Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Pulses market traded weak as demand remained subdued. Govt's attempts to arrest** decreasing prices, would take time to support market.new Tur is coming into the mandis. Chana crop condition is good so far. Moong and Urad crop is facing demand crunch at higher level. As Masur crop is in good condition, uptrend beyond a certain level is unlikely.Fresh demand is expected from mid January. Overall sentiments for pulses market remains weak in the short term.
- **The competent authority in the dept. of agriculture, co-operation & farmers welfare, ministry of** agriculture and farmers welfare has decided to extend the relaxation of fumigation regulations for import of agriculture commodities for which fumigation treatment with methyle bromite is stipulated in the plant quarantine order,2003 till 30th June 2018. association
- **NCDEX has imposed special margin of 15 % over and above 5% imposed earlier, in all** running contracts in short side, from 1st Jan -2018. Now applicable total addition margin on short side would be 20%. It is expected to support Chana price to a certain extent in the near term. As crop size is higher and new crop in few of the states has started, any major spike in Chana market is unlikely. So, selling at higher level is good.
- **Nafed has procured around 196830.57 lakh tonne moong from kharif 2017 crop at MSP of** Rs.5575 till 1st week of Dec. Procurement period in Karnataka ended on 24th Nov-2017 while it has just completed in Telangana. Rajasthan contributed maximum quantity of 166266.08 tonne, Karnataka contributed 21902.13 tonne, Maharashtra 4163.04, Telangana -3329.25 and AP- 1170.05 tonne so far. Procurement in Rajasthan, Maharashtra and AP is still on.
- **For ensuring MSP of Pulses, the union govt. has written to all state govts.to start decentralized** procurements of commodities including pulses and for which the central govt. will bear the cost. Positive response has been recorded so far. Opinion of all State Governments over new mechanism is awaited now. Madhya Pradesh and Haryana are paying differential costs to farmers, in case prices fall below the MSP. The Centre had set up a Price Stabilisation Fund under the Ministry of Food and Consumer Affairs for maintaining a strategic buffer stock of agriculture commodities
- **Area under pulses rose by 9 per cent to 150.63 lakh hectares in the ongoing rabi (winter-sown)** season so far,according to the official data.Area under pulses was 150.63 lakh hectares so far in this rabi season as against 138.34 lakh hectares, a year- ago.As per preliminary reports received from the states, the total area sown under rabi crops as on December 29, 2017 stands at 565.79 lakh hectares as compared to 571.47 lakh hectare this time in 2016.India produced a record 275.68 million tonnes of foodgrain in the 2016-17 crop year (July-June).
- **Tur Lemon Moved Up By \$5 To \$355 per T in Myanmar.As crop size is lower** than expectation, Urad FAQ moved up by \$35 to \$505 per tonne and SQ moved up by \$30 to \$625 per tonne in Myanmar. However, it traded down in Indian market after slight recovery. With new arrival due from UP,pressure is building up once again.Moong Pakako is being offered at \$690 per tonne.

International:

- **Pressure of Australian lobby on India to allow a transition period for newly introduced tariffs on imported pulses to avoid any disruptions to existing contracts.** Notably India has imposed 30 % import duty on Chickpeas and Lentil last week & 50 % duty on peas earlier. Australian Trade Minister Steven Ciobo has asked India for a period of transition for the tariffs on chickpeas and red lentils and was seeking a swift resolution. Analysts estimate that India accounts for about half of the shipments. Australia exports \$935 million of two pulses (Chana & Lentil) each year.
- **Global lentil markets ended with a mixed tone. Prices of red, traded range bound on the week,** while the spread between U.S. and Canadian green lentils widened to some extent. There is a concern in global market that India could impose an import duty on the product, given the risk that seeded area in India could match or exceed last year. Though the pace of seeding has slowed compared to last year, farmers in that country have sown 1.553 million hectares as of December 15, compared to 1.526 million during corresponding time of the previous rabi season.
- **Kabuli chickpea markets finished the week's trading on an uncertain note, with** markets for small caliber product destabilized by an increase in the number of Argentine farmers bypassing traditional exporters. Markets for large caliber product were unchanged on the week, with Mexico virtually sold out of product and Indian exporters holding firm on prices for 10mm and larger caliber kabuli chickpeas.
- **As per latest US dry pea and lentil council, dry pea export from US declined around 75% lower** than last year in Sept-2016. Indian demand has decreased considerably due to bumper crop size. Even China has bought less quantity of peas. China has bought 2890 MT, followed by India 2005MT and Mexico 1740 MT. Export data for pea from US for Oct is awaited.
- **Chickpeas production in Australia is expected to decrease from 11.88 to 10.55 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Chickpeas production in Australia is expected to decrease from 11.88 to 10.55 lakh tonne** in 2017-18 from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition, Lentils production would decline to 4.19 lakh tonne. Even field peas production is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Canadian Chickpeas Agriculture Canada, has updated its production estimate** for Chickpeas for marketing year 2017-18. According to new update Chickpeas production in Canada will improve from 58,000 (old estimate) to 81,000 tonne against 82,000 tonne produced last year. Export has been pegged

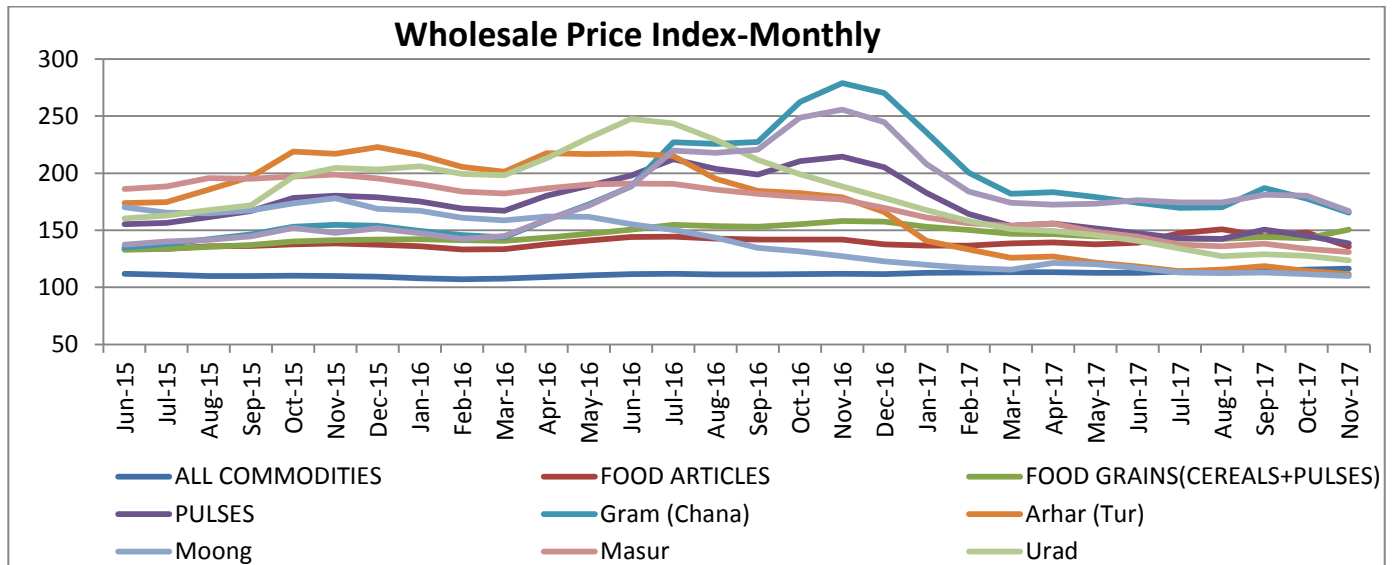

at 85,000 tonne in MY 2017-18 against 1.52 lakh tonne during previous MY. Domestic use has been forecast at 6,000 tonne against 16,000 tonne last year.

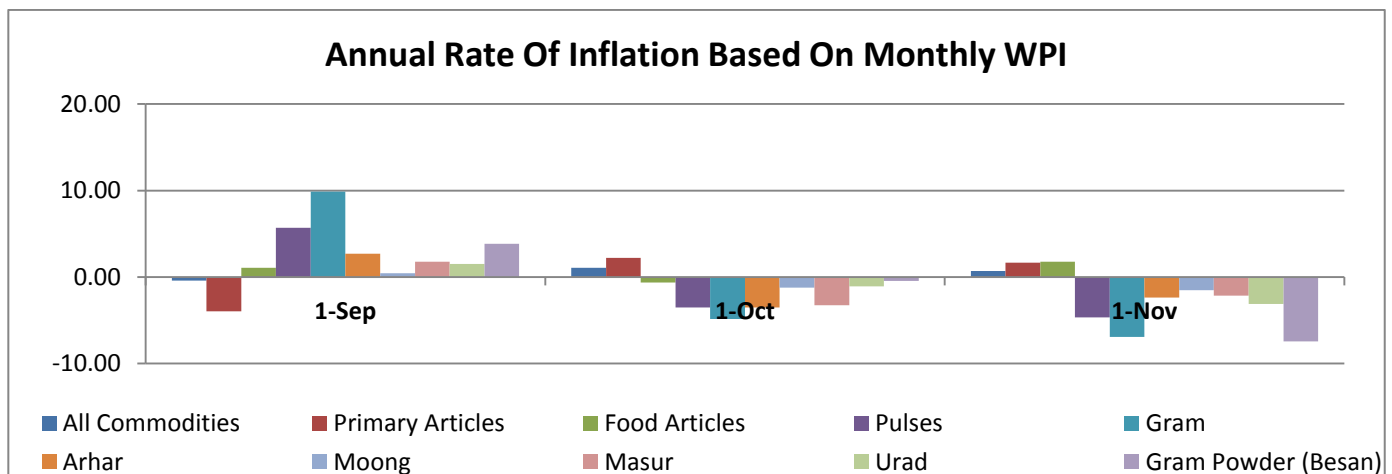

- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18** as bumper production seems very much on the card. Ukraine produced 7.45 lakh tonne peas last year.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak due slackened demand and decreased trading activities in the beginning of the new year..

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 6.8 point from 145.2 in Oct to 138.4 in Nov-2017.

Pulses-Wise Scenario:

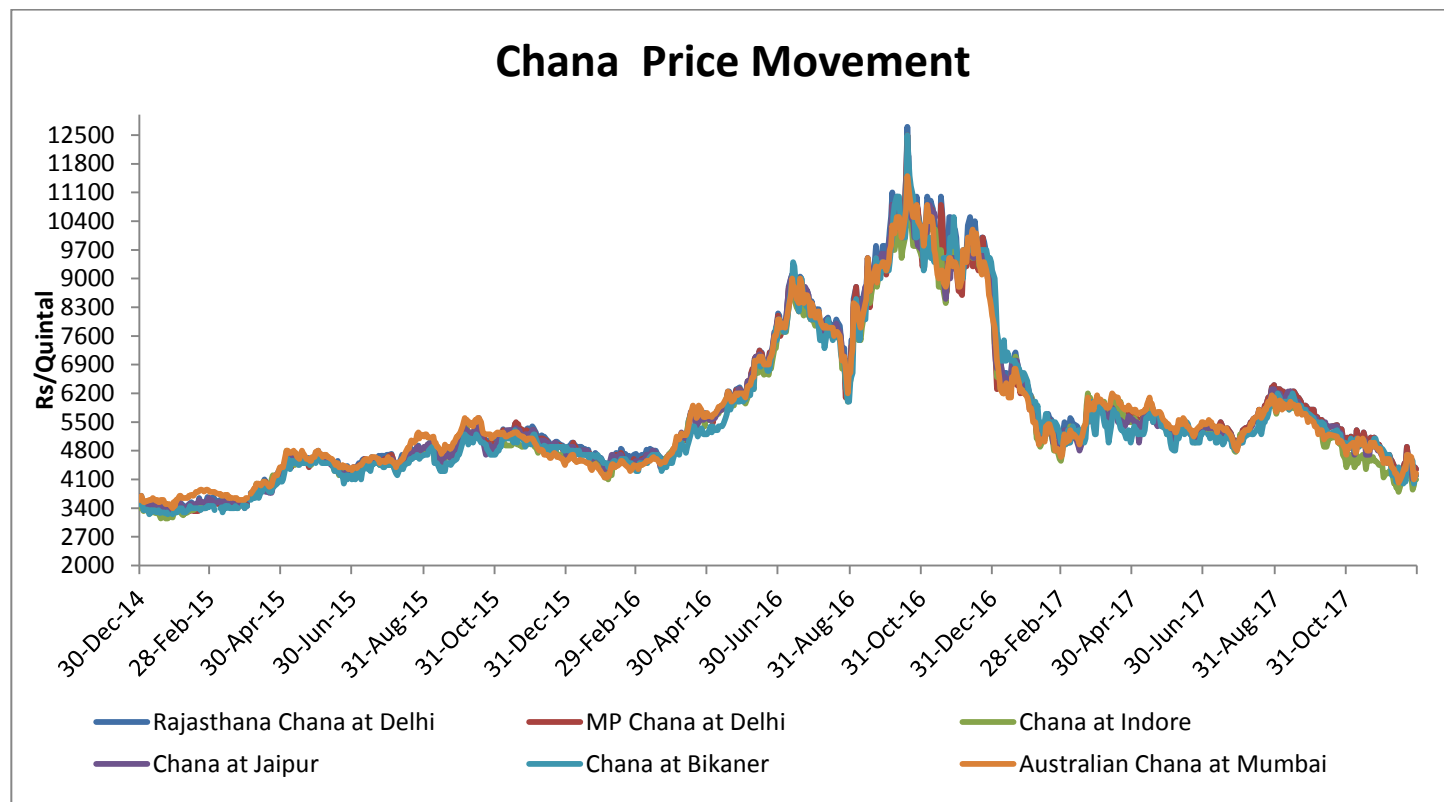

Chana

Market Recap:

Imposition of 30 percent duty could not lend support to cash chana market due to big crop size (95.56 lakh tonne) and commencement of new arrivals in Karnataka and some parts of Maharashtra. It would continue to pressurize Chana cash market once again. Crop condition is good so far. Arrival pressure from Karnataka is expected from Jan end. Australia is offering Chana at \$645 per tonne for Jan delivery. Importers are avoiding fresh deal due to import duty and availability of chana at lower price in domestic market. At export front there is no parity at current price. Agriwatch expects some export in the second half of the year. Overall tone remains weak.

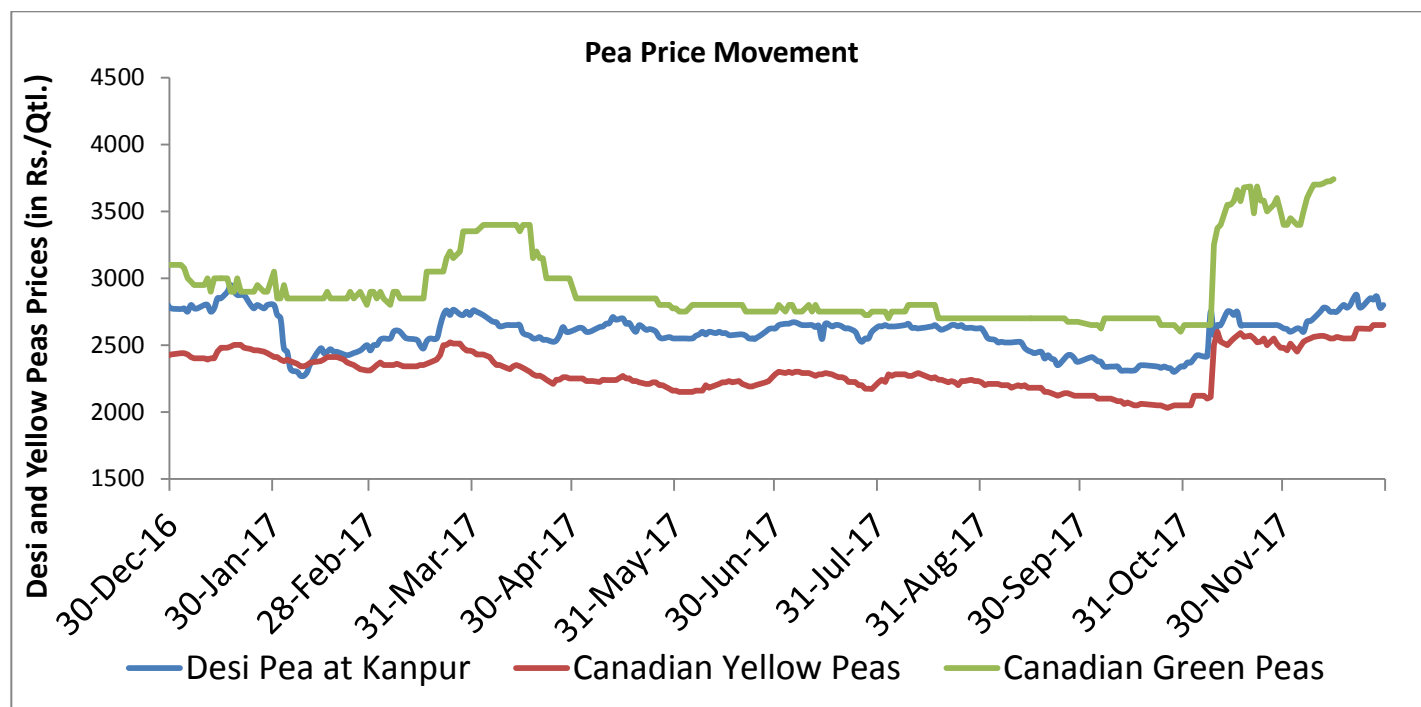

Current Scenario:

Chana all India average price increased by 2.41 percent to Rs 4236 per qtl. Any recovery is unlikely despite imposition of duty and additional margin on short side on NCDEX. In Delhi market it is being traded at Rs 4350 per qtl. In Mumbai Australian Chana is being offered at Rs 4200/4250 per qtl. Overall outlook remains weak for Chana in the medium term. Dal export is possible in the second quarter of the new the year. It is better to sell chana stock than to retain it. Following graph illustrates the chana price movement in different markets:

Market Outlook: Steady to weak tone may prevail .Selling on rise is good for stakeholders.

Peas (Matar):

Market Recap:

Peas market traded almost flat during the week under review. Slight recovery seen earlier is unlikely to continue. With decreasing chana price, pressure on peas may continue. Chana may trade weak. So peas too is expected to trade lower in coming weeks. Besides, new crop would hit market in Feb, so there is no concern on supply front right now. If prices start moving up, govt has option to decrease duty. Right now 50 % duty is applicable on all peas. The average price increase by 0.27 % to Rs 2828 per qtl. It may trade steady to slightly weak in the near to medium term. Import flow is expected to come to a halt. Coverage area is likely to increase due to price factor.

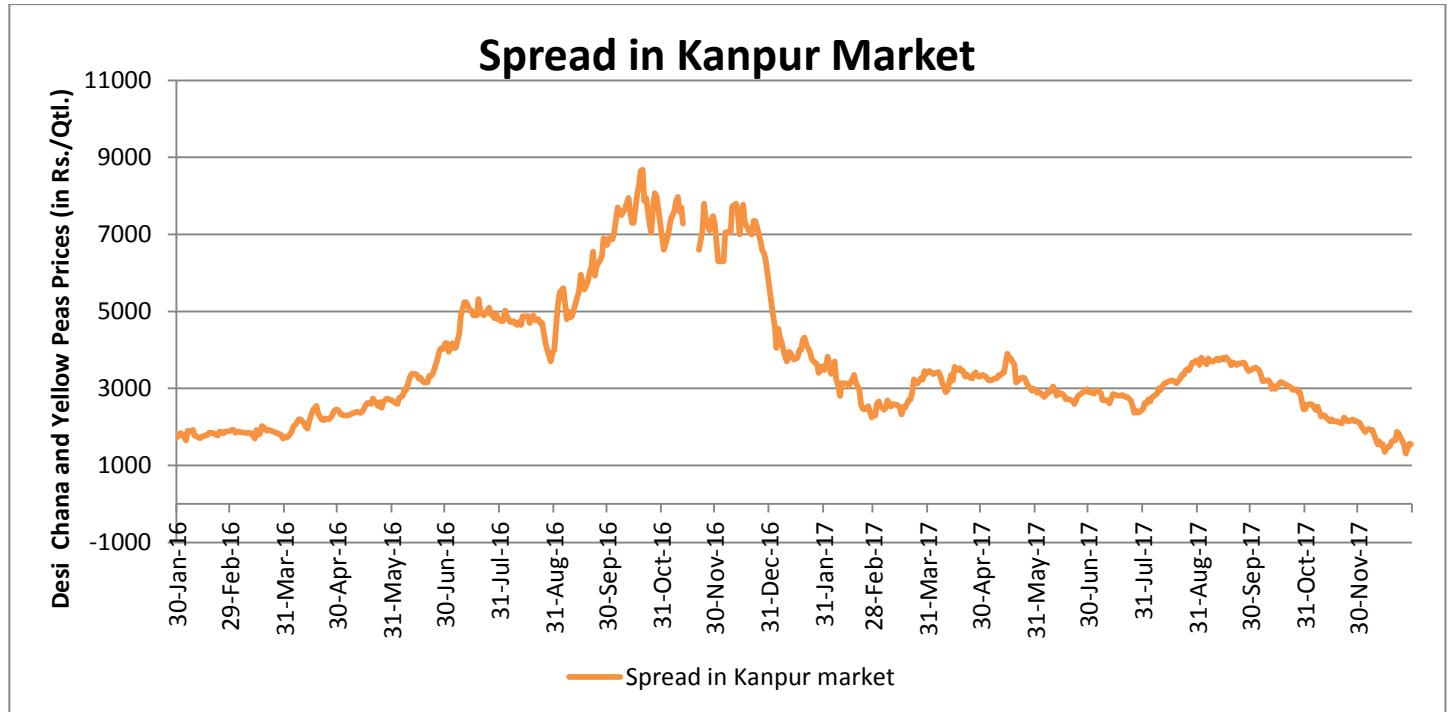

Current Market Dynamics & Outlook:

At Kanpur, Desi Peas traded steady at Rs 2800 due to decreased chana price. Average price moved up by 0.27 % to Rs 2827 per qtl. Firmness is unlikely due to commencement of chana arrival. Average price of all peas increased by 0.32 % to Rs 2723 per qtl. Canadian matar is being traded at Rs 2651 in Mumbai while Russian Matar quoted at Rs 2641 per qtl. There is no quotes for imported Hari Matar (green Pea). Market is expected to trade steady to slightly weak in the near term to medium term. With current applicable duty, import is not attractive.

Spread With Chana:

Spread between Chana and Peas at Kanpur market decreased by Rs 85 to Rs 1539 per qtl owing to increased peas and decreased Chana price. Spread is expected to move in the range of 1500 to 1650 per quintal in the coming weeks on relative movement in Chana prices. Overall outlook seems steady to weak despite imposition of duty.

Market Outlook:

Outlook remains steady to slightly weak this week.

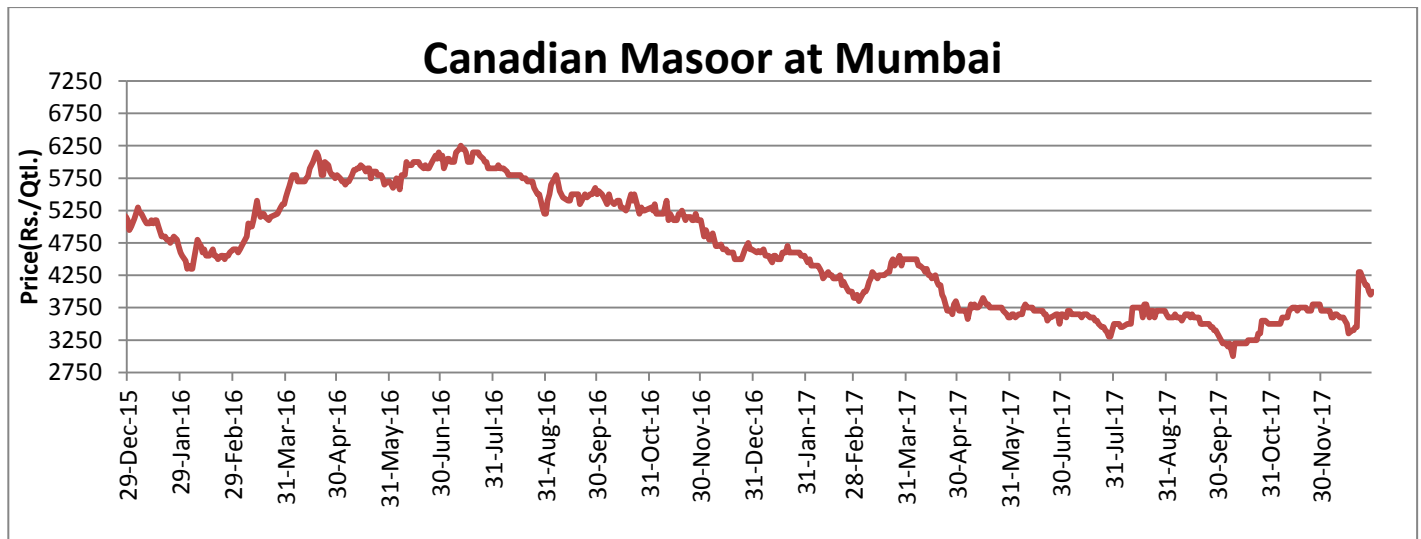

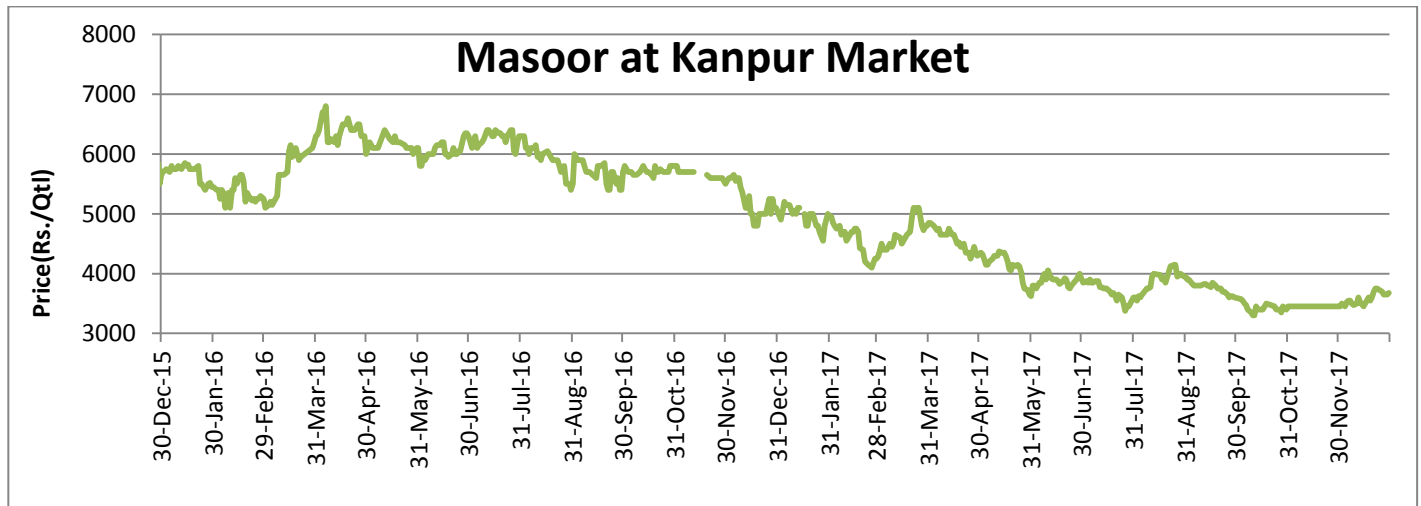

Lentils (Masoor):

Market Recap:

Kanpur market opened with a firm note in the beginning of the week and traded higher due to imposition of 30% import duty. Area under Lentils is bound to increase this year as overall sowing trend is higher by 4.21 % to 16.57 lakh ha so far. Overall sentiments remain steady to slightly firm in the short term. Stakeholders should buy on dip. Market is expected to move up By Rs 200 more from current level due to imposition of duty. Demand at higher level gets affected.

Current Scenario:

Weekly average price increased by 1.74 % to Rs 3679 per qtl. Currently in Mumbai it is being quoted at Rs 4000 per qtl. Canadian Massor is showing steady to firm movement and was traded in the range of Rs.3950/4000 per quintal. Weak tone may prevail this week too due to slack demand. The following chart shows the masoor prices movement in key markets:-

Market Outlook: Prices are likely to notice range bound to slightly weak movement this week.

Pigeon Pea (Tur/Toor):

Market Recap:

Tur market traded almost steady due to commencement of procurement, lower crop size in India as well as in Myanmar. Importers are stocking Tur in Myanmar and around 3.0 lakh tonne tur has been purchased so far. Stock in domestic market is coming down. Telangana govt would procure around 40,000 tonne from new crop. Karnataka govt too has commenced procurement. So downward trend is unlikely despite new crop coming into mandis. It is being traded at Rs 4000 to Rs 4400 per qtl in various markets. Steady to slightly weak tone may prevail this week. Demand at higher level gets affected.

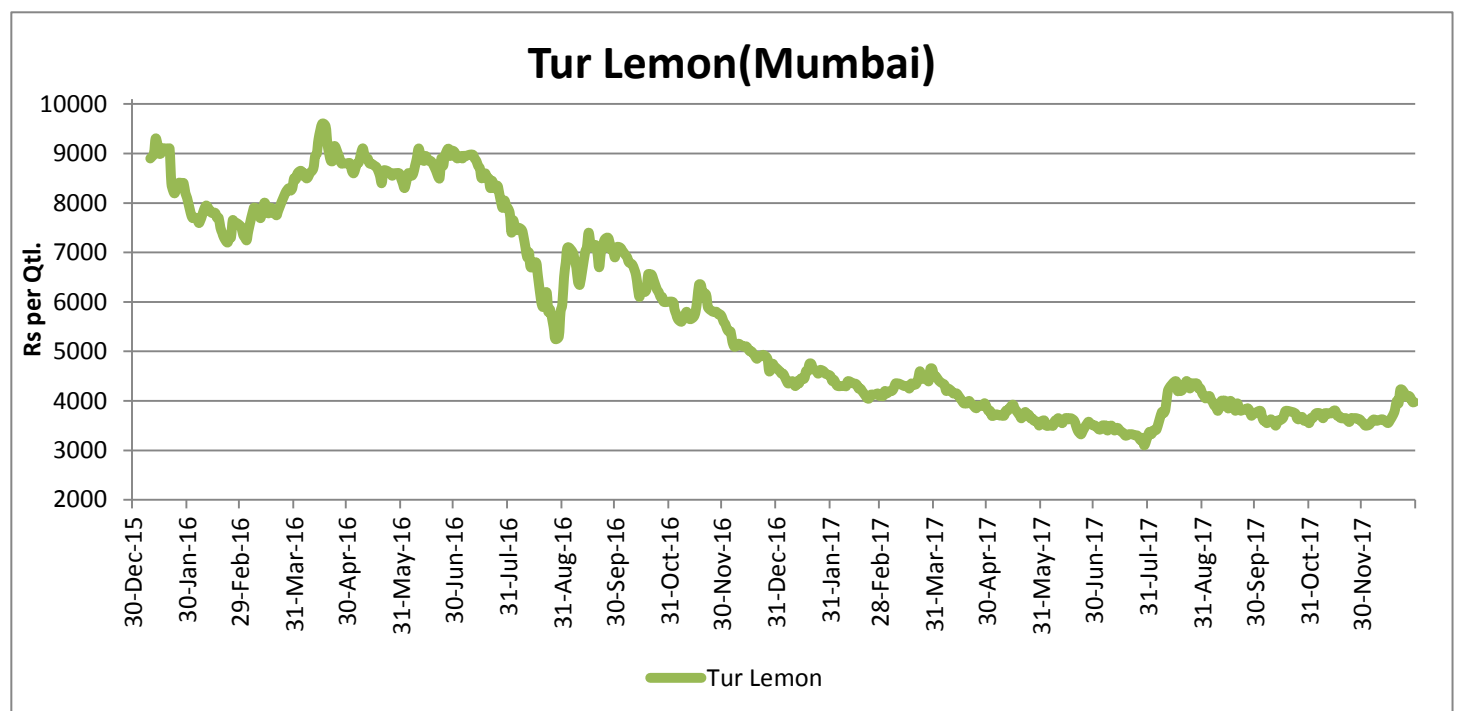

During review week, Desi and imported Tur traded down due to weak demand. However, any major dip is unlikely. Opening up dal export and restricted import quantity from Mozambique may support Tur market at

current level despite arrivals from new crop. Govt.'s buying too may support market. Agriwatch expects export in the new year after March/April to a certain extent. However, one way uptrend is unlikely as govt has around 0.4 MMT stock. Market is expected to stabilize at current level. Buying on dip is good

Current Market Dynamics & Outlook:

Imported Tur prices noticed steady to weak movement during the week under review. Stockists continued to retain stock despite new arrivals. Yield is considered to be lower by 5 to 10 % this year. Short term outlook remains weak. Tur lemon (imported) average price for the week, increased by 1.69 % to Rs 4491 per qtl in Gulberga. While lemon tur is being quoted at Rs 3900/3950 in Mumbai market. Steady to weak tone may prevail in the market.

Red Tur At Gulberga(Rs /Qtl.)

Market Outlook: Tur prices are likely to show steady to slightly weak movement this week.

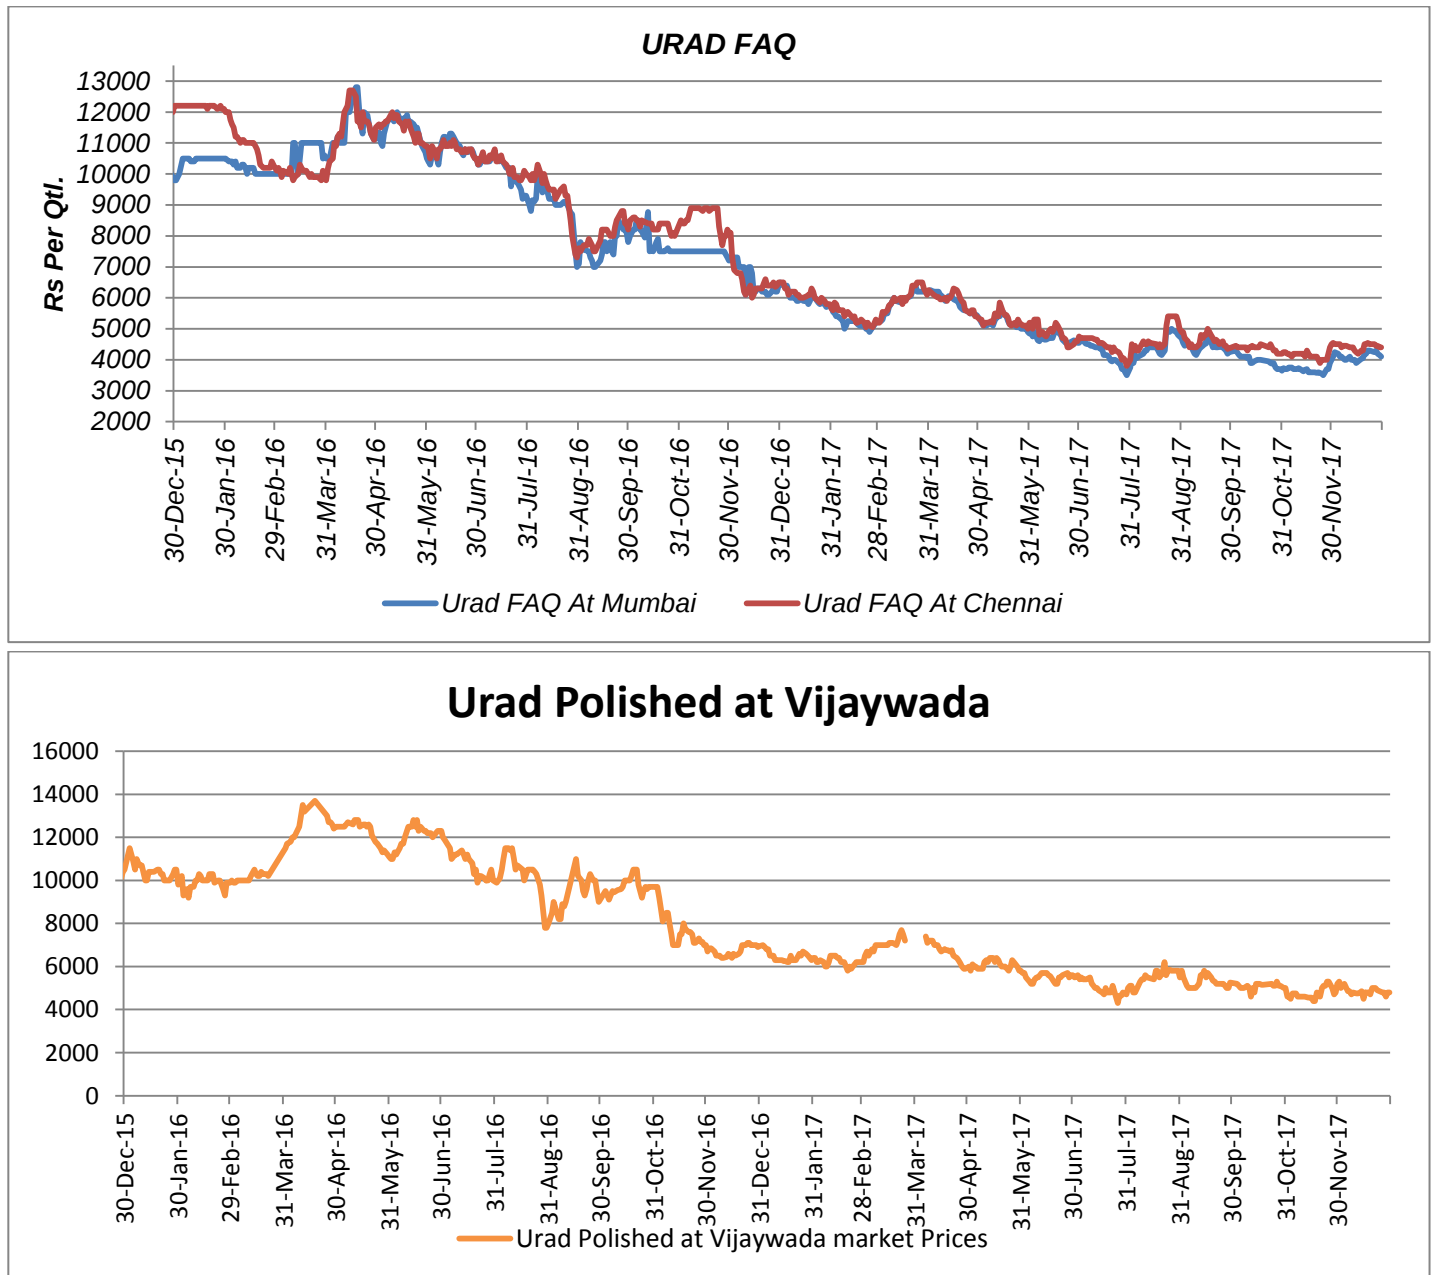

Black Matpe (Urad):

Market Recap:

During the review period, imported and desi Urad prices noticed weak momentum due to weak demand at current level and good crop condition. Commencement of procurement could not lend much support to Urad market. Rajasthan govt is going to buy 60,000 tone on MSP. Urad FAQ Mumbai is being quoted at Rs 4100 and in Chennai at Rs 4400/4450 per qtl. Steady to slightly weak tone may prevail.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.4100Qtl.) and Chennai (Rs.4400/4450Qtl.) noticed weak tone, at Vijayawada prices traded at Rs 4800. Steady to slightly weak movement might be seen in Urad market due to weak demand. The following graph shows the prices movement in different markets:-

Market Outlook: Urad Prices are likely to show steady to weak momentum this week .

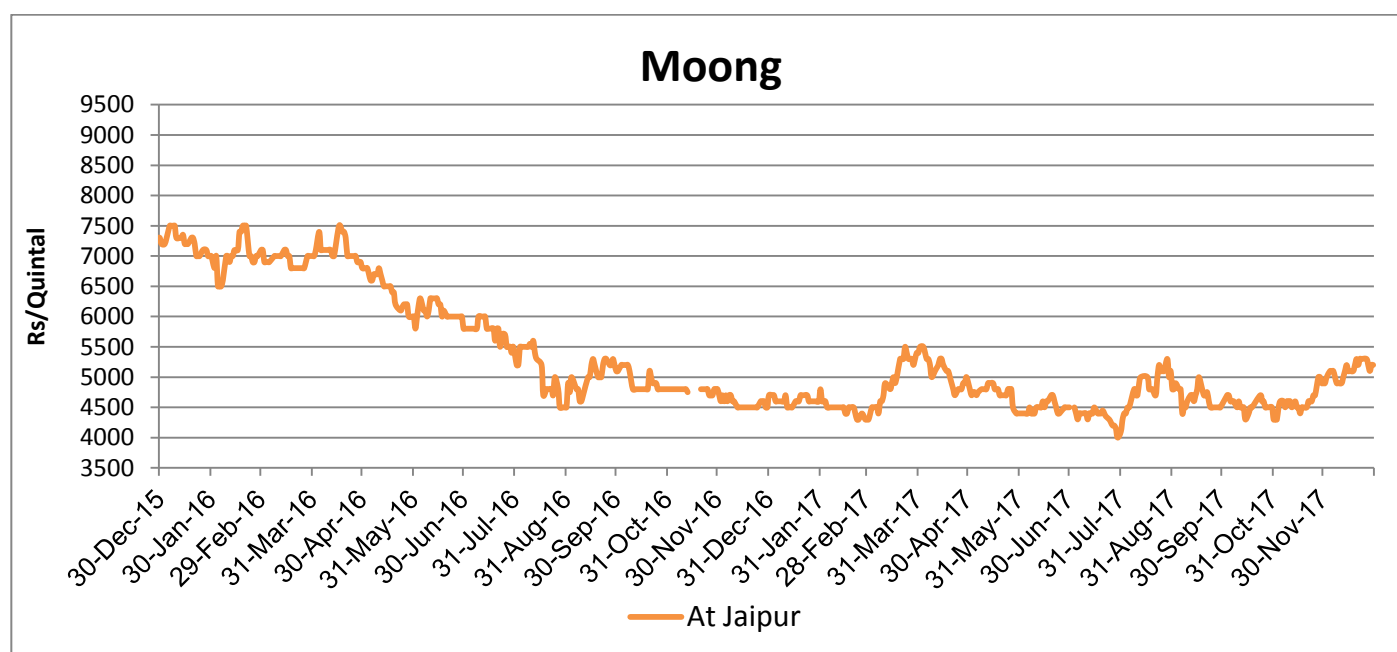

Green Gram (Moong):

Market Recap:

Moong demand at higher level gets affected. Steady to weak tone is expected in the cash market. Fresh demand may support market by mid Jan. Rajasthan govt would buy Moong worth Rs 1524 crore to support price. Besides, arrival is declining. Overall tone remains weak. Steady forward quotes and commencement of procurement remain supportive for Moong market. Sellers have restricted selling. Moong moved up at Rs 5200 during the week under review. It would continue to move towards MSP level. Export opportunity is intact, with Indian and Burmese price coming to same level. As prices have increased by Rs 600 per qtl., downward correction is expected. Overall tone is weak..

Current Market

Moong at Jaipur showed steady to weak movement and traded in the range of Rs 5100 to Rs 5200 per quintal. Market may trade steady to weak this week due to weak demand factors. Burma offers Moong Pokako at \$690 per tonne.

Market Outlook: Moong prices are likely to trade steady weak in the near term.

All Pulses Progressive Sowing As on 29th Dec 2017 (Update awaited)
