Global Market Updates:

As per Statistics Canada's latest report, dry peas production is increased by 52% to 34.23 LMT for 2022-23 compared to previous crop year. This is mainly due to higher yields as harvested area was low. Yields are almost 68% higher than last year's due to normal weather conditions. Yellow and Green Peas contributes 28.5 and 4.6 LMT respectively. Exports are forecasted to increase to 25 LMT.

Agriculture and Agri-Food Canada has lowered down Lentils production estimate by 17% from November estimates but still higher than last year's production. Out of total production, Red Lentils is about 17.7 LMT, Green Lentils 3 LMT and other remaining Lentils are 2.3 LMT. Total exportable quantity is around 23 LMT, which is exported mainly to India and Turkey.

According to the Agriculture and Agri-Food Canada's (AAFC) November Outlook for the 2022-2023 crop year, Chickpeas (both Kabuli and Desi) production in the country is expected to increase by 68% to 1.28 lakh tonne due to increase in seeding area couple with higher yield. November estimate is lower from October month's prediction of 1.57 lakh tonne. Chickpeas total supply is estimated to fall by 16% due to lower carry in stocks. Chickpeas export from Canada is likely around 1.95 lakh tonnes.

Chana (Chickpeas / Bengal Gram):
Market Recap:

Chana average prices improved during last month due to NAFED's selling at higher rates and less availability of good quality Chana. According to the sources, Chana (desi type) sowing in the ongoing Rabi has reduced in the key growing states like M.P., Rajasthan and U.P. However, Kabuli chana area has gone up in M.P. and in Maharashtra. Overall, the crop condition is reportedly good. Crop is in maturity to harvesting stage in southern India (Maharashtra, Karnataka & A.P.) while it is in vegetative to early reproductive phase in other key growing regions. Also, in southern states chana arrivals have started however, the quantity is less. Arrivals likely to increase by 1st week of January. Meanwhile, two vessels of Australian Chana will anchor at Karachi port in January. One vessel at 4-5 January and another during 15-20 January. Further, SEBI has extended the suspension of all chana contract for another year i.e. from December 20th, 2022 to December 20th, 2023. Weather conditions were not so favorable for growth of Chana crop during last month in Maharashtra. Insect, pest and disease infestations has been observed due to cloudy weather, unseasonal rains, higher day temperatures. This may affect yield of Chana. Pod borer infestation at flowering stage in Parbhani and Hingoli districts may affect crop yield badly. Mildew disease has also seen in some pockets like Akot. As per data from Ministry of Agriculture, Chana sowing is 5.31% higher than last year's as of 30th December 2022. Chana has been sown on 105.61 lakh ha as compared to last year's 105.18 lakh ha.

Following graph illustrates Chana price movement in different markets:

Field Pea (Matar / Dry Pea):

Fundamental Analysis and Outlook:

Peas physical market prices traded steady due to sluggish buying interest by stockists and miller during last month. Market prices are likely to trade steady as stocks stored out by stockists are being released at regular intervals ahead of new crop, hardly one and a half month away now. Apart from it, availability of vegetables at comparatively lower rates may keep the price movement under check. However, Chana trend has the capability to provide some support to the Peas cash market. Desi Peas and White Peas prices traded steady at Rs. 4,850 per quintal and Rs.4,750 per quintal respectively. As per data from Ministry of Agriculture, farmers have covered 9.15 lakh ha area under Peas till 30th December 2022 as compared to last year's 9.79 lakh ha, which is 6.57% lower.

Following chart shows the price movement of peas -

- Ample availability of green vegetables
- Continuous release by stockists and
Low prevailing prices of Chana/ Chana dal in the lean season

Overall tone : Sudden spike in Peas market unlikely in January.

Under India-Australia Economic Cooperation and Trade Agreement (Ind-Aus ECTA), duty on imported Lentils will be applied only 50% of the applied rate of duty. Tariff Rate Quota quantity for calendar year 2022 was 1,233 MT and for 2023 is 1,50,000 MT. The emergence and growth of Masur crop in Lalitpur and Jhansi line is reportedly good so far. Area coverage is likely to be 10 to 12% higher this year. Farmers have covered 8% higher area to 17.94 lakh ha. It is higher by 19% to 6.86 lakh ha in M.P. The sowing has entered into the last phase now and the season may end up with 18 to 18.25 lakh ha. In MP sowing is more than last year and crop condition is good so far. Weather needs to be cold in coming days for better yield. Under the normal condition AgriWatch expects bumper production this year given the normal weather condition. Under the emerging scenario spike in the market is unlikely as the inflow continues, supported by good area coverage and crop conditions.

Market Recap:

Moong prices have decreased during last month as compared to November. Prices at Jaipur decreased by 1.28% at INR 7,278 per quintal as compared to month ago at INR 7,372 per quintal. Also at Indore, Moong Chamki prices traded at 7,073 per quintal, down by 3.55%. However, ongoing procurement drive in various states would remain supportive for Moong prices and may restrict any major decline in prices. After procurement gets over, prices may see some downfall due to comfortable availability in both Central Pool and in domestic market. As per data available from Ministry of Agriculture, as of 30th December, 2022, farmers have covered 2.922 lakh ha, up by 27% from 2.299 lakh ha same time last year under Moong.
