- The state-run trading corporation of Bangladesh (TCB) temporarily suspended sale of essential commodities including lentil trough trucks at subsidized rates for three days before the Eid-UI-Azha.
- In UK, farmers are likely to shift towards pulses (pea and beans) crop in upcoming sowing season from rape seed and sugar beet due to falling prices. The pulses arable area would be higher in this spring season against the 30,000 ha. planted during the spring season in last year. Meanwhile, stocks of spring pulses seed are unseasonably low, and would be insufficient for increased demand. The pulses prices are continuously decline, but sellers still get 30-35 Euro per tonne premium over feed wheat with an additional 15-25 Euro per tonne paid for human consumption.
- In Mexico, Favorable weather for planting of winter chickpea crop witnessed, while, prices are at the lowest since 2010.
- In Turkey, smaller domestic lentil crop earlier in 2014 has increased the imports from Canada.

Weekly Outlook:- Pluses are likely to witness range-bound to weak movement on new crop arrivals. Meanwhile, effect of ongoing cyclone would also affect the prices.
