

Pulses Monthly Research Report: September-2022

Contents:

- **Pulses Sector-Highlights**
- Domestic & Global
- Supply & Demand
- Kharif Area Estimates 2022-23 (Preliminary)
- Kharif Progressive Sowing

Pulses-Wise Analysis

- Chana (Chick Pea)
- Matar (Dried Peas)
- Masoor (Lentils)
- Tur (Pigeon Pea)
- Urad (Black Matpe)
- Moong (Green Gram)

Appendix:

- Indian Pulses- Wise Import- Monthly Analysis
- Price Trend Chart with Ave Price Table
- Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
- India
- Australia
- Canada

Pulses Sector-Highlights:

Weather conditions during the August remained a cause of concern as excess rains and water logging in major producing state like Rajasthan, MP, Karnataka, Maharashtra disrupted the normal sowing activates for Kharif Pulses (Tur, Urad and Moong). Rains activities during September month would be crucial for Moong and Urad crops as crops are now almost ready to be harvested stage and any heavy spell of rains may negatively affect the yield as shattering effect may be visualized due to excess rains. As per IMD, more than normal rains are predicted over Central and North-West India including MP, East-Rajasthan, Western-Gujarat, Maharashtra, North-Karnataka during September month. These States are important from point of production of pulses. Assessment of area and yield loss is underway.

Total Pulses sown area decreased to 129.55 lakh ha as on 2nd September, 2022, down by around 4.36% from 135.46 lakh hectare same time last year while Green Gram (Moong) area decreased to 32.97 lakh ha., down by 4% from 34.38 lakh ha., Urad coverage fell down to 36.62 lakh ha., down by 4% from 38.18 lakh ha and Tur (Arhar) coverage slipped to 44.86 lakh ha., down by 5.67% from 47.56 lakh ha. same time last year. Kharif Tur and Urad production

Kharif Moong crop arrivals started in major markets of Karnataka, MP and Maharashtra. Similarly, Urad arrivals continued in market in MP and Maharashtra and is likely to increase in coming weeks. Cabinet nod for disposal of Chana at discounted rate is expected to keep the whole market sentiments little down not only for Chana but for other pulses too despite the fact that Kharif pulses (Tur, Moong and Urad) production is expected to be lower than the normal market expectation.

Tur traded down during the month under review and it traded down by 3% at INR 8,000 per quintal in Gulbarga market while Tur Lemon traded down by 3% at INR 7,250 per quintal in Mumbai market. Reports of crop loss due to excess rains over major producing state namely Karnataka and IMD's prediction of more rains in September month kept supporting the sentiments but Stock Declaration Order and apprehension regarding some more stringent step to check Tur prices capped the upward momentum. Moreover, continuous fall in overseas quotes also weighed on the market prices as lemon Tur quotation decreased to \$920 per MT from \$975 per MT a month ago. Last date of August too witnessed an effective decision by Central Govt. when it decided to dispose off around 15 lakh tonne of Chana at discounted prices which may take toll on the whole pulses sentiments including Tur. Tur market is likely to trade steady to slightly weak due to Govt.'s decisions despite the prevailing firm sentiments. Import volume and price for African crop would be key to direct the price trend in coming weeks. This year crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather still remains unfavourable.

Steep fall seen in **Urad** prices during August due to new crop arrivals with higher moisture level. New arrivals fetched lower prices by INR 200 to 300 per quintal due to higher moisture content. Urad prices have decreased despite the fact that sowing coverage is down by around 4% to 36.63 lakh ha. and excess rains plus water logging in fields have negatively impacted the crop size which is likely to fall by 10 to 15%. IMD's prediction of more rains in September may take toll on Urad crop which are near to maturity harvesting stage and any incident of excess rains may cut off crop size further. Trend may remain steady to slightly weak due to Centre's recent decision of Chana selling at discounted rate amidst new crop arrivals which is likely to increase now onwards. Otherwise, market trend seems firm on the back of crop and area loss due to unfavourable weather conditions. Negative impact of devaluation of Myanmar currency Kyat from 1850 to 2100 against Dollar has now over as C&F quotes have already fallen by around \$90-100 till date to \$880 per MT for Faq and \$1010 per MT for Sq variety respectively. The volume of import needs to be monitored for September. In August, around 18,000 MT is expected. Figure is still awaited.

Moong prices too remained slightly bearish during August amidst new Kharif Moong crops arrivals in Maharashtra, Rajasthan and MP after bumper summer crop. These arrivals are fetching lower prices by INR 200 to 300 per quintal due to higher moisture content. Volume of rains will remain in focus during September as in any incident of heavy rains Moong crop pods will have shattering effect resulting in fall in yield as well as crop size amidst the fact that coverage area too is running shorter by 4% to 32.97 lakh ha. besides quality deterioration. As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely in coming weeks. Moong production in Kharif season is expected to be in the range of 14 to 15 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Sep would be crucial for the Kharif crop size. The overall sentiments remain weak for the cash Moong markets till new crop arrivals get over.

Chana cash markets too traded down during the month due to lower buying interest by stockists and millers amidst good Chana availability (over 25 LMT) in Central pool and selling by NAFED from Rabi 2020 & 2021 crop. Due to the planned disposal of huge volume of Chana market prices are not likely to improve as recent decision would easily meet up the emerging demand. Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops while the Chana sowing is scheduled to start from mid-October. Availability is good, so spike in Chana market is unlikely in September.

Lentil cash market traded down during the August as overseas quotes (FoB) in Canada also decreased to \$750 per MT. It may decline further by \$25-30 by mid-September ahead of bumper crop (29.4 LMT, Canada Statistics) in Canada this year. Good pace of harvesting in Canada amidst conducive weather is keeping global market sentiments under check. Around 12% harvesting has already done in Canada while crop size is now likely to be at record 29.4 lakh tonne this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during year 2022-23. Thus, global market surplus is likely to increase to 14-15 lakh tonne from 9 to 10 lakh tonne. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase not only from Canada but also from Australia in coming months. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak as cheaper availability of Chana has potential to divert the actual demand from Indian market where the consumers are price sensitive.

Global Market Updates:

New data released by Statistics Canada recently reveals that Chickpea production in Canada is expected to be around 1.33 lakh tonne, up by 75% from 76,000 tonne same time last year.

As per the recent report by Statistics Canada, Dry Pea production in the country is expected to swell well by around 60% to 36.1 lakh tonne during Marketing Year 2022-23 from 22.57 lakh tonne same time last year. Agency's previous estimate was of 34 to 34.5 lakh tonne. Two major producing states like- Saskatchewan and Alberta are expected to produce 18.10 lakh tonne and 15.40 lakh tonne Dry Pea respectively.

Massive rise has been projected for Lentil production in Canada for 2022-23. Around 81 % increase from last year is considered a hefty increase and it would make global supply at comfortable level. This year Canada is going to harvest 25 to 29 LMT crop. Dry Peas production too has been pegged at 36 LMT, up by around 60% from last year. We see a significant rise in Chickpeas production, but quantity of the crop is insignificant and it does not affect the global supply.

According to the recent report by Statistics Canada, country is expected to produce around 29.06 lakh tonne Lentil during 2022, up by around 80% from last year same time. Agency's new estimate is far up from AAFC estimate which was of 24.60 lakh tonne. It means, global Lentil supply would increase by around 14 to 15 lakh tonne from previous estimate of 9-10 lakh tonne. It will keep in check the global prices for Lentil in coming months.

Australia can harvest 7.88 LMT in 2022-23 crop. It would be available for India in Dec. Apart from it, demand in domestic market is normal and farmers still have 20 % stocks. So, cash market may trade steady to slightly weak this week too. It may come down to Rs 6700-6800 by end Aug. Supply from the Black Sea Region is still uncertain due to Ukraine -Russia conflict.

Lentil Prices in Canada continued to soften as export volume declined in June as compare to May-2022. It exported 186376 MT in June, down by 25% to 248,547 MT in May-2022. Total export sales till June recorded at 14.85 LMT against 21.83 LMT last year till June-2021. Turkey brought 74000 MT while India purchased 39609 MT in June. UAE brought around 14500 MT.

Total export sales for the month reached 186,376 metric tons (MT), down 25% from the previous month's total of 248,547. So far movement has reached 1,485,608 MT, down from 2,183,398 during the last marketing year.

According to the recent report by Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES), Chickpea production in Australia is expected to decrease to 6.06 lakh tonne, down by around 4.6% in 2022-23 from 10.62 lakh tonne last Year. Reason for this decline in production is mainly attributed to fall in sowing area to only 4,43,000 hectare, down by 28% from 616,000 hectares.

Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) recent report reveals that Pea production in Australia is expected to decrease to 2.38 lakh tonne, down by around 0.23% in 2022-23 from 2.38 lakh tonne last Year. Fall in yield is the main cause behind lower output estimate. However, Pea sowing area has increased to 2.05 lakh hectare, up by 6.7% from 1.92 lakh hectare.

Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) recent report reveals that Australia is expected to witness slightly lower Lentil production to 7.88 lakh tonne, down by 0.51% in 2022-23 from 8.39 lakh tonne last year. Even though, sowing acreage has increased for Lentil here to 5.46 lakh hectare, up by % from 4.95 lakh hectare, but production is likely to remain slightly short due to fall in yield.

Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 20th April -2022 for Lentil, Chickpea and Field Pea. As per the latest forecast Lentil production may increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term. The crop condition is good so far.

The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 toone per ha in 2021-22. The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year. Yearly average price forecast to has been revised down to \$860 per MT in 2022-23 against \$1065 for 2021-22. Yield has been revised up to 1.51 tonne per ha for 2022-23 against 1.04 tonne in 2021-22.

Monthly Outlook: - Pulses market may trade steady to weak in September.

Supply & Demand:

Note: Preliminary APY estimates for Pulses Kharif for 2022-23 are under progress. It would be published by September-end.

AW estimates *

Marketing year (Urad & Moong: Aug to July, Tur: Dec to Nov. Chana & Masur: March to Feb

Kharif Pulses:

Urad: Agriwatch has estimated 23.20 lakh MT Urad production in 2021-22 including 16.60 lakh MT in Kharif season. Import volume would increase due to free import policy till March-2023. Higher import volume may ensure better supply side.

Moong: Moong production has been pegged at 26.53 lakh MT including rabi and summer. Kharif Moong production has been pegged at 15.60 lakh MT. Import increased to 1.95 lakh MT. Import remains restricted now. Prices may either stabilize at this level or decrease slightly.

Tur: AW Tur production estimate for the year 2021-22 is 37.11 LMT, slightly lower than(37.28LMT) last year. Higher import volume may cap uptrend in coming months. The Sowing for new season would start from 15th of June.

Rabi Pulses:

Chana: Agriwatch has pegged Chana production at 103.46lakh MT for crop year 2022-23 while Masur at 12.91 lakh MT. Supply side would increase to 125.93 LMT for Chana this year.

Masur: AW the final estimate for Masur pegged at 12.91 LMT for 2022-23, slightly higher than last year. Supply side would remain almost same as last year, so, prices may either remain stable or decrease slightly.

Preliminary Kharif area estimates have already been published and can be seen below:

Kharif Pulses Area Estimates (Preliminary):

| Kharif 2022 Preliminary Area Forecast (LHa.) | | | |

Chana (Chickpeas /Bengal Gram):**Market Recap:**

Chana cash markets too traded down during the month due to lower buying interest by stockists and millers amidst good Chana availability (over 25 LMT) in Central pool and selling by NAFED from Rabi 2020 & 2021 crop. Due to the planned disposal of huge volume of Chana market prices are not likely to improve as recent decision would easily meet up the emerging demand. Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops while the Chana

sowing is scheduled to start from mid-October. Availability is good, so spike in Chana market is unlikely in September.

Following graph illustrates Chana price movement in different markets:

| Chana Prices per Quintal | | | | | | % Ch. Over MSP |
|--|----------|----------|-----------|----------|------------|----------------------|
| Markets | Current | Week Ago | Month Ago | Year Ago | % Ch. Over | |
| | 05.09.22 | 29.08.22 | 05.08.22 | 05.09.21 | 29.08.22 | |
| Delhi Chana(Raj) | 4825 | 4880 | 4975 | 5525 | -1.13 | -7.74 |
| Bikaner Chana | 4600 | 4700 | 4800 | 5200 | -2.13 | -12.05 |
| Indore Chana | 4850 | 4900 | 5100 | 5550 | -1.02 | -7.27 |
| Tan.Chana | 4550 | 4500 | 4700 | NA | 1.11 | -13.00 |
| Price Projection For Bikaner During September-2022 (4700-5100) | | | | | | |

Expected Range of Chana In September-2022:4700-5100

Dynamics: Prices are likely to trade steady to slightly weak in September-2022 due to:

- Increased sale by NAFED
- Higher supplies from stocks

Seasonality Index: spike in Chana market is unlikely in September.

Field Pea (Matar/Dry Pea):

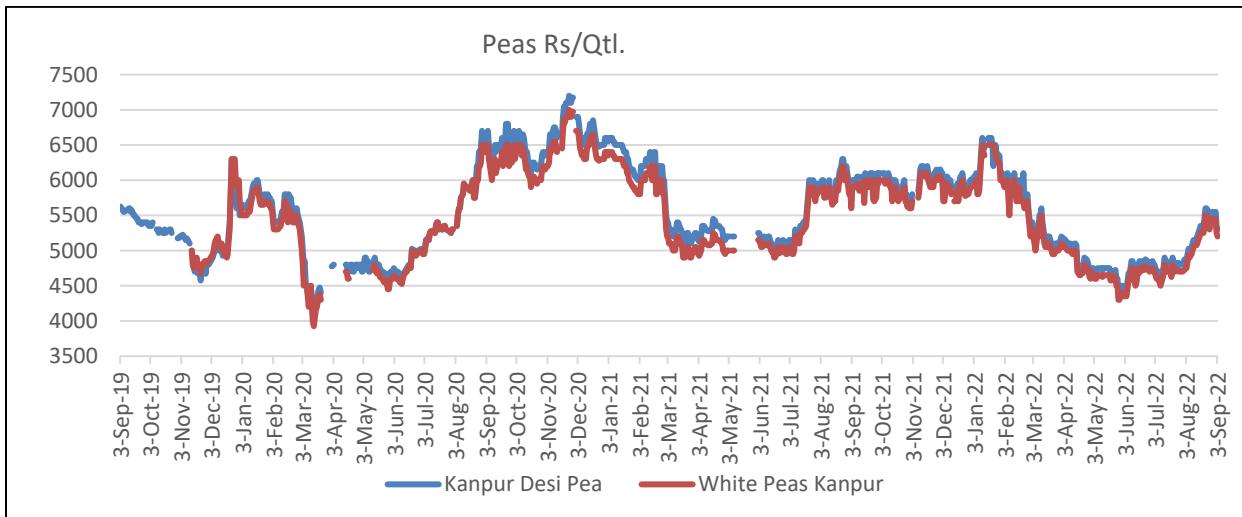

Fundamental Analysis and Outlook:

Cash Peas market traded up during the August on good demand by stockists and millers for coming festivals. However, trend is likely to remain slightly weak from current levels after considering

Govt.'s recent decision on Chana disposal at lower prices as it would distract the Peas demand toward Chana.

Following chart shows the price movement of peas.

| Yellow & White Peas % Price Fluctuation Over Previous Month | | | | | |
|--|----------|----------|-----------|----------|------------|
| Markets | Today | Week Ago | Month Ago | Year Ago | % Ch. Over |
| | 03.09.22 | 27.08.22 | 03.08.22 | 03.09.21 | 27.08.22 |
| Kanpur Desi Peas | 5300 | 5500 | 4850 | 6000 | -3.64 |
| Kanpur White Peas | 5200 | 5400 | 4750 | 5900 | -3.70 |
| Price Projection For Kanpur Desi During September-2022 (4900-5400) | | | | | |

Price Dynamics:

Pea market is expected to trade steady to slightly weak in September-2022 due to:

- Fall in Chana market
- Reduce seasonal demand

Overall tone: spike in Peas market too is unlikely in September.

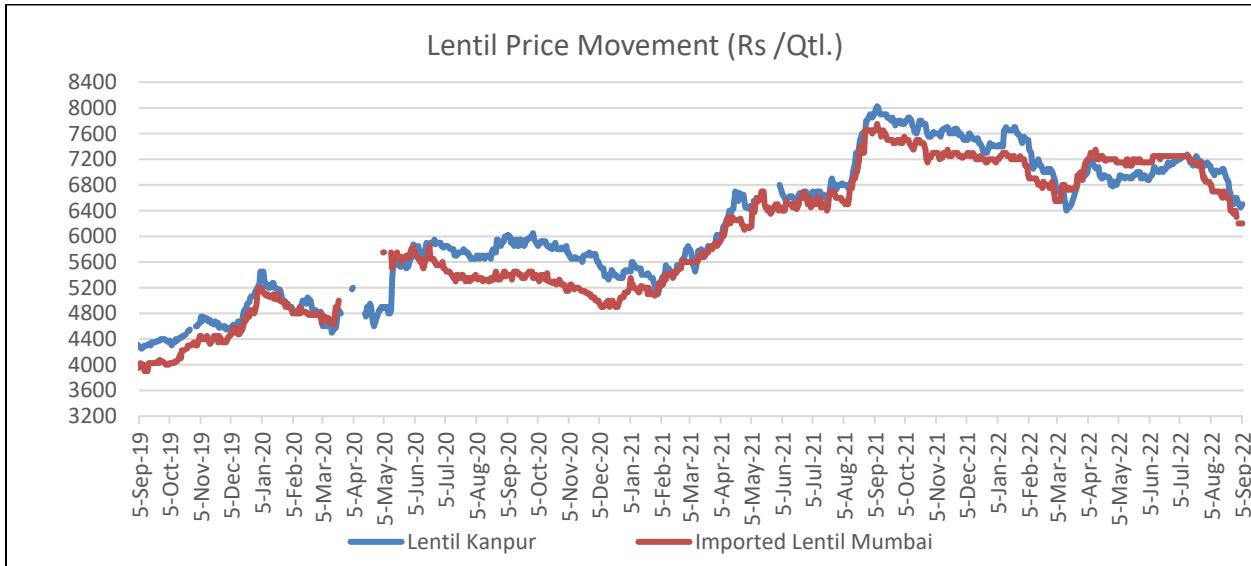

Masur (Lentils):

Lentil cash market traded down during the August as overseas quotes (FoB) in Canada also decreased to \$750 per MT. It may decline further by \$25-30 by mid-September ahead of bumper crop (29.4 LMT, Canada Statistics) in Canada this year. Good pace of harvesting in Canada amidst conducive weather is keeping global market sentiments under check. Around 12% harvesting has already done in Canada while crop size is now likely to be at record 29.4 lakh tonne this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during year 2022-23. Thus, global market surplus is likely to increase to 14-15 lakh tonne from 9 to 10 lakh tonne. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase

not only from Canada but also from Australia in coming months. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak as cheaper availability of Chana has potential to divert the actual demand from Indian market where the consumers are price sensitive.

Price Trend In Cash Market:

| Lentil Prices per Quintal | | | | | | %Ch. Over MSP |

| Price Projection For Kanpur During Sep-2022 (6400-7500) | | | | | | |

Expected Price Range in September-2022:6400-7500

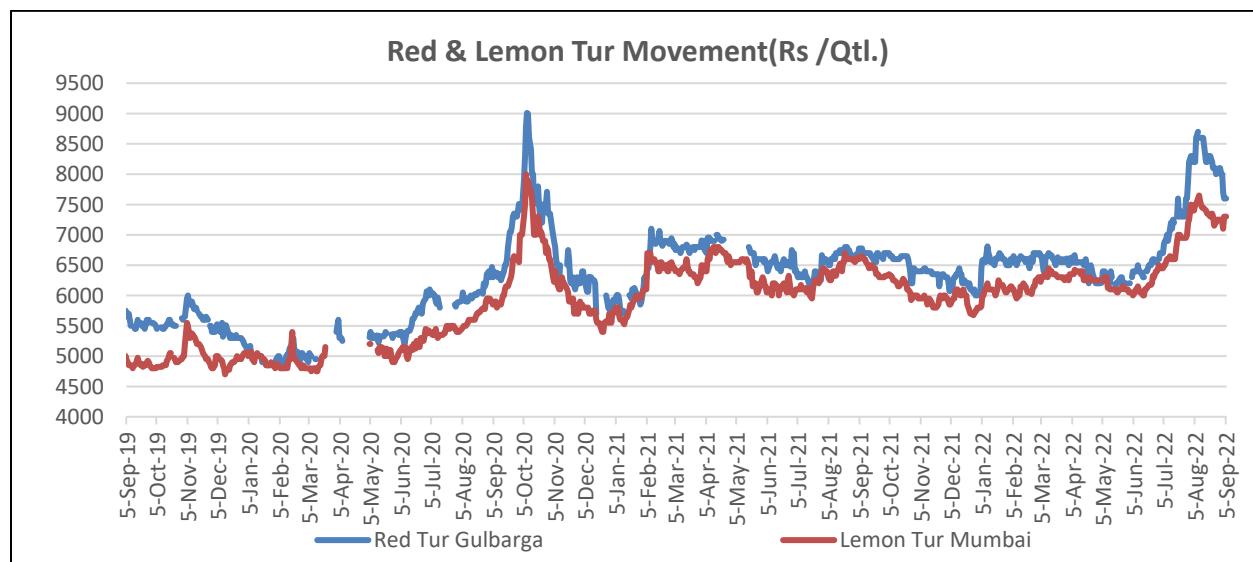

Weak tone may prevail in September due to:

- Decreasing quotes in global market just ahead of bumper crop in Canada
- Stockists' selling in local markets
- Weak demand in Monsoon season
- Good production prospects in Australia

Outlook for Aug-2022: Weak movement might be seen in September. Seasonality shows the same trend.

**Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):****Fundamental Analysis and Outlook:****Market Recap:**

Tur traded down during the month under review and it traded down by 3% at INR 8,000 per quintal in Gulbarga market while Tur Lemon traded down by 3% at INR 7,250 per quintal in Mumbai market. Reports of crop loss due to excess rains over major producing state namely Karnataka and IMD's prediction of more rains in September month kept supporting the sentiments but Stock Declaration Order and apprehension regarding some more stringent step to check Tur prices capped the upward momentum. Moreover, continuous fall in overseas quotes also weighed on the market prices as lemon Tur quotation decreased to \$920 per MT from \$975 per MT a month ago. Last date of August too witnessed an effective decision by Central Govt. when it decided to dispose off around 15 lakh tonne of Chana at discounted prices which may take toll on the whole pulses sentiments including Tur. Tur market is likely to trade steady to slightly weak due to Govt.'s decisions despite the prevailing firm sentiments. Import volume and price for African crop would be key to direct the price trend in coming weeks. This year crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather still remains unfavourable.

| Markets | Tur Prices per Quintal | | | | | |

Expected Price Range (Gulbarga) in September-2022:(8200-8800)

Price Dynamics:

Seasonality Index-depicts trade steady to slightly weak.

**Urad (Black Matpe/Black Gram):**

Steep fall seen in **Urad** prices during August due to new crop arrivals with higher moisture level. New arrivals fetched lower prices by INR 200 to 300 per quintal due to higher moisture content. Urad prices have decreased despite the fact that sowing coverage is down by around 4% to 36.63 lakh ha. and excess rains plus water logging in fields have negatively impacted the crop size which is likely to fall by 10 to 15%. IMD's prediction of more rains in September may take toll on Urad crop which are near to maturity harvesting stage and any incident of excess rains may cut off crop size further. Trend may remain steady to slightly weak due to Centre's recent decision of Chana selling at discounted rate amidst new crop arrivals which is likely to increase now onwards. Otherwise, market trend seems firm on the back of crop and area loss due to unfavourable weather conditions. Negative impact of devaluation of Myanmar currency Kyat from 1850 to 2100 against Dollar has now over as C&F quotes have already fallen by around \$90-100 till date to \$880 per MT for Faq and \$1010 per MT for Sq variety respectively. The volume of import needs to be monitored for September. In August, around 18,000 MT is expected. Figure is still awaited.

Seasonality Index depicts steady to slightly weak movement in September-2022

In September-2022, prices of Urad may trade weak due to:

Market Outlook for September-2022: Prices are likely to trade weak.

**Fundamental Analysis and Outlook For Moong:****Market Recap:**

Moong prices too remained slightly bearish during August amidst new Kharif Moong crops arrivals in Maharashtra, Rajasthan and MP after bumper summer crop. These arrivals are fetching lower prices by INR 200 to 300 per quintal due to higher moisture content. Volume of rains will remain in focus during September as in any incident of heavy rains Moong crop pods will have shattering effect resulting in fall in yield as well as crop size amidst the fact that coverage area too is running shorter by 4% to 32.97 lakh ha. besides quality deterioration. As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely in coming weeks. Moong production in Kharif season is expected to be in the range of 14 to 15 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Sep would be crucial for the Kharif crop size. The overall sentiments remain weak for the cash Moong markets till new crop arrivals get over.

Price Trend:

Expected Price range in September-2022(6700-7300) for FAQ

Market is expected to trade weak in September due to:

- Slower Pace of procurement
- Ample stocks accumulated in Central Pool
- Mills restricted buying
- Fear of bulk selling by NAFED at prevailing market price

Market Outlook for September-2022: weak tone is expected
