Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

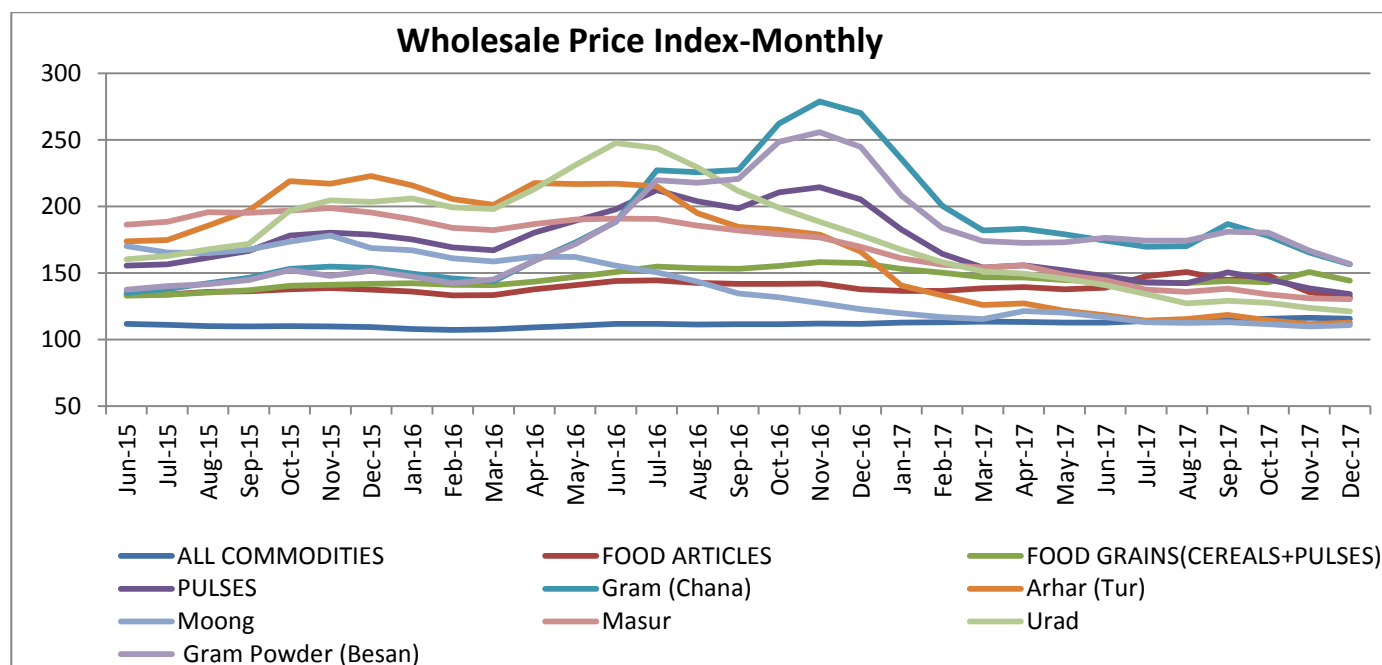

- **Rabi pulses sowing area is running ahead by 5.29 % to 169.10 lakh ha as on 9th Feb-2018.** Chana area was registered at 107.63 against 99.54 lakh ha. Masur area was registered at 17.36 against 17.30 lakh ha, peas area was recorded at 11.92 against 11.97 lakh ha. Even Urad and Moong area was recorded at 9.44 against 9.94 & 8.31 against 7.34 lakh ha. Other pulses area was recorded at 6.28 against 6.53 lakh ha. Sowing is almost over except Urad & Moong so far.
- **Govt has procured around 5.6 lakh tonne Urad and Moong on MSP during kharif season 2017-18** so far under price support scheme according to official data. It is worth of Rs 3077 crore by the end of January-2018. Agri cooperative and state agencies have collectively procured 5,60,335 tonne Urad & Moong.
- **Govt. has increased import duty on Chana from 30 to 40% now to support chana cash market** just ahead of new crop in Maharashtra and Rajasthan. New crop in Chana already started in Karnataka, Maharashtra & Gujarat. Pressure on chana is likely to continue despite revised duty. Reports of hailstorms too have supported Chana cash market due to loss in Maharashtra. However, recent loss is not so big to drive market up. Weak sentiments prevail.
- **Tur procurement in Maharashtra commences. It may check decreasing prices of Tur** in mandis of Maharashtra. Central govt has green signaled, to buy 4.46 lakh tonne Tur in the state. Around 1.2 lakh farmers have registered so far. Procurement drive, private participation and lower crop size did not allow market to decrease from current level. Steady to firm sentiment is expected in Tur cash market in the short to medium term. It traded in the range of Rs 4000-4550 per qtl. in Gulberga market.
- **Govt has procured total 5.6 lakh tonne Urad and Moong on MSP during kharif season 2017-18** so far under price support scheme. Rajasthan has contributed around 3,93,059 tonne Urad & Moong, while Maharashtra and Karnataka purchased around 64 & 35 thousand tonne so far. State agencies procured only Urad in states like Gujarat & UP. both contributed 19550 tonne & 17434 tonne Urad so far.
- **Moong and urad markets are expected** to trade steady to slightly weak as bulk buyers are buying against advance demand for dal. Stockists have resorted to sell some of stock at current price for managing money crunch. It has eased supply side once again. As dal demand is likely to improve in coming weeks, any major dip in Urad and Moong is unlikely. Range bound movement might be seen. In Jaipur mandi it is being traded at Rs 4850-4900 per qtl. Uptrend is unlikely as selling from central pool stock continues. Burma is offering Moong at \$700 per tonne basis Indian ports while Urad is being offered at \$ 465 and \$595-600 per tonne at Indian ports for FAQ and SQ varieties respectively.
- **Pressure on lentil market continues as new crop is at hand. Pressure is likely** to continue despite imposition of 30 % duty. Govt would procure on MSP in Uttar Pradesh and MP. However, quantity remains unspecified. As production is lower than consumption, need for import might be felt in second half of the year. It would support cash market in the medium term. Currently, masur is being traded at Rs3450 to Rs3550 per qtl.
- **Peas market traded weak and pressure is likely to continue till new crop hits Indian market.** Imported stock is decreasing. However, bearish tone in Chana too remains unsupportive for peas market. Pea is being traded at Rs2750 to Rs2850 per qtl. Yellow pea is being traded at Rs 4000 per qtl. Weak may prevail in domestic market as new crop too is due now.
- **Pulses output during Rabi 2017-18 season is expected to touch 87.1 lakh tonne,** slightly lower than 94.2 lakh tonne produced in 2016-17. Higher area & good climatic condition so far may push rabi pulses area to around 165 lakh ha this year. It will give India additional 25 to 30 lakh tonne pulses which would be available in MY 2018-19. If we add kharif production, total availability would be around 245 to 250 lakh tonne, almost equal to normal consumption.

International Market:

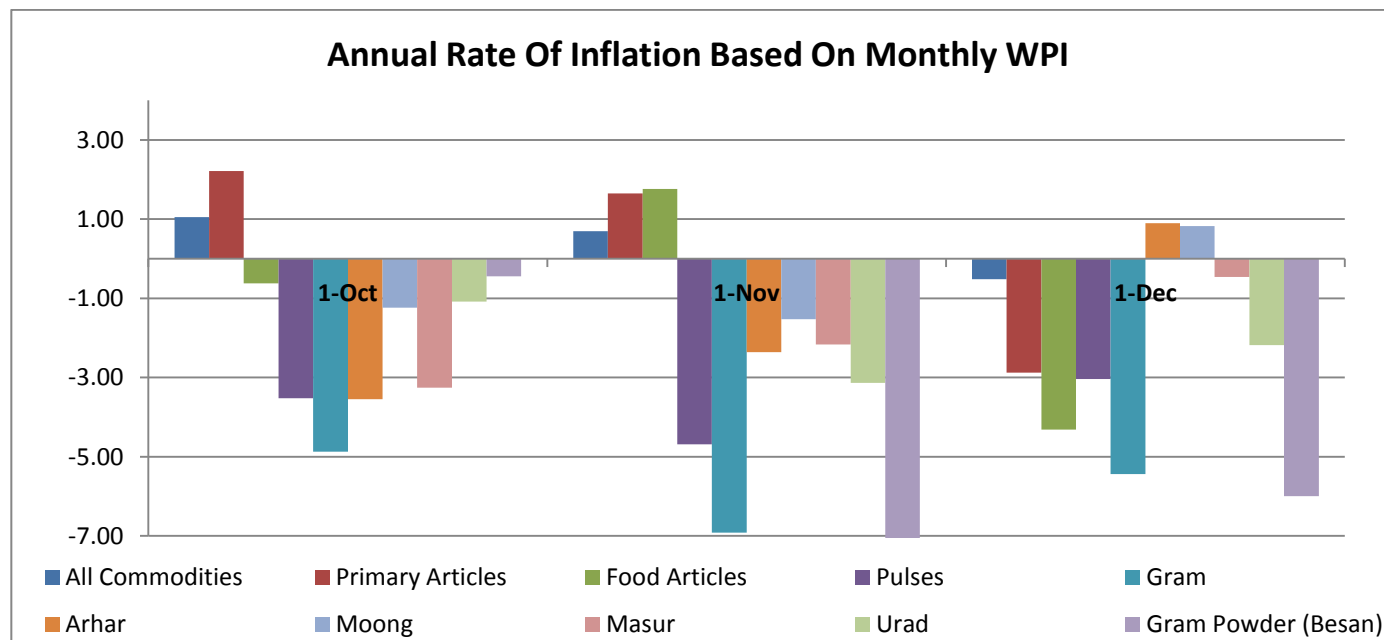

- **Undertone in global chickpeas market remains subdued due to higher supply in exporting countries and lower demand from India.** Global Chickpeas production is bound to increase from 115 to 125 lakh tonne due to higher area coverage in India. Global Chickpeas production of Kabuli Chana too would increase from 20 to 28 lakh tonne this year. Besides global trade would decline as major buyers like India is out of the market right now.
- **Lentil price has come down from \$500 to \$475-80 per tonne.** Major buyers like India is not going to enter the market for any bulk purchasing. So, other countries' buying interest would not fulfill the gap. So price is likely to stabilize at current level.
- **Chickpeas production estimate for the US has been increased from 2.50 lakh tonne (2016) to 3.15 lakh tonne in 2017** despite lower area coverage of 6.23 lakh acres. US farmers had covered 3.31 lakh acres in 2016. However, Chickpeas stock on 1st Dec-2017 was recorded at 72,000 tonne, lower from 65,000 tonne from Dec-2016. Small Chickpeas stock was recorded at 45,750 tonne against 32,600 tonne last year. Its a tentative fig. Combined stock is higher by around 20,000 tonne from 2016.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 20.04 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 20.04 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Production of Yellow pea continues to increase in Nebraska.** In 2017/18, 70,000 acres of yellow peas were planted in the state, up from 10,000 acres five years ago.
- **Chickpeas production in Australia is expected to decrease from 11.88 to 10.55 lakh tonne in 2017-18** from record 18.54 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather conditions, prevalent in the major growing regions. Chickpeas area increased from 1052 to 1099 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production, would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **AAFC (Canada) has revised down peas production estimate from 42.50 to 41.50 lakh tonne for 2017-18.** In the last one month, production estimate has been revised down by 1.50 lakh tonne for next season crop, due to lower prevailing price and weak demand from India and Pakistan. Canada had produced 48.36 lakh tonne peas in 2016-17.
- **Imposition of 50% import duty on all peas, has started impacting export volume from Canada,** According to Agriculture and Agri-Food Canada Peas export would decrease from 3.9 MMT (2016-17 to 2.4 MMT in 2017-18. Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas prices are hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.
- **Peas import from Ukraine to India is bound to increase over 50 % to 6.5 lakh tonne in 2017-18,** as bumper production seems very much on the cards. Ukraine produced 7.45 lakh tonne peas last year.

Weekly Outlook: -Pulses are likely to trade range bound with weak bias.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 3.8 point from 138.4 in Nov to 134.2 in Dec-2017.

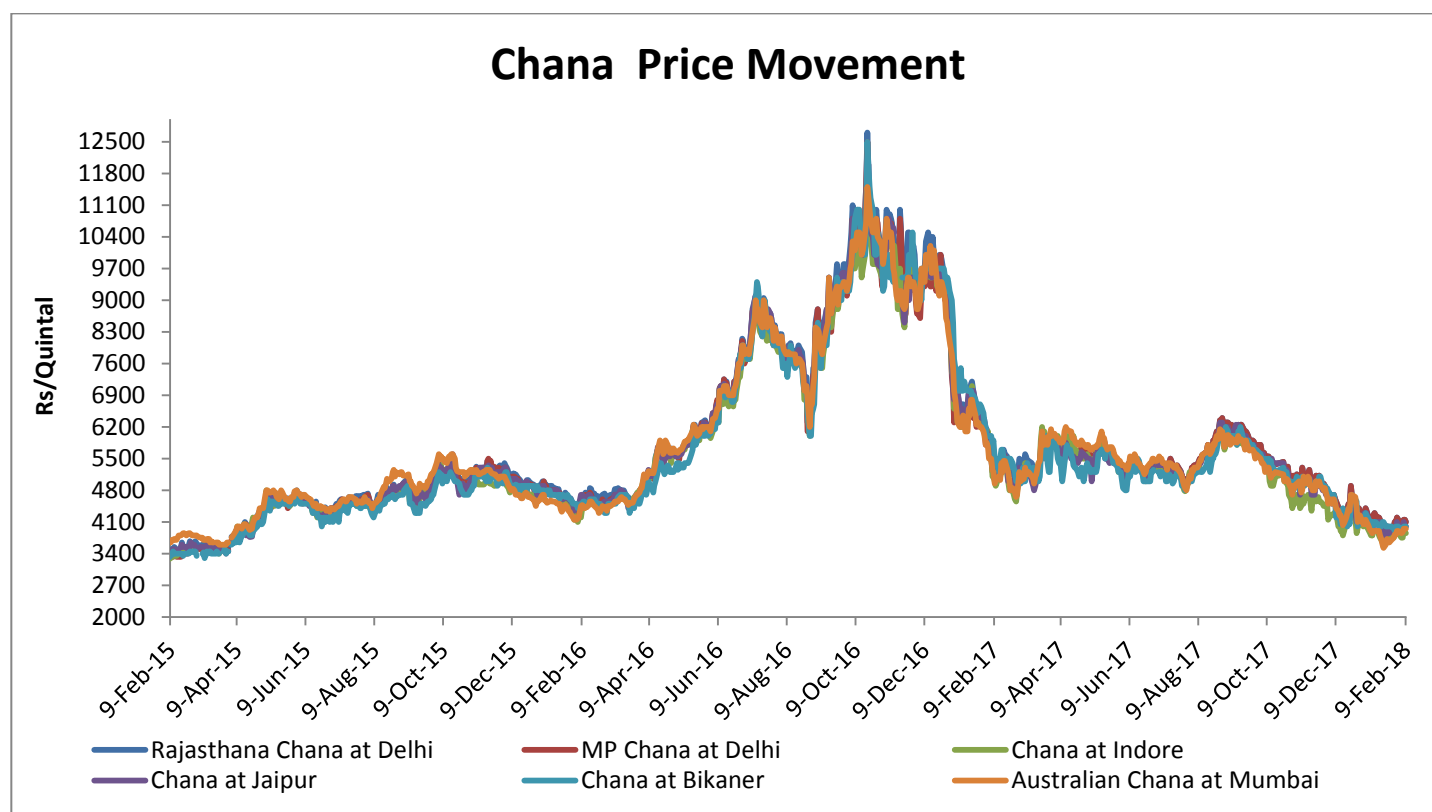

Pulses-Wise Scenario:

Chana

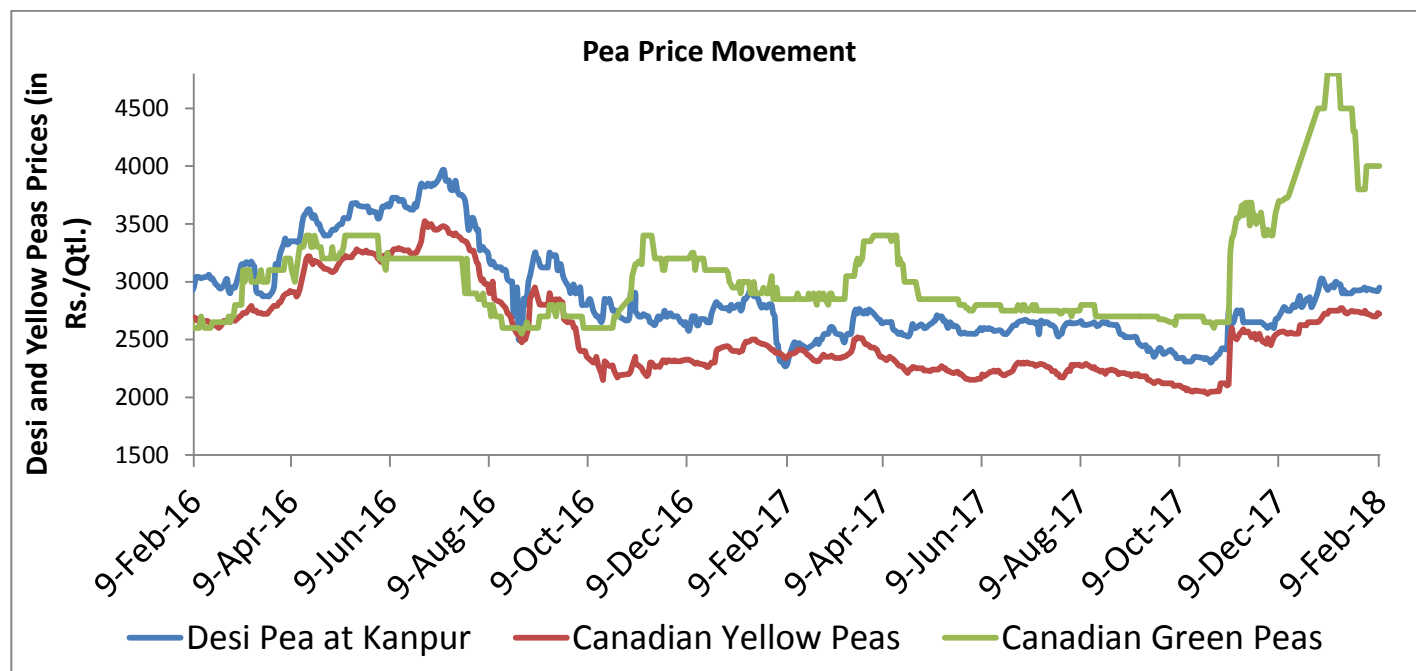

Current Scenario:

Chana continued to trade under pressure despite import duty hike from 30 to 40 % now. Higher duty is likely to cap decline just ahead of incoming crop in MP & Rajasthan. It traded at Rs 3850-3875 in Indore. Arrival pressure may push it down further. Recent firmness is due to report of crop loss in Maharashtra due to hailstorms. Firmness is unlikely to sustain. Production of Chana may cross 96 lakh tonne this year. Area under chana is likely to end up at 110 lakh ha. Sowing is almost over now.

All India average price for Chana increased by 0.32 percent to Rs 3999 per qtl. Any recovery in the near term is unlikely as new crop from MP, Rajasthan & Gujarat is yet to begin. Crop condition, until now, is good except Maharashtra. In Delhi market, it is being traded at Rs 4100-4150 per qtl. In Mumbai, Australian Chana is being offered at Rs 3950-3975 per qtl. Overall outlook remains weak for Chana in the near term. Dal export is possible in the second quarter of the year. Import is expected to remain limited due to 40 % duty. Buyers should wait until pressure from MP & Rajasthan builds up. Following graph illustrates the chana price movement in different markets:

Market Outlook: Weak tone may prevail. Selling on rise is good for stakeholders.

Peas (Matar):**Market Recap:**

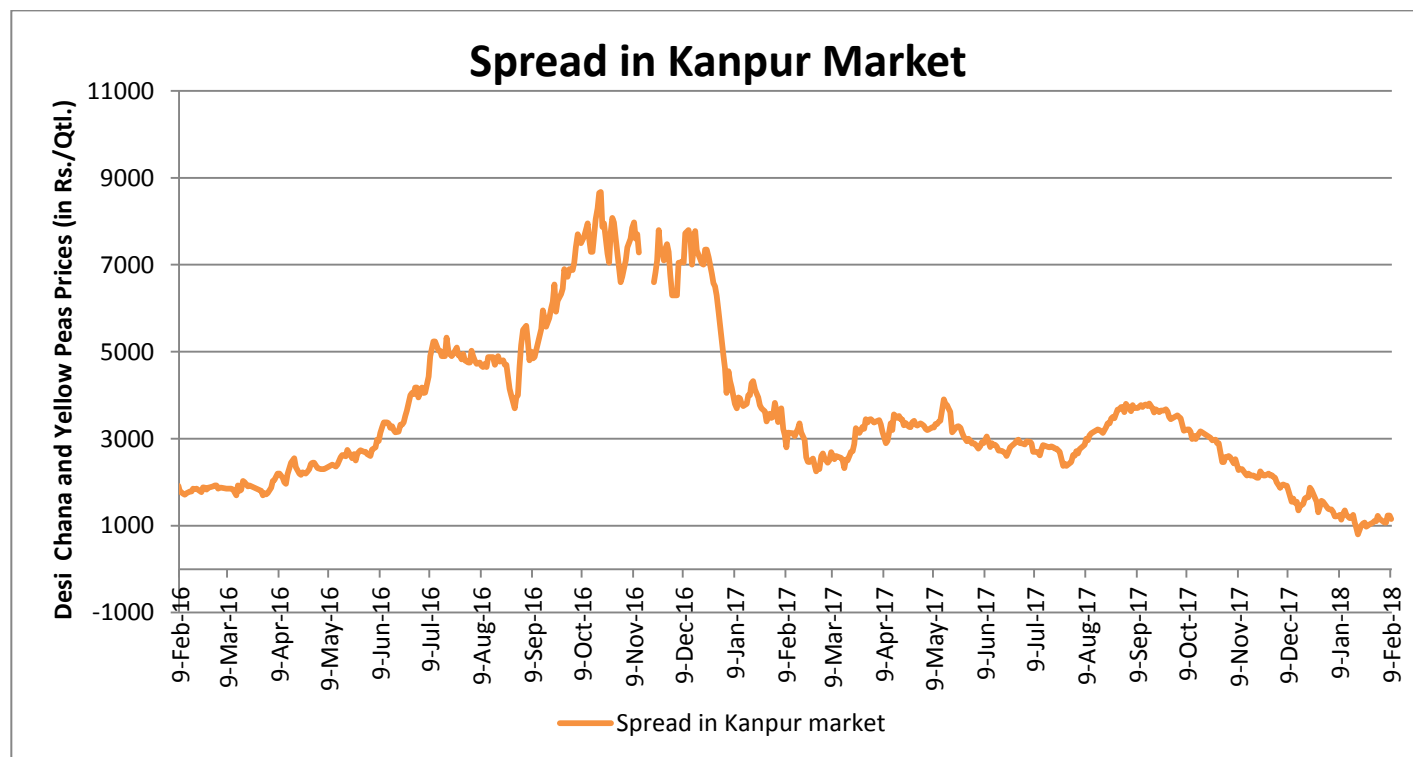

Peas market traded slightly down during the week under review. Weak chana would not support peas market at present. Besides, new crop is at hand now and availability is likely to increase. Chana too would not sustain at higher level. So firmness in the near term is unlikely to continue. Pea may trade lower in coming weeks despite declining imported stock. Right now, 50 % duty is applicable on all peas. The average price decreased by 0.30 % to Rs 2928 per qtl. in Kanpur market, Canadian pea decreased to Rs 2721. It may trade range bound to slightly weak in the near term. Import flow is expected to come to a halt in the first quarter. Coverage area is likely to increase to 12.00 lakh ha due to price factor.

Current Market Dynamics & Outlook:

At Kanpur, Desi Peas traded weak at Rs 2950 due to weak chana. Firmness is unlikely due to commencement of new chana. Canadian matar is being traded at Rs 2721 in Mumbai while Russian Matar quoted at Rs 2715 per qtl. Green peas, was quoted at 4000 per qtl. in Mumbai market, down by Rs 100 from previous close. Market is expected to trade steady to slightly weak in the near term. With current applicable duty, import is unviable.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market increased by Rs 37 to Rs 1152 per qtl owing to stable peas and decreased Chana price. Spread is expected to move in the range of 1100 to 1200 per quintal in the coming weeks on relative movement in Chana prices. Overall outlook seems steady to slightly weak due to decreasing imported stock..

MarketOutlook: Outlook remains steady to slightly weak this week.

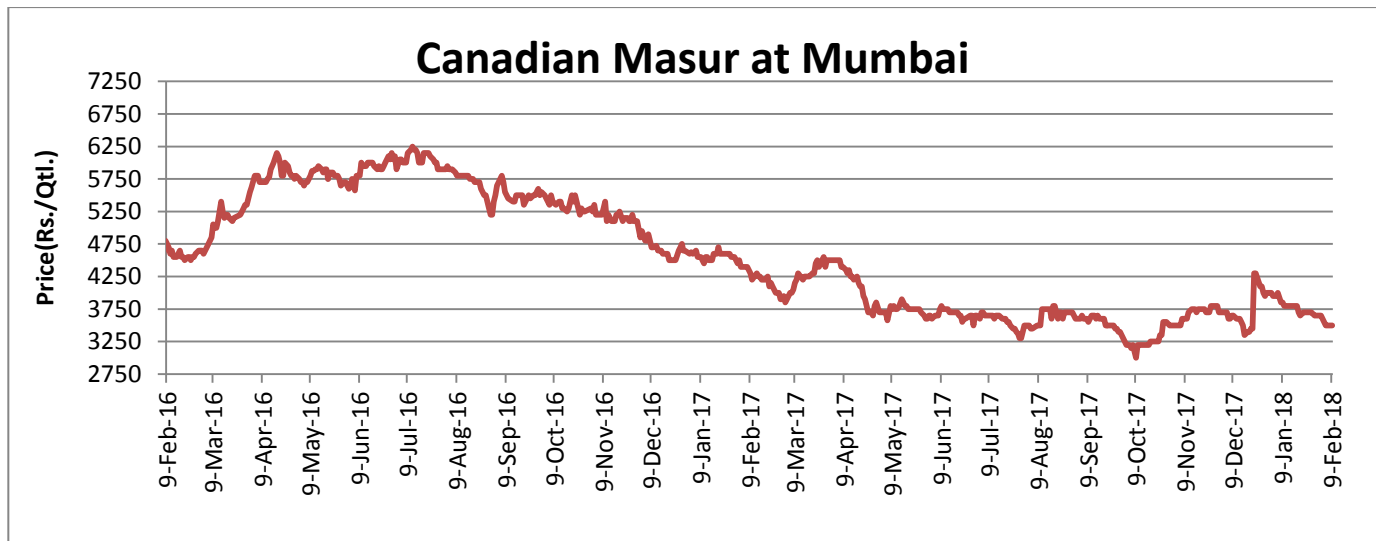

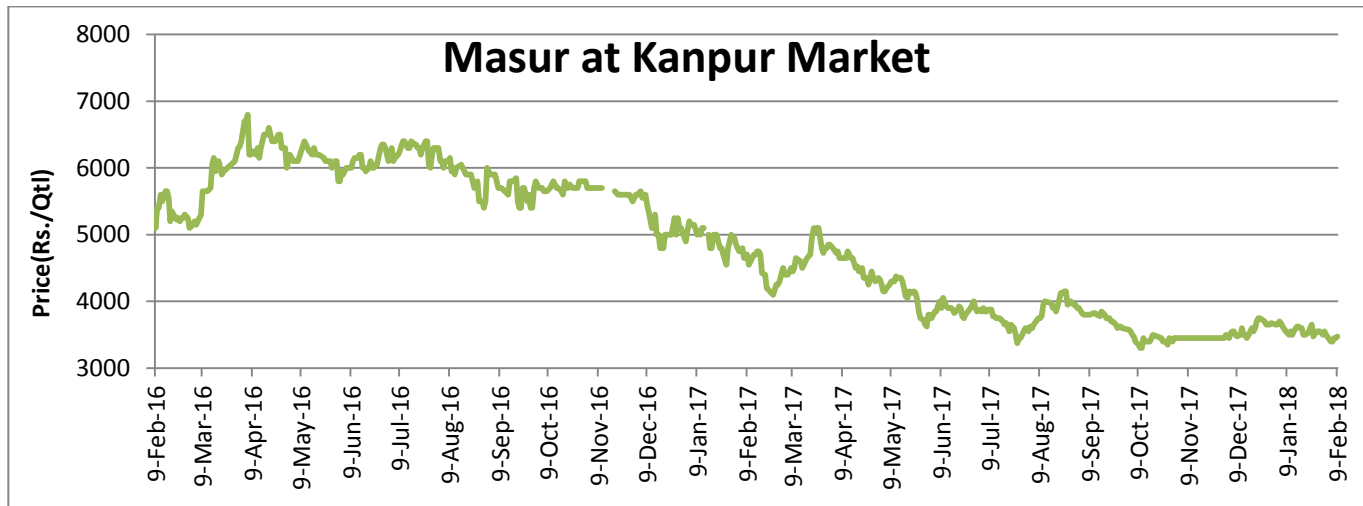

Lentils (Masoor):

Market Recap:

Kanpur market opened with a weak note in the beginning of the week and pressure continues despite imposition of 30% import duty and lower import volume. Besides, new crop is at hand amid good crop condition. Area under Lentils is bound to increase this year as overall sowing trend is higher by 0.35 % at 17.36 lakh ha so far. Overall sentiments remain steady to slightly weak in the short to medium term. Stakeholders should sell on rise. Market is expected to trade range bound. Demand at higher level remains affected.

Current Scenario:

Weekly average price decreased by 2.66 % to Rs 3435 per qtl. Currently in Mumbai it is being quoted at Rs 3500-3550 per qtl. Canadian Massor is showing steady to weak movement and was traded in the range of Rs.3500/3600 per quintal. Weak tone may prevail this week too due to slack demand. New crop expected in mid Feb would prevent market from moving up from current level until some weather disturbance occurs. The following chart shows the masoor prices movement in key markets:-

Market Outlook: Prices are likely to notice range bound to slightly weak movement this week.

Pigeon Pea (Tur/Toor):

Market Recap:

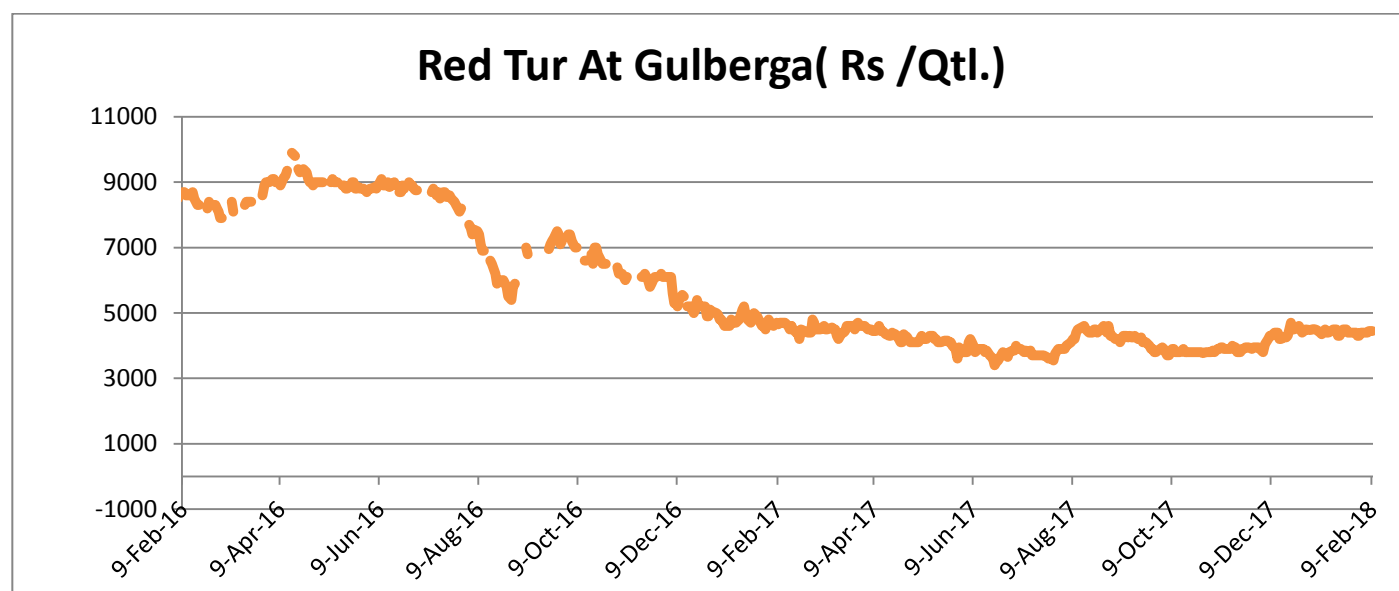

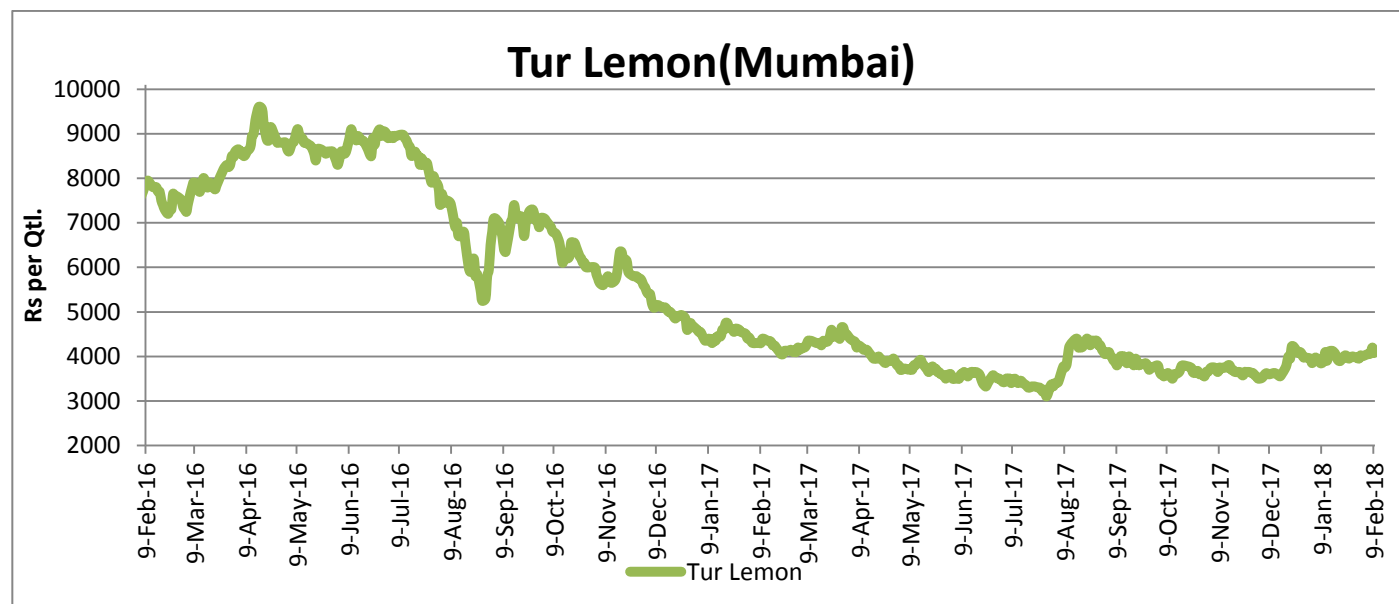

Tur market traded in a narrow range in Gulberga despite ongoing procurement drive in producing states. It traded in the range of Rs 4100-4550 per qtl. Steady to slightly firm trend is expected in coming weeks due to higher temperature that encourages dal demand. Nafed procured 84320.25 tonne Tur at MSP till 8th Feb 2018 from kharif 2017-18 crop. Karnataka has contributed around 41,520 tonne so far. Telangana has procured 39,403 tonne so far. Telangana's initial procurement target has been met but the same has been revised upwards and procurement date extended to 28th Feb 2018. New Red Tur is being traded at Rs.4000-4600 per quintal. Procurement drive, marginally firm quotes in Myanmar and increased private buying would prevent market from further decline current level. Myanmar offers old Tur at \$375-80 per tonne while new Tur

is being offered at \$420-25 per tonne, still much lower than prevailing price in India. As crop size is lower, buying on dip is good. Govt. procurement drive would not allow market to dip more. Procurement in Maharashtra begins.

Current Market Dynamics & Outlook:

Tur market based on market fundamentals would not move up suddenly. It would take time to reach at MSP level in a span of time. Procurement drive is on. Average price moved up slightly by 1.45 % to Rs4430 per qtl. in Gulberga market. Overall tone remains firm.

Market Outlook: Tur prices are likely to show steady to slightly firm movement this week too.

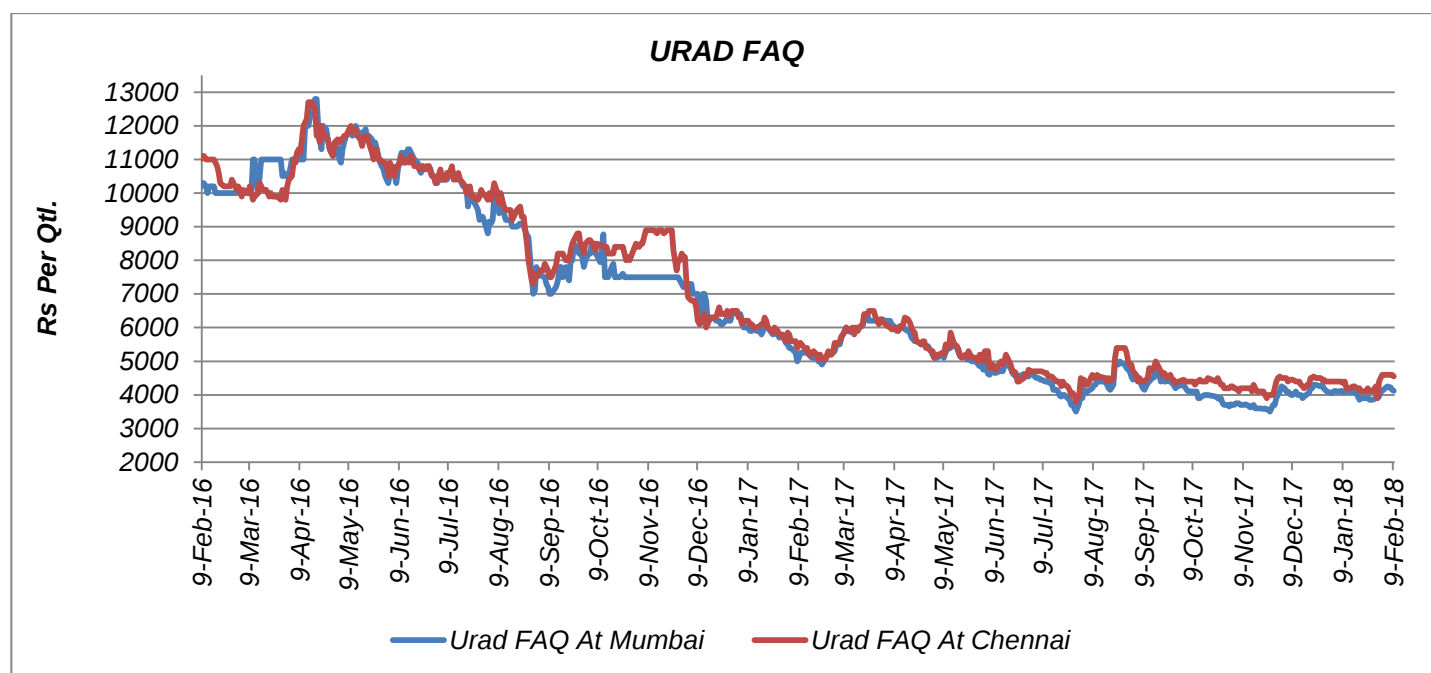

Black Matpe (Urad):

Market Recap:

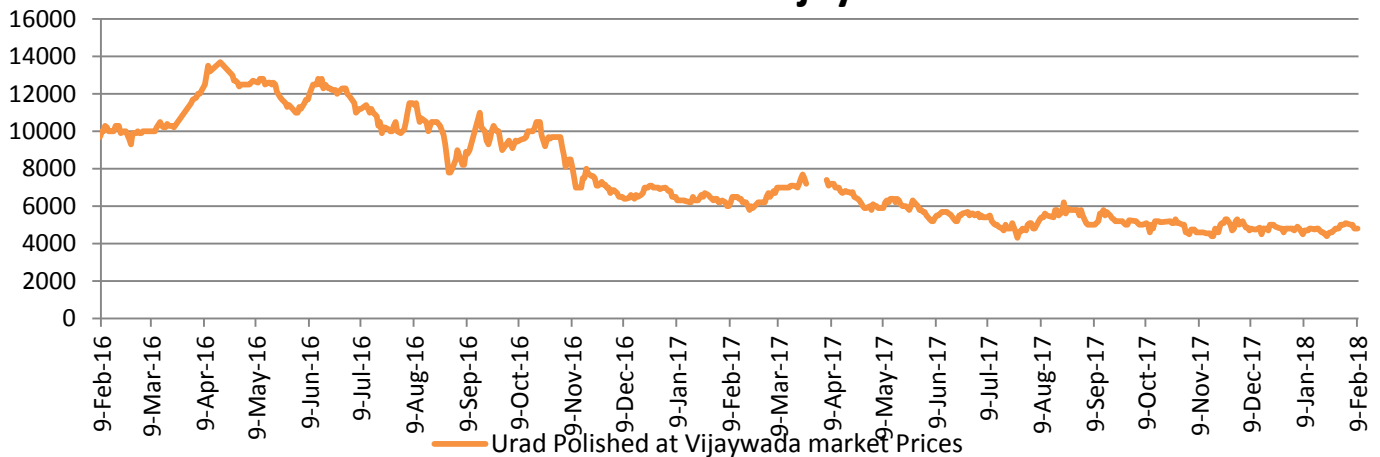

Urad traded slightly up on ongoing procurement drive. It is being traded at Rs 4400 to Rs 4600 per qtl in Chennai market. Steady to slightly firm tone may prevail with ongoing procurement drive. Government's procurement drive at MSP (Rs.5400, including bonus of Rs.200) remains supportive to cash Urad market. However, overall condition is that of very high surplus. New arrivals from Rabi crop and selling through auction by central pool may restrict any upward momentum in the short term. It is likely to trade in the range of Rs.4200 to Rs.4700 per quintal in the open market in coming weeks, depending on quality. Urad FAQ Chennai is being traded at Rs 4300 to 4500 per quintal while in Mumbai it traded at Rs.4100-4250 per quintal. There is no export opportunity for Indian Urad at prevailing prices as Myanmar offers FAQ Urad at \$465 and SQ at \$590 per tonne.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.4000-4150Qtl.) and Chennai (Rs.4300-4500Qtl.) noticed weak tone, at Vijayawada, prices moved up at Rs 4800. Steady to slightly weak movement might be seen in Urad market due to lack of demand at higher level. The following graph shows the prices movement in different markets:-

Urad Polished at Vijaywada

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week.

Green Gram (Moong):

Market Recap:

Moong market traded steady at Rs 4900 in Jaipur market. As arrival has decreased, more dip is unlikely from current level. New crop is 3-4 months away from now, so steady tone may prevail. It is likely to trade in the range of Rs 4700-5000 per qtl. in Jaipur market. Dal demand is likely to improve as vegetables availability starts decreasing with increasing temperature. However, selling by Nafed and Markfed would not allow market to move beyond a certain level. Markfed has issued tender for sale of 1.93 lakh tonne Moong in MP. It would continue to balance supply side and would continue to affect market sentiments in the weeks ahead.

Moong

Market Outlook: Moong prices are likely to trade steady in the near term.

All Pulses Progressive Sowing As on 9th Feb 2018
