In 2014, the district recorded a rainfall of 763 mm, against the annual average of 662.2 mm. Last year 2013-14, the food grain output came down due to monsoon failure. - **Chana to be buoyant in 2015:** According to the GrainCorp Middle East, Europe and Africa regional manager Nick Poutney, the chickpea values to rise this season as India would fall short of producing enough to meet its demand and international supply remains low. He said India had planted 20% less than last year, meaning production was likely to be down by 2.1 million tonnes. He further states that “Demand will outstrip supply, so expect chickpea values to be quite buoyant.” (Source- The Land, Australia, Article by Gregor Heard of Fairfax Agricultural Media)

Weekly Outlook:- Pulses are likely to remain mostly steady on recent rainfall, which would badly effect the harvest-ready crop and delay the arrivals and quality of new crop.
