Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights[\(Back to Content\)](#)**Domestic:**

- Chana market is likely to trade range bound as market has already taken account of recent loss incurred by inclement weather. If freight rate softens further (unlikely) some downward correction is a visible possibility in the short term. Market participants opine that there is a tight position in cash market and it would continue to restrict market from any major dip. Inner tone in the market remains firm.
- Tur market is likely to stay steady to slightly firm as supply-demand side is simply matched. Undercurrent in the market remains firm. Lower freight may drive market slightly lower in the short term. Demand supply side is almost balanced. However, international quotes for Tur may be driving force for the current market fundamentals.
- Masur market may trade steady to slightly weak as supply side is better than exiting demand in the market. Sentiments for masur may turn firmer if prices of other pulses get firmer. Overall sentiments in the medium term remain bullish.
- Traders in Orissa are stick to their demand of withdrawing VAT on dal, pulses and wheat products and have refused to discontinue imports of wheat, dal and pulses from other states. State finance minister is trying to break deadlock by pitching for uniform tax rate on these commodities. Currently Vat is being levied on dal, pulses and wheat products as per the recommendation of the empowered committee.
- Trader's body in Orisha had questioned the recent practice of levying the entry tax recently. As per minister there is no entry tax on agriculture products at present. The constitutional validity of the Entry Tax has been challenged and the matter is sub judice with the Supreme Court. The government has also filed an affidavit in the apex court to maintain status-quo. So, no entry tax can be levied on agricultural products.
