International Fundamental:

- **Myanmar Launch Pulses Future Trading on Trial**-Myanmar looks to develop a future market for pulses to allows buyers and sellers to lock in a price and reduce the risk of price fluctuations. The merchants at Bayinnaung market in Yangon, the country's largest commodities exchange centre, began a one-month trial for futures trades October 9. There are a number of rules in place, such as requirement for buyers to make a 10 percent payment up front and sellers to provide 10pc of the goods on the day the futures contract is sold, with the rest of the payment and goods coming on the delivery day-The Myanmar Times.
- In Canada, Pea and lentil prices decline as new crop harvesting is near to finished.
- In UK, farmers are likely to shift towards pulses (pea and beans) crop in upcoming sowing season from rape seed and sugar beet due to falling prices. The pulses arable area would be higher in this spring season against the 30,000 ha. planted during the spring season in last year. Meanwhile, stocks of spring pulses seed are unseasonably low, and would be insufficient for increased demand. The pulses prices are continuously decline, but sellers still get 30-35 Euro per tonne premium over feed wheat with an additional 15-25 Euro per tonne paid for human consumption.

Weekly Outlook:- Pluses are likely to witness firm movement on festivities.
