

Pulses Monthly Research Report: October-2022

Contents:

- **Pulses Sector-Highlights**
- Domestic & Global
- Supply & Demand
- Kharif Area Estimates 2022-23 (Preliminary)
- Kharif Progressive Sowing

Pulses-Wise Analysis

- Chana (Chick Pea)
- Matar (Dried Peas)
- Masoor (Lentils)
- Tur (Pigeon Pea)
- Urad (Black Matpe)
- Moong (Green Gram)

Appendix:

- Indian Pulses- Wise Import- Monthly Analysis
- Price Trend Chart with Ave Price Table
- Indicative Pulses & Processed Pulses Prices (Domestic; Imported; Cnf) & Arrivals
- India
- Australia
- Canada

Pulses Sector-Highlights:

According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, total kharif pulses production during 2022-23 is estimated at 83.70 lakh tonne. Under the Pulses, Tur production is estimated at 38.9 lakh tonne. Urad production is estimated to be at 18.4 lakh tonne, Moong at 17.5 lakh tonne.

According to the 1st Advance Estimates of production of Kharif Pulses for 2022-23 released by the Agriculture Department of Rajasthan, Kharif Moong production during 2022-23 is estimated to increase by 46% to 13,21,460 MT from 9,05,713 MT, Urad at 2,55,660 MT, up by 64% from 1,55,626 MT and Tur is estimated at 6,673 MT which is almost similar to previous year's production of 6,708 MT.

As per IMD's latest report, South-west monsoon has started to withdrawn from Indian Peninsular. Late withdrawal of monsoon this year couple with good and widespread rains over Central, Southern along with North and Northwest India, has provided good residual moisture for Rabi crops and it is likely that Rabi sowing/planting will start on time with good pace. However, recent rainy activities over major part of India including MP, Karnataka may affect the new crop arrivals and also affect the quality of the produce (moisture content will increase) which may have a bearing on the quality of the produce. Moreover, the likely rains would delay the Rabi crop sowing / planting due to presence of excess moisture in field.

A cyclonic circulation lied over West-central Bay of Bengal off Andhra Pradesh coast in lower & middle tropospheric levels which brought heavy rains in many parts of Karnataka during recent past where Tur crop was in crucial vegetative stage or entering into early reproductive phase. There are more chances for heavy rains in some parts of Karnataka and if, it happens so, Tur crop may be affected more. As per sources, around 10-15% Tur crop has affected due to excess of rains.

A vessel with 23,800 tonne Tur took birth at Mumbai port and around 1.50 lakh tonne Tur is expected to reach India in October. Tur imports from African countries are expected to increase in October and November month due to cheaper price. Lower quotes from South African countries are also putting pressure on Myanmar Tur prices. If, import volume at lower prices increases from Africa, it may put some pressure on prices in local markets and in turn, prices may slip from its current levels.

As per the latest report of Min. of Agriculture, all India Pulses area recorded at 133.68 lakh ha. as on 30th September, 2022, down by around 3.96% from 139.2 lakh hectare, Urad acreage reported at 38.27 lakh ha., down by nearly 3.27% from 39.57 lakh ha., Moong acreage at 33.44 lakh ha., down by 3.88% from 34.79 lakh ha. and Tur sowing at 46.15 lakh ha. area, down by 4.44% from 48.29 lakh ha.

Tur traded mostly up except Latur where prices decreased by 1.33% on lower demand for processing purpose. It traded up at INR 7,900 per quintal, up by 2.60% from INR 7,700 per quintal in Gulbarga and at INR 7,300 per quintal, up by 5.80% from INR 6,900 per quintal during the month despite the fact that demand from processed Tur Dall from millers/processors is poor. At present, traders remained reluctant to take any fresh deals and they tried to sell/dispose their high-priced old stocks before entering into fresh deals as their capital is chocked which is affecting their buying / demand. Moreover, as per IMD, there are chances of more rains during October over the southern states besides forming of low-pressure area over Bay-of-Bengal which may also likely to have impact on southern part of the country. Tur crop is already in stress due to recent and earlier heavy / excess rains, further rains would again have a negative impact on crop which is moving towards reproductive phase.

Quotation for Burmese Tur increased to \$925 per MT from \$910 per MT previous month basis at Indian ports. If, import volume at lower prices increases from Africa, it may put some pressure on prices in local markets and in turn, prices may slip from its current levels. Africa is the only source for importing Tur right now (Domestic and Myanmar crop likely from January 2023) where production is likely between 6 to 7 lakh tonne. Meanwhile, as per preliminary AgriWatch estimate, Tur production for Kharif 2022-23 is likely to be around 32-33 Lakh MT (LMT) this year, down by around 12% from 37.11 LMT last year.

Urad traded mixed during the month under review on increased arrivals of inferior quality. It traded down by 1% at INR 6,950 per quintal in Chennai while it traded up by 0.69% at INR 7,350 per quintal in Delhi. Market prices are likely to remain slightly weak due to arrivals of inferior quality of new crop which is fetching at lower prices and in turn weighing on the sentiments. However, good demand for superior quality is being observed currently from Dall mills of Andhra Pradesh, Maharashtra and Tamil Nadu which is restricting any major decline in prices as of now. Meanwhile, Urad imports during 1st Sept to 21st Sept at Chennai reportedly pegged at 30,850 MT. Urad Demand is expected to improve once the new crop quality improves which may remain supportive for prices. Stocks at major ports like – Mumbai and Chennai are also reportedly very lower or negligible. Myanmar quotes decreased to \$850 per MT from \$880 per MT for Faq at basis Indian ports. The volume of import needs to be monitored for October. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23, kharif Urad production is estimated to be at 18.4 lakh tonne, down by 5%, from 19.4 in 2021-22. AgriWatch expects Urad production during 2022-23 season would at 21.12 lakh tonnes lower from 22.91 lakh tonnes.

Moong cash market traded up during the month under review. It traded at INR 6,950 per quintal, up by 2.96% from 6,750 per quintal in Jaipur and at INR 7,600 per quintal, up by 1.33% from 7,500 per quintal in Jalgaon due to lower arrivals of new crop. Despite start of new season and end of harvesting in almost all the key growing states, Moong arrival pressure remained lower because farmers are holding back their produce as they wanted to sell their produce at MSP (Rs 7755/Qtl.) to Govt. The procurement of Moong likely to start from early October in key states. Prices are expected to improve once the procurement starts thereafter, comfortable supply would keep prices in check. Plenty of stock in Central Pool and continuous supply from summer crop would keep easy availability and thus prices are not likely to witness any major firmness in Moong. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23, Moong production during 2022-23 is estimated at 17.5 lakh tonne, up by 18% from 14.8 lakh tonne in 2021-22 while AgriWatch production estimate is of 14 lakh tonne.

Chana cash markets traded down during the month under review due to continuous selling by NAFED at lower levels in heavy volume for keeping the prices under check and lower demand from Dall mills. Traders remained aloof from taking part for any new deals as they were fearing of NAFED intervention in the market through selling at lower prices. So, any big jump in prices unlikely in October too amidst ample availability in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop. However, some improvement in prices may be seen in October due to increase in seed demand for sowing purpose. There are apprehensions in the market that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops like Wheat, Mustardseed and Spices while the Chana sowing is scheduled to start from mid-October. Availability is good, so spike in prices of Chana is unlikely at this point of time. However, market may move up by INR 100-200 per quintal in coming week on likely demand for seed.

Peas physical market prices too traded down due to lower demand from millers and regular selling of Chana by NAFED at lower prices. Desi Peas and White Peas prices traded down at INR 5,200 per quintal, down by

1.64% from INR 5,300 per quintal and at INR 5,100 per quintal, down by 1.67% from INR 5,200 per quintal in Kanpur. Market prices are likely to trade in a range.

Lentil cash market traded mixed during the month under review on reports of Lentil import in higher volume and poor participation by Dall mills. It traded at INR 6,500 per quintal, up by 0.78% from INR 6,450 per quintal in Kanpur and at INR 6,050 per quintal, down by 2.42% from INR 6,200 per quintal in Mumbai. Dall mills had reportedly stopped the new purchasing as they wanted to sell off their previous stocks of higher prices before taking any new position. Also, they were running short off money because demand for Dall was lower during previous month.

Now market situation has changed as Canadian Lentil traders are not ready to quotes below the range of \$850-860 per MT. Apart from it, demand in domestic market is likely to improve now may lend some support to cash Masur markets in the near term. Disparity at the current price too would remain supportive to cash market. Masur may move up by Rs100-200 from the current level. India has imported around 1,16,000 tonne Lentil (estimated) during August. Meanwhile, Canada is expected to produce a bumper Lentil crop of 29.4 LMT, as per Canada Statistics, this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during the year 2022-23. Thus, global market surplus is likely to improve. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Under the given situation, farmers in India too may release their stocks (around 10 to 15% stocks) before Rabi sowing, expected from mid-Oct.

International News:

According to the latest report by U.S. Department of Agriculture (USDA), the country is expected to produce around 5.03 LMT Dry Peas (of all classes), up by 29% from 3.90 LMT last year. Around 9.14 lakh acres area was estimated to be sown under it which is down by 10% from earlier forecast and around 6% from 2021 forecast. In Montana and North Dakota, harvest has been reportedly completed.

According to the latest report by U.S. Department of Agriculture (USDA), the country is expected to produce 2.20 LMT Chickpea (Chana) this year, up by 37% from last year. Around 3.59 lakh acres area has been covered under it which is up by 3% from earlier forecast. However, small Chickpea cover area is expected at 0.80 lakh acres.

According to the latest report by U.S. Department of Agriculture (USDA), US is expected to harvest around 1.2 LMT of Lentils this year which is up by 46% from around 0.82 LMT last year. Increase in sowing coverage and yield both remains main reasons behind the projected higher output. However, sowing coverage has increased by 3% to 6,70,000 acres but it is still lower by 5% from last year's coverage area. Simultaneously, yield also pegged at 766 pound, up by 160 pound from last year.

New data released by Statistics Canada recently reveals that Chickpea production in Canada is expected to be around 1.33 lakh tonne, up by 75% from 76,000 tonne same time last year.

As per the recent report by Statistics Canada, Dry Pea production in the country is expected to swell well by around 60% to 36.1 lakh tonne during Marketing Year 2022-23 from 22.57 lakh tonne same time last year. Agency's previous estimate was of 34 to 34.5 lakh tonne. Two major producing states like-Saskatchewan and Alberta are expected to produce 18.10 lakh tonne and 15.40 lakh tonne Dry Pea respectively.

Monthly Outlook: - Pulses market may trade steady to weak in October except Urad.

Supply & Demand:

Note: Preliminary APY estimates for Pulses Kharif for 2022-23 are under progress. It would be published by September-end.

AW estimates *

Marketing year (Urad & Moong: Aug to July, Tur: Dec to Nov. Chana & Masur: March to Feb

Kharif Pulses:

Urad: Agriwatch has estimated 21.12 lakh MT Urad production in 2022-23 including 12.87 lakh MT in Kharif season. Import volume would increase due to free import policy till March-2023. Higher import volume may ensure better supply side.

Moong: Moong production has been pegged at 26.30 lakh MT including rabi and summer. Kharif Moong production has been pegged at 13.99 lakh MT. Import increased to 1.95 lakh MT. Import remains restricted now.

Tur: AW Tur production estimate for the year 2022-23 is 33.55 LMT, slightly lower than (37.11 LMT) last year. Higher import volume may cap uptrend in coming months.

Rabi Pulses:

Chana: Agriwatch has pegged Chana production at 103.46 lakh MT for crop year 2022-23 while Masur at 12.91 lakh MT. Supply side would increase to 125.93 LMT for Chana this year.

Masur: AW the final estimate for Masur pegged at 12.91 LMT for 2022-23, slightly higher than last year. Supply side would remain almost same as last year.

Preliminary Kharif area estimates have already been published and can be seen below:

Chana (Chickpeas /Bengal Gram):**Market Recap:**

Chana cash markets traded down during the month under review due to continuous selling by NAFED at lower levels in heavy volume for keeping the prices under check and lower demand from Dall mills. Traders remained aloof from taking part for any new deals as they were fearing of NAFED intervention in the market through selling at lower prices. So, any big jump in prices unlikely in October too amidst ample availability in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop. However, some improvement in prices may be seen in October due to increase in seed demand for sowing purpose. There are apprehensions in the market that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops like Wheat, Mustardseed and Spices while the Chana sowing is scheduled to start from mid-October. Availability is good, so spike in prices of Chana is unlikely at this point of time. However, market may move up by INR 100-200 per quintal in coming week on likely demand for seed.

Following graph illustrates Chana price movement in different markets:

Chana Prices (Rs./Quintal)						
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over	% Ch. Over
	30/09/2022	23/09/2022	30/08/2022	30/09/2021	30/08/2022	MSP
Delhi Chana(Raj)	4850	4850	4925	5350	-1.40	-7.27
Bikaner Chana	4650	4600	4700	5100	-0.98	-11.09
Indore Chana	4750	4800	4850	5300	-1.89	-9.18
Tan.Chana	4400	4400	4500	4950	-2.02	-15.87
Price Projection For Bikaner During October-2022 (4500-5100)						

Expected Range of Chana In September-2022:4700-5100

Dynamics: Prices are likely to trade steady to slightly weak in September-2022 due to:

- Increased sale by NAFED
- Higher supplies from stocks

Seasonality Index: spike in Chana market is unlikely in September.

Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

Peas physical market prices too traded down due to lower demand from millers and regular selling of Chana by NAFED at lower prices. Desi Peas and White Peas prices traded down at INR 5,200 per quintal, down by 1.64% from INR 5,300 per quintal and at INR 5,100 per quintal, down by 1.67% from INR 5,200 per quintal in Kanpur. Market prices are likely to trade in a range.

Following chart shows the price movement of peas.

Peas Prices (Rs./Quintal)					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	30/09/2022	23/09/2022	30/08/2022	30/09/2021	30/08/2022
Kanpur Desi Peas	5150	5400	5500	6100	-5.74
Kanpur White Peas (Canadian)	5050	5300	5400	6000	-5.83
Price Projection For Kanpur Desi During October-2022 (4900-5400)					

Price Dynamics:

Pea market is expected to trade steady to slightly weak in September-2022 due to:

- Fall in Chana market
- Reduce seasonal demand

Overall tone: spike in Peas market too is unlikely in September.

Masur (Lentils):

Lentil cash market traded mixed during the month under review on reports of Lentil import in higher volume and poor participation by Dall mills. It traded at INR 6,500 per quintal, up by 0.78% from INR 6,450 per quintal in Kanpur and at INR 6,050 per quintal, down by 2.42% from INR 6,200 per quintal in Mumbai. Dall mills had reportedly stopped the new purchasing as they wanted to sell off their previous stocks of higher prices before taking any new position. Also, they were running short off money because demand for Dall was lower during previous month.

Now market situation has changed as Canadian Lentil traders are not ready to quotes below the range of \$850-860 per MT. Apart from it, demand in domestic market is likely to improve now may lend some support to cash Masur markets in the near term. Disparity at the current price too would remain supportive to cash market. Masur may move up by Rs100-200 from the current level. India has imported around 1,16,000 tonne Lentil (estimated) during August. Meanwhile, Canada is expected to produce a bumper Lentil crop of 29.4 LMT, as per Canada Statistics, this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during the year 2022-23. Thus, global market surplus is likely to improve. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Under the given situation, farmers in India too may release their stocks (around 10 to 15% stocks) before Rabi sowing, expected from mid-Oct.

Price Trend In Cash Market:

Lentil Prices (Rs./Quintal)						
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over	% Ch. Over MSP
	30/09/2022	23/09/2022	30/08/2022	30/09/2021	30/08/2022	
Kanpur	6550	6500	6600	7750	-0.76	19.09
Mumbai (Canadian)	6050	6100	6300	7450	-3.97	10.00
Raipur	6000	6100	6200	7400	-3.23	9.09
Ashok Nagar	6100	5900	6200	6900	-1.61	10.91
Price Projection For Kanpur During October-2022 (6300-7500)						

Expected Price Range in September-2022:6400-7500

Weak tone may prevail in September due to:

- Decreasing quotes in global market just ahead of bumper crop in Canada
- Stockists' selling in local markets
- Weak demand in Monsoon season
- Good production prospects in Australia

Outlook for Aug-2022: Weak movement might be seen in September. Seasonality shows the same trend.

Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):

Fundamental Analysis and Outlook:

Market Recap:

Tur traded mostly up except Latur where prices decreased by 1.33% on lower demand for processing purpose. It traded up at INR 7,900 per quintal, up by 2.60% from INR 7,700 per quintal in Gulbarga and at INR 7,300 per quintal, up by 5.80% from INR 6,900 per quintal during the month despite the fact that demand from processed Tur Dall from millers/processors is poor. At present, traders remained reluctant to take any fresh deals and they tried to sell/dispose their high-priced old stocks before entering into fresh deals as their capital is chocked which is affecting their buying / demand. Moreover, as per IMD, there are chances of more rains during October over the southern states besides forming of low-pressure area over Bay-of-Bengal which may also likely to have impact on southern part of the country. Tur crop is already in stress due to recent and earlier heavy / excess rains, further rains would again have a negative impact on crop which is moving towards reproductive phase.

Quotation for Burmese Tur increased to \$925 per MT from \$910 per MT previous month basis at Indian ports. If, import volume at lower prices increases from Africa, it may put some pressure on prices in local markets and in turn, prices may slip from its current levels. Africa is the only source for importing Tur right now (Domestic and Myanmar crop likely from January 2023) where production is likely between 6 to 7 lakh tonne. Meanwhile, as per preliminary AgriWatch estimate, Tur production for Kharif 2022-23 is likely to be around 32-33 Lakh MT (LMT) this year, down by around 12% from 37.11 LMT last year.

Price Projection For Gulbarga During October 2022 (7600-8300)						

Expected Price Range (Gulbarga) in September-2022:(8200-8800)

Price Dynamics:

Seasonality Index-depicts trade steady to slightly weak.

Urad (Black Matpe/Black Gram):

Urad traded mixed during the month under review on increased arrivals of inferior quality. It traded down by 1% at INR 6,950 per quintal in Chennai while it traded up by 0.69% at INR 7,350 per quintal in Delhi. Market prices are likely to remain slightly weak due to arrivals of inferior quality of new crop which is fetching at lower prices and in turn weighing on the sentiments. However, good demand for superior quality is being observed currently from Dall mills of Andhra Pradesh, Maharashtra and Tamil Nadu which is restricting any major decline in prices as of now. Meanwhile, Urad imports during 1st Sept to 21st Sept at Chennai reportedly pegged at 30,850 MT. Urad Demand is expected to improve once the new crop quality improves which may remain supportive for prices. Stocks at major ports like – Mumbai and Chennai are also reportedly very lower or negligible. Myanmar quotes decreased to \$850 per MT from \$880 per MT for Faq at basis Indian ports. The volume of import needs to be monitored for October. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23, kharif Urad production is estimated to be at 18.4 lakh tonne, down by 5%, from 19.4 in 2021-22. AgriWatch expects Urad production during 2022-23 season would at 21.12 lakh tonnes lower from 22.91 lakh tonnes.

Seasonality Index depicts steady to slightly weak movement in September-2022

In September-2022, prices of Urad may trade weak due to:
Market Outlook for September-2022: Prices are likely to trade weak.

Fundamental Analysis and Outlook For Moong:

Market Recap:

Moong cash market traded up during the month under review. It traded at INR 6,950 per quintal, up by 2.96% from 6,750 per quintal in Jaipur and at INR 7,600 per quintal, up by 1.33% from 7,500 per quintal in Jalgaon due to lower arrivals of new crop. Despite start of new season and end of harvesting in almost all the key growing states, Moong arrival pressure remained lower because farmers are holding back their produce as they wanted to sell their produce at MSP (Rs 7755/Qtl.) to Govt. The procurement of Moong likely to start from early October in key states. Prices are expected to improve once the procurement starts thereafter, comfortable supply would keep prices in check. Plenty of stock in Central Pool and continuous supply from summer crop would keep easy availability and thus prices are not likely to witness any major firmness in Moong. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23, Moong production during 2022-23 is estimated at 17.5 lakh tonne, up by 18% from 14.8 lakh tonne in 2021-22 while AgriWatch production estimate is of 14 lakh tonne.

Price Trend:

Price Projection For Jaipur During October 2022 (6700-7300)						

Expected Price range in September-2022(6700-7300) for FAQ

Market is expected to trade weak in September due to:

- Slower Pace of procurement
- Ample stocks accumulated in Central Pool
- Mills restricted buying
- Fear of bulk selling by NAFED at prevailing market price

Market Outlook for September-2022: weak tone is expected
