Domestic:

According to IBIS (provisional data), import of pulses in the week (01 Feb-07 Feb) was around 119 Thousand tonnes at major ports in India, around 12% lower than previous week's (25 Jan-31 Jan) import of 135 Thousand tonnes. Chana, Masoor, Pigeon Pea and Yellow Pea were imported lower this week whereas Green Pea, Urad, Cow Pea, Kidney Bean and Moong were imported higher as compared to last week.

Chana markets' including futures recovered smartly in last few days despite new crop round the corner. There is a gossip in market that stockiest are trying to pull market up so that they could sell their old stock at higher level and get fund for procurement from new crop. Actually, market, especially futures market has been on rise against all expectation. Generally before season stockiest intend to sell their stock at higher level and they have intentionally brought in futures to drag futures market up. When their old stocks are released, they would start selling in futures.

As per traders of Ashok Nagar region of Madhya Pradesh, new chana from non irrigated land started hitting the mandis in small quantity. Grain quality and size is normal to good. New arrivals of chana will continue in small quantity till 1st week of March when harvesting of irrigated land will start and arrival will take pace. Overall crop condition is good.

According to the local trader of Merta city region of Rajasthan, there is normal demand of Moong that will keep pressure on the prices in near future. At present Tur is being traded at Rs 7800-7850 per quintal and arrival has been reported 1500-1600 bags per day. Prices may show some increase in March due to festive season.

Standing pea crop in Kanpur region of Uttar Pradesh is in dire need of rains as size of the grain is feared to be affected in absence of rains. Moisture stress would not allow pea in the developing stage to develop fully. Lower rainfall has already affected area coverage under peas and if rains do not occur in this region this week, yield is feared to be lower than normal and resultantly lower size of the crop. Early sowed crop is in grain filling stage while late sowed crop is in flowering stage. Both these stages need light showers of rains at regular intervals. If rains occur, production prospects would improve.

At present arrival of tur in Amaravati mandi is 5000-5500 bags with price range of Rs 8600-8700 per bag. Arrival of Tur in Vidharba region of Madhya Pradesh is good and it may continue till February. As per market participants farmers are holding tur in expectation of better prices in future. We can expect some firmness from March onwards when arrival pressure eases.

Masoor crop in Patna region of Bihar is in very good condition and farmers are expecting greater yield than last year. According to the local traders, Masoor sowing area is higher by around 20% this year compared to last year. New crop is expected to hit the market in mid March.

International:

According to the latest report, Canadian Lentil production for 2015-16 increases by around 19% to 2.4 MMT. Last year it was 1.98 MMT. Due to higher production and good demand, exports are forecasted to reach 2.4 MMT from 2.1 MMT. Season ending stock is expected to decrease from 0.36 MMT to 0.10 MMT. Farmer's average bids are likely to increase from \$585 to \$880/910 per tonnes due to higher demand, less availability of good quality crop and weak Canadian dollar.

According to the latest report, Canada Chickpea Production for 2015-16 decreases by around 31 percent to 0.90 MMT. Canada had produced 1.31 MMT last year. Despite lower production, exports are forecasted to reach 0.85 MMT this year from 0.80 MMT last year due to higher demand. However, season ending stock is expected to decrease from 0.125 MMT to 0.075 MMT. Farmers bids are likely to increase from \$515 to \$685-715 per tonne.

According to the latest report, Canada Pea Production for 2015-16 decreases by around 16 percent to 3.2 MMT. Canada had produced 3.8 MMT last year. Due to lower production, exports are forecasted to reach 2.95 MMT this year from 3.04 MMT last year. Farmer's bids are likely to increase from \$260 to \$305-335 per tonne due to good demand.

According to the trade sources, Burmese Tur crop is in good condition and they are estimating around 3-3.5 Lakh MT production this year. Buyers are asking \$1120(CNF) for February contract.

According to the latest ABARES report, Australian Chickpea production forecast 2015-16 is 990 kilo tonnes around 78% greater than 2014-15 estimates of 555 kilo tonnes. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
