### Highlights

[\(Back to Content\)](#)

#### Domestic:

- Pulses market noticed mostly range-bound movement.
- According to Ministry of Agriculture, around 92.62 lakh hectare of area has been sown under pulses (Kharif) this year as on August 22, around 6.81% lower than the previous year, when it was 99.39 lakh hectares during the same period.

|                            | This Year Sowing | This Year Sowing | % Change     |
|----------------------------|------------------|------------------|--------------|
| Moong                      | 19.54            | 22.53            | -13.27       |
| Urad                       | 22.57            | 22.36            | 0.94         |
| Tur                        | 33.41            | 36.64            | -8.82        |
| <b>Total Kharif Pulses</b> | <b>92.62</b>     | <b>99.39</b>     | <b>-6.81</b> |

- RBI states in its annual report for 2013-14 that the impact of weak monsoon so far this year on India's farm production and economy is likely to be limited, if the rainfall is normal in rest of the monsoon season (June to September), some deficiency will stay but it will not have a debilitating impact on the economy. The report said the area sown under kharif crops was 2.3% lower than the normal but 8.9% higher than the 2009 drought year. Based on the sowing data, it appears that the drop in output may

August 25, 2014

now be restricted mainly to coarse cereals and pulses. Historically, whenever rainfall was deficient by 10% or more, kharif food grains production, mainly rice and coarse cereals, declined. Major rabi crops being well irrigated were less impacted. Moreover, the difference between kharif (summer) and rabi (winter) crops have evened out in the past few years, thus eliminating a massive impact on food production due to rainfall shortfall this season. On an average basis, for the last five years, rabi crops accounted for 50.7 per cent of total food grains output. The RBI also said that said current water levels in reservoirs are a source of comfort. Central Water Commission monitors 85 major reservoirs in the country, which have a total live capacity of 155.05 BCM at Full Reservoir Level (FRL). Current live storage in these reservoirs as on 13<sup>th</sup> August, 2014 was 98.11 BCM as against 112.11 BCM on 13.08.2013 (last year) and 85.79 BCM of normal storage (average storage of the last 10 years). Current year's storage is 88% of the last years and 114% of the normal storage. Following table shows the IMD Rainfall Index and Pulses Production:

| Year    | IMD Rainfall Index (% of LPA) | Pulses Production Growth (Per cent) |
|---------|-------------------------------|-------------------------------------|
| 1982-83 | 86                            | 3.0                                 |
| 1986-87 | 87                            | -12.4                               |
| 1987-88 | 81                            | -6.4                                |
| 2002-03 | 81                            | -16.8                               |
| 2004-05 | 86                            | -11.9                               |
| 2009-10 | 78                            | 0.6                                 |
