Pulses Sector-Highlights:

After August & September, October month too observed rainfall in major parts of main Pulses producing states like Maharashtra, UP, Rajasthan, Madhya Pradesh and Karnataka. Continuous rainfall during first half of the October after heavy and continuous rainfall in August and September, again affected the crop size and quality of Urad on a large scale to the tune of the 20-25% which was already under stress due to same reason.

Karnataka too witnessed heavy rainfall almost whole the month that affected the Tur crop size. Tur crop in Karnataka is expected to reduce by 10% this year. The crop is mainly in vegetative to flowering stage in the state. New crop arrival likely to start from mid-December.

New Urad crop arrivals remained lower side due to decrease in crop size and arrivals pressure in major markets of MP remained lower by 30% from its normal size. Moreover, markets received 40-50% inferior quality of Urad that kept restricted a significant hike in prices despite the poor and deteriorate Urad arrivals.

Nod for procurement of Kharif Moong at MSP of INR 7,755 per quintal under the PSS in Karnataka, Tamil Nadu, UP, Telangana, Chhattisgarh and Haryana provided the support to the market despite the fact that Moong stocks in Central Pool and private stocks are more than sufficient.

During the month, most of the markets remained closed due to the series of auspicious festivals namely Navratri, Dashera and Diwali. However, good festival demand for all the Pulses including Tur, Urad, Chana, Moong and Masur provided the good support to the cash markets.

Meanwhile, Cabinet Committee on Economic Affairs approved the hike in Minimum Support Price (MSP) for Rabi crops for Marketing Season 2023-24. MSP for Lentil increased by INR 500 to INR 6,000 per quintal from Rs 5,500 per quintal and for Chana, MSP hiked by INR 105 to INR 5,335 per quintal from INR 5,230 per quintal.

Despite the increase in MSP for Chana, prevailing lower chana prices throughout the year would force farmers to switch to other lucrative crops this Rabi. It is very likely that during the current Rabi season, Chana area may be diverted to Lentil, Wheat and Mustard majorly with slight diversion towards Spices (Coriander and Cumin).

Department of Consumers' Affairs, Govt. of India fixed the base price for purchase of imported Tur at INR 79.53 per kg for Myanmar origin Tur Whole and INR 59.80 per kg for African Origin.

According to the recent release by Department of Agriculture & Farmers Welfare, farmers have covered 29.055 lakh ha area under Rabi pulses as on 4th November, 2022, up by 7.10% from 27.13 lakh ha. same time last year. Under the pulses, Chana has been sown in 22.083 lakh ha, up by 11.13% from 19.872 lakh ha, Lentil in 2.036 lakh ha, down by 11.56% from 2.302 lakh ha, Peas in 1.976 lakh ha, up by 0.87% from 1.959, Urad in 0.924 lakh ha, up by 6.33% from 0.869 lakh ha, Moong in 0.069 lakh ha, down by 25.81% from 0.093, same time last year. Masur area is likely to increase by 7 to 10% this year as Masur prices remained up from its MSP throughout the season while that of Chana is likely to reduce by 10-12% owing to lower realization for farmers throughout the year.

Tur prices traded firm during the month under review on active buying support by stockists and millers due to good festival demand and expectation of lower Tur production. However, Indore mandi was exception where it traded down by 4% to INR 7,200 per quintal while Tur prices traded up by 6.41% to INR 8,300 for quality produce in Gulbarga and up by 4% to INR 7,700 per quintal in Latur. Given the background, projected lower Tur production, fixation of higher prices for imported Tur, higher import parity due to

depreciating of Indian Rs. may keep supporting the sentiments in coming week too besides lack of clarity of shipments from Mozambique. Prices likely to move up by INR 200-300 per quintal in coming future. International quotes for Lemon Tur remain bearish at \$920 per MT basis at Indian port from \$945 start of October for Burmese origin. While African quotes ranges from \$690- \$915 per MT as per quality and origin. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, Tur production is estimated at 38.9 lakh tonnes, down by 10% compared to 43.4 lakh tonnes in 2021-22. AgriWatch's 2nd forecast for the season is at 32.10 LMT.

Urad prices traded slightly down during the month due to arrivals of inferior quality despite the fact that excess and heavy rainfall during August to October have already take a toll on the crop as well as quality aspect. FAQ Urad traded at INR 7,075 per quintal, down by 1% from INR 7,100 per quintal in Mumbai while it traded at INR 6,975 per quintal, down by 0.36% in Chennai. Market prices may move up by INR 200-300 per quintal from current levels with the end of the main crop arrival season by November end. Sentiments likely to remain firm. Myanmar C&F quotes decreased to \$860 for FAQ from \$830 per MT and SQ variety quoted at \$1000 per MT from \$960 per MT, basis Indian ports. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, total kharif Urad production is estimated at 18.4 lakh tonnes, down by 5%, from 19.4 in 2021-22. AgriWatch expects Kharif Urad production during 2022-23 season would at 12.87 LMT.

Moong cash market traded firm during the month due to ongoing procurement in various states coupled with scheduled procurement in Rajasthan from November amidst good festival demand. It traded at INR 7,600 per quintal, up by 7%, from 7,200 per quintal in Jaipur and at INR 7,900 per quintal, up by 1.28%, in bench mark market Jalgaon and at INR 7,100 per quintal, up by 1.43% in Indore. Till now, farmers were holding back their stocks in hope of better prices. However, sufficient quantity in Central Pool couple with continuous supply from summer crop and now from Kharif crop would keep easy availability in coming days. Moong buying at MSP in various states is not letting the prices to go down and prices are likely to trade range bound with slightly firm bias till the buying on MSP continues. After that market prices may fall slightly from current levels. According to the 1st Advance Estimates of production of major Kharif crops for 2022-23 released by the Ministry of Agriculture and Farmers Welfare, Moong production during 2022-23 is estimated at 17.5 lakh tonnes, up by 18% from 14.8 lakh tonnes in 2021-22. AgriWatch expects Kharif Moong production during 2022-23 season would at 13.99 LMT.

Chana cash markets traded firm during the month under review due to good stockists and miller demand in the wake of a long series of festival season demand despite the continuous selling of Chana at lower prices by NAFED. Chana cash market traded at INR 4,870 per quintal, up by 0.41% from INR 4,875 per quintal and at INR 4,850 per quintal, up by 2.11% from INR 4,850 per quintal. Now, market prices are likely to trade in a range amidst NAFED's selling pressure and over of festive season demand. At present, demand for sowing may only the factor that may support the prices. Otherwise, fundamentals are weak on plenty of stocks at cheaper rates. Meanwhile, Rabi Chana sowing has started, however, as per sources, it is expected to remain less by 10 to 15% this year as farmers may divert Chana area to other lucrative crops like Wheat, Mustard seed, Masur and Spices due to lower realization to farmers in Chana throughout the season. AgriWatch has pegged Chana production at 103.46 lakh MT for crop year 2022-23. Supply side would increase to 125.93 LMT for Chana this year.

Lentil cash market too traded firm during the month under review due to festive season demand. Lentil traded at INR 6,900 per quintal, up by 5.34% from INR 6,900 per quintal in Kanpur and at INR 6,500 per quintal, up by 8% in Raipur, and traded at INR 6,300 per quintal, up by 3.28% in Ashoknagar. Market prices are likely to remain steady now with the end of the festive season extra demand. Lentil sowing coverage is expected to increase by 5 to 7% this year as it has been remained fruitful for farmers throughout the season. India has imported around 43,872 tonnes Lentil (tentative figure) during September. Expected good crop in

Canada (around 29.4 LMT) and Australia (around 9.24 LMT) this year signaling for easy global supply. This would keep in check in any significant upside movement of Lentil. However, Lentil crop in Australia is expected to reduce by 20-30% due to recent flooding in major producing areas owing to heavy rainfall. AW the final estimate for Masur pegged at 12.91 LMT for 2022-23, slightly higher than last year. Supply side would remain almost same as last year, so, prices may either remain stable or decrease slightly.

Global Market Updates:

Lentil production in Australia is expected to hit by around 20-25% due to heavy rainfall in main producing areas of Victoria and New South Wales. Earlier official estimate was of record 9,24,000 tonnes which is expected to fall.

Australia Bureau of Statistics' recent data suggests that Australia exported 64,405 MT Lentil during the August, down by 38% from 103,205 in July.
