Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights

Domestic:

- **Restricted trading activities and likely higher volume of import** have pressurized cash market further. With expected huge volume of import by December end pulses market in India is bound to decrease in coming months despite tight supply side and disturbed trading activities. Arrivals from major producing states like A P, Karnataka, Telangana and Maharashtra in Delhi market have decreased in last two weeks and there is no hope for any recovery by the end of this month. Despite lower arrivals prices of pulses have decreased by 5 to 10 percent as buyers remain side lined.
- **As per latest update by consumer affair ministry govt. will try to procure 2MMT** pulses by June next year for buffer stock and sell it in domestic market in case prices rise and supply situation gets tight. Govt has procured 6 lakh tonne pulses so far and the rest will be procured in next 6/7 months including one MMT from global markets. Pulses production is estimated to cross 20 MMT in 2016-17. In current MY India has imported around 3.5 MMT pulses in which PSU contribution is around 4 Lakh tonne so far. Likely Bumper production in ongoing Rabi season would ease pressure at supply front and import volume may decrease in the medium term.
- **By December end Prices are expected to decrease more as around 20-22 lakh tonnes** of Chana, Masur and Tur would reach at Indian ports from Australia, Canada, Myanmar and Africa. Prevailing market conditions have increased fears of importers regarding sale of imported pulses in domestic market. New arrivals, imported large volume and sluggish demand would put more pressure on domestic dal market and prices may dip 10 to 15 % more from current level. Besides after bumper kharif crop Rabi sowing is running ahead by 6 percent and there is good production prospect so far.
- **Price of yellow pea has plummeted to \$300 a tonne from \$380 a tonne in last three weeks.** Yellow peas from Canada, Russia and Ukraine as also new chickpea crop from Australia have begun to arrive on Indian shores says market experts. Yellow pea import in next three months including Nov may touch 15 lakh tonne. It will ease the tight supply side and augment availability. Australian chickpeas are offered at around \$850 a tonne.
- **India imported 283426 tonne pulses during 6th to 13th Nov-2016, higher by 16.14 %** from previous week. It had imported 244024 tonne pulses during week ended 6th Nov-2016. The highest quantity was of yellow peas out of total import during the week. India imported 193883 tonne yellow peas, 32699 tonne Tur, 7043 tonne Urad and 11358 tonne Chana. During this period. Besides, 33206 T Lentils has been imported. The rest were other pulses including kidney beans.
- **India imported 1002 containers pulses at JNPT port** as on 21st Nov-2016. Out of total major share was of pigeon pea. Around 874 containers of pigeon pea were landed. Chickpeas contribution was registered at 92 containers. Lentil contribution was registered at 20 containers. Besides black eye beans contribution was only 3 containers.
- India imported 254 containers pulses at Chennai and Krishnapatnam ports from 7 to 10th Nov-2016. Out of total share of Urad was 57 containers, Tur 52 containers, Lentils 42 containers, Yellow peas -25 and Chana -6 containers. Import flow has increased and higher volume would continue till December.
- **As monsoon has been favorable so far, govt has fixed 207.5 lakh tonne production target** for pulses this year. It expects 135 lakh tonne pulses production from Rabi season while kharif pulses production is expected to touch 87 lakh tonne. Production of Moong, Urad and Tur has increased considerably due to higher area coverage and congenial weather condition.
- **MP Govt has decided to end stock limit on pulses. Notification regarding this is** expected in next two-three days. Until recently, big traders were not permitted to stock 2000 qtl. of pulses. It was 1000 qtl for small traders. Due to imposition of stock limit traders were unable to participate in tenders for imported pulses by MMTC and NCF. Now participation is expected to increase.
- **As per the latest notification if retail sale price of any essential commodity is fixed** and notified by the competent authority under the Essential Commodities Act, 1955, the same will be applied on essential commodities that are sold both in loose and packaged form in retail markets.

International:

- **Chickpeas import from US In India is increasing fast. India imported 20607 MT Chickpeas in Sept** and Volume is expected to be higher in Oct. Data is awaited. Surprisingly, it is 73 % of total Chickpeas export from US in a month. Turkey and Spain brought the rest volume. The reason behind higher import from US is said to be crop loss around 70 % in Canada due to wet condition.
- **Lentils import volume from US too increased to 19326 T, around 30.9 % of total lentil export in a month.** India imported 74526 tonne dry peas from US too, 75.4 % of total dry peas export in a month. India imported 1.14 lakh tonne pulses from US out of total export of 1.9 lakh tonne. Higher import volume is likely to continue as prices in India still rules higher despite decreased price.
- **Pulses prices in Canada have moved up in recent weeks. Lentils local quotes for Number 2 Laird varieties** are currently hovering in the range of 48 to 61 cents per pound in Western Canada. Green pea prices range from C\$7.50 to as high as C\$9.00 per bushel.
- **Farmers in Australia have been taking advantage of higher chickpea price.** Drought affected crop and tight supply side have temporarily lent support to chickpea price from AU\$800 per tonne to AU\$1,000 per tonne. However, firmness would not sustain in the medium term once Indian crop starts hitting the market in Feb this year.
- **USA has exported 189,436 MT pulses in the month of Sept. Out of pea contribution** was recorded at 98779 MT. It has exported total 62,400 MT Lentils, higher than record export of 41961 MT recorded in April, 2013. Chickpea exports exploded for the month, hitting 28,257 MT, an amazing 130% higher than the prior one-month record of 12,290 MT set in October 2011.
- **News Of crop damage (Lentil) in Australia and good export demand for Canadian Lentil** have lent support to red Lentil, Laird 1S despite better production estimates. Prices of Lentil in Canada have increased 3 to 4 cent per pound to 62/63 in last one week. However, Chickpeas traded steady at current level of 53 cents a pound. Yellow peas too traded steady at 8 cents per pound. Its impact on Indian market may be felt in the weeks ahead.
- **The Canadian Grain Commission latest report based on latest sample** result says that protein content in Lentil crop is higher by 0.9 % to 26.6 % this year against 25.7 last year. The result has been concluded by surveying green and red varieties collected from two major producing states like Saskatchewan and Alberta. Higher protein content found in Lentil is encouraging and the main reason for this is attributed to better weather conditions in growing regions. Despite higher protein content steady price trend may prevail as supply side is ample.
- **Canadian government has increased its forecast for dry beans and chickpea prices** as Indian government has stepped in to control prices. In case of chickpeas, prices to farmers are expected to rise between Can\$950-\$980 per tonne for 2016-17 compared to last month estimates of Can\$790-\$820 per tonne. This forecast is also higher by around Can\$135 per tonne compared to last year. The rise in forecast is mainly due to strong export demand.
- **According to the latest update by market viewers in Australia, Lentil crop** in some pockets of western Australia has been affected by severe outbreaks of botrytis grey mould. Experts say that South Australia and Victoria alone have planted 2.5 lakh ha Lentil this year and out of this 50 % is said to be affected by this botrytis grey mould. Quality and yield is expected to be affected badly and it would reduce the final size of the crop.
- **Chickpea crop in Canada is said to be affected and concern over quality has increased now.** Firm tone continued in local market and market may trade steady in coming weeks too despite expectation of more arrival in coming weeks. India and Mexican crop is far ahead and till then Australia, Canada and Ukraine/Russia have to bridge the gap. By mid October only 25% chick pea crop in Canada has been harvested. So, quality concern has increased and major portion of crop may be used for feed purpose. Currently Chickpea is being quoted at 53 cent (Canadian \$) per lb in Canada.
- **Chickpeas export from Russia increased around 19 percent to 72800 tonne** from July to Sept-2016. Russia had exported around 60200 tonne chickpeas in corresponding period last year. Out of total export of chickpeas from Russia Turkey brought around 60 percent while India purchased around 22 percent. As supply side is tight in India import flow of chickpeas from various origin would continue to flow in coming months.
- **As per the latest ABARE update chickpeas production in Australia may increase** to 12.34 lakh tonne in 2016-17. The production estimate for 2015-16 was 10.13 lakh tonne. Higher price of chana encouraged farmers to grow more chana and the trend may continue if prices continue to rule at higher level. Area under chickpeas is forecast to increase from 6.61 to 8.22 lakh ha in 2016-17. Lentil production too may move up from 2.58 to 3.65 lakh tonne for the same period.

November 21, 2016

- **According to the latest report, Canadian Lentil production estimate** for 2016-17 is expected to increase by around 37% to 3.25 MMT. Last year (2015-16) estimate is 2.37 MMT. Due to higher production, exports are forecasted to reach 2.4 MMT in 2016-17 from 2.30 MMT in 2015-16. Season ending stock is expected to increase from 0.07 MMT to 0.65 MMT. Farmer's average bids are likely to decrease from \$985/1015 to \$765/795 per tonnes in 2016-17 due to a more normal grade distribution and record Canadian supply. Farmer's average bid fall near \$45/tonne in June as compare to May report due to higher production estimate.

Weekly Outlook: -Pulses prices are likely to stay steady to slightly weak,

AGRIWATCH Agri Commodity Indices – 6th November, 2016

According to Agriwatch Commodity Indices, Pulses Index decreases to 221.71 (-4.20%) on w-o-w basis.

Agriwatch has recently launched its AW Agri Commodity Indices to enable organizations access independent Indices to track and use to benchmark their purchases and sales. The Indices are based on the daily prices in the key benchmark markets for each commodity that AW has been covering for the past decade. The indices include an Aggregate Index, Category Indices and individual commodity indices. The weekly indices are free to access on our website www.agriwatch.com. The daily indices are available on subscription. Please contact for more details.

Pulses-Wise Scenario

Chana

Market Recap:

Chana prices noticed weak tone during the week under review.

Current Scenario:

Weak momentum continued in the beginning of review week due to weak demand. Retail buyers are away from markets as money crunch is affecting normal trade. Besides, arrivals from South India to North and Central India have put pressure on price. More dip is expected from this weak as Chana starts arriving at various port from Australia. Chana price traded in the range was Rs.9000-9500 per quintal in Delhi market. Imported chana at Mumbai is being offered at Rs 5800/5900 per qtl. for December delivery. Following graph illustrates the chana price movement in different markets:
