Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights

[\(Back to Content\)](#)

Domestic:

According to IBIS (provisional data), import of pulses in the last week (12 Oct-18 Oct) was around 123 Thousand tonnes at major ports in India, around 115% higher than previous week's (05 Oct-11Oct), import of 57 Thousand tonnes. Chana, Kidney Bean, Cow Pea, Green Pea and Urad were imported lower this week whereas Masoor, Pigeon Pea, Moong and Yellow Pea were imported lower as compared to last week.

Government has decided to create buffer stock of pulses by procuring from farmers and by imports. NAFED, FCI and SFAC will procure on behalf of government from state cooperatives, state government organizations and farmer producer organizations respectively. Buffer stock will help the government stabilize the rising prices of pulses by selling them at subsidized rate.

In a bid to check rising prices government has imposed stock limit on pulses held by importers, exporters, licensed food processors and large departmental retailers which were exempted earlier. The stock limit on pulses is extended to September, 2016.

Government of MP has imposed the stock limit on Pulses, seeing the drastically higher prices of the commodity. The stockist in the region having the population of three to ten lakh cannot hold the pulses more than four thousand quintal, whereas the limit for the region having the population of less than three lakhs is five hundred quintal.

According to the Ministry of Agriculture, area under Rabi pulses throughout the country stood at 9.83 lakh hectares as on 23rd October this year, around 107% higher when compared to the area sown during corresponding period last year which was 4.75 lakh hectares. The rise in area is due to the higher prices of pulses in the retail market.

According to Agriwatch telephonic survey with farmers in Madhya Pradesh, tur yield may decrease by 40-50 percent this year as compared to last year due to lower rainfall. As Madhya Pradesh is one of the major producing States of tur, 40 to 50 percent lower yield may not show steep decline in prices in the coming arrival season.

According to the local traders, Chana sowing started in Ganj Basoda region of Madhya Pradesh but this year chana area may decrease as compared to last year due to less rainfall. Farmers in the region with water supply facility still tend to sow wheat as it is less prone to pest and frost attack as compared to chana.

International:

According to the Union Nationale Interprofessionnelle des Plantes Riches en Proteines (UNIP), French Pea exports in the month of August was 37285 MT which is around 9% higher than the month of July that was 34130 MT. The increase in exports is due to good demand of pea from India which imported 23,261 MT of peas in the month of August.

According to the stat pub, Canada Lentil Production for 2015-16 is expected to increase by 5 percent to 2.083 MMT. Canada had produced 1.987 MMT last year. Despite hope for higher production export volume is likely to decrease from 2.229 to 2.0 MMT in 2015-16. Canada growers predict the price range for all lentils at \$750-\$780 in 2015-16 due to better prospects of export demand. Lentil prices were ruling \$585 (average) per tonne in the last season. As prices are expected to rule higher, local sellers and stockists, even farmers would prefer to retain stock for garnering maximum profit and it may slow down the current pace of export volume.

According to the statpub, harvest of first grade variety of Canadian Lentil could increase from 5% (last year) to 12 % this year and second grade variety from 32% to 59% this year whereas No.3 and sample grade decreased from 53% and 10% to 27% and 2% respectively. Second grade variety of Canadian lentil is the FAQ (fair average quality) variety.

According to the latest ABARES report, Australian Chickpea production forecast 2015-16 is 990 kilo tonne which is about 78% greater than 2014-15 estimates which was 555 kilo tonnes. Australian chickpea harvesting begins mid September and crops start reaching India market from October onwards.

According to the Pakistan Bureau of Statistics (PBS), pulses net import in fiscal year (July to June) 2014-15 was around 6.60 Lakh tonnes which was around 32 % higher than 4.99 Lakh tonnes of 2013-14. Pakistan imports around 50-60 Lakh tonnes of pulses annually mainly from countries like Australia, Burma, Tanzania and Ethiopia to meet its demand.

Canada Lentil Production Forecast

	2013-2014	2014-2015[f]	2015-2016[f]
Area seeded (kha)	1060	1263	1356
Area harvested (kha)	1052	1217	1330
Yield (t/ha)	2.07	1.63	1.62
Production (kt)	2173	1987	2150
Imports (kt) [b]	9	15	10
Total supply (kt)	2479	2166	2210
Exports (kt) [b]	1755	1800	1750
Total domestic use (kt) [c]	560	316	360
Carry-out stocks (kt)	164	50	100
Stocks-to-use ratio (%)	7	2	5
Average price (\$/t) [d]	445	555-585	585-615

[a] August-July crop year.

[b] Imports and exports exclude products.

[c] Total domestic use = Food and industrial use + Feed waste and dockage + Seed use + Loss in handling. Total domestic use is calculated residually.

[d] Producer price, Free-on-board (FOB) plant, average over all types, grades and markets.

kha: kilohectares

t/ha: tonnes per hectare

kt: kilotonnes

\$/t: dollars per tonne
