Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights

[\(Back to Content\)](#)

Domestic:

According to IBIS (provisional data), import of pulses in the last week (21 Sept-27 Sept) was around 69 Thousand tonnes at major ports in India, around 19% lower than previous week's (14 Sept-20 Sept), import of 85 Thousand tonnes. Chana, Kidney Bean and Pigeon Pea were imported higher this week whereas Masoor, Moong, Green Pea, Cow Pea, Urad and Yellow Pea were imported lower as compared to last week.

With the rise of festive demand and decreased pace of arrival from local market and import, the prices of urad continued to lend support in the cash market and resultantly prices firmed up. According to the preliminary advance estimate released by Agriwatch, urad Kharif production is likely to be around 10.7 Lakh tonnes which is around 22 percent lower than the 1st advance estimate release by Government of India of 13.7 Lakh tonnes.

With a view of boosting production of pulses at domestic front the CACP has recommended hike in MSP of Chickpeas to Rs 3425 per quintal from 3175 and lentil to Rs 3,325 from Rs 3,075 per quintal.

Central Government extends the stock limit on pulses by one year to September 2016 and States will be allowed to take necessary steps to curb rising prices. Warehouse registered with WDRA would be subjected to the same stock limits imposed by State Governments except exporters; those who store raw material for food processing and supplier to retailers have been exempted.

According to the first advance estimate 2015-16 by Ministry of Agriculture, pulses Kharif production is estimated to be 5.56 MMT which is around 1% lower than the fourth estimate of 2014-15 that was 5.63 MMT. Tur production is estimated to decline to 2.61 MMT as compared to 2.71 MMT (4th estimate 2014-15) but Urad production is estimated to increase to 1.37 MMT from 1.27 MMT.

According to Ministry of Agriculture area under Kharif pulses throughout the country stood at 114.58 Lakh hectares as on 01 October this year, around 12% higher when compared to the area sown during corresponding period last year which was 102.56 lakh hectares.

According to the final estimate released by Ministry of Agriculture, All India Tur, Urad and Moong sowing area are 37.78, 28.22 and 25.73 Lakh Hectare which is around 4%, 10% and 20% higher than last year which was 36.27, 25.57 and 21.41 respectively.

Area under Kharif pulses in Andhra Pradesh stood 2.65 Lakh Hectares as on 30 September this year, around 57% higher as compared to the area of 1.69 Lakh hectare sown during corresponding period last year. The area of Red Gram and Green gram has shown the highest increase as compared to last year.

According to latest data released by Gujarat Agriculture Ministry, area under Kharif, pulses in Gujarat stood at 4.23 Lakh Hectares as on 28 September this year, around 7% higher than 3.96 hectares of area sown during corresponding period last year.

International:

According to the stat pub, Canada Lentil Production for 2015-16 is expected to increase by 5 percent to 2.083 MMT. Canada had produced 1.987 MMT last year. Despite hope for higher production export volume is likely to decrease from 2.229 to 2.0 MMT in 2015-16. Canada growers predict the price range for all lentils at \$750-\$780 in 2015-16 due to better prospects of export demand. Lentil prices were ruling \$585 (average) per tonne in the last season. As prices are expected to rule higher, local sellers and stockists, even farmers would prefer to retain stock for garnering maximum profit and it may slow down the current pace of export volume.

According to the statpub, Canada Lentil No. 1 variety harvest could increase from 5% (last year) to 12 % this year and No.2 variety from 32% to 59% this year whereas No.3 and sample grade decreased from 53% and 10% to 27% and 2% respectively. Canadian lentil No. 2 variety is the FAQ (fair average quality) variety.

According to the Union Nationale Interprofessionnelle des Plantes Riches en Proteines (UNIP), French Pea exports in the month of July was 34130 MT which is around 1% higher than the month of June that was 33720 MT. The increase in exports is due to good demand of pea from Indian subcontinent.

According to the latest ABARES report, Australian Chickpea production forecast 2015-16 is 990 kilo tonne which is about 78% greater than 2014-15 estimates which was 555 kilo tonnes. Australian chickpea harvesting begins mid September and crops start reaching India market from October onwards.

According to the Pakistan Bureau of Statistics (PBS), pulses net import in fiscal year (July to June) 2014-15 was around 6.60 Lakh tonnes which was around 32 % higher than 4.99 Lakh tonnes of 2013-14. Pakistan imports around 50-60 Lakh tonnes of pulses annually to meet its demand mainly from countries like Australia, Burma, Tanzania and Ethiopia.

Canada Lentil Production Forecast

	2013-2014	2014-2015[f]	2015-2016[f]
Area seeded (kha)	1060	1263	1356
Area harvested (kha)	1052	1217	1330
Yield (t/ha)	2.07	1.63	1.62
Production (kt)	2173	1987	2150
Imports (kt) [b]	9	15	10
Total supply (kt)	2479	2166	2210
Exports (kt) [b]	1755	1800	1750
Total domestic use (kt) [c]	560	316	360
Carry-out stocks (kt)	164	50	100
Stocks-to-use ratio (%)	7	2	5
Average price (\$/t) [d]	445	555-585	585-615

[a] August-July crop year.

[b] Imports and exports exclude products.

[c] Total domestic use = Food and industrial use + Feed waste and dockage + Seed use + Loss in handling. Total domestic use is calculated residually.

[d] Producer price, Free-on-board (FOB) plant, average over all types, grades and markets.

kha: kilohectares

t/ha: tonnes per hectare

kt: kilotonnes

\$/t: dollars per tonne
