- ✓ In 2014-15, the Production of pulses estimated at 18.43 million tonnes is lower by 6.83% from 19.78 million tonnes produced in 2013-14.
- ✓ Kharif pulses production is estimated to fall by 8% to 5.5MMT and pulses produced during rabi season is expected to decline by 6.4% to 12.93 MMT.
- ✓ India is likely to harvest 13% lower chana in 2014-15 from last year on lower planted area (down 16% Y-O-Y). Meanwhile, the decline in tur production due to erratic rainfall conditions during the monsoon season-2014.
- ✓ The 2nd Advance Estimates of production of major crops for 2014-15 and Final Estimates for 2013-14 have been released by the Department of Agriculture & Cooperation on 18th February, 2015.

- Rabi Pulses Sowing Down 10.04% Y-O-Y, Chana Down 15.98 %.** According to Ministry of Agriculture, total rabi pulses acreage till Feb. 13, 2015 is down by 10.04% to 145.92 lakh hectare (Ha.) as compared with last year's area coverage of 162.21 lakh hectare during the corresponding week. The area planted under chana is also down by 15.98% to 85.91 Lakh Ha. against 102.25 lakh ha. in same corresponding week during last year.
- Gujarat Rabi 2015 Sowing Final Report**-According to Gujarat Agriculture Department, following is final rabi pulses sowing status released on Feb.9,2015:

Area (in '00 Ha.)	Area till 9-2-15	Area till 9-2-14	% Change
Chana	1699	2473	-31
Other Pulses	214	328	-35

- The rising incidents of farmer suicides led the Supreme Court to demand explanation from the Ministry of Agriculture that why can't the MSP of important cereals and pulses be increased by 50% to check the suicide cases.
- Following the expectation of lower output and rising demand, pulses imports are expected to rise significantly in year 2015-16. Higher local price and duty free import of Chana (till March 31) has made the imports viable and has raised the same in the country. According to Ministry of Agriculture, total rabi pulses

acreage till Feb. 13, 2015 is down by 10.04% to 145.92 lakh hectare (Ha.) as compared with last year's area coverage of 162.21 lakh hectare during the corresponding week.

- According to the official sources, pulses import stood 3.03 million tonnes in during the period of April-November 2014 which was 2.42 million tonnes during the corresponding period last year. IPGMA forecasted pulse imports to stand around 3.7-3.8 million tonnes in the ongoing financial year and around 4 million tonnes in the next year.
- The imports of pulses were reported around 88125.591 tonne for the reported period (Feb.9-15,2015). (Source-IBIS)

- **Pulses WPI Jan.2015 Up 5%-** The Wholesale price index for Pulses for the month of January, 2015 rose by 4.94% to 254.9 from 242.9 for December,2015.

The annual rate of inflation based on monthly WPI, stood at 12.34% for January 2015 (Y-O-Y) as compared with 5.88% for the previous month.

- **Saral-New Chickpea Variety a 'Game-Changer' for Iran's highland farmers-** ICARDA in collaboration with Iran's Agricultural Research Education and Extension organization (AREEO), has released a new variety – named 'Saral' - high-yielding winter chickpea, which is tolerant of cold temperatures and resistant to ascochyta blight. The variety is being disseminated to farmers across the highland regions of West and North-West Iran. In trials over the past twelve years, Saral has achieved a mean yield of 1350 kg/hectare – a 25 percent increase over local varieties.(Source: What's New at ICARDA)
- **ICRISAT Pigeonpea project Extend For Four Years-**The state government of Odisha, India, extend the ICRISAT's pigeonpea(tur) seed systems project to three new districts (Ganjam, Gajapati and Sonepur) of the state over the period 2015-2018. The 'Introduction and Expansion of Improved Pigeonpea Production Technology in Rainfed Upland Ecosystems of Odisha' had been implemented in five districts (Rayagada, Kalahandi, Nuapada, Bolangir and Boudh) of Odisha state during the period 2011-2014. • **Pulses MBR Fumigation Guidance at Indian Ports**

Following is the abstract of circular regarding methyl bromide(MBR) fumigation guidance given by the Plant & Quarantine Dept

The interim fumigation arrangement with five times penalty had expired on December 31, 2014.

In an order passed by Department of Agriculture & Cooperation (Plant Protection), Ministry of Agriculture a permanent solution which will hold good till an alternative is found for Methyl Bromide has been achieved and no extensions will have to be sought in the future.

As per Order F. No. 8-65/2012-PP II dated 30th October, 2014, "till such time that effective alternatives to Methyl Bromide are found and notified, import of all agricultural commodities for which treatment with Methyl Bromide fumigation is prescribed in Plant Quarantine (Regulation of import into India) Order 2003 will be allowed without offshore methyl bromide fumigation from those countries only which certify the discontinuance of the chemical from Phytosanitary application."

"Such consignments will be subjected to Methyl Bromide fumigation in India from approved treatment providers at the ports of entry and on payment of penal fees, provided all other conditions under Plant Quarantine (Regulation of Import into India) Order 2003 have been complied with."

Please note that all importers need to take the following steps:

1. For countries where Methyl Bromide fumigation is banned: Please arrange for a letter from the NPPO of the origin country certifying that MBR fumigation is banned in their country.
2. For countries where Methyl Bromide fumigation is not possible due to extreme cold weather conditions: Please arrange for a letter from the NPPO of the origin country certifying that MBR fumigation is not possible in the specific months (state which month to which month) when the weather is extremely cold.

Once this is done, it will be possible for the Plant & Quarantine office to issue an advisory allowing MBR fumigation at port of arrival at five times penalty and stocks will not get held at port.

Please note that the letter has to be issued by the npo or relevant government authority.

A letter from the exporter will not be accepted by the plant & quarantine office in india.

International:

According to the AAFC's January Outlook release in February

• **For dry peas-**

In 2014-15, Canadian exports are expected to increase to 2.9 Mt, with India, China and the Bangladesh as -out stocks are forecast to decrease sharply due to due to lower supply and higher exports. The average price in 2014-15 is expected to fall from 2013-14 as a larger proportion of the crop is feed quality peas which are priced at a discount.

During the month of January, the on-farm price of yellow peas in Saskatchewan rose by \$30/t while the green pea price was relatively unchanged.

In 2015-16, seeded area is forecast to rise by nearly 4% from 2014-15 to 1.6 Mha because of higher potential returns relative to other crops, good logistical movement and solid export demand. Production is expected to increase by 10% to 3.8 Mt, due to a return to higher expected yields. Supply is forecast to rise marginally due to lower carry-in stocks. Exports are expected to be slightly lower than 2014-15 and as a result, carry-out stocks are expected to rise sharply but not be burdensome. The average price is expected to remain strong due to strong global demand but slightly lower than 2014-15.

- **For Lentils-**

For 2014-15, exports are forecast to fall by 6% to 1.65 Mt. India, Turkey and the United Arab Emirates are currently the top three export markets. Domestic use is expected to decrease due to lower supply. Carryout stocks are expected to fall to the lowest level since 2009-10. The overall average price is forecast to be above 2013-14 due to the tight carry-out stocks.

During the month of January, the on-farm price of large green lentils in Saskatchewan rose by \$65/t while the red lentil price increased over \$80/t.

For 2015-16, area seeded in Canada is forecast to increase by 11% to 1.4 Mha, due to competitive returns relative to other crops, but may be limited due to quality seed availability. A higher yield forecast is expected to result in production increasing by 17% to 2.15 Mt. However, due to tight carry-in stocks, supply is forecast to increase by only 10% to 2.2 Mt. Exports are expected to be unchanged from 2014-15 at 1.65 Mt despite the larger exportable supply. Carry-out stocks are forecast to increase sharply. With the assumption of a more normal grade distribution and lower grade discounts, the overall lentil price is forecast to increase from 2014-15.

- **For Chickpea**

For 2014-15, exports are forecast to increase from 2013-14. The EU-27, the US and the Middle East have been the main markets for Canadian chickpeas to-date. Carry-out stocks are expected to increase for the third year in a row to burdensome levels. The average price is forecast to fall for the third consecutive year, due to larger world and Canadian supply.

For 2015-16, the area seeded is forecast to decrease from 2014-15, largely due to larger carry-in stocks and lower prices. As a result, production is expected to decrease to 115 kt. However, supply is expected to only fall marginally from last year due to the large carry-in stocks. Exports are expected to be unchanged from last year and carry-out stocks are expected to decrease, but remain burdensome. The average price is forecast to be unchanged as it will be limited by higher expected world supply.

- China pulses export noticed a steep fall during January to October 2014 however net imports are rising to record levels. Total export during the January to October 2014 stood 640616 metric tons, compared to 765,656 metric tons during the same period in previous year whereas the country imported 230,641 metric tons during the mentioned period compared to 40,000 metric tons previous season.
- **French Field Pea Dec.14 Export Up M-O-M, Down Y-O-Y.** France field pea exports in December, 2014 up by 70% to 13205 MT from 7815 MT shipped in previous month, but down by 32% from 19625 MT shipped during Dec., 2013. The shipments during this season is down by 43% to 58815 MT. (Source-UNIP)
- **Canada-Korea FTA to Eliminate Tariff on Pulses.** The Canada-Korea Free Trade Agreement (CKFTA), which entered into force on January 1, 2015, will create new opportunities for Canadian farmers in the Korean market. According to the Canadian government, the CKFTA will eliminate tariffs on over 97 percent of Canadian agricultural exports to Korea and on 86.8 percent of agricultural tariff lines. Tariffs will be phased out over three to five years for: refined canola oil, chick peas, lentils and broad beans, wheat flour, confectionary products, cranberry and blueberry juice. More gradual phase-out periods cover beef, pork, dried peas, kidney beans, mung beans, adzuki beans, crude canola oil, and frozen and dried blueberries and cranberries.

Weekly Outlook:- Pluses prices are likely to remain weak in expectation new crop arrivals.

In Queensland, the area planted to chickpeas fell in response to declining prices and low levels of soil moisture at the time of planting. In contrast with wheat in central Queensland, chickpeas benefited from the above average rainfall in August 2014 and yields are estimated to be above average.
