Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Despite various attempts & efforts to increase pulses export, it could not increase** as expected. With higher domestic production and uncompetitive local price, govt has decided to extend support @ the rate of 7% to Bengal Gram (dal) & Besan through the Merchandise Exports from India Scheme (MEIS) for a limited period of three months. Under this scheme exporters get access to a scrip they can invoke as and when they import a similar quantity. There would be no immediate impact on chana cash market.
- **Chana cash market extended its loss and traded down by Rs 100 to 3700-3725** per qtl. in Delhi on weak demand from dal millers and higher arrivals. Arrivals are increasing and govt.'s agencies are active in various states. However, farmers are expected to restrict selling where procurement agencies are not active. It would not allow market to fall beyond a certain level. Chana is likely to trade in the range of Rs 3500 to Rs 3850 per qtl. in various mandis. Fresh demand is expected from April by which time, prices are expected to stabilize. Farmers are selling Chana under Bhavantar Yojna. Rajfed has started procuring Chana on MSP from 14th March. Besides, state agencies including Nafed are active in Maharashtra.
- **There is news from unconfirmed source that government may announce 7 % export** incentives on chana products like dal and besan. Govt may release circular soon in this regard.
- **Nafed is active to procure in various states. It has purchased 564182.99 metric tonne Tur in** various states. As on 17th March-2018 tur procurement in AP was registered at 39293.46MT, in Karnataka it was 322560.21 MT, in Maharashtra 126357.35 MT. Telangana contributed around 75,300 MT so far while it was 671.97 MT in Gujarat. Procurement is likely to continue till April-2018.
- **Higher duty (60%) would restrict import at negligible level even in the second half of the year** and restrict declining prices, to a great extent. Rajfed in Rajasthan would procure 4 lakh tonne Chana on MSP. Chana production estimate by govt. has been revised up, from the target of 9.75 MMT to 11.1 MMT for 2017-18 in the 2nd adv estimate, released on 27th Feb-2018. For 2016-17 final chana production estimate has been pegged at 9.38 MMT.
- **Tur market is facing demand problem from bulk buyers. Tur market stayed steady at Rs3750 to Rs3950** in Gulberga market. Market has decreased by Rs 300 in last two weeks due to sluggish demand. Stockists having old stock have preferred to offload 50 % stock, as they need money to buy new one from on- going kharif season. Agriwatch expects market to recover once old stock pressure comes to an end. Nafed has procured around 511213.13 MT Tur in ongoing Rabi season so far.
- **Food corporation of India is working on setting up pulses silos, under modernization** and technology adoption drive. A feasibility study regarding storage requirements, is under way and final report is expected to be submitted by the end of this month, done by Price waterhouse-Coopers (PwC). The center has been procuring pulses for last two years and buffer stock of 20 lakh tonne has been created. Hence, modern storage is needed.
- **Urad kharif and rabi production estimate has been pegged higher at 3.23 MMT, against** production target of 2.6 MMT in the second adv estimate released on 27th Feb-2018. For 2016-17 final production fig for rabi and kharif has been pegged at 2.84 MMT. Kharif Urad production has been pegged at 2.6 MMT against target of 1.85 MMT while rabi production has been pegged at 0.63 MMT against target of 0.75 MMT.
- **As expected, moong market traded lower despite govt's attempts to arrest declining** prices, through increasing bank limit for Nafed and provision in budget to ensure 1.5 times production cost for farmers. Higher rabi crop size in Odisha and huge inventory continue to pressurize moong cash market. Acreage in Odisha has increased from 5.17 to 5.86 lakh ha this year. At national level area under rabi Moong increased from 7.34 to 8.31 lakh ha this year. Out of total, Odisha contributed 5.86 lakh ha. Rabi production is expected to increase from 5.50 lakh tonne to around 7 lakh tonne. This would further ease supply in coming weeks.
- **Current improvement in Masur is due to demand from West Bengal.** It is expected to come down again. So it is advisable to buy after correction. Crop condition is good and it has started hitting market in Bihar. Pressure on lentil market continues as new crop is at hand. Export is not feasible as exporting countries offer it at cheaper

price. Import would be restricted due to 30 % duty. Market would move up April onward. Govt would procure on MSP in Uttar Pradesh and MP.

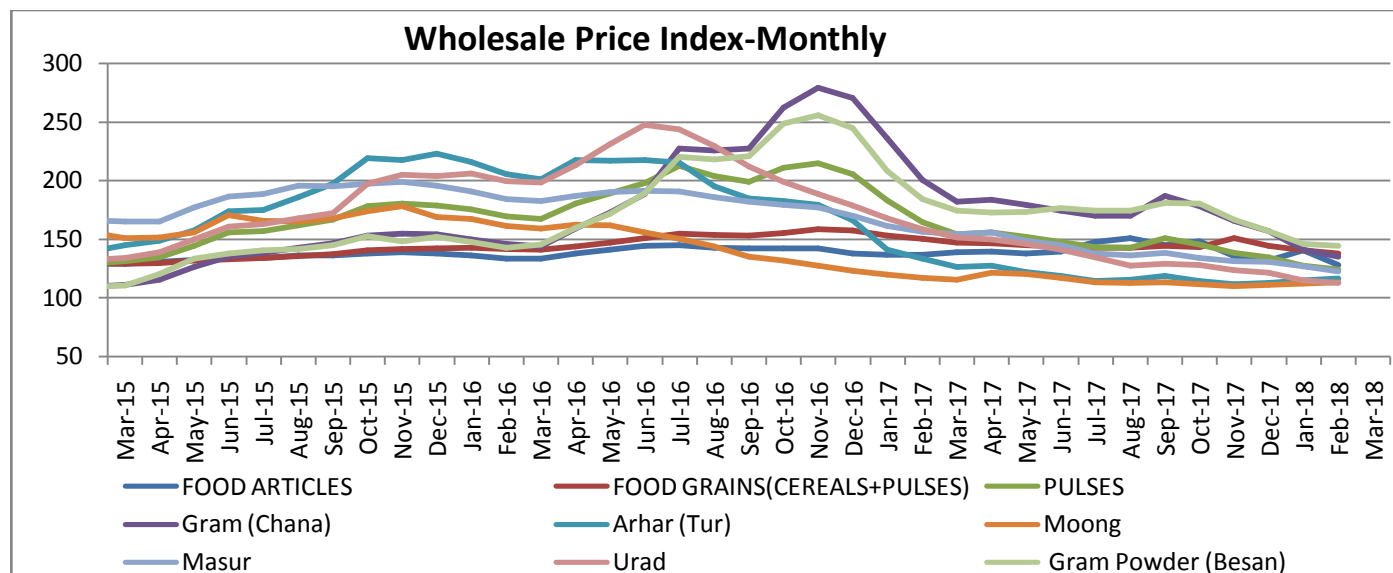

- **Peas market traded slightly firm. Range bound movement is expected this week.** Desi pea in Kanpur market is being traded at Rs2941-2950 per qtl. Canadian peas are being offered at Rs 2951-61 (duty included in it). Russian pea is being offered at Rs Rs2975. Steady to firm tone may prevail this week.

International Market:

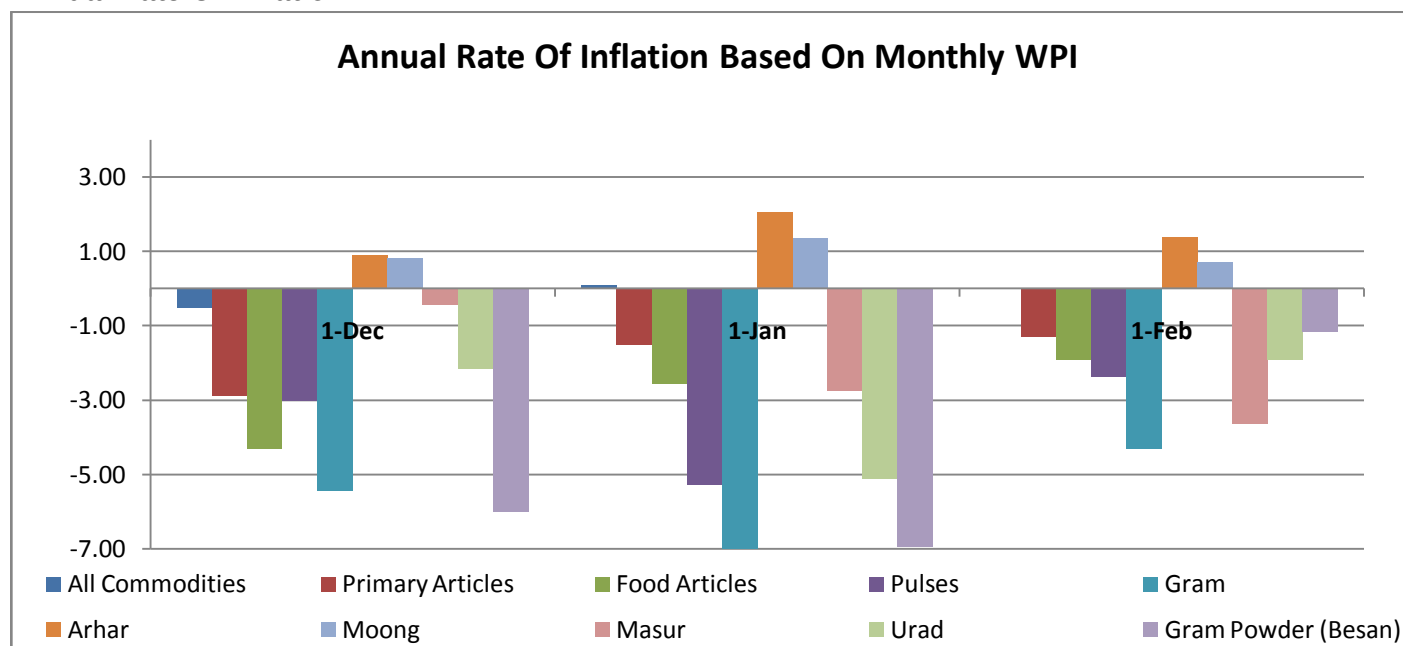

- **Production of urad and moong has decreased in Myanmar due to lower price realization**, quality issue and virtually no demand from India, as per latest update by Myanmar Pulses, Beans and Sesame Seeds Merchant Association. U Aung Htoo, deputy commerce minister of Myanmar is on a visit to India (18 to 20th Mar-2018) and discussion with Indian counterpart is on. The minister has requested to end quantity limit imposed on import, valid upto 31st March-2018. Under quantity restriction Indian cannot import more than 1.5 lakh tonne Urad & Moong (each) and 2 lakh tonne Tur in a marketing year.
- **After two consecutive bumper crop years of pulses in India, prices of pulses fell below MSP level and pressure is still on.** So, Indian govt is unlikely to increase import quantity in the first half of the current MY, starting from April. Farmers in Myanmar may decrease area under Moong and Urad this year and may shift to other alternate crops as prices are much below the production cost. Myanmar govt is planning to buy Moong to support farmers.
- **Global lentil market traded unchanged during the week under review. Weak demand from India and other importing nations has pressurized the Canadian lentil market too.** Lentil export from Canada has been decreasing continuously. In the first half of MY 2016-17 only 26% of the opening season supply of lentils, was exported. It is down by 51% from last season and 59% during the first half of the 2015-16 marketing year.
- **CEO of Myanmar Pulses Beans and Sesame Seeds Merchants Association (MPBSMA) San U Myat Soe**, has given hint that Indian and Burmese Govt.'s official are still engaged in sorting out issue related to pulses purchase from Myanmar. Price modalities are being set. Myanmar govt is eager to sell pulses to India at locally prevailing price while Indian govt wants to fix pulses price below market prevailing price. Market is awaiting decision.
- **Lentil price has come down from \$500 to \$475-80 per tonne.** Major buyers like India are not going to enter the market for any bulk purchasing. So, buying interest of other countries would not fill the gap. So price is likely to stabilize at current level.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production, would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition, Lentils production would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.
- **Imposition of 50% import duty on all peas, has started impacting export volume from Canada.** According to Agriculture and Agri-Food, Canada Peas export would decrease from 3.9 MMT (2016-17 to 2.4 MMT in 2017-18). Lower export volume would increase carryout around 5 lakh ton, higher than normal expectation. Yellow peas prices are hovering in the range of C\$5.00 to C\$6.50 a bushel in western Canada.

Weekly Outlook: -Pulses are likely to trade range bound with weak bias likely to continue.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 3.0 point from 127.1 in **Jan** to 124.1 in **Feb**-2018.

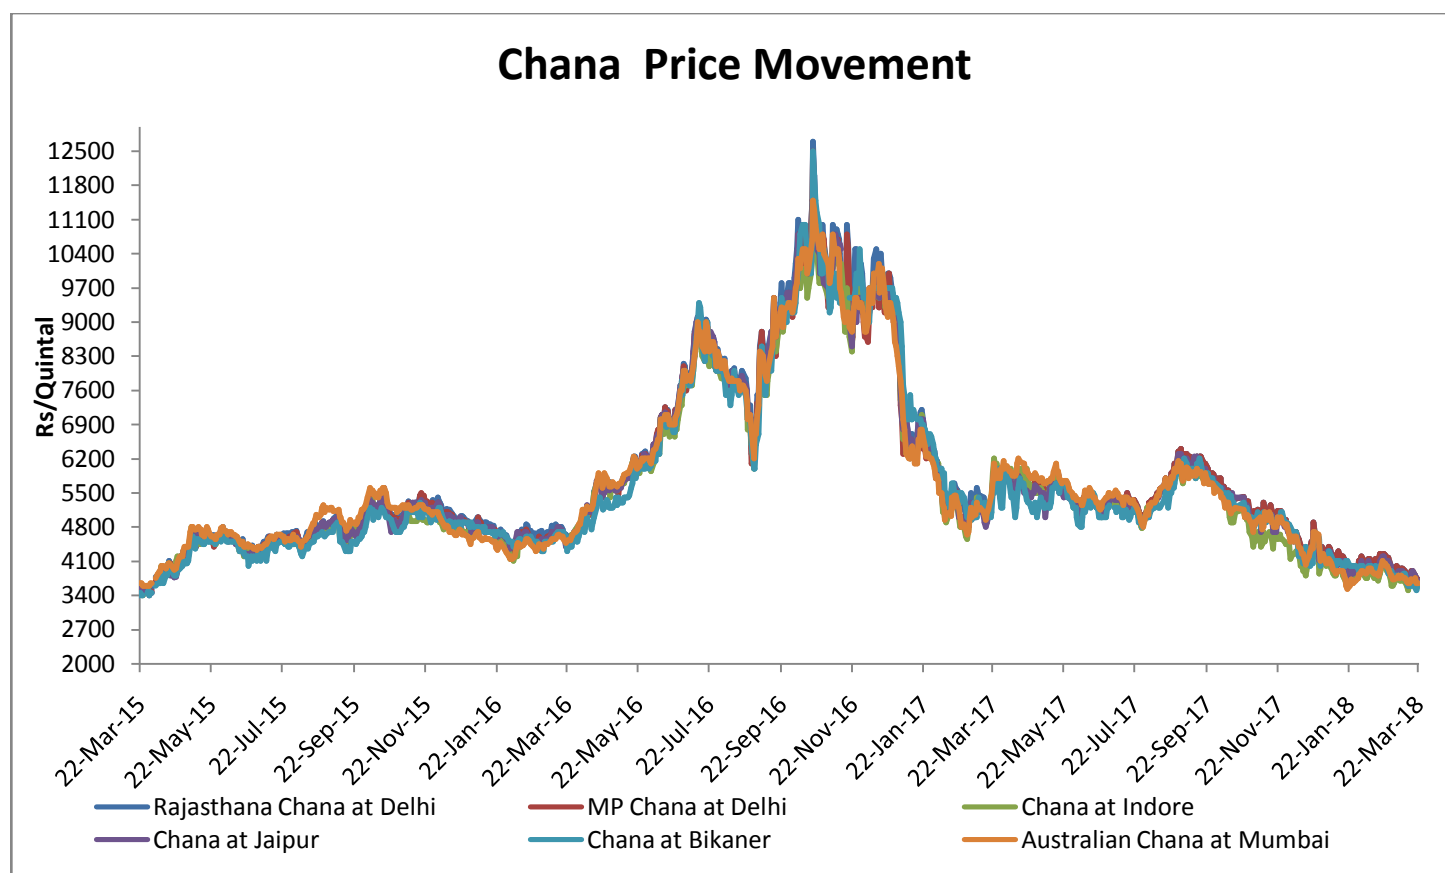

Pulses-Wise Scenario:

Chana

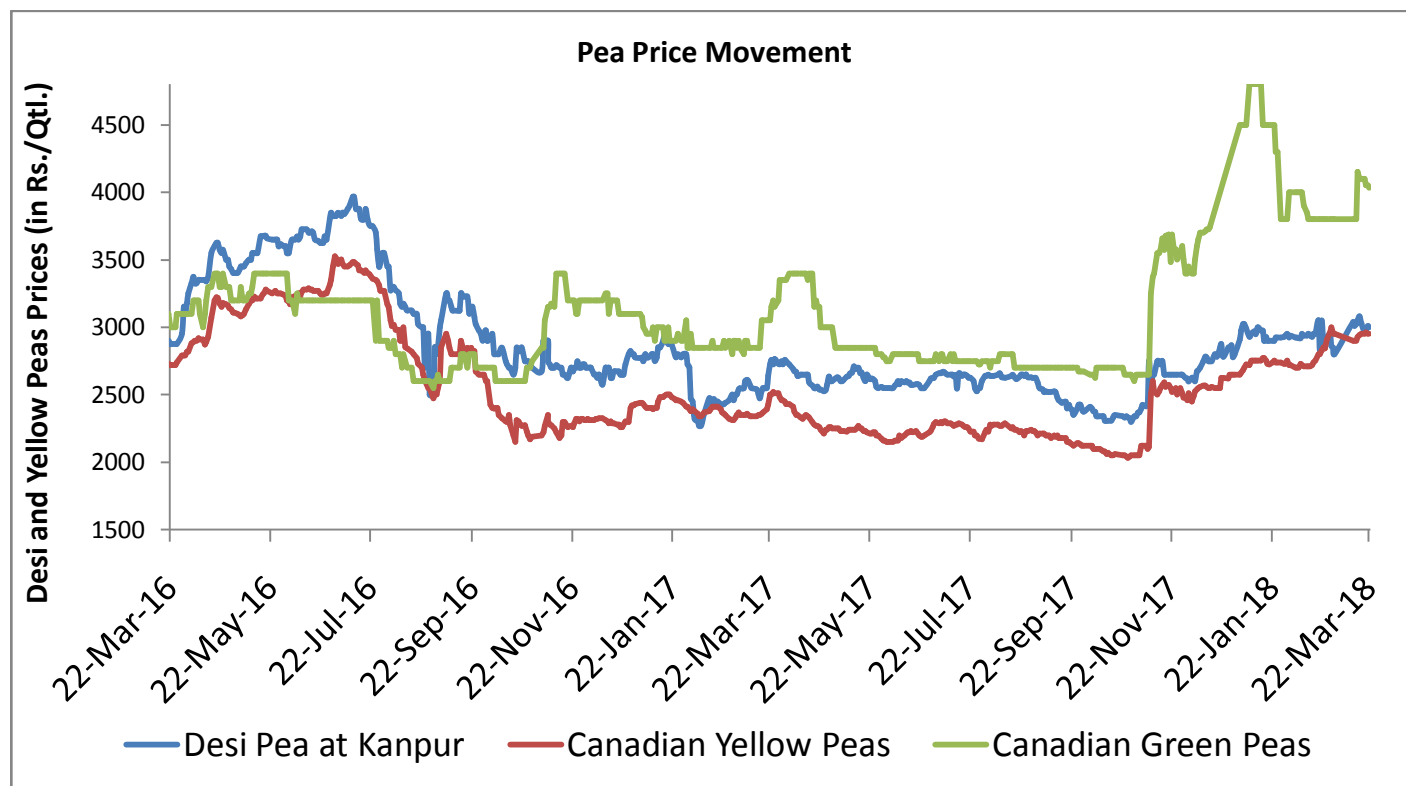

Current Scenario:

Chana & Tur continue to reel under pressure and the processing units across the country are facing a difficult phase. Actually, lower price for both remain unfavorable as demand is weak and processing (operational) costs have gone up. It has forced millers to operate either at lower capacity or stop completely. Higher stock in govt.'s custody and the fear of intervention by the government too, is affecting trade sentiment. Lack of interest by stockists in a bearish market has also added to the woes of the millers. Procurement agencies are active and govt has extended 7 % export incentive to gram dal and besan for another three months. It would not allow market to go beyond a certain level.

All India average prices for Chana decreased by 1.0 percent to Rs 3658 per qtl. Market is expected to stabilize near current level. In Delhi market; it is being traded at Rs 3700-3725 per qtl. In Mumbai, Australian Chana is being offered at Rs 3700-3750 per qtl. (old stock). There is no fresh import deal as there is no parity on higher duty. Steady to slightly weak sentiment may prevail in the near term. Dal export is possible in the second quarter of the year. Import is expected to remain halted due to 60 % duty. Buyers should buy on correction. Following graph illustrates the chana price movement in different markets:

Market Outlook: Slight downward correction is possible. Buying on dip is good for stakeholders.

**Peas (Matar):****Market Recap:**

Peas market traded slightly down during the week under review. Weak chana, may pressurize pea market this week too. As supply side is ample with commencement of new crop, slight correction might be seen in cash market in the near term. Pea may trade steady to slightly weak, taking clue from Chana. Right now, 50 % duty is applicable on all peas. The average price decreased by 1.45 % to Rs 3009 per qtl. in Kanpur market, Canadian pea decreased by 0.32 to Rs 2951. It may trade range bound in the near term. Import flow is expected to come to a halt in the first quarter. Downward correction is expected this week.

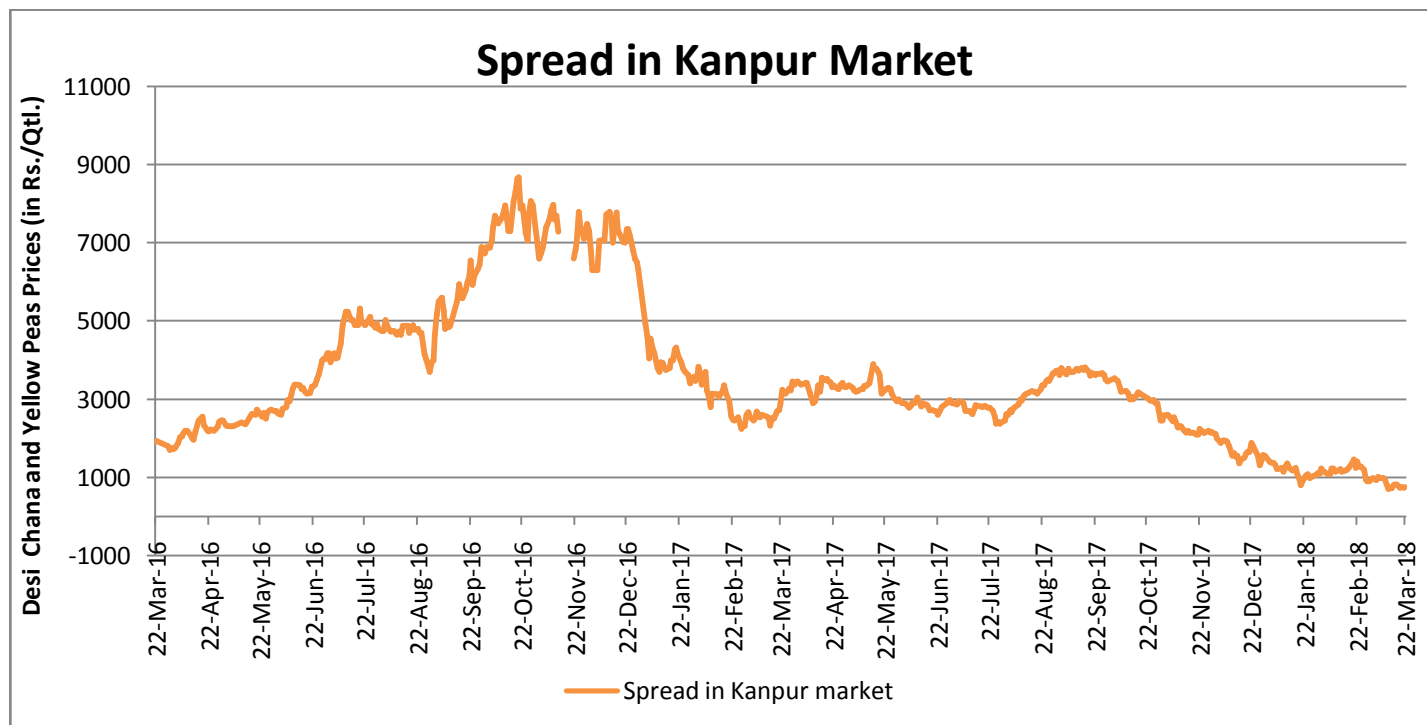

Current Market Dynamics & Outlook:

At Kanpur, Desi Peas traded firm at Rs 3000 due to weak demand and bearish chana market. Firmness is unlikely due to higher arrival of chana. Russian peas being traded at Rs 2911-21 in Mumbai while Canadian Matar, is being quoted at Rs 2931-41 per qtl. Green peas, was quoted at 4100 per qtl. Market is expected to trade range bound to weak in the near term. With current applicable duty, import volume is expected to come to a halt in March. However, it may increase once again from April, when arrival pressure from domestic crop will decrease.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market decreased by Rs32.5 to Rs 760 per qtl owing to increased prices of peas and decreased Chana price. Spread is expected to move in the range of 600 to 800 per quintal in the coming weeks on relative movement in Chana prices. Overall outlook seems steady to weak due to ample stock available in domestic market. Buying on dip is good.

Market Outlook: Outlook remains steady to weak this week.

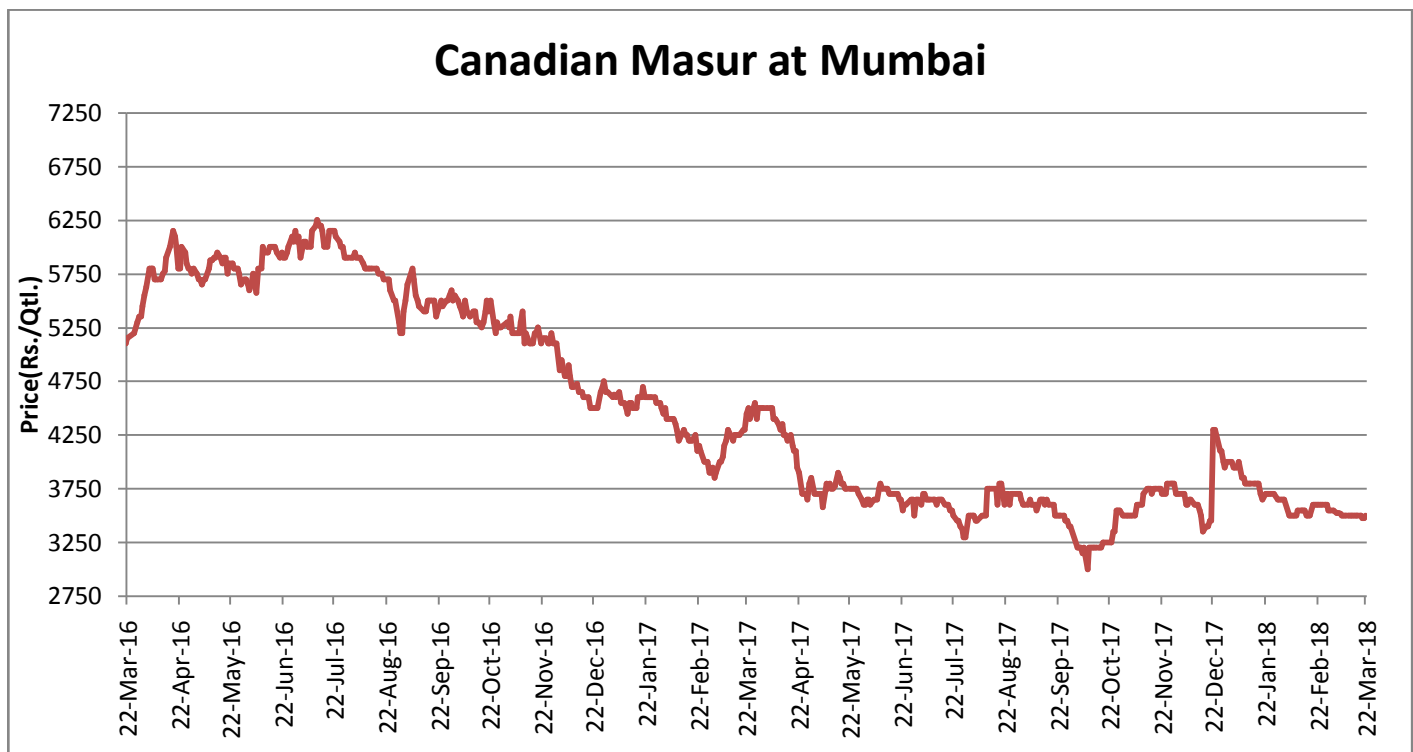

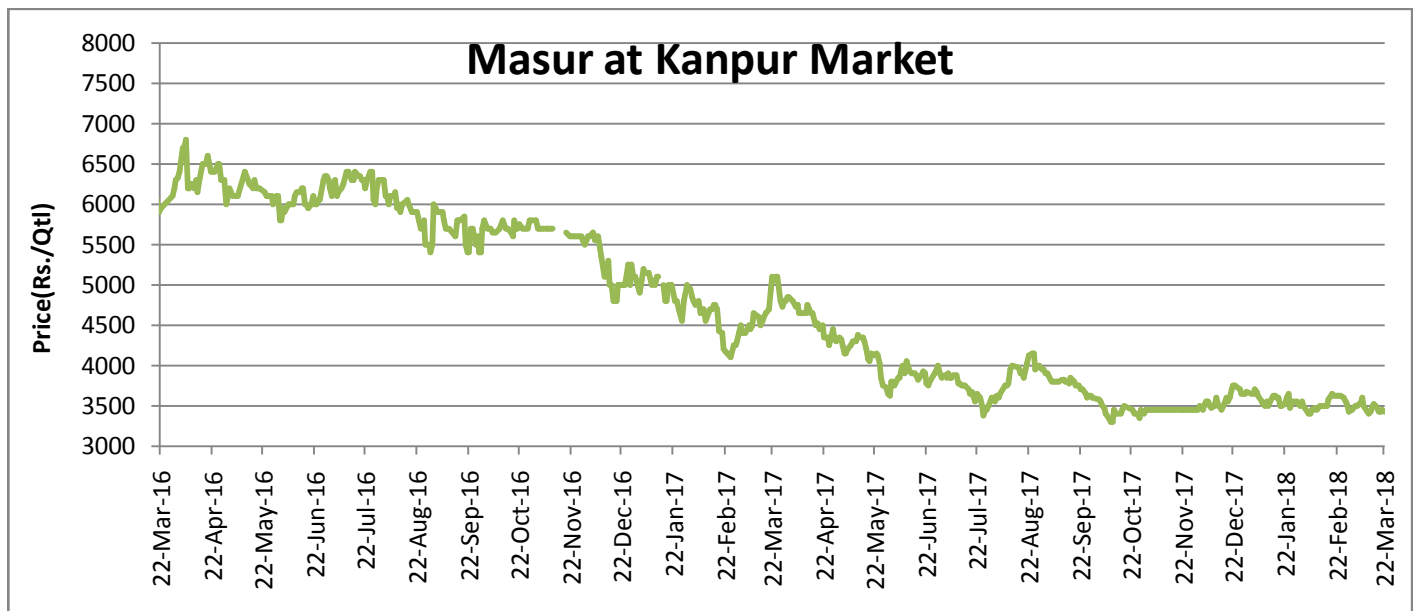

Lentils (Masoor):

Market Recap:

Kanpur market opened with a weak note in the beginning of the week and stayed steady on weak demand and eased supply side. Imposition of 30% import duty would continue to restrict import. New crop is coming into mandis. Buyers should take possession after correction. Area under Lentils is bound to increase this year as overall sowing trend is higher by 0.35 % at 17.36 lakh ha so far. Overall sentiments remain steady to slightly firm in the medium term. Stakeholders should buy on dip. Demand from Bengal would support market. There is a fear of lower crop size as yield is not up to the mark in UP.

Current Scenario:

Weekly average price decreased by 0.28% to Rs 3445 per qtl. Currently in Mumbai, it is being quoted at Rs 3400-3425 per qtl. Canadian Massor is showing steady movement and was traded in the range of Rs. 3450/3550 per quintal. Steady to slightly weak tone may prevail this week too, due to pressure from new arrival. Buying on dip is good.

Market Outlook: Prices are likely to notice steady movement this week.

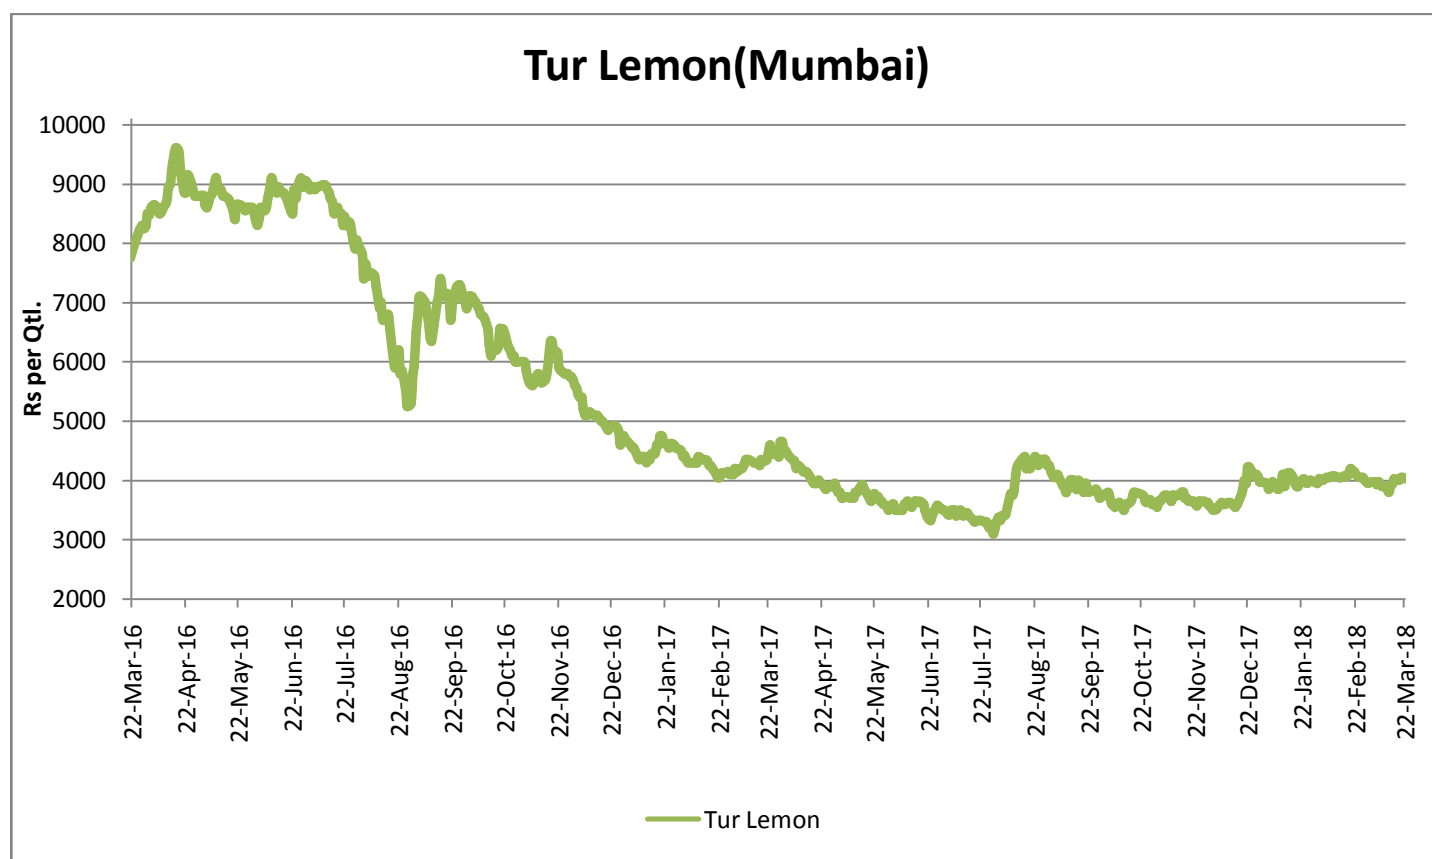

Pigeon Pea (Tur/Toor):

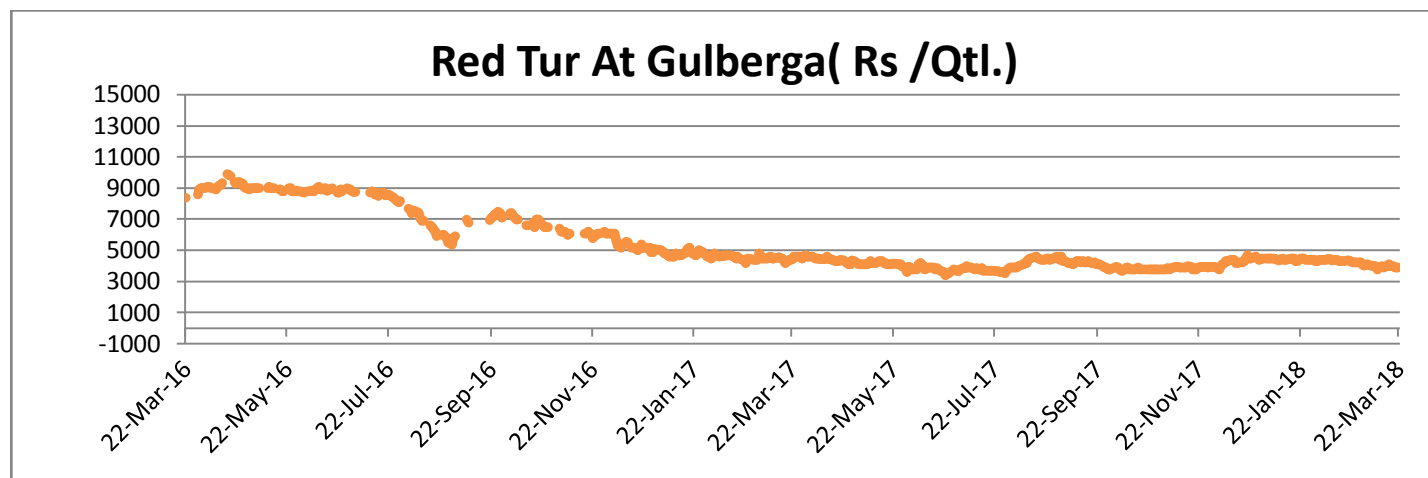

Market Recap:

Tur continues to reel under pressure and the processing units across the country are facing difficult phase. Actually, lower price for both, remain unfavourable as demand is weak and processing (operational) costs have gone up. It has forced millers to operate either at lower capacity or stop completely. Higher stock in govt.'s custody and the fear of intervention by the government too, is affecting trade sentiment. Lack of interest by stockists in a bearish market has also added to the woes of the millers. New Red Tur is being traded at Rs.3850-4150 per quintal. Procurement drive, marginally firm quotes in Myanmar and increased private buying would prevent market from further decline. Myanmar offers old Tur at \$370-375 per tonne while new Tur is being offered at \$410-15 per tonne. It is advisable to buy on dip.

Current Market Dynamics & Outlook:

Tur market based on market fundamentals would not move up suddenly. It would take time to recover from current level in the months ahead. Procurement drive is on. Average price moved slightly down by 1.5 % to Rs3940 per qtl. in Gulberga market. Range bound movement may prevail in cash market this week.

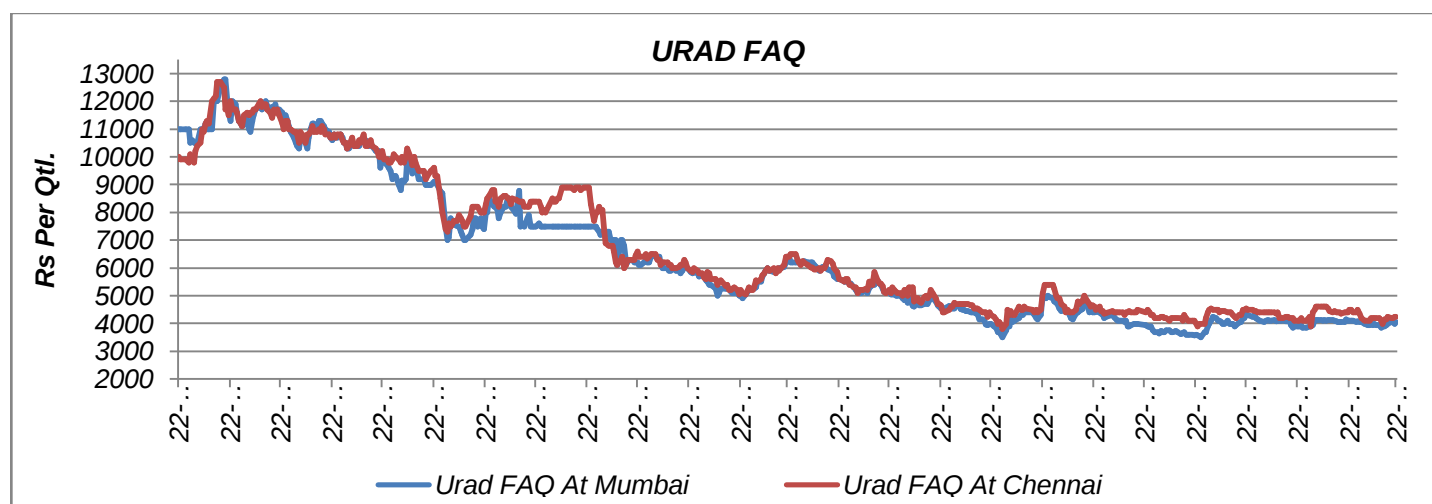

Market Outlook: Tur prices are likely to show steady movement this week.

Black Matpe (Urad):

Market Recap: Urad traded slightly down on higher supply. It is being traded at Rs 3900 to Rs 4100 per qtl in Chennai market. Steady tone may prevail with ongoing procurement drive. Government's procurement drive at MSP (Rs.5400, including bonus of Rs.200) remains supportive to cash Urad market. However, overall condition is that of very high surplus. New arrivals from Rabi crop and selling through auction by central pool may restrict any upward momentum in the short term. It is likely to trade in the range of Rs.4200 to Rs.4600 per quintal in the open market in coming weeks, depending on quality. Urad FAQ Chennai, is being traded at Rs 4200 to 4250 per quintal while in Mumbai it traded at Rs.4000-4050 per quintal. There is no export opportunity for Indian Urad at prevailing prices as Myanmar offers FAQ Urad at \$465 and SQ at \$590 per tonne.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.3900-4050Qtl.) and Chennai (Rs.4100-4200Qtl.) noticed weak tone, at Vijayawada, prices moved up at Rs 5100. Steady to slightly weak movement might be seen in Urad market due to lack of demand at higher level. The following graph shows the prices movement in different markets:-

Urad Polished at Vijaywada

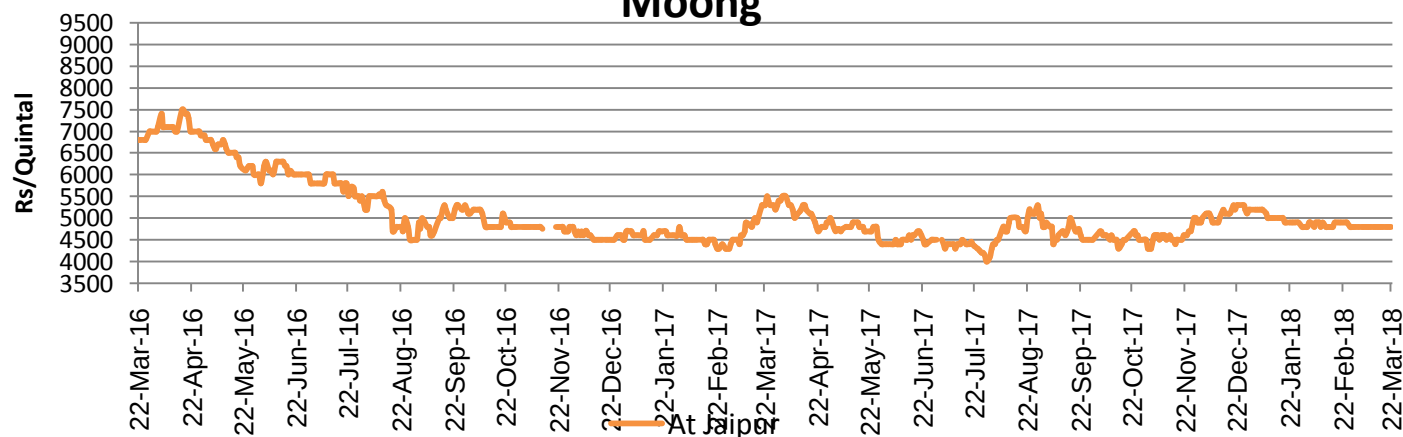

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week.

Green Gram (Moong):

Market Recap:

Moong market traded unchanged at Rs 4800 in Jaipur market. As arrival, has decreased, more dip is unlikely from current level. New crop is 3-4 months away from now, so steady tone may prevail. It is likely to trade in the range of Rs 4700-5000 per qtl. in Jaipur market. Dal demand is likely to improve as availability of vegetables starts decreasing with increasing temperature. However, selling by Nafed and Markfed would restrict market from moving beyond a certain level. Markfed has issued tender for sale of 1.93 lakh tonne Moong in MP. It would continue to balance supply side and would continue to affect market sentiments in the weeks ahead.

Moong

Market Outlook: Moong prices are likely to trade steady in the near term.
