Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights

Domestic:

- **Mostly cash pulses markets except moong traded steady to slightly firm during the week under review.** Chana traded up by Rs 250 to Rs350 per qtl. due to supply-demand gap and lower volume of import, supported by restricted release by private trades. However, more upside momentum is unlikely as arrival from new kharif crops like tur, moong and urad are likely to increase in coming weeks.
- **Market participants say that expected higher arrivals in the new season in major mandis and imported quantity due for delivery in next two months, pulses prices are unlikely to move up.** Other pulses might also trade near MSP. Expected higher volume of import and bumper kharif crop would continue to pressure pulses at price front.
- **The government's advisory body on farm pricing CACP has recommended a sharp increase of up to Rs 475 per quintal in the minimum support price of pulses for the winter season.** It has suggested a sharp hike in the MSP of 'masoor' and gram (chana) by up to Rs 475 to Rs 3,800, and Rs 3900 per quintal respectively for the winter season.
- **Kharif pulses area has increased by 29.14 percent to 145.84 lakh ha till 23.09.2016.** Kharif sowing has entered the last phase now. Tur area increased by 40.21 percent to 52.89 lakh ha from last year. Urad area was registered at 35.48 lakh ha, higher by 25.33 percent this year. Moong area increased by 32.77 percent to 33.99 lakh ha. Kulthi and other pulses area increased by 10.14 & 10.35 percent respectively to 0.76 and 22.82 lakh ha. and normal crop condition ensure bumper kharif production this year.
- **Continuous rains in chickpeas growing belts of Australia has started threatening standing chana crop and its normal quality.** Heavy rains in Australia are sparking fresh outbreaks of disease among chickpeas. Mumbai tur opened at Rs7100, BMP opened at Rs8200 and chana opened at Rs 9400 per qtl. Burmese tur cnf was quoted at \$995, faq \$1220 & sq \$1255 per tonne. Australian chana at Mumbai was quoted at Rs9750/9800 per qtl. Tanzanian and ethiopian chana were quoted at Rs9600 and Rs 9400 per qtl. Chana prices may rule steady in domestic market.
- **Matar Canada is being quoted at Rs2425 to Rs 2450 per qtl. Russian matar is available at Rs Rs2301 per qtl.** Massor is being quoted at Rs 5400/5550 per qtl. As the CACP has recommended to increase MSP for chana and masoor for winter season, area under pulses is likely to increase in rabi season too and it would put pressure on price after likely bumper production in kharif.
- **Urad production too is likely to increase by 54.85 % from normal of 1.29 MMT (5 years ave) to 2.01 MMT.** It would be higher by 38.62 % from set target of 1.45 MMT. If we consider it from last year's production (1.39 MMT) it would be 42.76 % higher this year. Current uptrend is due to bad weather that may affect urad crop quality. However, once weather improves pressure may continue on urad in cash market.
- **Kharif moong production is expected to increase by 25.23 % from normal of 1.07 MMT (5 years ave) to 1.35 MMT this season.** It is higher by 10.66 % from the set target of 1.22 MMT. With increasing arrival, pressure might be seen on cash market. However, procurement on MSP would continue to lend support if prices move down to Rs 5225 per qtl. Cash market may continue to trade near MSP in coming weeks.
- **Other kharif pulses including peas production too are expected to increase by 21.56 % to 1.06 MMT.** It would be higher by 40.63 % from the kharif production (0.67 MMT) of last year. Overall condition for other pulses too seems under pressure. Production over 1MMT would help easing supply side in the market.
- **The govt. extends stock limit on pulses by another year till 30th Sep-2017.** The decision in this regard has been taken to control price rise and check hoarding. The union cabinet has given extension of stock limit on pulses. Almost all States seem in favor of stock limit on pulses. State governments can issue control orders with the concurrence of the central government on importers, millers, wholesalers and retailers as per requirements needed.
- **Govt has decided to increase buffer stock limit from 8 lakh tonne to 20 lakh tonne** to keep prices of pulses under control and encourage farmers. Out of 20 lakh tonne, 10 lakh tonne would be sourced from domestic market and the rest 10 lakh tonne from import. The latest decision is very crucial as it would help to stabilize price in domestic market and ease tight supply side.
- **As per market sources Indian importers have contracted 1.5-1.8 million tonnes of pulses for delivery till December-2016,** for which they are incurring losses due to declining trend in cash market prices. Agriwatch expects import defaults and re-negotiation of prices to take place soon. Recent crop damage due to water lodging is holding up urad prices. However, Urad price is bound to trade lower in coming weeks.

International:

- **According to Canadian grain commission (CGC) around 100MT of chickpeas were exported** in bulk through terminals and private elevators between September 12 and 18. Season to date exports total around 700 MT compared to 1600 MT in the previous marketing year. Around 10 percent of the crop is in the bin compared to 35 percent at the same time last year. This represents just 12000 MT of chickpeas compared to 32000 last year.
- **As per latest updates from Statistic Canada lentils production has been pegged at 2.87MMT** for 2016-17 season. It is lower than the estimate of 3.23MMT pegged in August-2016. For the latest updation satellite data and computer image has been used. Feedback received from farmers has been ignored to some extent.
- **As per latest update by Canadian grain commission**, season to date exports for chickpea total 600 MT, compared to 1500 MT during the previous marketing year. As on September 12, only 5 percent of the crop was in bin compared to 14 percent last year. In terms of quantity this represents almost 6000 MT of the new crop compared to 13000 MT at the same time last year. Commercial stock of chickpeas is around 8400 MT (3500 MT in Manitoba, 4600 MT in Saskatchewan, 300 MT in Alberta) and there are no chickpea in transit by rail to Canadian ports
- **Australia is heading towards bumper pulses production this year. ABARE has forecast 3.25 MMT** pulses production higher by 7.4 lakh tonne from last year. Five year's average production in Australia is 24.3 lakh tonne. Chickpeas production may touch 12.34 lakh tonne. It was around 10 lakh tonne last year. Field peas production would jump from 204,500 to 317,000 MT and lentils from 258,200 to 365,000 MT.
- **As per latest updates by USA Lentil and dry pea council pulses yields in 2016** are extremely high with excellent quality. (0% of the crop looks like US# 1 grade. Both lentils green and red were seen with very good color and size. Green peas color is excellent and a good size. This year's US crop is one of the best crops both in quality and quantity. Official data is still awaited.
- **Canada, and Stats Canada projects they could have the second largest crop on record** at 33.6 million tons. The most recent crop progress report has the Saskatchewan harvest at approximately 49% for Lentils, 63% for peas and 6% for chickpeas.
- **According to the latest Saskatchewan Agriculture's weekly Crop Report**, 40 % Lentils and 64 % Peas has already been harvested. Harvesting activities is in full swing as rain has stopped. The majority of crop damage last week was due to prolonged flooding and disease. There are some reports of bleaching of pulses in the region.
- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonnes in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fall near \$45/tonne in June as compare to May report due to higher production estimate.
- **According to the latest report, Canada Pea Production estimate** for 2016-17 is expected to increase by around 28 percent to 4.1 MMT. Canada is expected to produce 3.2 MMT in 2015-16. Due to higher production, exports are forecasted to reach 4.23 MMT in 2016-17 from 3.90 MMT in 2015-16. Farmers' bids are likely to decrease from \$360/390 to \$300-330 per tonne due to expectation of larger stock in Canada and increased world supply.
- **According to the latest ABARES report, Australian Chickpea production forecast** 2016-17 is 1090 kilo tonnes which are around 8% greater than 2015-16 production estimate of 1013 kilo tonnes. Australia chickpea production forecast is higher due to increase in area and favorable weather condition till now. Australian chickpea harvesting starts from mid September and crops start hitting India market from October onwards.
- **According to the apk-inform, Russia pea export** during 11 months of 2015/16 MY (July-May) reached 6.95 Lakh tonnes which is around 89 higher than 2014/15 MY export of 3.68 Lakh tonnes. India imports of pea from Russia also increased to 0.70 Lakh tonnes from 0.65 Lakh tonnes.

Weekly Outlook: -Pulses prices are likely to stay steady to slightly weak except chana.

AGRIWATCH Agri Commodity Indices – 1st October, 2016

According to Agriwatch Commodity Indices, Pulses Index rises to 216.70 (4.4 %) on w-o-w basis.

Agriwatch has recently launched its AW Agri Commodity Indices to enable organizations access independent Indices to track and use to benchmark their purchases and sales. The Indices are based on the daily prices in the key benchmark markets for each commodity that AW has been covering for the past decade. The indices include an Aggregate Index, Category Indices and individual commodity indices. The weekly indices are free to access on our website www.agriwatch.com. The daily indices are available on subscription. Please contact for more details.

Pulses-Wise Scenario

Chana

Market Recap:

Chana prices noticed steady to firm tone during the week.

Current Scenario:

Chana noticed steady to firm movement during the week and price range was Rs.9000-9800 per quintal at major markets. Cash market may trade steady to slightly firm. Imported chana at Mumbai is being offered at Rs 5350 5450 per qtl. for end Oct/Nov delivery. Following graph illustrates the chana price movement in different markets:
