Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights

[\(Back to Content\)](#)

Domestic:

According to IBIS (provisional data), import of pulses in the last week (05 Oct-11Oct) was around 58 Thousand tonnes at major ports in India, around 21% lower than previous week's (28 Sept-04Oct), import of 72 Thousand tonnes. Chana, Kidney Bean, Green Pea, Urad and Moong were imported higher this week whereas Masoor, Cow Pea, Pigeon Pea and Yellow Pea were imported lower as compared to last week.

With a view to stabilize prices government has decided to maintain buffer stock of pulses by importing it from global market. For this purpose it has also decided to allocate Rs 500 crores as price stabilization fund. The fund will be used to pay for transportation, handling, milling and processing. The main aim of this fund is to reduce costing of imported pulses.

Tur crop in Gulbarga needs one winter rains in next 10 to 15 days for better yield and flowering. Currently, standing crop has entered into flowering stage and the process would continue two to three weeks from now. One good shower of rains may increase numbers of flowers and it would enhance yield. However, farmers express fear of lower yield if rains get delayed by a fortnight. Such condition may reduce expected yield by half. Actually, winter rains in between third and fourth week of Oct remains crucial for the final size of the tur crop.

Like Gulbarga now tur crop needs immediate showers of rains in Latur and Jalgaon too. The standing crop is in dire need of rains. If rains in these regions get delayed, yield may drop by 30 to 40 percent. In these regions crop is in flowering stage. Yield prospects are deteriorating day by day in absence of rains.

The Wholesale price index for Pulses for the month of September, 2015 rose to 333.8 from 326 in previous month. The Pulses annual rate of inflation based on monthly WPI, stood at 2.39% for September 2015 as compared to 2.58% in the previous month.

With the rise of festive demand and decreased pace of arrival from local market and import, the prices of urad continued to lend support in the cash market and resultantly prices firmed up. According to the preliminary advance estimate released by Agriwatch, urad Kharif production is likely to be around 10.7 Lakh tonnes which is around 22 percent lower than the 1st advance estimate release by Government of India of 13.7 Lakh tonnes.

According to the final estimate released by Ministry of Agriculture, All India Tur, Urad and Moong sowing area are 37.78, 28.22 and 25.73 Lakh Hectare which is around 4%, 10% and 20% higher than last year which was 36.27, 25.57 and 21.41 respectively.

Area under Kharif pulses in Andhra Pradesh stood 3.28 Lakh Hectares as on 14 October this year, around 69% higher as compared to the area of 1.94 Lakh hectare sown during corresponding period last year. The area of Red Gram and Green gram has shown the highest increase as compared to last year.

International:

According to the Union Nationale Interprofessionnelle des Plantes Riches en Proteines (UNIP), French Pea exports in the month of August was 37285 MT which is around 9% higher than the month of July that was 34130 MT. The increase in exports is due to good demand of pea from India which imported 23,261 MT of peas in the month of August.

According to the stat pub, Canada Lentil Production for 2015-16 is expected to increase by 5 percent to 2.083 MMT. Canada had produced 1.987 MMT last year. Despite hope for higher production export volume is likely to decrease from 2.229 to 2.0 MMT in 2015-16. Canada growers predict the price range for all lentils at \$750-\$780 in 2015-16 due to better prospects of export demand. Lentil prices were ruling \$585 (average) per tonne in the last season. As prices are expected to rule higher, local sellers and stockists, even farmers would prefer to retain stock for garnering maximum profit and it may slow down the current pace of export volume.

According to the statpub, harvest of first grade variety of Canadian Lentil could increase from 5% (last year) to 12 % this year and second grade variety from 32% to 59% this year whereas No.3 and sample grade decreased from 53% and 10% to 27% and 2% respectively. Second grade variety of Canadian lentil is the FAQ (fair average quality) variety.

According to the latest ABARES report, Australian Chickpea production forecast 2015-16 is 990 kilo tonne which is about 78% greater than 2014-15 estimates which was 555 kilo tonnes. Australian chickpea harvesting begins mid September and crops start reaching India market from October onwards.

According to the Pakistan Bureau of Statistics (PBS), pulses net import in fiscal year (July to June) 2014-15 was around 6.60 Lakh tonnes which was around 32 % higher than 4.99 Lakh tonnes of 2013-14. Pakistan imports around 50-60 Lakh tonnes of pulses annually to meet its demand mainly from countries like Australia, Burma, Tanzania and Ethiopia.
