Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Summary

Domestic

- Pulses prices noticed sideways to steady tone on festive demand.
- Market Participants revealed that:-
 - ✓ At Indore, masoor and urad surge on lower arrivals
 - ✓ At Gotegaon(M.P.) cash market, reported positive tone in chana desi price on enhanced demand.
 - ✓ At Harpalpur (M.P.) local market, recorded lower arrivals due to heavy rainfall.
 - ✓ At Kanpur, pulses are getting support due to festive demand and prices are likely to dwindle thereafter.
- National Agricultural Cooperative Marketing Federation (NAFED) is likely to trim its procurement due to poor financial health. The agency purchased urad, groundnut and sunflower seed during this kharif season under price support scheme. The Cooperative is facing a debt of around Rs 2,000 crore debt to banks and has negative net worth of Rs.147 crore, due to which it has decided to cut salaries of employees by 10 per cent and also offer voluntary retirement to bring down the running cost.
- Commencement of new chana crop reported at Maharashtra's Latur and some markets of Karnataka (Bidar, Sedam, Gadag, Raichur and Gulbarga). Higher carry forward stocks and prospects of good rabi crop output despite the concerns in yield due to cold wave and winter rain in Madhya Pradesh, Rajasthan and Uttar Pradesh. However, farm source revealed that cold effect is generally reported in this time frame of the rabi crop and if the current situation prolonged for next three to four weeks than may affect the grain size of standing crop and other quality related issues. The area sown under chana is surged to 95.3 lakh Ha. against 90.3 lakh ha. in last year.
- In Chana, buying ahead of the Makar Sankranti this month has been comparatively weak unlike the previous year and earlier expected, leading to fall in prices over the last few days.
- In Rajasthan and Madhya Pradesh, recent 'mawtha' (winter rain) appears to have bolstered the prospect of the standing rabi pulses crop. It also nullify the cold wave condition in Rajasthan during the last week
- For the past two weeks, tur, moong and masoor had been witnessing an uptrend on strong festive demand, new crop buying interest and buying support from the millers. Tur has been witnessing firm trend. Strong festival demand and new tur crop demand has been supporting a gain in the prices. However, rise in arrival of new tur and expected continuous higher arrivals after Pongal/Makar Sankranti festival would cause a downslide of Rs.100-300 per quintal in its price.

Market participants are expecting that without government agency buying, tur prices will fall after Sankranti.

- Millers have shifted to process new tur dal from moong dal, it also leads to the shortage of processed moong dal.
- Lower masoor crop estimate will also support the prices while cheap imported Canadian masoor may pressurize the rally.

International

- USDA's Commodity Credit Corporation office seek purchase tender for 9000 tonne of pulses for February 1 to February 22 and February 23 to March 16 delivery at port.
- USDA's Commodity Credit Corporation office seek purchase tender for 200 tonne of pea for February 16 to March 9 and March 10 to March 31 delivery at port.
- International moong prices surged on fresh buying queries from India, China and Bangladesh. Burmese moong (Pedishewa variety) quoted high at USD 1060 per tone for the shipments between February 15 to March 15, 2014.

Weekly Outlook: - Pulses prices are likely to notice sideways to steady tone in the near-term on festive demand. However, prices are likely to dwindle after Makar Sankranti.
