Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights[\(Back to Content\)](#)**Domestic:**

According to IBIS (provisional data), import of pulses in the week (02 Nov-08 Nov) was around 171 Thousand tonnes at major ports in India, around 23% lower than previous week's (26 Oct-01 Nov) import of 221 Thousand tonnes.

According to the Ministry of Agriculture, area under Rabi pulses throughout the country stood 38.91 lakh hectares as on 13th November this year, around 13.04% higher when compared to the area sown during corresponding period last year which was 34.42 lakh hectares. The hike in MSP of pulses has led to higher sowing this year so far.

Most of the states, which had seized pulses from hoarders, have started releasing the commodity in the market at the fare price range. Karnataka has released around 209 tons of pulses from the total volume of 25,448 tons confiscated during the raids.

Government of Maharashtra has decided to release the seized pulses in the local market in order to relieve consumers from soaring prices. According to the official, Maharashtra has seized around 86,000 tons of pulses, which are now expected to be sold at the price range of Rs 90-100 per Kg. by the wholesaler and retailer from whom it being confiscated.

In order to reduce the dependency on imports, Cabinet Committee on Economic Affairs (CCEA) has increased the MSP of Lentil (Masoor) and Chickpea (Chana) by Rs 250 each to Rs 3325 and Rs 3425 per quintal respectively. Apart from this, CCEA has also approved the bonus of Rs 75 per quintal for these two pulses over and above the support prices.

Arrival starts from newly harvested crop in limited quantity in Kanpur mundi. The price for the new crop was quoted at Rs8300 to Rs 8400 per quintal. As new crop has higher moisture level, traders are offering lower quotes for the produce. It has moisture level of 15-16% and is coming from Meerut line with 100-125 bags per day.

Farmers in Bihar are awaiting good showers of rain in the next 1 week which will boost up chana area by 15-20 % from last year. If rain doesn't occur in 7 to 10 days it may affect chana area by 20-30 % from last year. So occurrence of rain remains very crucial for chana area in Bihar.

According to Agriwatch telephonic survey with farmers in Madhya Pradesh, tur yield may decrease by 40-50 percent this year as compared to last year due to lower rainfall. Madhya Pradesh is one of the major producing States of tur, and 40 to 50 percent lower yield may not show steep decline in prices in the coming arrival season.

Maharashtra government has removed stock limit imposed on pulses importers this week. The decision will help to reduce the prices of pulses as the stock which was lying on the ports is expected to enter into the market now.

According to local media sources, Government of Tamil Nadu has imposed stock limit on pulses to curb the rising prices. Municipal corporation (big city) wholesalers can stock maximum 250 tonnes of pulses whereas retailers 6.25 tonnes, municipal council (small city) wholesalers 150 tonnes and retailers 5 tonnes respectively.

International:

According to the trade sources, Burmese Tur crop is in good condition and they are estimating production of around 4 Lakh MT this year. Harvesting of tur in Burma generally begins in December and export shipments start from January.

In a view to keep the prices stable, Trading Corporation of Pakistan has issued two tenders to import 10,000 tonnes of Chickpeas. The tender for import of 5,000tons each will be opened on 5th and 16th November respectively. Additional demand from Pakistan is expected to push chickpeas prices up in the international market.

According to the Union Nationale Interprofessionnelle des Plantes Riches en Proteines (UNIP), French Pea exports in the month of August was 37285 MT which is around 9% higher than the month of July that was 34130 MT. The increase in exports is due to good demand of pea from India which imported 23,261 MT of peas in the month of August.

According to the stat pub, Canada Lentil Production for 2015-16 is expected to increase by 5 percent to 2.083 MMT. Canada had produced 1.987 MMT last year. Despite hope for higher production export volume is likely to decrease from 2.229 to 2.0 MMT in 2015-16. Canada growers predict the price range for all lentils at \$750-\$780 in 2015-16 due to better prospects of export demand. Lentil prices were ruling \$585 (average) per tonne in the last season. As prices are expected to rule higher, local sellers and stockists, even farmers would prefer to retain stock for garnering maximum profit and it may slow down the current pace of export volume.

According to the statpub, harvest of first grade variety of Canadian Lentil could increase from 5% (last year) to 12 % this year and second grade variety from 32% to 59% this year whereas No.3 and sample grade decreased from 53% and 10% to 27% and 2% respectively. Second grade variety of Canadian lentil is the FAQ (fair average quality) variety.

According to the latest ABARES report, Australian Chickpea production forecast2015-16 is 990 kilo tonne which is about 78% greater than 2014-15 estimates which was 555 kilo tonnes. Australian chickpea harvesting begins mid September and crops start reaching India market from October onwards.
