Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights

[\(Back to Content\)](#)

Domestic:

According to IBIS (provisional data), import of pulses at major port in India, during the last week (27-July-02 Aug) was around 110 Thousand tonnes around 15% higher than previous week's (July 20-July 26), import of 96 thousand tonnes. Chana, Kidney Bean, Urad, Tur, Moong and Yellow Pea were imported lower this week whereas Green Pea, Cow Pea and Masoor were imported higher as compared to last week.

Government of India is planning to barter surplus sugar for pulses with countries like Canada, Indonesia and Malaysia. India imports around 3-4 MMT of pulses to meet its domestic demand and exports around 18-19 MMT of sugar with carryout of 10 MMT.

According to the trade sources, Tur area in Gulbarga region of Karnataka is likely to surge this year by around 5-10% as compared to the previous year. However yield could be impacted downwardly as there have been no rain spills in last 15-20 days.

Overall crop condition of Moong in Bikaner region of Rajasthan is good. According to local traders moong area in this region may have increased by 50% as compared to the last year. The bumper production seems very much in sight this year in this region, if the condition continues to remain the same.

According to the Ministry of Agriculture, area under Kharif pulses throughout the country stood 92.64 lakh hectares as on 07 August this year, around 14.0% higher when compared to the area sown during corresponding period last year which was 81.24 lakh hectares.

According to latest data released by Gujarat Agriculture Ministry, area under Kharif, pulses in Gujarat stood at 3.28 Lakh Hectares as on 10 August this year, around 02% lower compared to the area sown during corresponding period last year which was 3.34 Lakh hectares.

Area under Kharif pulses in Andhra Pradesh stood 1.04 Lakh Hectares as on 05 August this year, around 2% higher as compared to the area sown during corresponding period last year which was 1.02 Lakh hectares. But the area of Black gram has decreased as compared to last year.

According to the Rajasthan Department of Agriculture, the production estimate of Gram in 2014-15 is only 9.10 Lakh tonnes as compared to 16.40 Lakh tonnes in 2013-14 which is around 45% lower than last year. Rajasthan is the country's second producing state and this decline in production will not cause steep decline in prices near term.

[\(Back to Content\)](#)

Weekly Outlook: -Pulses prices are likely to remain range bound.

Pulses-Wise Scenario ([Back to Content](#))

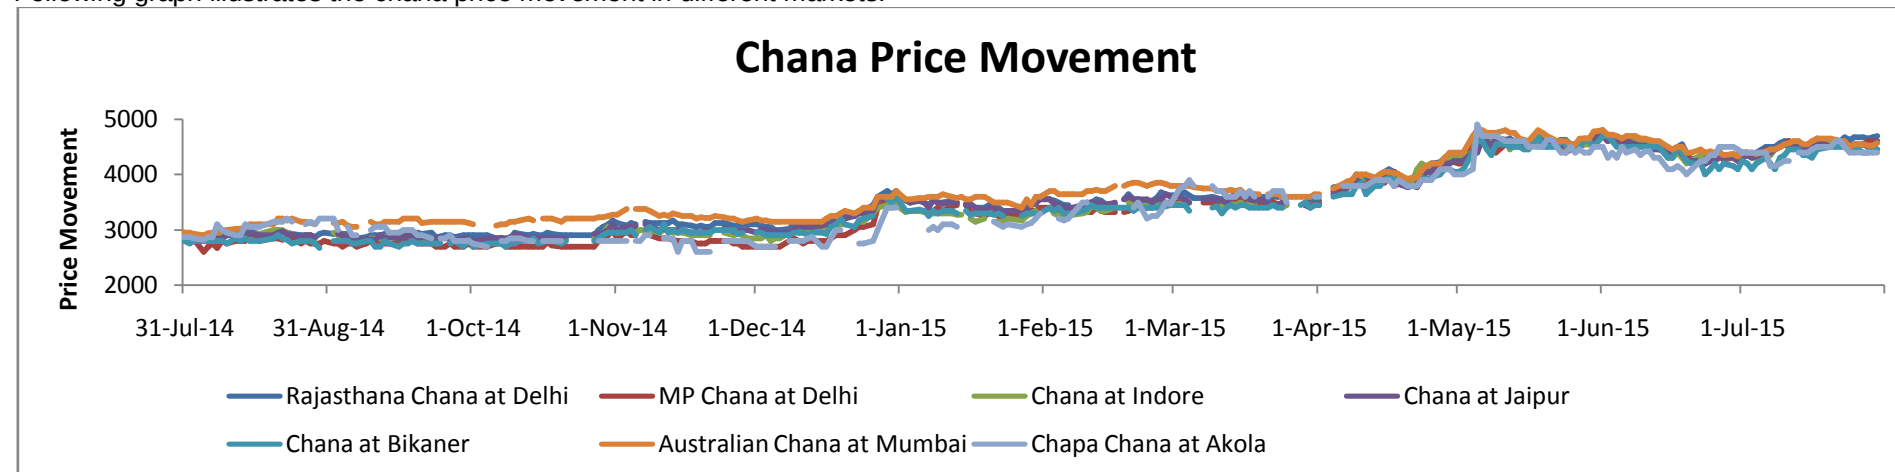

Chana ([Back to Content](#))

Market Recap:

Chana prices noticed range bound to slightly firm movement during the week.

Current Scenario:

Chana noticed range bound movement to slightly firm during the week and price range during the week was Rs.4475-4700 per quintal at major markets. Following graph illustrates the chana price movement in different markets:
