
Mumbai	6700	6850	7250	6500	-2.19	21.82
Raipur	7000	7150	7300	6700	-2.10	27.27
Ashok Nagar	6450	6400	6700	NA	0.78	17.27

Expected Price Range in August-2022:6500-7000

Weak tone may prevail in Aug due to:

- Decreasing quotes in global market just ahead of bumper crop in Canada
- Stockists' selling in local markets
- Weak demand in Monsoon season

- Good production prospects in Australia

Outlook for Aug-2022: Weak movement might be seen in August. Seasonality shows the same trend.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Market Recap:

Tur cash market is likely to move further up despite devalued Kyat by Myanmar. Low area coverage (10%) so far may exceed to 15 % by the end of the season due to excess rains in major growing states like Karnataka and Maharashtra. Even resowing window too is contracting and sowing pace has decreased considerably due to continuous rains in both the states. Sensing the bad crop prospects this year stockists have started holding stocks amid low volume of import despite extension of import time limit to March-2023. Trades have started talking of low crop size (32-33LMT) against 37.11 LMT last year. Loss may exceed if rains continues. However, import volume and price in South African countries have potential to cap the uptrend. Harvesting is about to start in these countries and the normal crop size is expected this year too. Right now, fundamentals remain firm. Following chart shows the price movement for Tur markets:

Tur Prices per Quintal						
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over	%Ch. Over MSP
	06.08.22	30.07.22	06.07.22	06.08.21	30.07.22	
Gulbarga	8600	8200	6900	6500	4.88	36.51
Kadapa(A.P.)	7800	7200	6500	6100	8.33	23.81
Indore	8000	7400	6500	6500	8.11	26.98
Mumbai	7500	7250	6500	6250	3.45	19.05

Expected Price Range(Gulbarga) in August-2022:(8200-8800)

Price Dynamics:

In August-2022, Tur price is likely to trade firm due to:

- Fear of decreasing area

- Rains generated crop loss
- Stockists 'holding
- Low pace of arrivals
- Lower volume of import

Seasonality Index-depicts steady to slightly firm tone.

Urad (Black Matpe/Black Gram):

Crop loss in Maharashtra, Gujarat, South India and some pockets in M.P. have lent support to cash urad markets. Apart from it tight supply side, low area coverage (6% so far) and decreasing volume of import may push up price further after a down ward correction of Rs200-250. Rains continues in South India and it may further damage the standing crops. If damage extends in more districts of M.P., Urad price may move up by 300-400 from the current level. There is negligible stocks in central Pool. Import volume in Sep-oct is likely to increase as Myanmar has devalued its currency. Stocks are said to be around 2.5 to 3 lakh Mt in Myanmar. So, stockists' may increase quotes again if losses increase in India. The overall tone seems firm right now. Urad FAQ is being traded at rs 7600-7800 in India. Weather conditions in August and September in growing regions would be a major price driving forces in the coming months. Following charts show the Urad price movement:

Seasonality Index depicts steady to steady to slightly firm movement in August-2022

Urad Prices per Quintal						
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over	%Ch. Over MSP
	06.08.22	30.07.22	06.07.22	06.08.21	30.07.22

Delhi SQ	8900	8950	8200	7850	-0.56	41.27

In August-2022, prices of Urad may trade firm due to:

Low area coverage

Fear of crop loss

Tight supply side in India

Higher demand due to festive season and

Negligible stocks in Central Pool

Market Outlook for August-2022: Prices are likely to trade firm.

Fundamental Analysis and Outlook For Moong:

Market Recap:

Bumper production in the Summer season, over 3 LMT stocks in Central Pool and weak demand remain unsupportive to Moong cash market fundamentals. Stockists and millers are not buying in Bulk volume as they are aware of the fact that Govt. would sell Moong below MSP as usual. Perception of such thinking has weakened Moong prices. If quality suffers this year in Kharof season due to excess rains, it would suppress market further. Availability is good so weak sentiment may prevail in the cash Moong market. As the procurement of Moong in M.P. starts, prices have recovered to some extent in recent weeks. It is considered as a temporary phenomenon. Price would come down again. Right now Moong is being traded at Rs 6800-7000 despite the MSP of Rs7275 for the year 2021-22.

Price Trend:

Moong Prices per Quintal						
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over	% Ch.
	06.08.22	30.07.22	06.07.22	06.08.21	30.07.22	Over MSP
Jaipur	7000	6900	6600	6600	1.45	-3.78
Jalgaon	7800	7600	7800	6300	2.63	7.22
Indore	6800	6400	6300	6200	6.25	-6.53
Delhi (Mertacity)	6800	6600	6600	6600	3.03	-6.53

Expected Price range in Aug-2022(6400-7200) for FAQ

Market is expected to trade stable to slightly weak in August due to:

- *Slower Pace of procurement*
- *Ample stocks accumulated in Central Pool*
- *Mills restricted buying*
- *Fear of bulk selling by NAFED at prevailing market price*

Market Outlook for August-2022: Steady to slightly weak tone is expected

Agri Commodity Indices June-2022:

Pulses WPI: Pulses WPI decreased by 2 points from 172.4 in April to 174.6 in June-2022
