Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Govt. has intended to give 1.5 times more than actual production cost of food-grains**, to farmers and would develop infrastructure for the same. It may support pulses market too in the medium term. Budget is said to be favorable to the farmers. Pulses market traded steady to weak. Arrival pressure is expected to increase for Chana, Tur, Moong. Besides, Urad and Moong is being sold from central pool stock. It would restrict the market from getting firmer in the near term.
- **Tur procurement in Maharashtra commences. It may check decreasing prices of Tur** in mandis of Maharashtra. Central govt has green signaled, to buy 4.46 lakh tonne Tur in the state. Around 1.2 lakh farmers have registered so far
- **Nafed procured 66897.20 tonne Tur at MSP till 23rd Jan-2018 from kharif 2017-18 crop.** Karnataka has contributed around 33392.83tonne so far. Telangana has procured 33504.37 tonne so far. Telangana has met its procurement target. However, procurement target has been revised up and procurement date extended to 28th Feb-2018, Total Tur purchased by Nafed has increased to 1,33,794.41 tonne till 23rd Jan-2018.
- **Improved demand for Chana and increasing temperature in major producing region** of Rajasthan like Churu, Bikaner, Nokha and Tara Nagar, has increased fear of a 20/25% yield loss. The fast increasing temperature and in interrupted electricity supply remain major hurdles for irrigating standing crop in these regions. These developments have lent support to Chana market. Market is expected to move up Rs 100 more from current level. Delhi Chana traded at Rs 4000-4100 per qtl.
- **Tur procurement in Maharashtra commences from today. It may check decreasing prices of Tur** in mandis of Maharashtra. It may trade steady in Gulberga and other producing regions. Central govt has green signaled to buy 4.46 lakh tonne Tur from the State. Around 1.2 lakh farmers have registered so far. As crop size is lower, steady to firm tone might be seen once again.
- **Moong market traded under pressure and it may continue, due to stockiest's selling.** They are releasing stock to buy other rabi pulses. New crop from Odisha started coming into mandis. So prices may fall by Rs 100-Rs150 more from current level. In Jaipur mandi it is being traded at Rs 4700-4750 per qtl. Uptrend is unlikely as selling from central pool stock continues.
- **Urad demand in south India has improved and stockiest have restricted selling** in open market despite ample stock available from last year's crop. There is a rumour in the market that govt is going to give 10% subsidy on exports of pulses and dal and import duty on pulses may be increased to 50 % for all pulses. All these developments have lent support to Urad market. It traded at Rs 4400 in Chennai market, up by Rs400 from previous close.
- **Pulses output during Rabi 2017-18 season is expected to touch 87.1lakh tonne**, slightly lower than 94.2 lakh tonne produced in 2016-17. Higher area & good climatic condition so far may push rabi pulses area to around 165 lakh ha this year. It will give India additional 25 to 30 lakh tonne pulses which would be available in MY 2018-19. If we add kharif production, total availability would be around 245 to 250 lakh tonne, almost equal to normal consumption.
- **Chana prices continue to reel under pressure despite government's various attempts to arrest** the decline. Chana in Delhi market traded at Rs.3850-3900 per quintal. With new arrivals, prices are likely to rule much below MSP. Private buyers are very watchful and expect prices to fall below 3500-3600 level in Feb. There is no immediate impact of imposing 30% import duty on Chana, though it would help market in second half of the year.
- **Weakness in Lentil market would prevail and it may touch 3000 level just ahead of new crop**, expected by end Feb. Peas market traded up and firmness is likely to continue till new crop hits India. Imported stock is decreasing. However, bearish tone in Chana would not allow peas market to move beyond a certain level. Peas market traded slightly weak taking clue from weak chana.

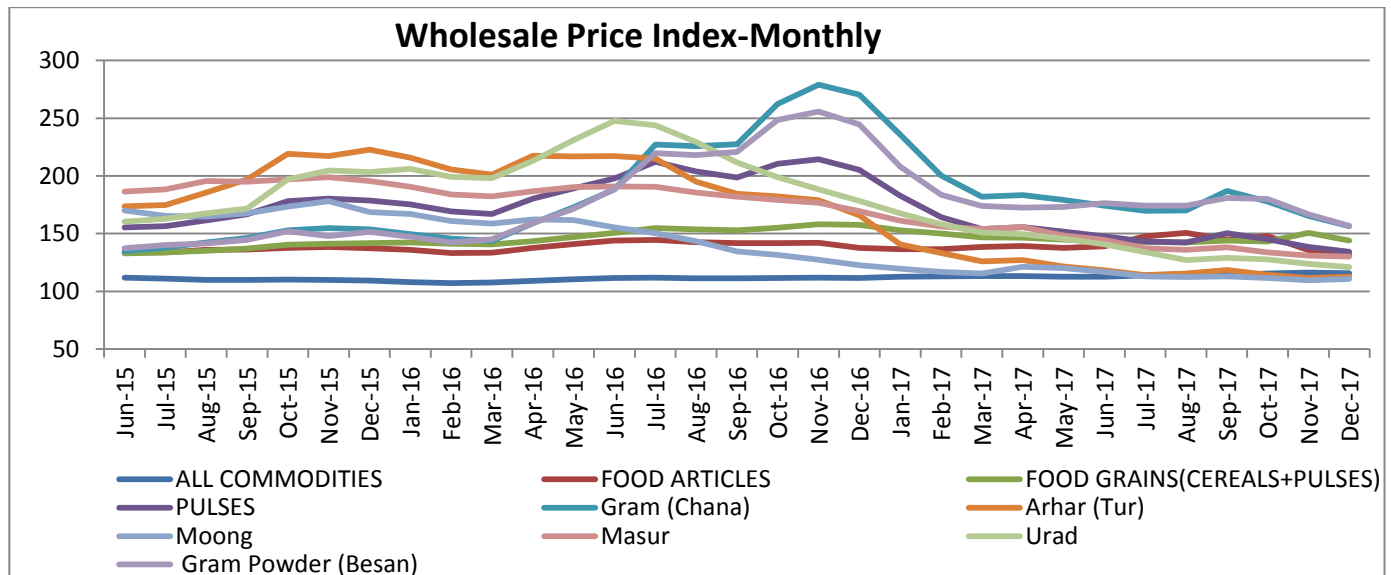

International Market:

- **Active buying by Bangladesh and rumour of Pakistan's likely buying, have helped Australian pulses market to move up smartly last week.** Harvesting of Chickpeas is on in India and Pakistan would not import Chana from India due to tensed political issues. However, current firmness is unlikely to continue. Australian market would drop once again. Notably, Australian market moved up around \$125 to around \$1000 and lentil moved up by \$85-90 to \$880 per tonne. Prices moved up by \$50 per tonne in last 10 days. However, it has started falling once again. Quotes in Queensland has dropped from \$600 to \$565 per tonne.
- **Even lentil price has come down from \$500 to \$475-80 per tonne. Major buyers like India is not going to enter the market for any bulk purchasing.** So, other countries' buying interest would not fulfill the gap. So price is likely to stabilize at current level.
- **Chickpeas production estimate for the US has been increased from 2.50 lakh tonne (2016) to 3.15 lakh tonne in 2017** despite lower area coverage of 6.23 lakh acres. US farmers had covered 3.31 lakh acres in 2016. However, Chickpeas stock on 1st Dec-2017 was recorded at 72000 tonne, lower from 65000 tonne from Dec-2016. Small Chickpeas stock was recorded at 45750 tonne against 32600 tonne last year. Its a tentative fig. Combined stock is higher by around 20,000 tonne from 2016.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 20.04 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 20.04 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Production of Yellow pea continues to increase in Nebraska. In 2017/18, 70,000 acres of yellow peas were planted in the state, up from 10,000 acres five years ago.**
- **As per latest US dry pea and lentil council, dry pea export from US declined** by around 75% from that in in Sept-2016. Indian demand has decreased considerably due to bumper crop size. China too, has procured less quantity of peas. China has procured 2890 MT followed by India 2005 MT and Mexico 1740 MT. Export data for pea from US for Oct is awaited.
- **Chickpeas production in Australia is expected to decrease from 11.88 to 10.55 lakh tonne in 2017-18** from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather conditions, prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production, would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **AAFC (Canada) has revised down peas production estimate from 42.50 to 41.50 lakh tonne for 2017-18.** In the last one month, production estimate has been revised down by 1.50 lakh tonne for next season crop, due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.

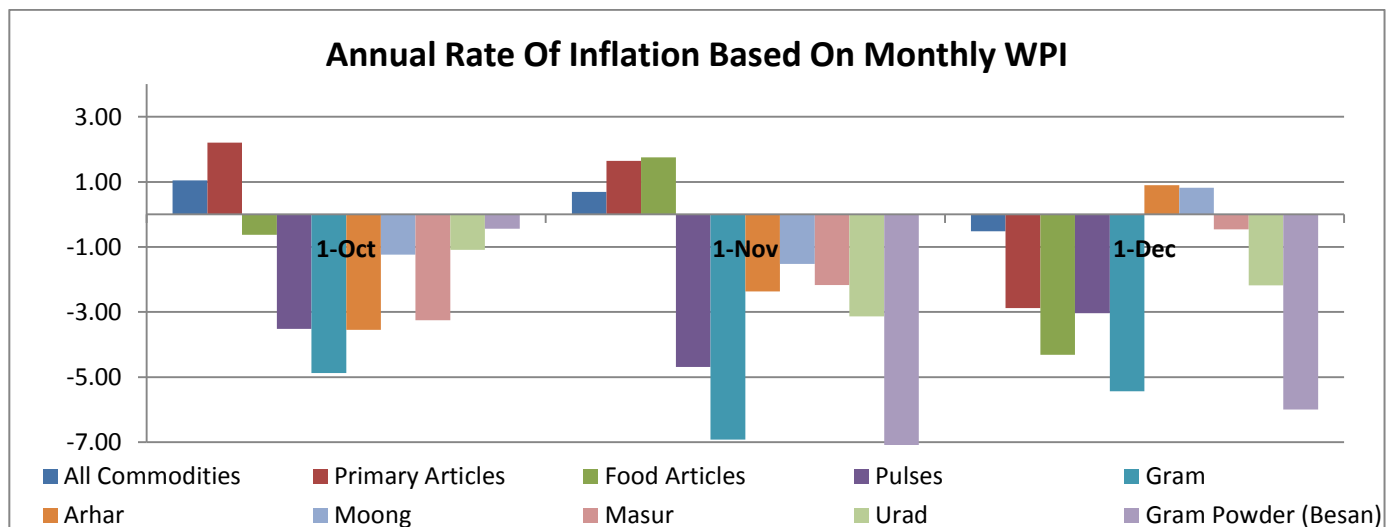

- **Imposition of 50% import duty on all peas, has started impacting export** volume from Canada, According to Agriculture and Agri-Food Canada Peas export would decrease from 3.9 MMT (2016-17 to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas prices are hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18**, as bumper production seems very much on the cards. Ukraine produced 7.45 lakh tonne peas last year.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm .

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 3.8 point from 138.4 in Oct to 134.2 in Dec-2017.

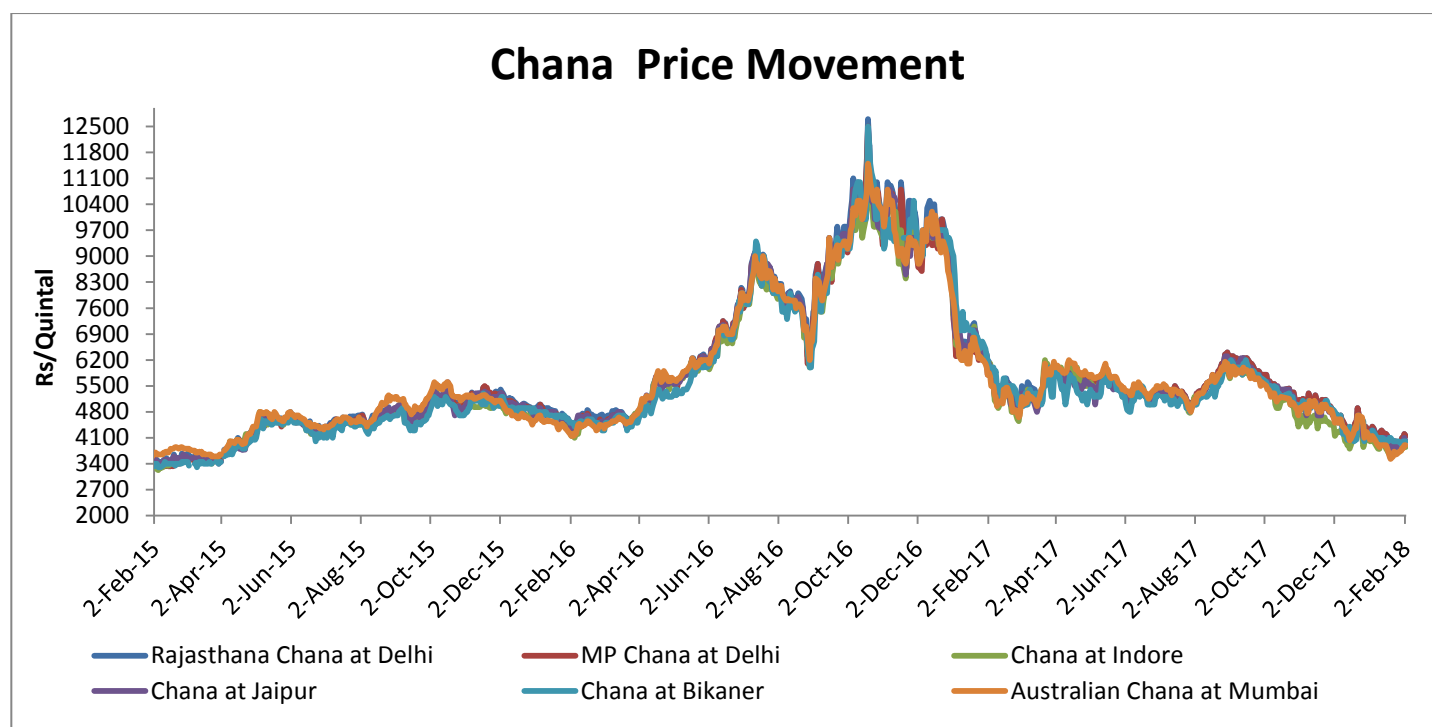

Pulses-Wise Scenario:

Chana

Current Scenario:

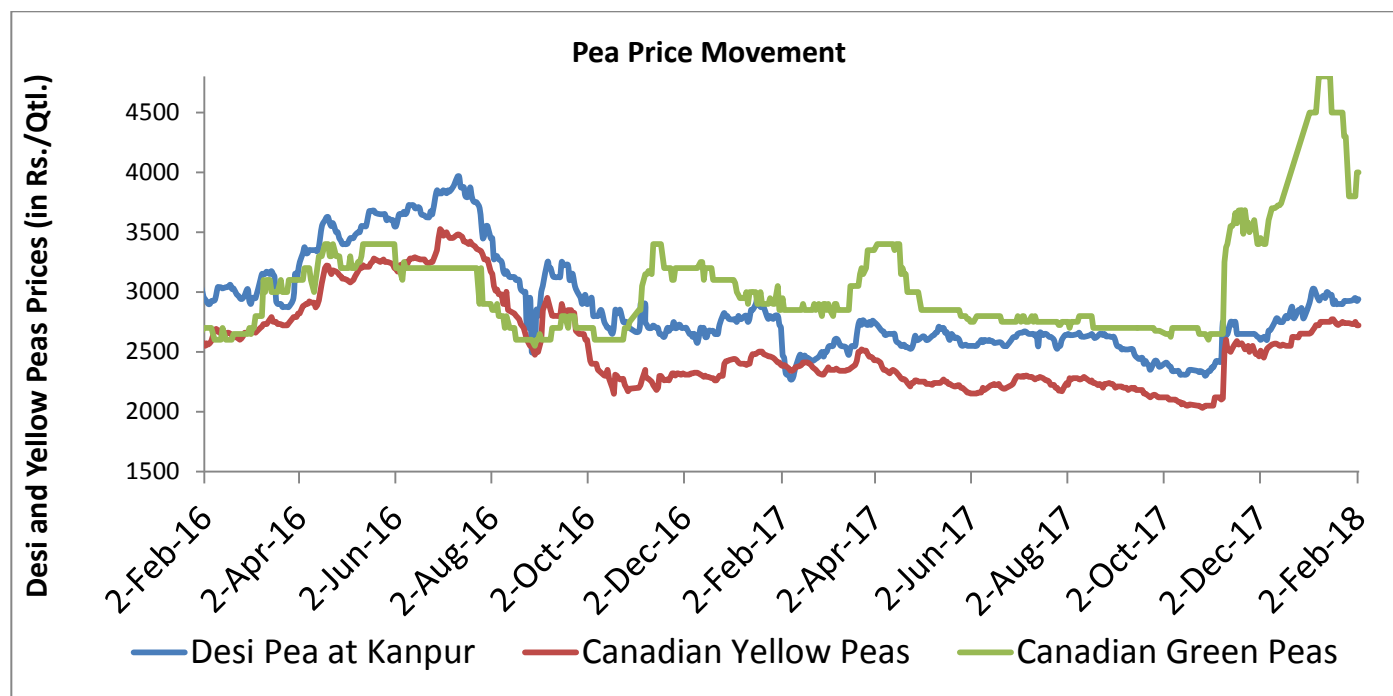

Govt. has intended to give 1.5 times more than actual production cost of food-grains to farmers and would develop infrastructure for the same. It may support pulses market too in the medium term. Budget is said to be favorable for farmers.

Production of Chana may cross 96 lakh tonne this year. Area under chana is likely to end up at 110 lakh ha. Sowing is almost over now. All India average price for Chana increased by 2.84 percent to Rs 3986 per qtl. Any recovery in the near term is unlikely as new crop from MP, Rajasthan & Gujarat is yet to begin. Crop condition, until now, is good. In Delhi market, it is being traded at Rs 4000-4100 per qtl. In Mumbai, Australian Chana is being offered at Rs 3900 per qtl. Overall outlook remains weak for Chana in the near term. Dal export is possible in the second quarter of the year. Import is expected to remain limited due to 30 % duty. Buyers should wait until pressure from MP & Rajasthan builds up. Following graph illustrates the chana price movement in different markets:

Market Outlook: Weak tone may prevail .Selling on rise is good for stakeholders.

Peas (Matar):

Market Recap:

Peas market traded slightly firm during the week under review. Firm chana would support peas market to a certain extent. However, new crop is at hand and availability is likely to increase. Chana too would not sustain at higher level. So firmness is unlikely to continue. Pea may trade lower in coming weeks despite declining imported stock. Right now, 50 % duty is applicable on all peas. The average price increased by 0.92 % to Rs 2933 per qtl. in Kanpur market, Canadian pea decreased to Rs 2721. It may trade range bound to slightly weak in the near term. Import flow is expected to come to a halt in the first quarter. Coverage area is likely to increase due to price factor.

Current Market Dynamics & Outlook:

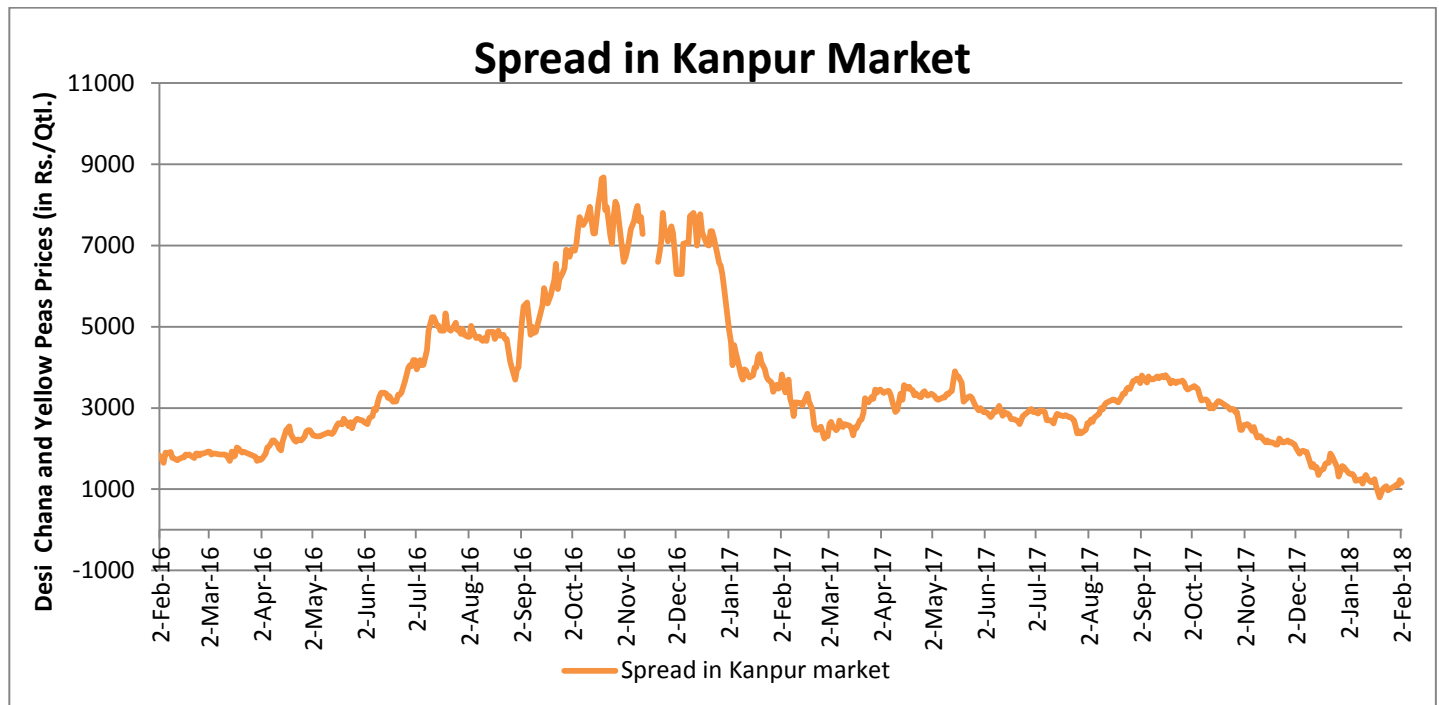

At Kanpur, Desi Peas traded firm at Rs 2933 due to firm chana. Firmness is unlikely due to commencement of new chana. Canadian matar is being traded at Rs 2721 in Mumbai while Russian Matar quoted at Rs 2711 per qtl. Green peas, was quoted at 4000 per qtl. in Mumbai market, down by Rs 200 from previous close. Market is expected to trade steady to slightly weak in the near term. With current applicable duty, import is unviable.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market increased by Rs 135 to Rs 1115 per qtl owing to decreased peas and increased Chana price. Spread is expected to move in the range of 1050 to 1150 per

quintal in the coming weeks on relative movement in Chana prices. Overall outlook seems steady to slightly weak due to decreasing imported stock..

Market Outlook:

Outlook remains steady to slightly weak this week.

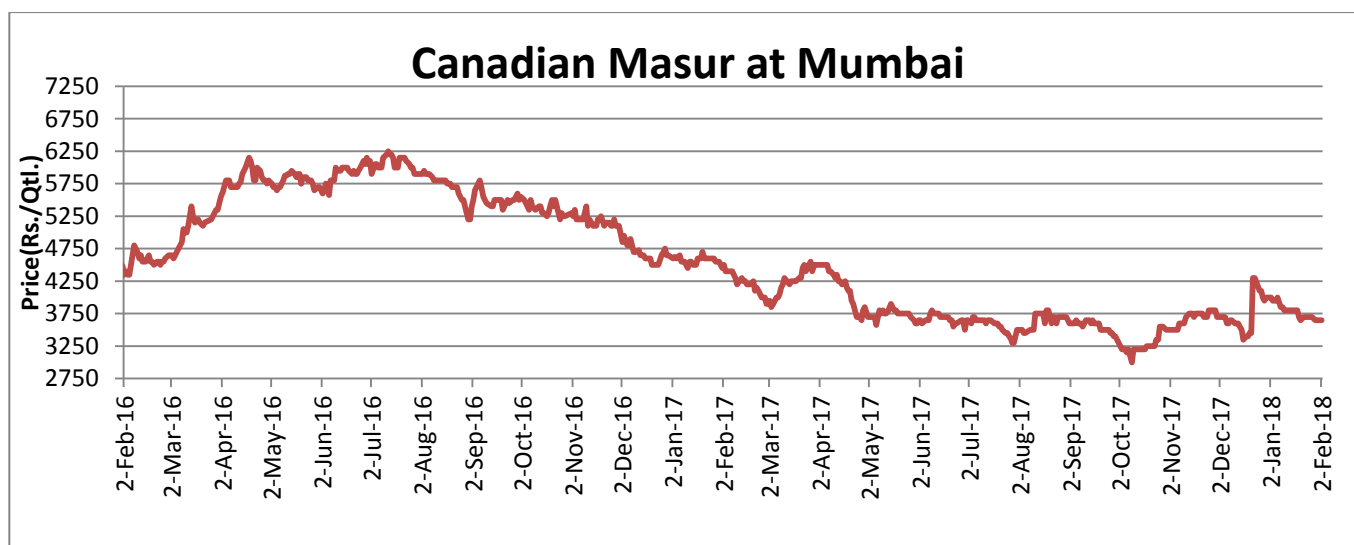

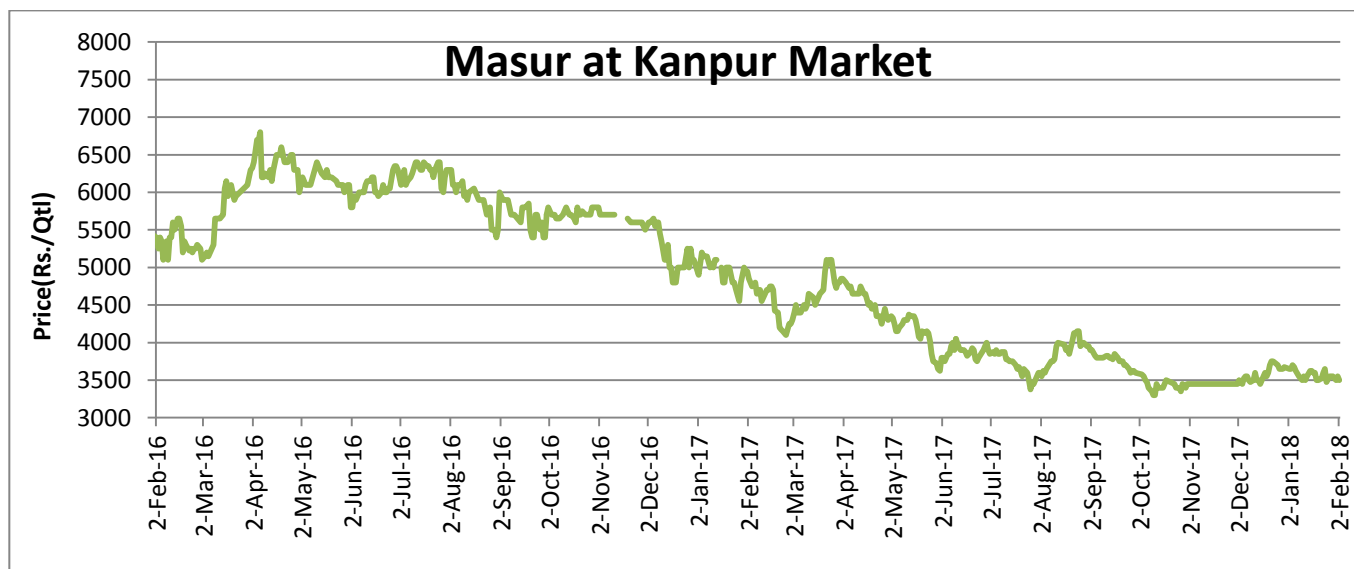

Lentils (Masoor):

Market Recap:

Kanpur market opened with a weak note in the beginning of the week and pressure continues despite imposition of 30% import duty and lower import volume. Area under Lentils is bound to increase this year as overall sowing trend is higher by 0.28 % at 17.35 lakh ha so far. Overall sentiments remain steady to slightly weak in the short term. Stakeholders should sell on rise. Market is expected to trade range bound. Demand at higher level was affected.

Current Scenario:

Weekly average price decreased by 0.45 % to Rs 3500 per qtl. Currently in Mumbai it is being quoted at Rs 3650 per qtl. Canadian Massor is showing steady to weak movement and was traded in the range of Rs.3650/3700 per quintal. Weak tone may prevail this week too due to slack demand. New crop expected in mid Feb would prevent market from moving up from current level until some weather disturbance occurs. The following chart shows the masoor prices movement in key markets:-

Market Outlook: Prices are likely to notice range bound to slightly weak movement this week.

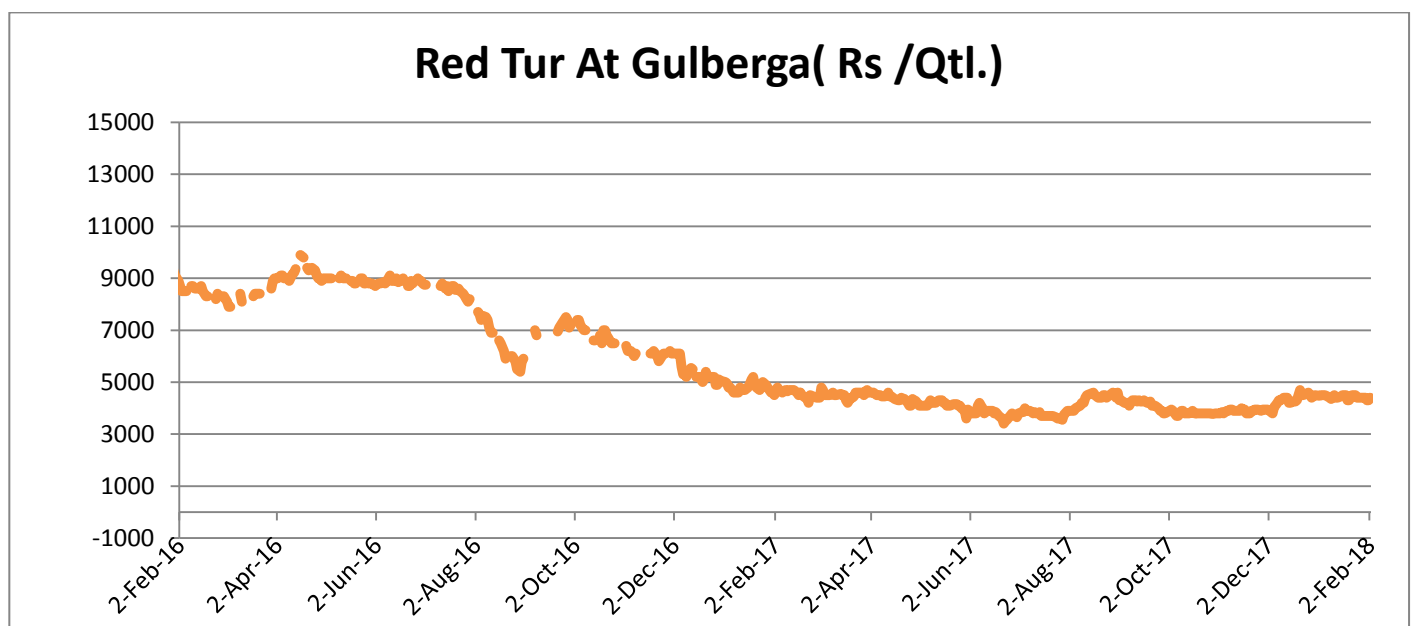

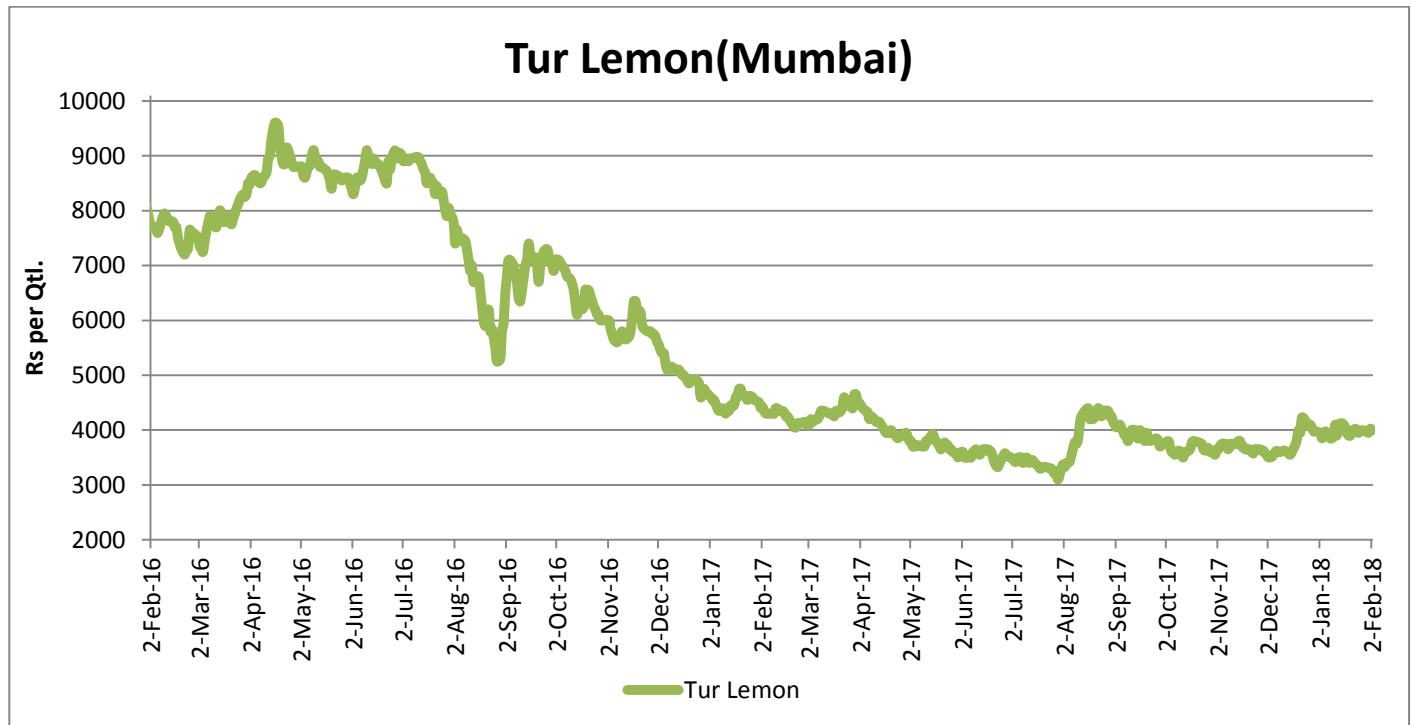

Pigeon Pea (Tur/Toor):

Market Recap:

New crop has started arriving in markets of Maharashtra, AP and Karnataka and will commence in MP, Gujarat and Rajasthan soon. New Red Tur is being traded at Rs.4000-4600 per quintal. Procurement drive, marginally firm quotes in Myanmar and increased private buying would prevent market from further decline current level. Myanmar offers old Tur at \$375-80 per tonne while new Tur is being offered at \$420-25 per tonne, still much lower than prevailing price in India. As crop size is lower, buying on dip is good. Govt. procurement drive would not allow market to dip more. Procurement in Maharashtra begins.

Current Market Dynamics & Outlook:

Tur market based on market fundamentals would not move up suddenly. It would take time to reach at MSP level in a span of time. Pressure is building up and market is expected to move down by Rs100 from current level despite procurement drive. Average price moved down slightly by 1.62 % to Rs4366 per qtl. in Gulberga market.

Market Outlook: *Tur prices are likely to show steady to slightly weak movement this week too.*

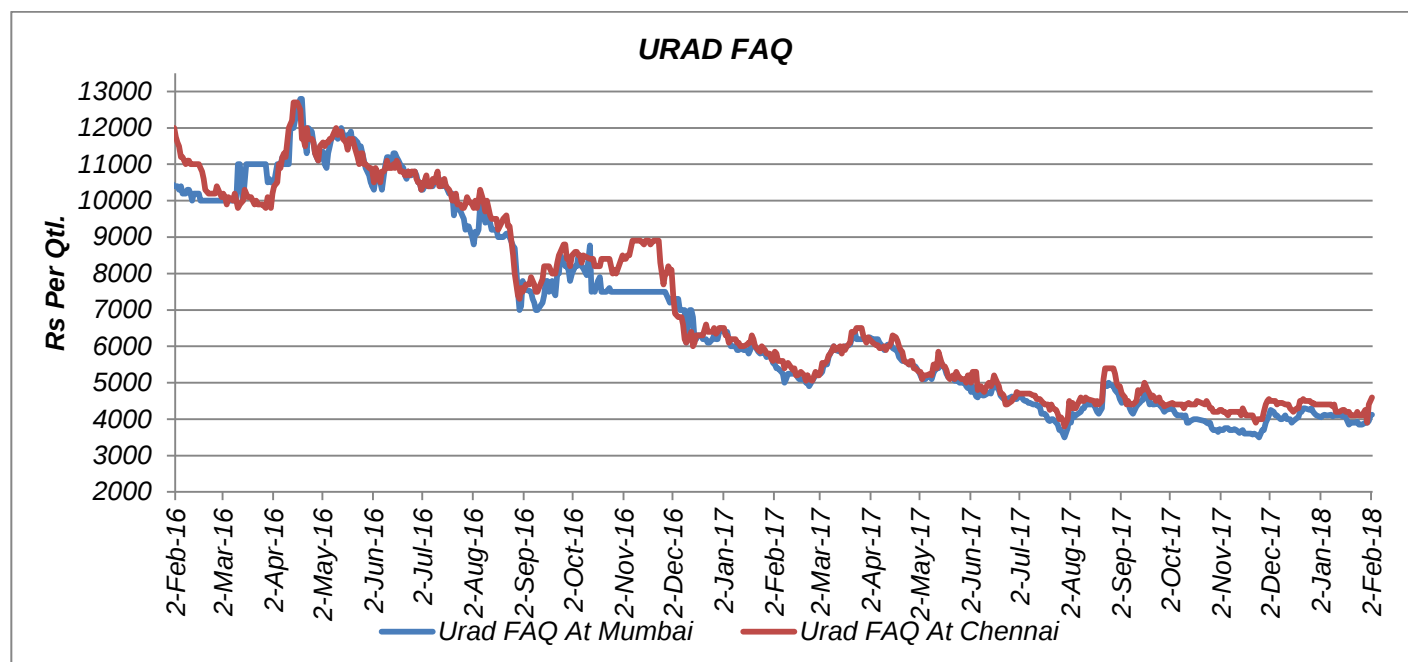

Black Matpe (Urad):

Market Recap:

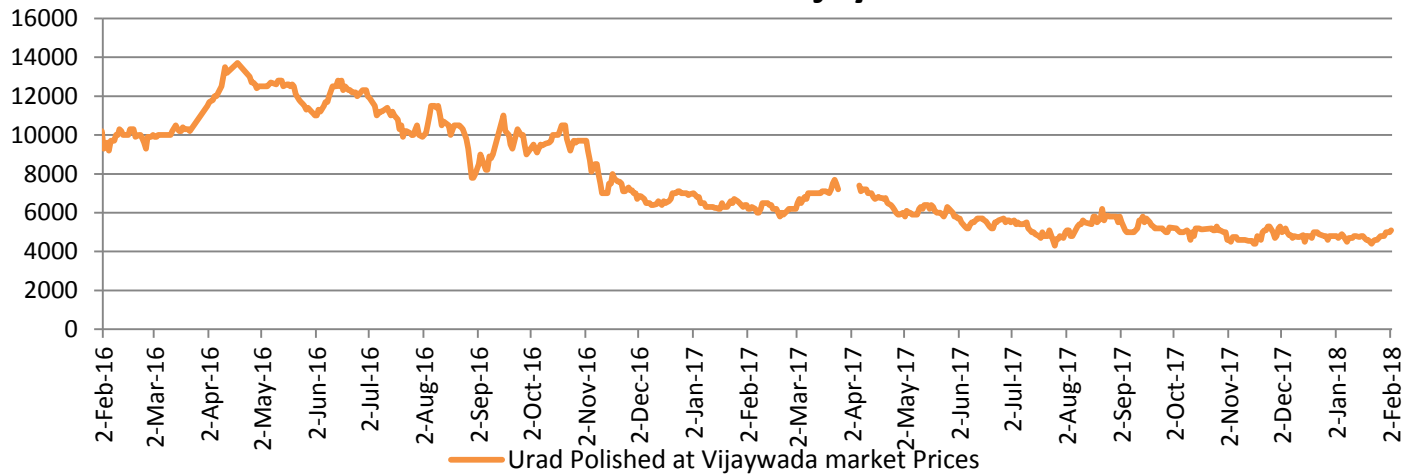

Pressure has started to build up on new arrivals in Tamil Nadu & Andhra Pradesh. However, good crop quality and procurement drive amid farmers' intention to sell maximum quantity to govt. on MSP, would prevent market from drastic decrease from current level. Urad market is likely to trade in the range of Rs4000 to Rs4500 per qtl in coming weeks. Urad FAQ Chennai is being traded at Rs 4400 to 4500 per quintal while in Mumbai it traded at Rs.4100-4150 per quintal. There is no export opportunity for Indian Urad at prevailing prices as Myanmar offers FAQ Urad at \$465 and SQ at \$590 per tonne. Buying on is good

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.4100-4150Qtl.) and Chennai (Rs.4400-4500Qtl.) noticed firm tone, at Vijayawada, prices moved up at Rs 4800. Steady to slightly firm movement might be seen in Urad market due to improved demand. The following graph shows the prices movement in different markets:-

Urad Polished at Vijaywada

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week.

Green Gram (Moong):

Market Recap:

Moong and its dal demand are affected at higher level. Besides, new moong commences in Tamil Nadu, AP & Chhattisgarh. It is due from Odissa now. Moong traded at Rs.4900 per quintal in Jaipur market. It may extend its loss by Rs 100 more from current level in Jaipur market against declared MSP of Rs 5575 per qtl. It may trade in the range of Rs 4700 to Rs5200 in Feb-2018 despite short supply of quality Moong this year. All India Rabi Moong acreage till 19th January 2018 is up by 1.6% to 5.77 lakh ha. It is up in AP by 22.5% to 0.87 lakh ha while down by 1.9% and 50% in Tamil Nadu and Telangana respectively.

Moong

Market Outlook: Moong prices are likely to trade weak in the near term.
