Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Tur market is likely to trade steady to firm as it has adjusted the impact of opening of import**(2 lakh tonne) from Burma & Mazambique (1.5 lakh tonne) this year(2018-19).As govt has ample stock(around 8.5 to 9 lakh tonne),any major spike is unlikely. However, it would continue to trade steady to slightly firm. Higher MSP(proposed at Rs 5850 per 100 kg) may encourage farmers to maintain area at least, at last year's level. Good monsoon rain is expected, so production is unlikely to decrease this kharif season. In gulberga market Tur is being tradeed at Rs 3700 to Rs4100 per qtl. It is necessary to have a close eye on recent Developments that are still Influencing Markets.
- **Moong arrival from summer crop has started increasing in various markets.** Demand from millers remains limited and it has started pressurizing cash moong market once again.Carryout is ample amid sufficient stock available in govt.'s hand. New arrivals have been reported from MP, UP, Rajasthan & Gijarat. Besides, Nafed & other agencies are selling Moong on lower level. So any firm trend is unlikely in the weeks ahead. Moong in Jaipur market is being traded at Rs 4800-4900 while it is being traded at Rs 4500 to 5000 in Indore. New Moong is being traded at Rs 5000 -5200 per qtl.Moong production estimate has been revised down from 1.42 to 1.39 MMT in 3d Adv estimate against the set target of 1.65 MMT for 2017-18 for kharif.
- **Yellow pea import is not possible till 30th June-2018 as quata set for one lakh tonne is over** and it has led to a sudden upward movement of market..After June, import would resume at 50 percent import duty. Until then, steady to slightly firm trend may prevail in yellow & green pea market. Import of yellow peas would be limited to 1 lakh tonne till 30th June-2018.It will be effective from 1st April to 30th June-2018 for three months. The restricted quantity also includes import from 1April to 25th April..
- **India has produced record 23.95 MMT pulses in 2017-18 against23.13** in 2016-17.This year too there is good production prospects and India expects one more bumper crop in kharif 2018-19.Good monsoon rainfall and higher MSP have encouraged farmers to grow more pulses. However, situation is not favorable for farmers due to lower realization this year. If prices continue to rule below MSP, farmers may reduce Tur and Urad Area in kharif season.
- **DES has revised pulses production estimates from23.95 to 24.51MMT** in the 3rd Adv.Est released on16th May-2018 for 2017-18 season.It has finalized last year production at 23.13 MMT.
- **According to agriculture ministry, import of pulses in India has** declined by around 10 lakh tonne from 66 in 2016-17 to 56.5 lakh tonne in 2017-18 due to bumper rabi & kharif crops in two consecutive years. Import would continue, despite quantity restriction and import duty.India has to import5 lakh tonne pulses(2 lakh tonne Tur,1.5 lakh Tonne Moong & 1.5 lakh tonne Urad) this year. Besides, lentil and yellow pea import would continue as per domestic market demand.As there is surplus in domestic market, import is bound to decline considerably this year too.
- **Yellow pea import is not possible till 30th June-2018 as quota set for one lakh tonne is over** and it has helped market to move up suddenly.After June import would resume at 50 percent import duty.Till then steady to slightly firm trend may prevail in yellow & green pea market.
- **In a latest development, MP state govt has approved buying of 11,27,325 tonne** chana on MSP. Nafed has procured total 7.89 lakh tonne chana so far. Out of total, it has procured 3.65 lakh tone chana in MP so far.
- **Masur cash market traded firm and increased by Rs 100 per qtl. due to improved buying by mills.** Upward momentum is expected to continue this week too, as demand from bulk buyers has improved. Import is likely to remain restricted due to 30 % duty and ample availability from new local crop.Procurement on MSP in MP and

Uttar Pradesh may lend some support to cash market in coming weeks. In Mumbai market, masur is being traded in the range of Rs3500 to Rs3850 per qtl.

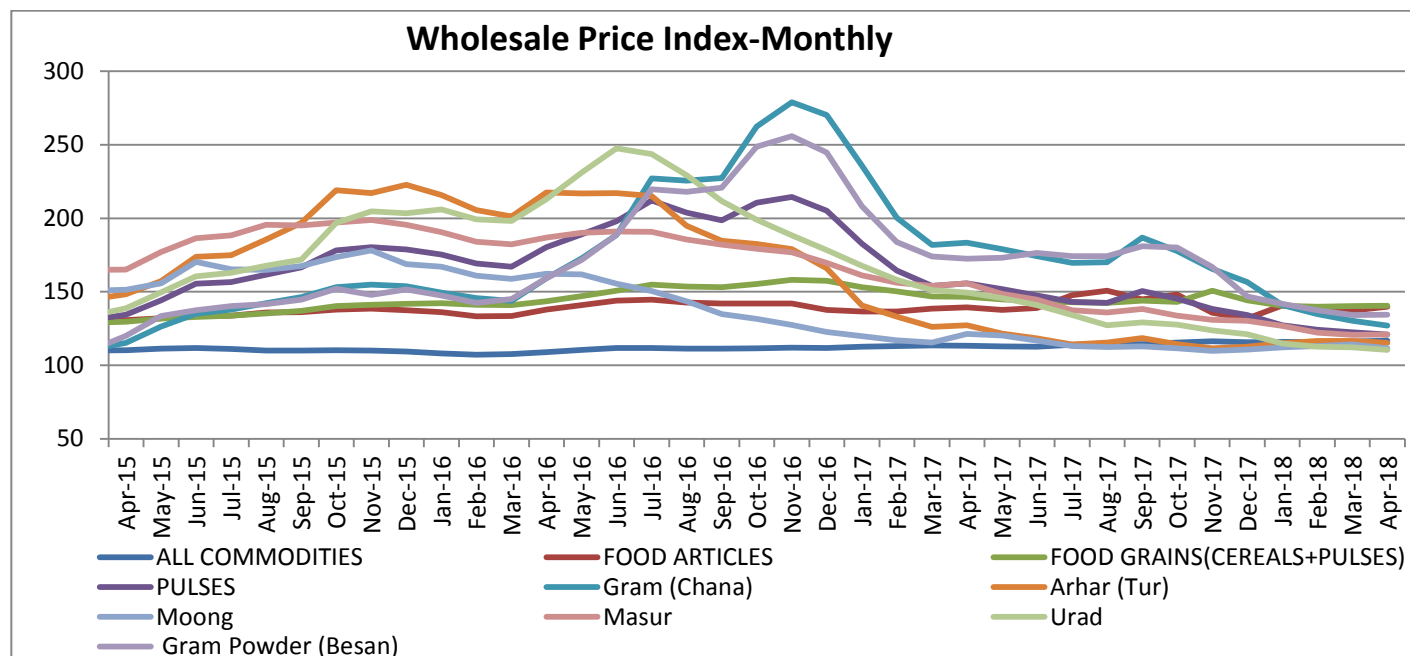

International Market:

- **Chickpea production in US is likely to increase from 3.13(2017) to 4.34 lakh tonne** in 2018. Lentil production may be steady at around 3.39 lakh tonne this year. Pea production too would increase from 6.43 to 6.69 lakh tonne in 2018. Sowing of pulses continues in US and Canada. As major buyers are almost out of the market, global pulses market may stay steady to slightly weak in coming weeks.
- **Planting of lentil continues in Canada and almost 60 percent crop has been sown** so far. The pace and coverage of sowing is higher than last year. However, moisture stress in the field and comparatively dry weather, may affect germination. There is a dire need for rains in growing belts. Lentil cash market traded mixed, despite improved pace of export. Large green Laird, 15/64 is being delivered to plant at an average price of 26.25 CND cents per pound. Medium green Richlea is being delivered at 23.50 CND cent per pound. Small red is being delivered at 17.03 CND per pound.
- **Global chickpeas market continued to trade steady to slightly firm as exporters and processors** continue to buy, for fulfilling their immediate demand for the market. Chickpea planting is underway in Canada & US and slow progress of seeding and delayed sowing have increased fear of lower crop size as crop may face bad weather condition during flowering stages. Sowing progress is running behind by 60 % so far. It is only 20 % so far against last year of 46 % and recent average of 35%.
- **Despite higher inventory (farms & commercial combined) of lentil in Canada, lentil market** remained unaffected. At the end of March, total lentil inventory in Canada was registered at 1.53 million metric tons (MT). Inventory was highest at record at 1.55 million MT in 2014. Out of this, farmers have over 1.36 million MT and the traders 168,000 MT in their custody. According to Statistics Canada, inventories in Saskatchewan increased from 835,000 MT last year to 1.25 million MT this year. However, it was decreased from 130,000 to 112,000 MT in Alberta.
- **Despite price distortion caused by Indian prohibitive import policy (50 % duty) on yellow peas**, import & quantity restriction up to the level of 1 lakh tonne till 30th June-2018, farmers in Canada may not reduce their peas area. Preliminary intention shows that farmers would plant 2.171 million acres of peas this year, slightly higher (2.165 million acres) than last year. Actually, yellow peas demand from Canada is increasing, as China has started importing more peas for feed industry. Besides, Canadian fractionation plants' demand is increasing continuously. It has helped to reduce dependency on India to a certain extent.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres** in 2018. While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown - says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for hummus, is another factor behind the strength in chickpeas market.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne** in 2017-18 from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha** in 2017-18. It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production, would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne** in 2017-18. It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition

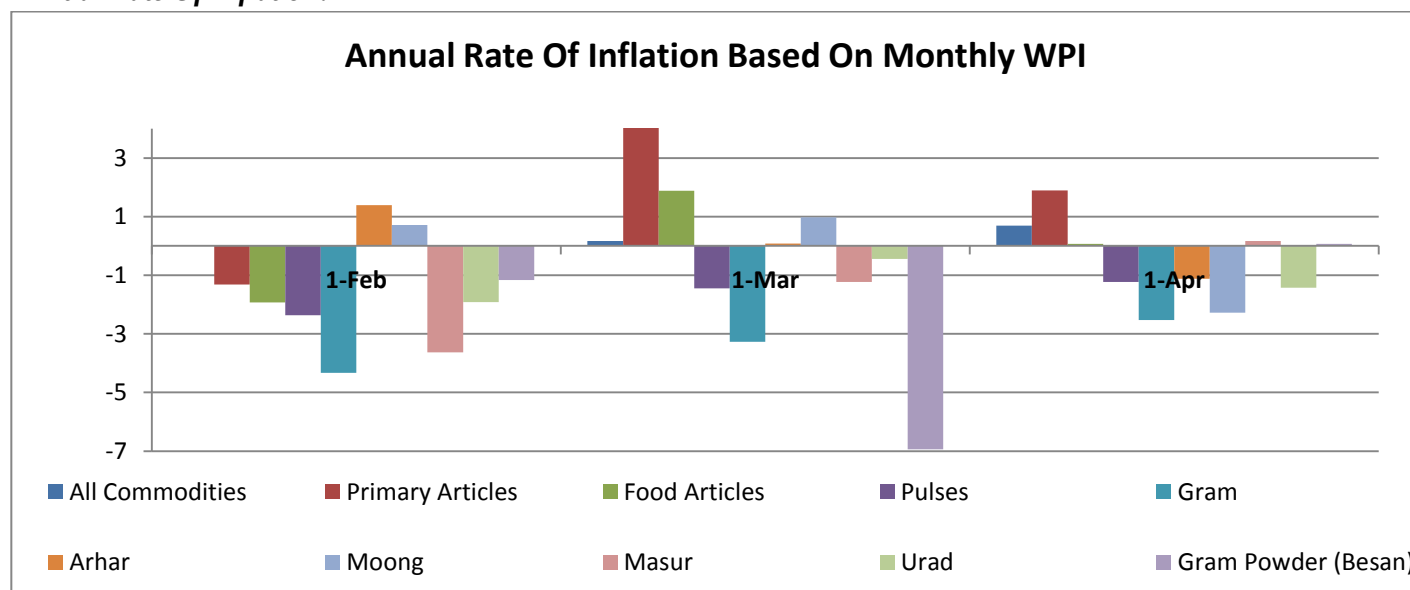

Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

Weekly Outlook: -Pulses are likely to steady to slightly firm.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

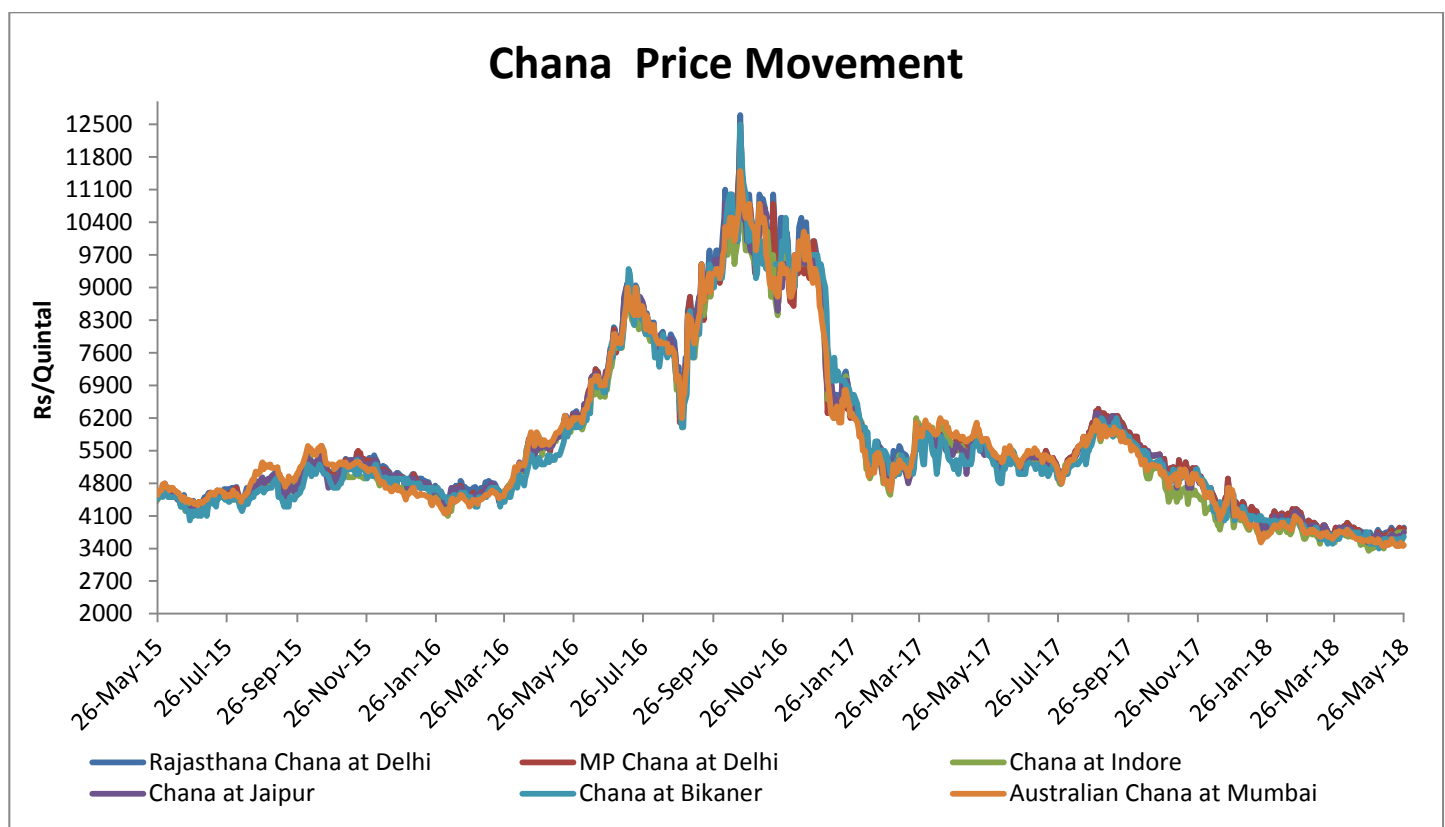

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 1.5 point from 122.3 in Mar to 120.8 in Apr-2018.

Pulses-Wise Scenario:**Chana****Current Scenario:**

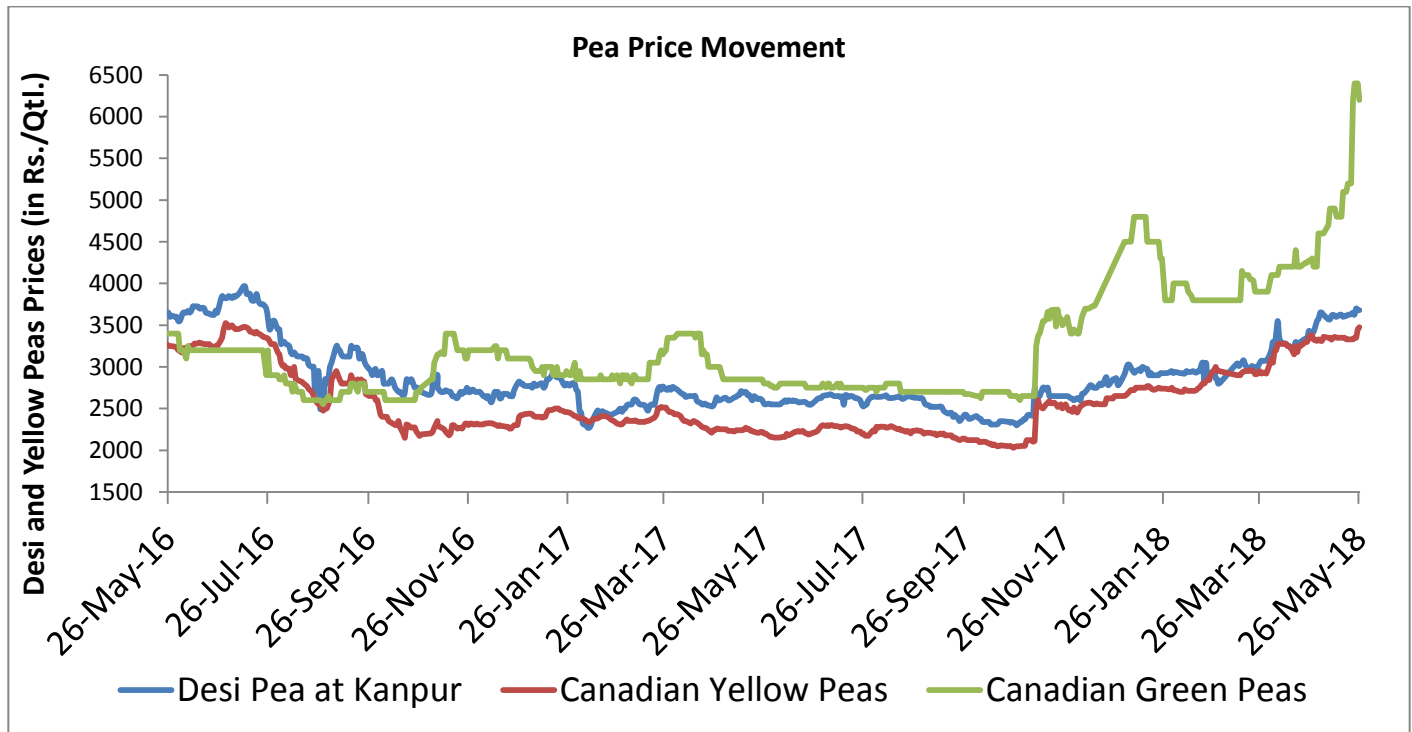

Recovery is expected from current level, in cash chana market, as arrivals in various mandis continue to decline amid improvement in demand due to commencement of Ramadan month and loss of mango crop from recent stormy winds in many mango producing states. Import is almost halted with imposition of 60 % duty. Besides, MP govt. would procure over 11 lakh tone chana this season. This may support cash market to a certain extent. Export may take place in second half in neighboring countries. In last one week chana in cash market has moved up by Rs100 per qtl. and it might improve Rs 100 more from current level. In Delhi market chana is being traded at Rs3825-3850. Buying at current level seems riskless.

All India average price for Chana increased by 1.07 percent to Rs 3718 per qtl. However, Australian Chana(old imported crop) price decreased by 1.39 percent to Rs 3471 per 100kg. Following graph illustrates the chana price movement in different markets:

Market Outlook: Steady to slightly firm tone seems possible this week too. Buying on dip is good for stakeholders.

Peas (Matar):

Market Recap:

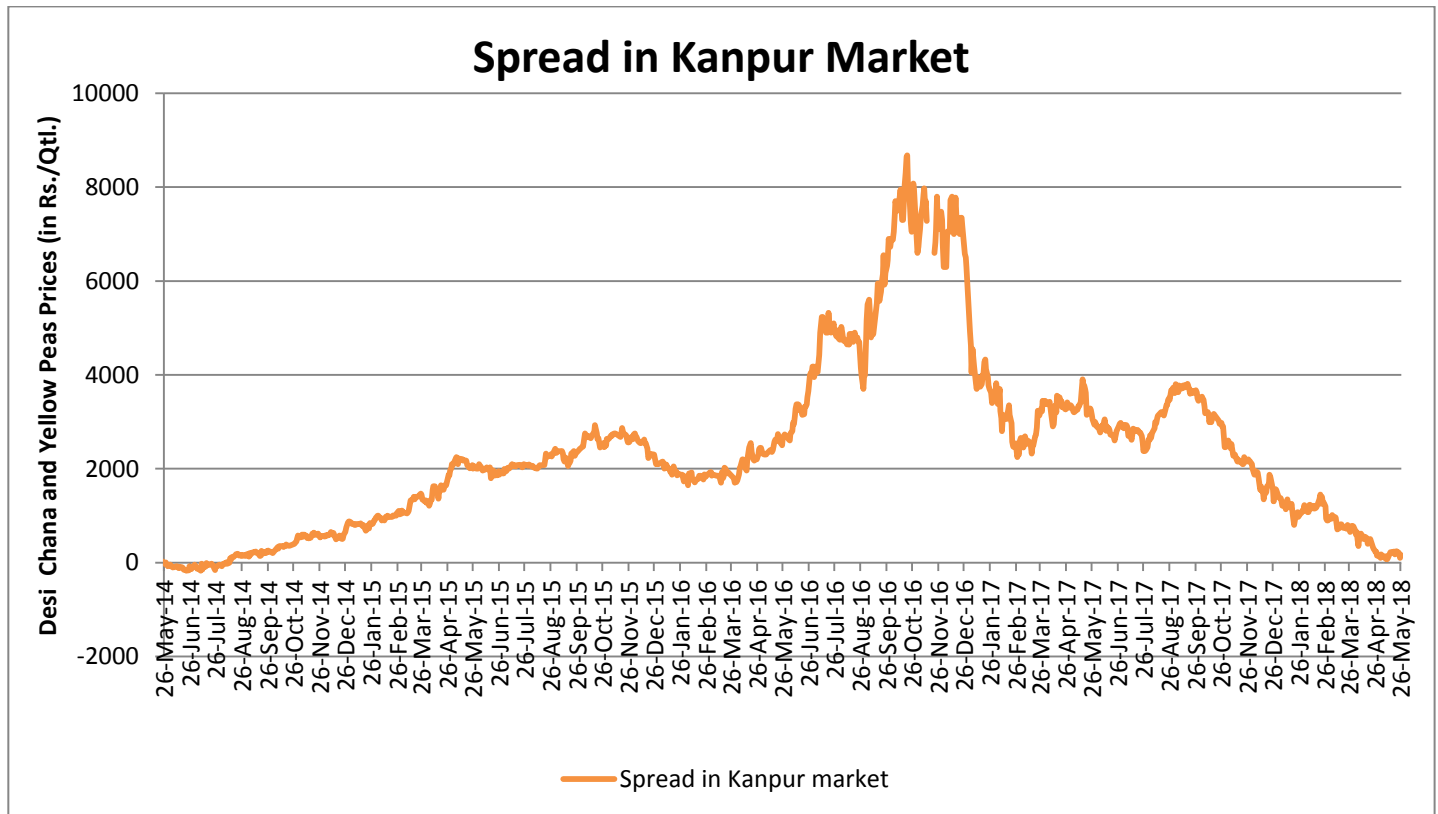

Desi pea, green pea and Canadian pea traded up this week due to restricted import volume till June-2018. Overall tone seems firm in the short to medium term. Supply-demand side is almost normal. Downward correction is not expected, as Chana price is likely to stay steady at current level. Right now, 50 % duty is applicable on all peas. All India average price increased by 8.77 % to Rs 4459 per qtl. In Kanpur market, it traded up at Rs 3680 per qtl. Higher import cost may remain supportive in the near to medium term. Import is not possible till 30th June, as quota of 1 lakh tonne from Apr to Jun-2018 is over now.

Current Market Dynamics & Outlook:

At Kanpur, Desi Peas traded up by 1.43 at Rs 3680- due to good demand and retention by stockists. However, hope for improving chana demand may support uptrend in the market. Russian pea is being traded at Rs 3251 in Mumbai while Canadian Matar, is being quoted at Rs 3475 per qtl. Green peas, was quoted at Rs 6000-6200 per qtl. Market is expected to trade steady to slightly firm in the near term. With current applicable duty and quantity restriction, import volume is expected to come to a halt in May too.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market decreased by Rs 22 to Rs 191 per qtl owing to increased prices of peas. Spread is expected to move in the range of 150 to 250 per quintal in the coming weeks, on relative movement in Chana prices. Overall outlook seems steady to slightly firm. Buying on dip is good, as imported pea costing would be higher.

Market Outlook: Outlook remains steady to slightly firm this week too.

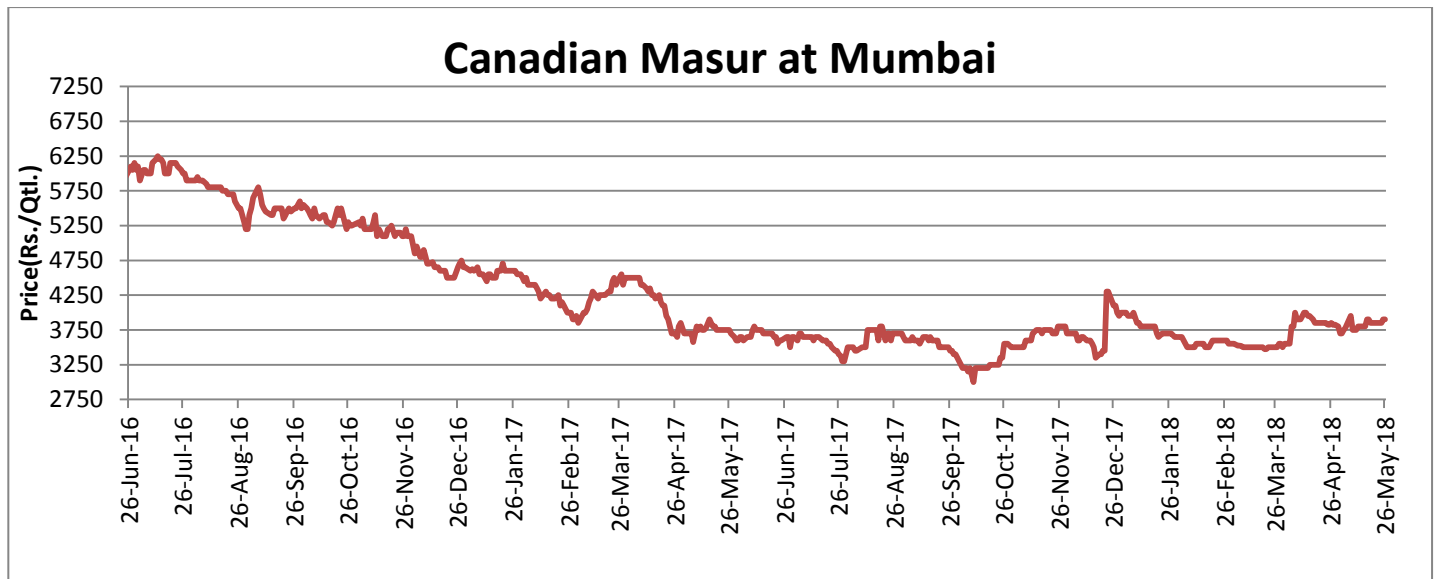

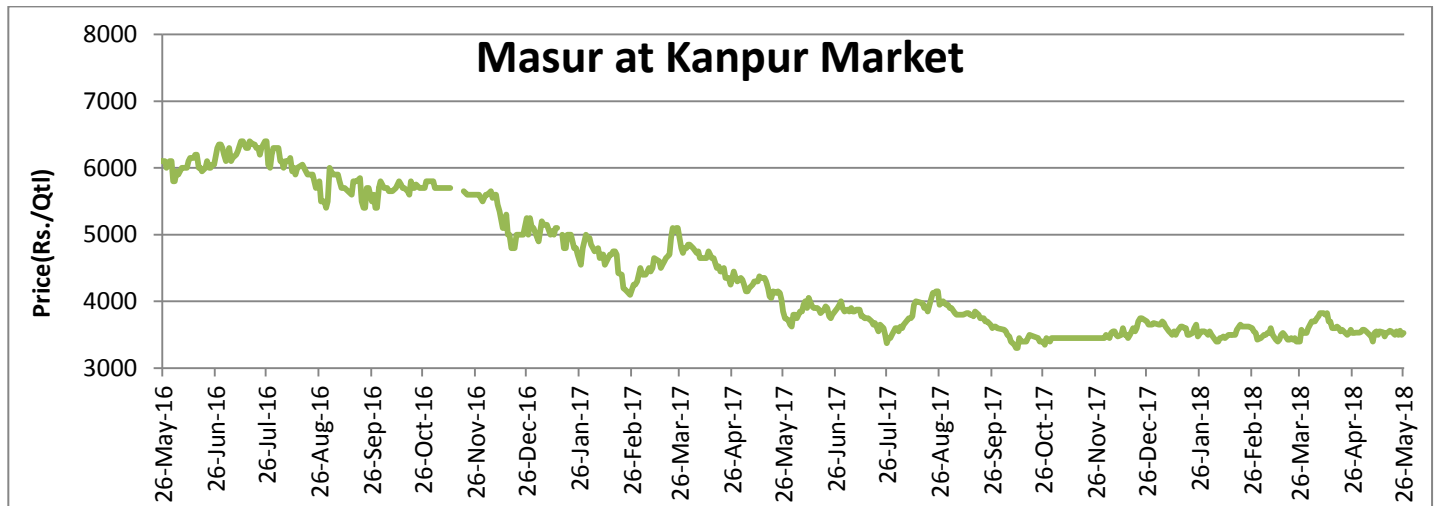

Lentils (Masoor):

Market Recap:

Kanpur market opened with a firm note in the beginning of the week but could not sustain firm momentum at the end of the week. Imposition of 30% import duty would continue to restrict import. Arrival has decreased. Buyers should take possession after correction. Overall sentiments remain firm in the medium term. Stakeholders should buy on dip. Demand from Bengal would support market. Masur dal demand is likely to improve in coming weeks.

Current Scenario:

Weekly average price decreased by 0.13% to Rs 3526 per qtl. Currently in Mumbai it is being quoted at Rs 3864 per qtl. Steady to firm tone may prevail this week as demand is likely to improve. However, illegal import from neighboring countries may cap uptrend as per market source.

Market Outlook: Prices are likely to notice firm movement this week.

Pigeon Pea (Tur/Toor):

Market Recap:

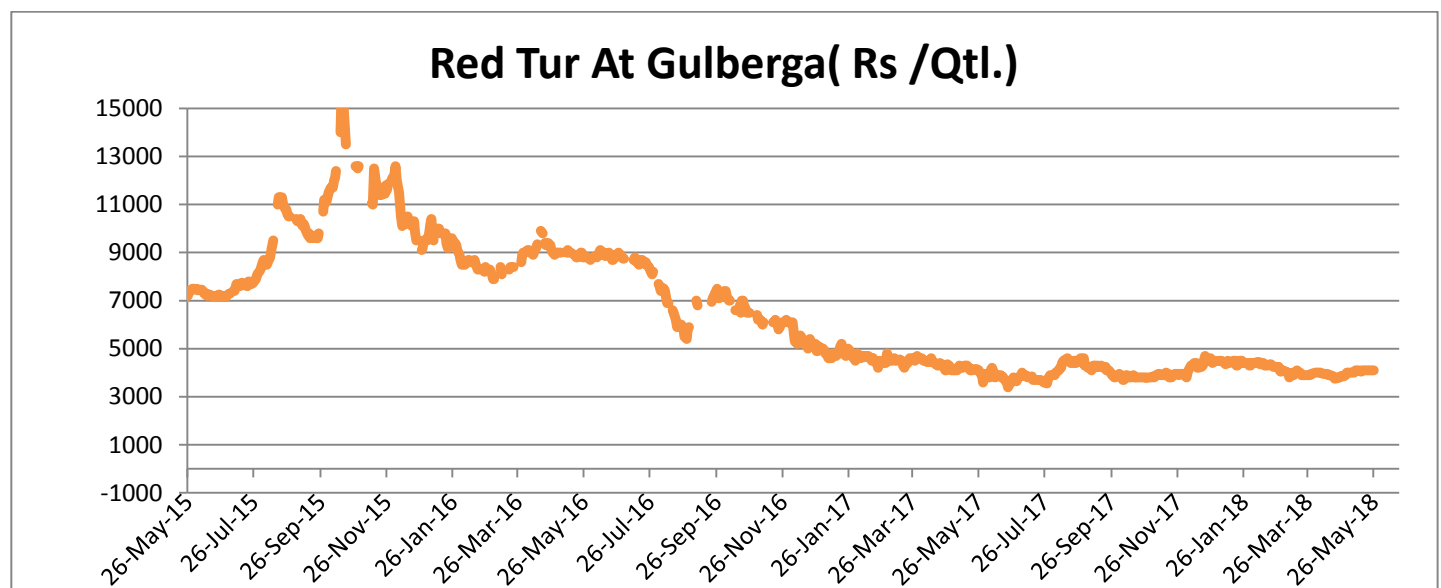

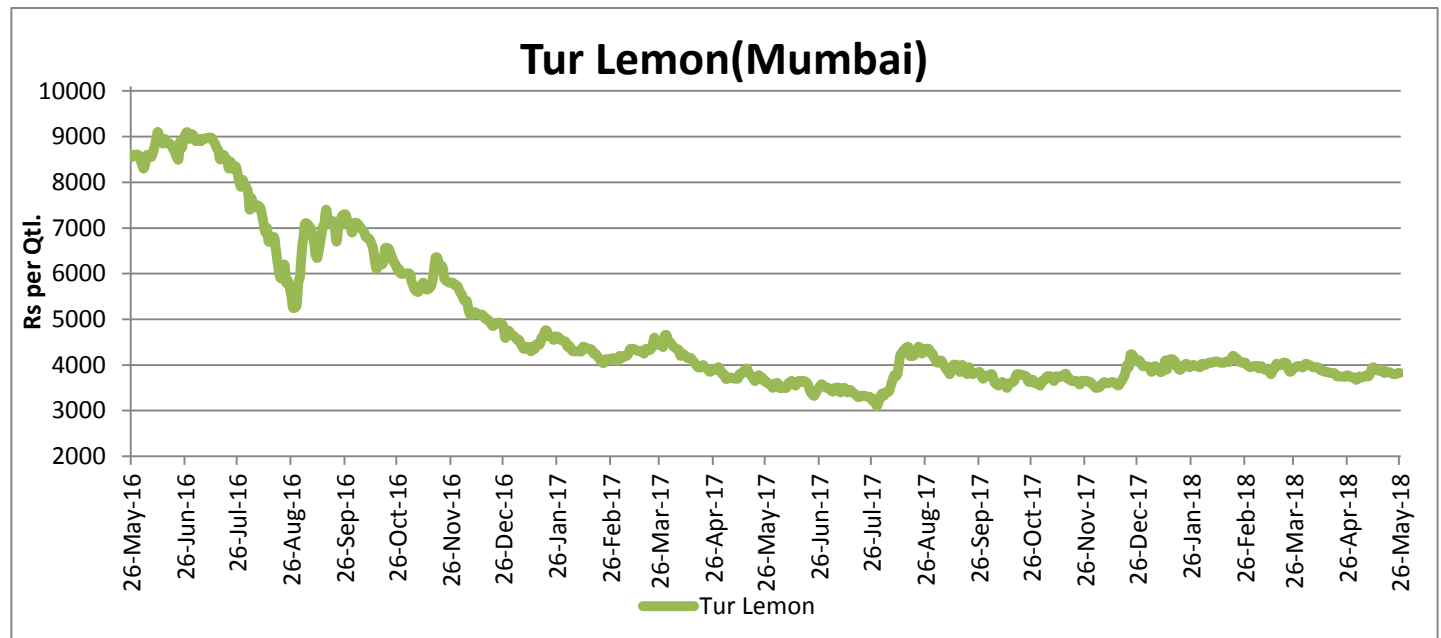

Tur market traded up by Rs 50 per quintal during the week under review, taking clue from decreasing arrivals in major mandis, growing fears of lower acreage and almost halted imports. Import has been allowed with certain conditions. Millers demand, due to beginning of marriage season, is expected to improve in coming weeks and it may continue to lend support to cash market fundamentals. It is advisable to buy on dip. Directorate of Economics & Statistics (DES), Agricultural Statistics Division has published its 3rd Adv. estimates for foodgrains this week and estimated Tur production at 4.18 MMT against the set target of 4.25

MMT for 2017-18. Tur production for 2016-17 has finally been pegged at 4.87 MMT. Tur production estimate has been revised up from 4.02MMT in 2nd Adv. Est. to 4.18 MMT in 3rd Adv estimate.

Current Market Dynamics & Outlook:

Tur market is expected to improve as import through quota system would not hurt market much. This means import is possible up to the limit of 2 lakh tonne during the fiscal year beginning, 1st April 2018 and only millers would get permission to import under quota allocated to them. This may encourage private buyers for holding stocks. Range bound movement may prevail in cash market this week in the near term.

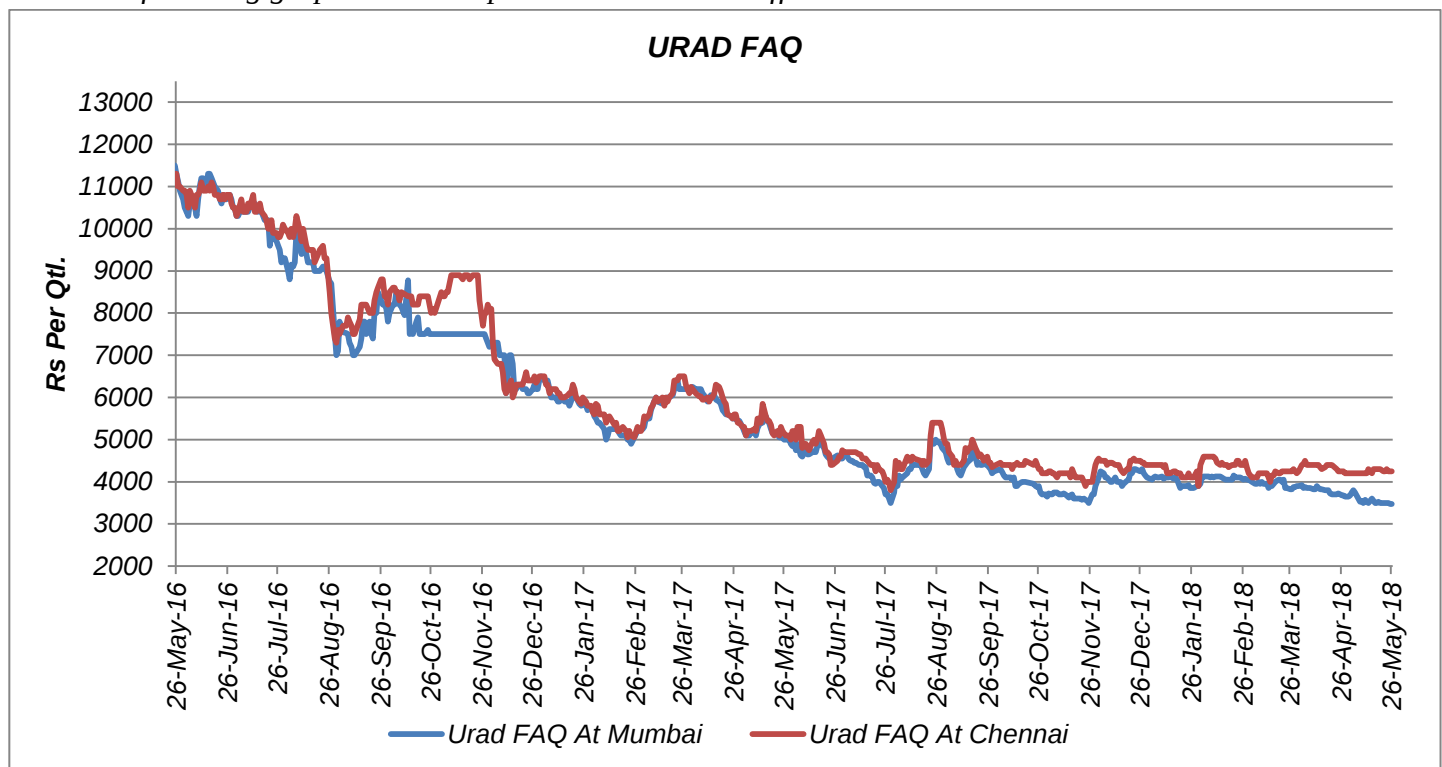

Market Outlook: Tur prices are likely to show steady to slightly firm movement this week..

Black Matpe (Urad):

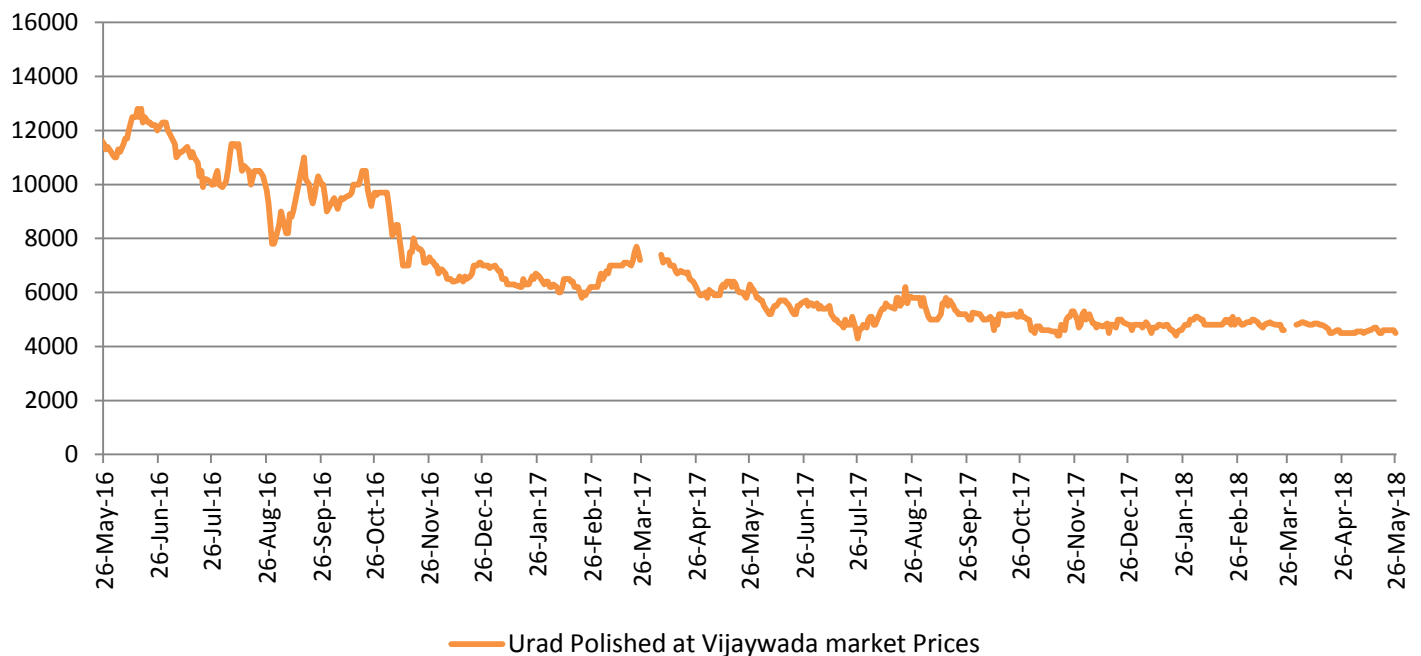

Urad cash market traded weak. Firmness in market is unlikely as there is ample availability of stock in private as well as govt's custody. In a latest development, central govt has given green signal for procuring 3000 MT Urad in Tamil Nadu and 1 lakh MT in Andhra Pradesh from Rabi season 2018 at MSP. It may support Urad price in local market to a certain extent. Odisha govt. has approved to procure Urad, Moong and Tur from farmers on MSP. Markfed will procure pulses in the state. Procurement quantity remains unspecified. Import is possible as govt has not notified any ban on fixed quota of 1.5 lakh tonne for three years, starting from 1st April-2018. Import is possible from Burma as it is offering Urad at much lower prices- FAQ at \$360-365 and SQ at \$480 per tonne.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.3650-3750Qtl.) and Chennai (Rs.4200-4250Qtl.) noticed weak tone. It traded down in Vijaywara too. Steady to weak movement might be seen in Urad market due to lack of demand at higher level. The following graph shows the prices movement in different markets:-

Urad Polished at Vijaywada

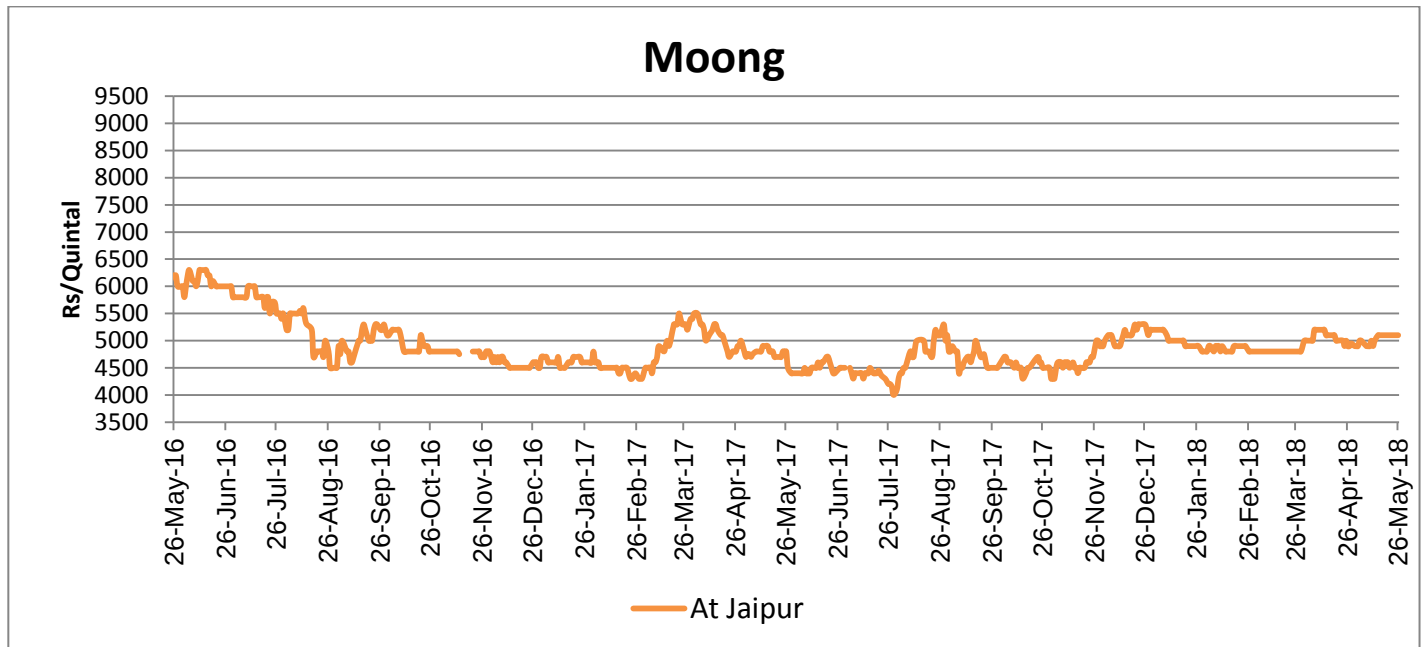

Market Outlook: Urad Prices are likely to show steady to weak momentum this week too.

Green Gram (Moong):

Market Recap:

Good pre-monsoon rainfall in Moong growing belt in Karnataka and more rainfall expected this week would encourage kharif moong sowing in Karnataka, especially in Mysore and Gadag regions this year. Sowing is likely to commence in the third week of May. New crop would arrive in the market approximately during second week of July. As crop size is small, prices may not be impacted much. However, new moong from UP and Bihar may cap uptrend in the near term. Quality of summer Moong crop in UP and Bihar is good. As Moong is fetching comparatively good price in pulses segment, farmers may increase Moong area in kharif season. However, selling by Nafed and Markfed would restrict market from moving beyond a certain level. It would continue to balance supply side and would continue to affect market sentiments in the weeks ahead.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
