Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **All India Pulses sowing was recorded at 1.87 lakh ha as on 8th June-2018 against 1.98 lakh ha last year till date.** It is running behind by 5.85 % so far. Tur, Moong and Kulthi area is running ahead from last year 143,30 & 122 % so far. As monsoon rains begin in many states, area under moong may be higher than last year. Even, Tur area in Karnataka may increase despite lower price realization this year. However, the trend of final acreage would be clear by mid July. It is beginning stages of planting. See details in table:
- **All India Chana procurement under price support scheme reached at record high at 2258654.792 MT till 6th June-2018.** Procurement is still on in some states. Total figure may touch 25 lakh tonne as Nafed continue to procure Chana till 20th June in two states. The highest procurement (1431675.447 MT) has been registered in MP, followed by Rajasthan (395318.248 MT), Karnataka (127301.264 MT), Maharashtra (108039.644), Gujarat (65647.039 MT), Andhra Pradesh (77662.450 MT), Telangana (50000.059 MT) and UP (3010.65 MT). Procurement target is over in AP, Telangana and Karnataka. Higher procurement this year signals lower private participation as it weakens inner tone.
- **There is no immediate respite for Tur cash market as bulk buyers like mills have slowed down processing activities with Maharashtra state govt.'s recent announcement of selling tur dal at Rs35 per kg through ration shop.** Earlier it was supplying tur dal at Rs 55 per kg. Besides, 3.5 lakh tonne likely import has put further pressure on tur market. Even government has stock of around 10 lakh tonne (new over 8.57 lakh tonne & old around 1.08 lakh tonne) right now. So market expects selling from central pool stock to continue at prevailing market price. All these developments remain unfavorable for Tur cash market right now. Expectation of decline in area may support market. However, it would be too early to conclude the final size of Tur acreage. Planting has begun in Karnataka & Assam. It would commence in other major producing states like Maharashtra, UP, Telangana, Jharkhand & AP by the end of this month.
- **Amid weak demand urad arrival from UP (Kekriline) and stockists selling strategy has pressurized cash market once again.** Supply is expected to increase in cash market and it would continue to cap any move of improvement till June. Millers have slowed processing activities due to lack of demand from retail market. Besides, kharif sowing has just commenced. Even govt has ample stock (2.02 lakh tonne) in central pool. Out of this stock only around 21 000 tonne has been sold out. The remaining stock would continue to enter in cash market at prevailing market price. It would continue to restrict any move of uptrend in cash market.
- **Moong market traded weak with new arrivals in Bihar, Rajasthan and U.P.** Quality of new moong is good and pressure would continue till 20th June. Recent rains and hailstorm did not affect standing crop much. There is no report of any damage so far. As stock in central pool is over 1.87 lakh tonne, supply side is expected to be normal. As on 25.05.2018, NAFED has procured 2.02 lakh tonne. Out of this only 23387 tonne has been sold out. Demand is weak and steady to weak tone may prevail in moong market in next two-three weeks more or till arrival pressure comes to an end.
- **Cash chana market traded lower taking clue from weak futures and subdued demand from bulk buyers like millers.** Millers have slowed down processing as demand at this time of season is almost 30 percent lower than normal demand. Only need based buying is taking place. Market is still awaiting direction. As monsoon season is about to begin and there is no chance of any major recovery in the near to medium term, new entrants would not prefer to retain stock in rainy season as quality of chana gets affected in high moisture condition. So selling is expected once again in July. It would restrict Chana price.
- **Kanpur market opened with a weak note in the beginning of the week but recovered again at the end of the week.** Imposition of 30% import duty would continue to restrict import. Arrival has decreased. Buyers should take possession after correction. Overall sentiments remain firm in the medium term. Stakeholders should buy on

dip. Fresh demand from retail market is awaited Masur dal demand is likely to improve in coming weeks once again.

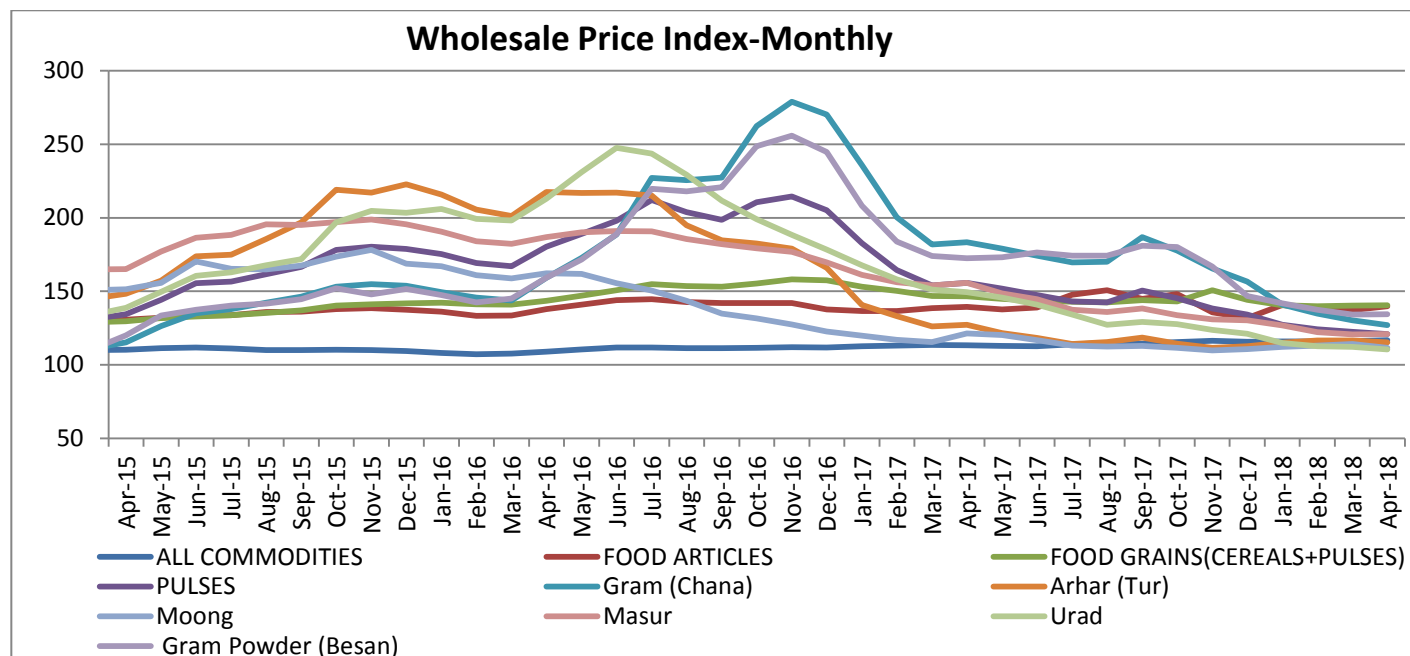

- **Yellow pea import is not possible till 30th June-2018 as quota set for one lakh tonne is over and it has helped market to move up suddenly.** After June import would resume at 50 percent import duty. Till then steady to slightly firm trend may prevail in yellow & green pea market.

International Market:

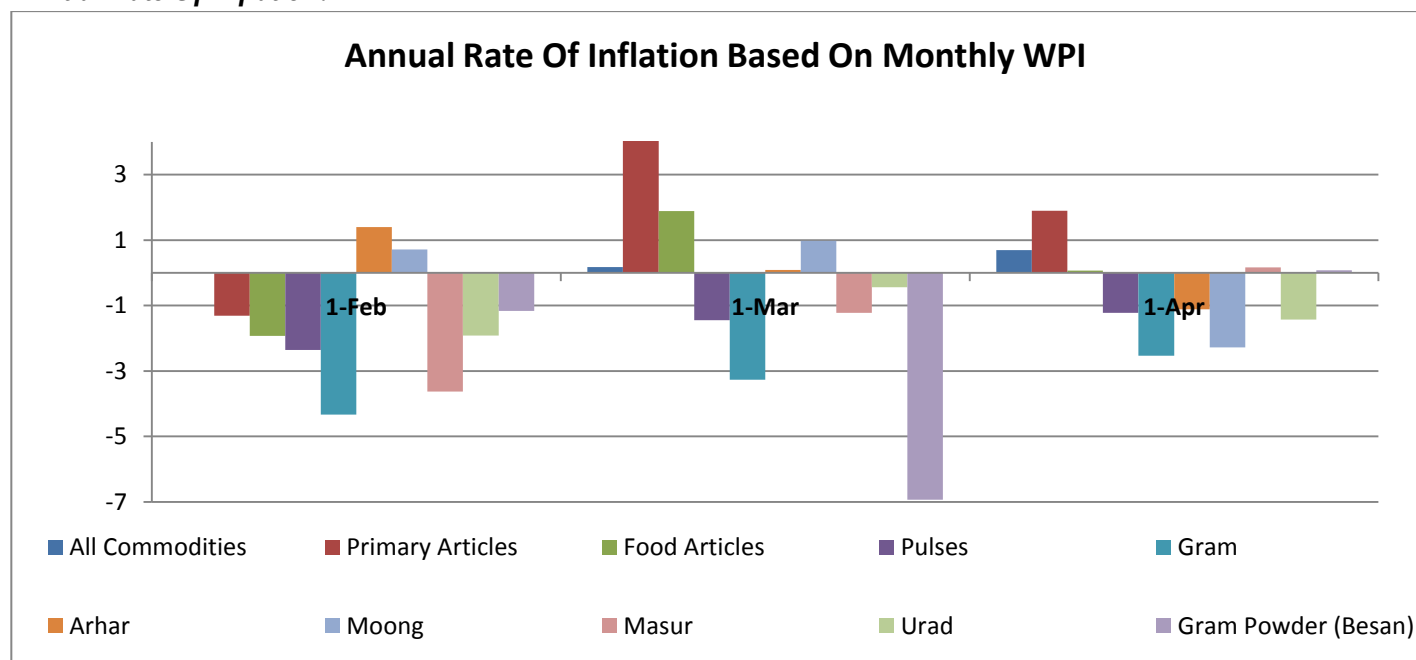

- **As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne pea in April-2018.** The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However, it is quite higher from March shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- **Canada exported 36,600 MT lentil in April-2018, It is higher by 3500 MT shipped in April-2017.** Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900 MT). B, desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this MY has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **The current 2017-18 season for pulses in Black Sea Region is coming to an end now.** Ukraine & Russia are major pea producing countries now. Pea production contributes 75 to 80 % in total pulses production in these countries. In 2017 both countries harvested bumper pea crop. Export of pea from these countries continues to increase from last two years. Ukraine exported record volume of peas during the first ten months of the 2017/18 season. This is already up 50% from the whole of MY 2016/17. This year too Ukraine & Russia would continue to dominate global pea trade despite lower price.
- **Chickpea production in US is likely to increase from 3.13(2017) to 4.34 lakh tonne in 2018.** Lentil production may be steady at around 3.39 lakh tonne this year. Pea production too would increase from 6.43 to 6.69 lakh tonne in 2018. Sowing of pulses continues in US and Canada. As major buyers are almost out of the market, global pulses market may stay steady to slightly weak in coming weeks.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown - says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for hummus, is another factor behind the strength in chickpeas market..
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production, would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

Weekly Outlook: -Pulses are likely to steady to slightly weak.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 1.5 point from 122.3 in Mar to 120.8 in Apr-2018.

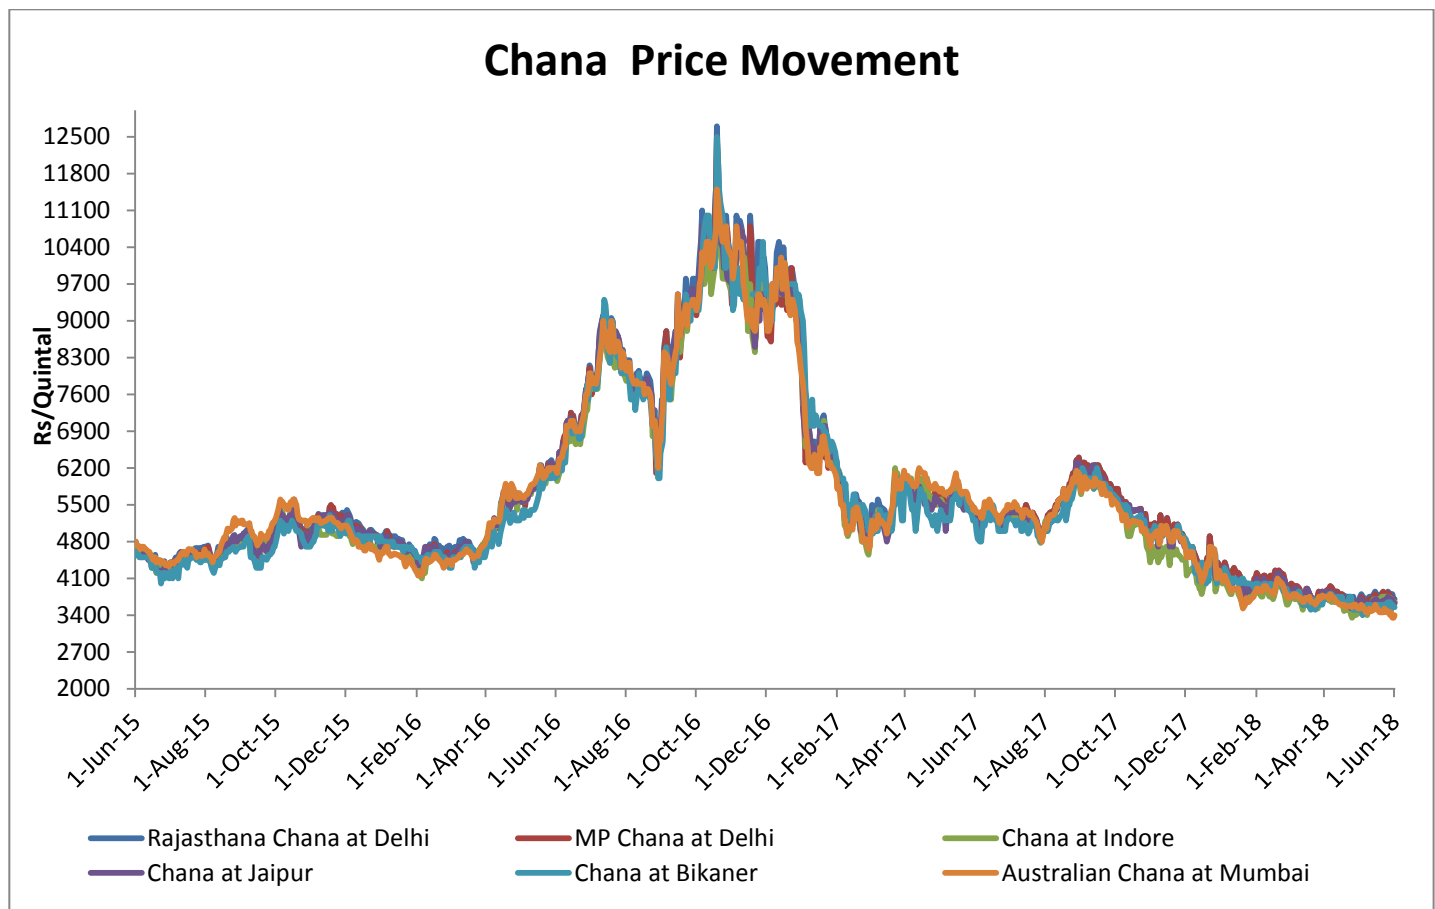

Pulses-Wise Scenario:

Chana

Current Scenario:

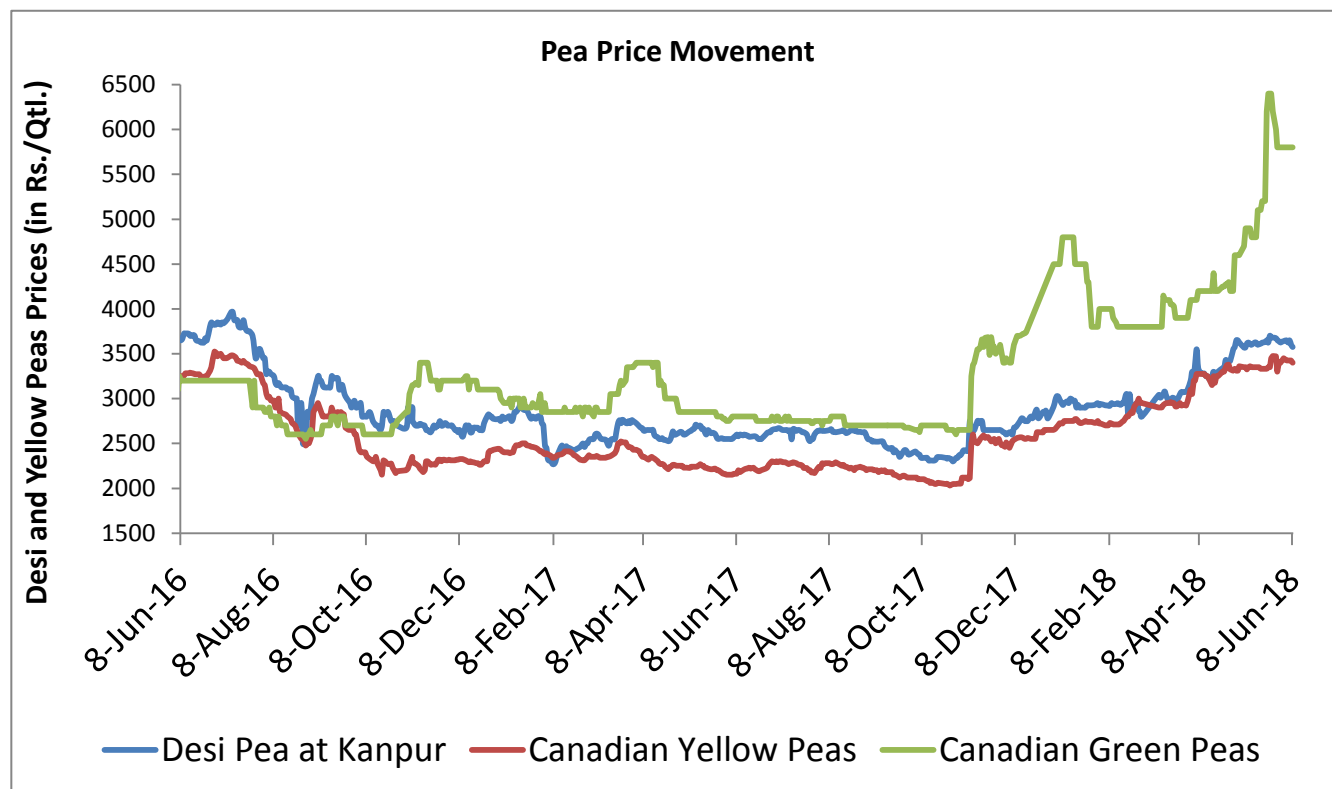

Chana cash market traded weak due to hefty stock accumulated in central pool and private trades are unwilling to buy for stock purpose as there is a common perception in the market that govt would sell it below MSP in lean season and it would not support chana cash market in coming months. Chana cash market traded under pressure taking clue from weak futures despite procurement drive in MP, Maharashtra and Rajasthan. As maximum approved quantity (1577000 MT) for procurement is nearing completion, pressure is building up on cash market once again. Nafed & other agencies have procured over 22.58 lakh tonne. procurement drive would end on 20th June chana-2018, So in central pool around 25 lakh tonne chana would be available. Chana in Delhi market is being traded down by Rs 100 to Rs 3600 per qtl. It may trade Rs100 down further. Improvement in Chana market is expected in second half of the year. Demand for dal remains weak.

All India average price for Chana decreased by 1.38 percent to Rs 3624 per qtl. Australian Chana (old imported crop) price decreased by 0.81 percent to Rs 3362 per 100kg. Following graph illustrates the chana price movement in different markets:

Market Outlook: Steady to slightly weak tone seems possible this week too.

Peas (Matar):

Market Recap:

Desi pea, green pea and Canadian pea traded down this week too due sluggish demand from retail market and declining chana price. However, overall tone seems firm in the medium term. Supply-demand side seems balance right now but may turn mismatched in coming month As chana price is decreasing continuously, it has affected peas price in market too. Right now, 50 % duty is applicable on all peas. All India average price stayed almost stable to Rs 4280 per qtl. In Kanpur market, it traded down at Rs 3575 per qtl. Higher import cost may remain supportive in the near to medium term. Import is not possible till 30th June, as quota of 1 lakh tonne from Apr to Jun-2018 is over now. Imported stock is decreasing continuously. Around 2 lakh tonne peas stock at various ports is likely to be lifted in next two months. So supply demand mismatch is obvious. It would help market to move up again.

Current Market Dynamics & Outlook:

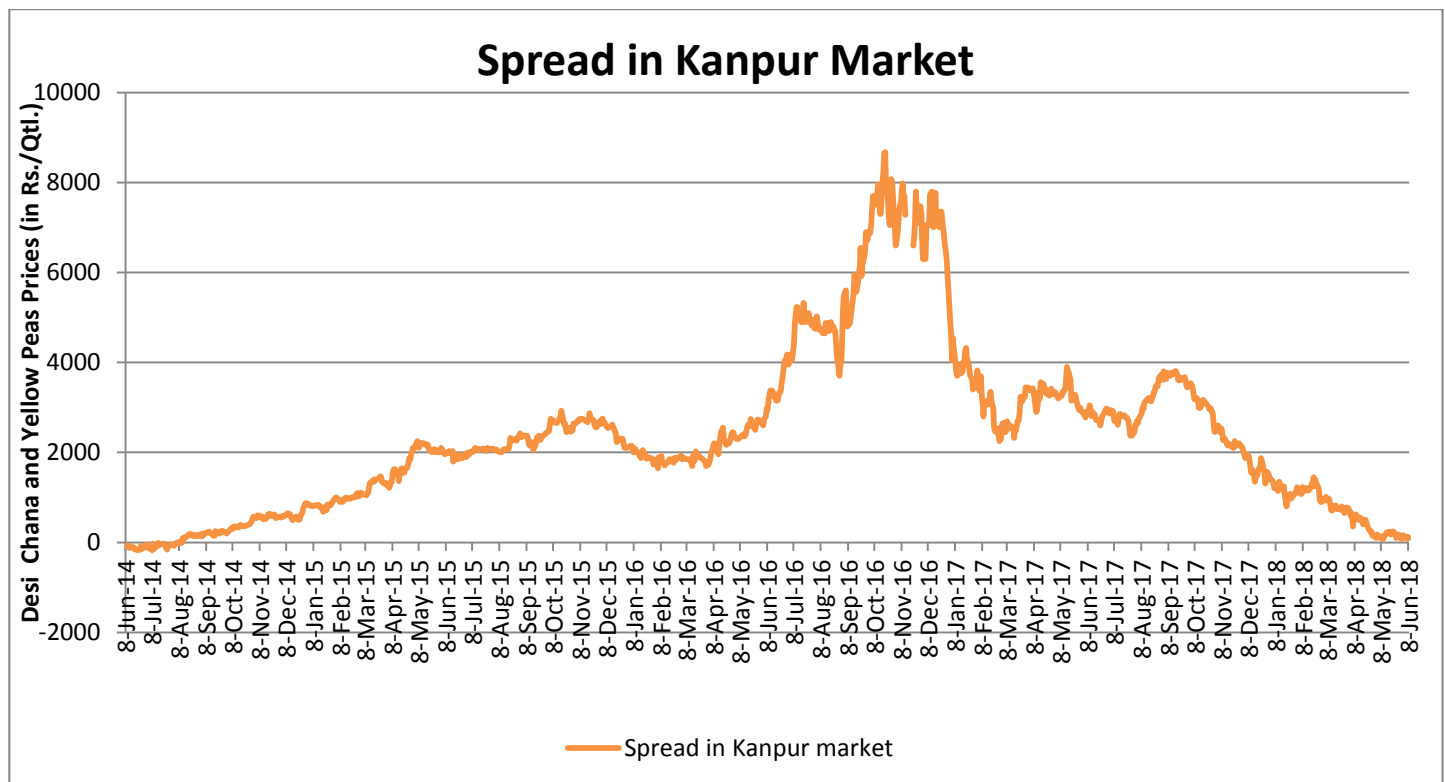

At Kanpur, Desi Peas traded down by 0.45 at Rs 3575- due to weak demand and decreased chana price. However, hope for improving chana demand and declining peas stock at port may support uptrend in the market. Russian pea is being traded at Rs 3250 in Mumbai while Canadian Matar, is being quoted at Rs 3375 per qtl. Green peas, was quoted at Rs 5750-5800 per qtl Market is expected to trade steady to slightly weak in

the near term. With current applicable duty and quantity restriction, import volume is expected to remain restricted.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market decreased by Rs 11 to Rs 114 per qtl owing to increased prices of peas and decreasing chana price. Spread is expected to move in the range of 75 to 150 per quintal in the coming weeks, on relative movement in Chana prices. Overall outlook seems steady to slightly weak. Buying on dip is good, as imported pea costing would be higher. Imported stock is declining.

Market Outlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

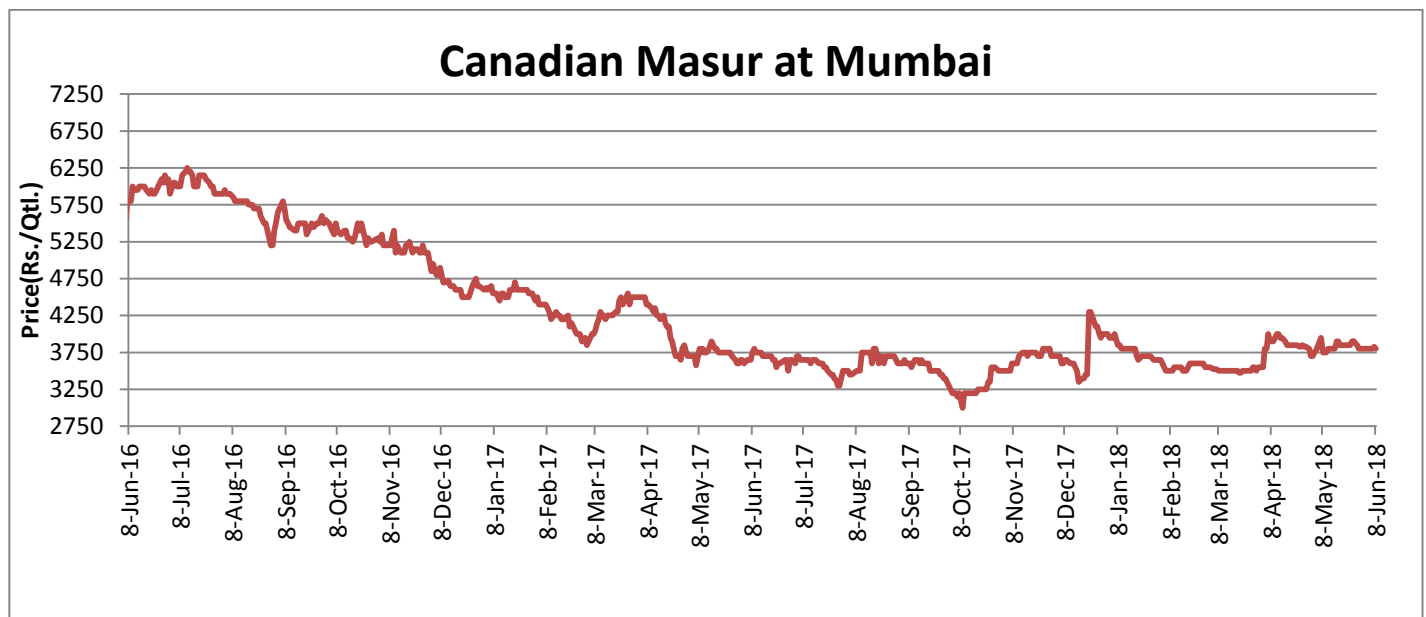

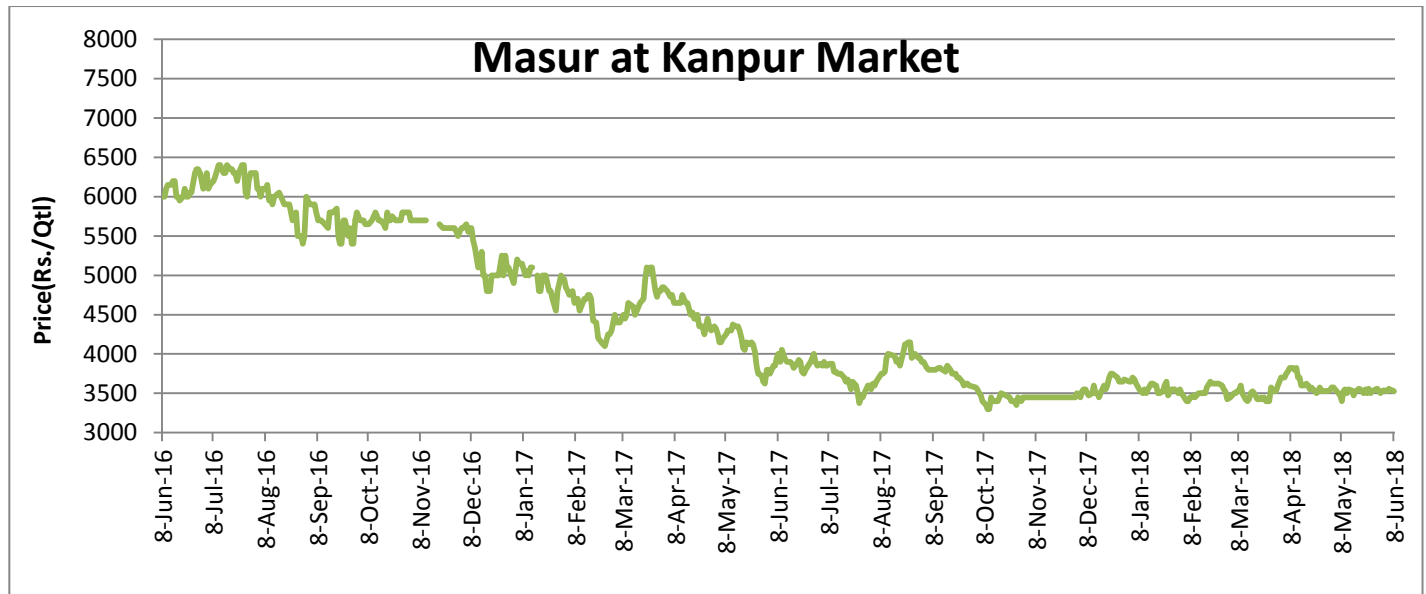

Market Recap:

Kanpur market opened with a weak note in the beginning of the week but recovered again at the end of the week. Imposition of 30% import duty would continue to restrict import. Arrival has decreased. Buyers should take possession after correction. Overall sentiments remain firm in the medium term. Stakeholders should buy on dip. Fresh demand from retail market is awaited Masur dal demand is likely to improve in coming weeks once again.

Current Scenario:

Weekly average price stayed almost steady to Rs 3538 per qtl. Currently in Mumbai it is being quoted at Rs 3804 per qtl. Steady tone may prevail this week too as demand is likely to improve. However, illegal import from neighboring countries and higher stock in central pool (over 2 lakh tonne so far) may cap uptrend as per market source.

Market Outlook: Prices are likely to notice steady tone this week.

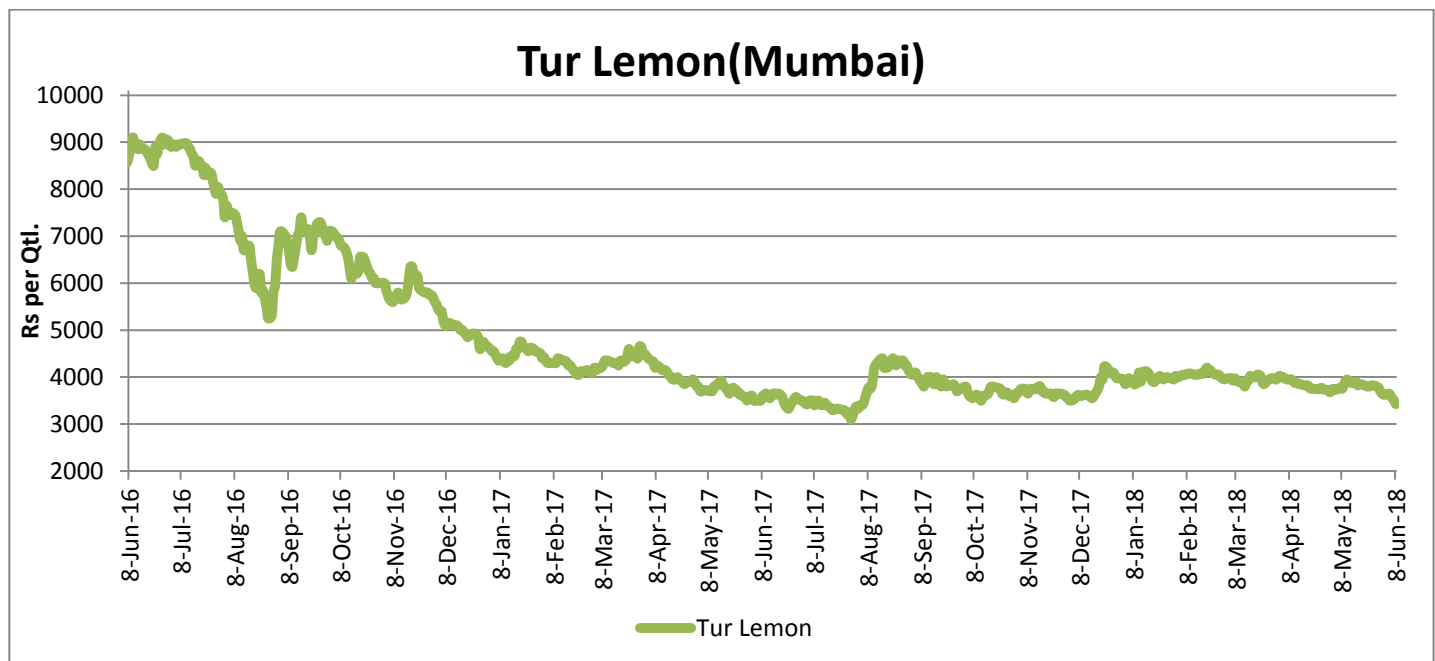

Pigeon Pea (Tur/Toor):

Market Recap:

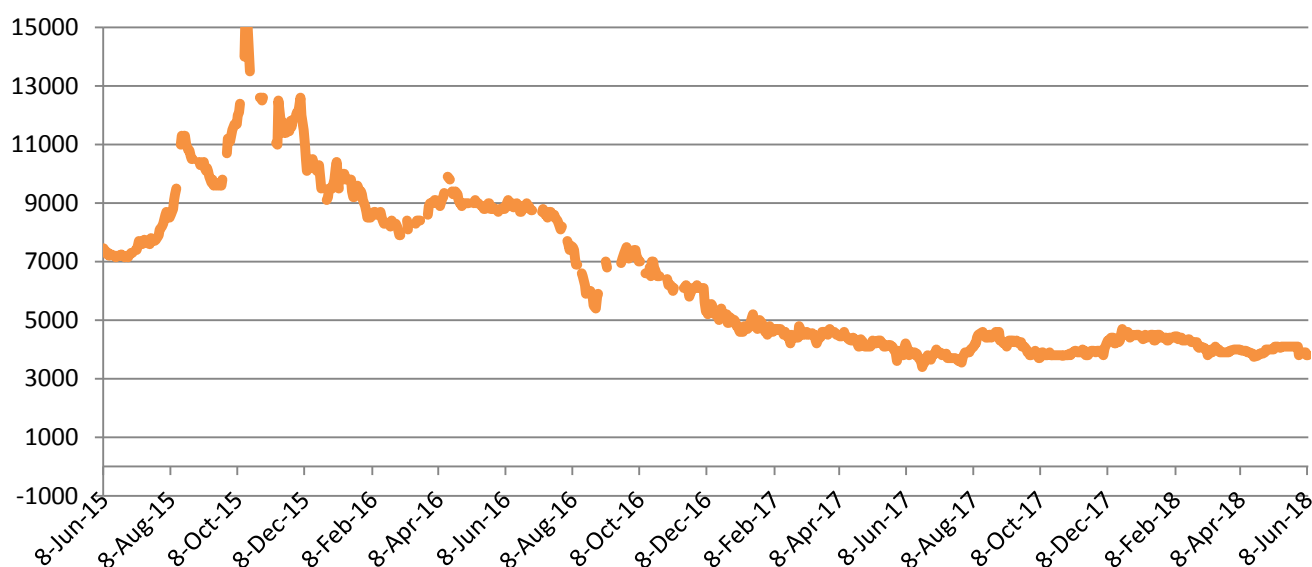

There is no immediate respite for Tur cash market as bulk buyers like mills have slowed down processing activities with Maharashtra state govt.'s recent announcement of selling tur dal at Rs35 per kg through ration shop. Earlier it was supplying tur dal at Rs 55 per kg. Besides, 3.5 lakh tonne likely import has put further pressure on tur market. Even government has stock of around 10 lakh tonne (new over 8.57 lakh tonne & old around 1.08 lakh tonne) right now. So market expects selling from central pool stock to continue at prevailing market price. All these developments remain unfavorable for Tur cash market right now. Expectation of decline in area may support market. However, it would be too early to conclude the final size of Tur acreage. Planting has begun in Karnataka & Assam. It would commence in other major producing states like MP, Maharashtra, UP, Telangana, Jharkhand & AP by the end of this month.

.Current Market Dynamics & Outlook:

Myanmar is offering lemon Tur (old) at \$440 per tonne and new Lemon Tur (Linkely) at \$450 per tonne basis Indian ports. Despite smart gains in prices at origin there is import parity and import seems possible to the level of 3.5 lakh tonne in current MY. Selling through auction from central pool stock too continues and it would help keep the prices under leash so that consumers are not burdened with high prices suddenly. Normal demand is still awaited.

Red Tur At Gulberga(Rs /Qtl.)

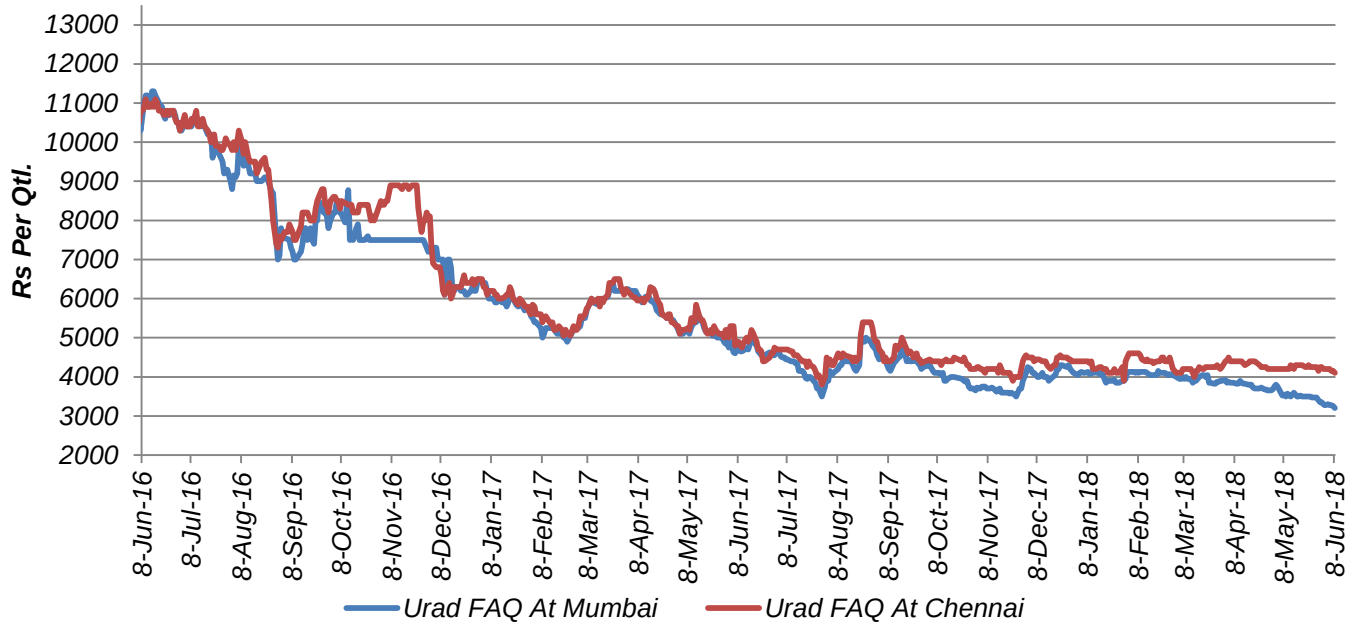

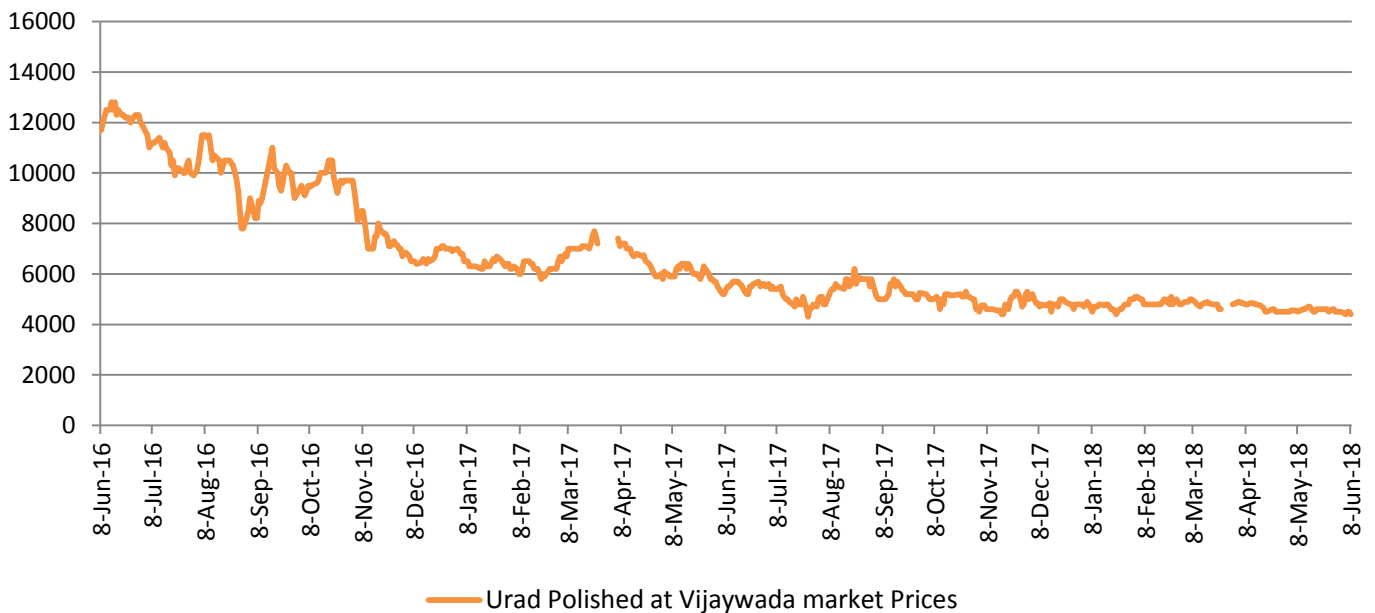

Market Outlook: Tur prices are likely to show steady to slightly weak movement this week..

Black Matpe (Urad):

Steady tone is likely to prevail in Urad market due to normal supply –demand side. Higher acreage is anticipated due to good monsoon rainfall despite lower price realization. Increased quotes in Burma has capped downward trend in domestic market to some extent. However, higher stock in govt custody and hefty carryout would restrict any firm momentum in coming weeks. Selling from central pool stock would continue.. Import is possible as there is a cheaper availability of Urad in Burma despite recent uptrend in price there. Myanmar is offering FAQ Urad at \$450 per tonne and SQ at \$570 per tonne basis Indian ports against Indian (Chennai) prevailing price of \$625 per tonne. Imports to India are feasible at these prices and may occur soon as DGFT has allowed conditional import for the millers under allocated quota of 1.5 lakh tonne for current MY.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.3500-3550Qtl.) and Chennai (Rs.4100-4200Qtl.) noticed weak tone. It traded down in Vijaywara too. Steady to weak movement might be seen in Urad market due to lack of demand at higher level. The following graph shows the prices movement in different markets:-

URAD FAQ**Urad Polished at Vijaywada**

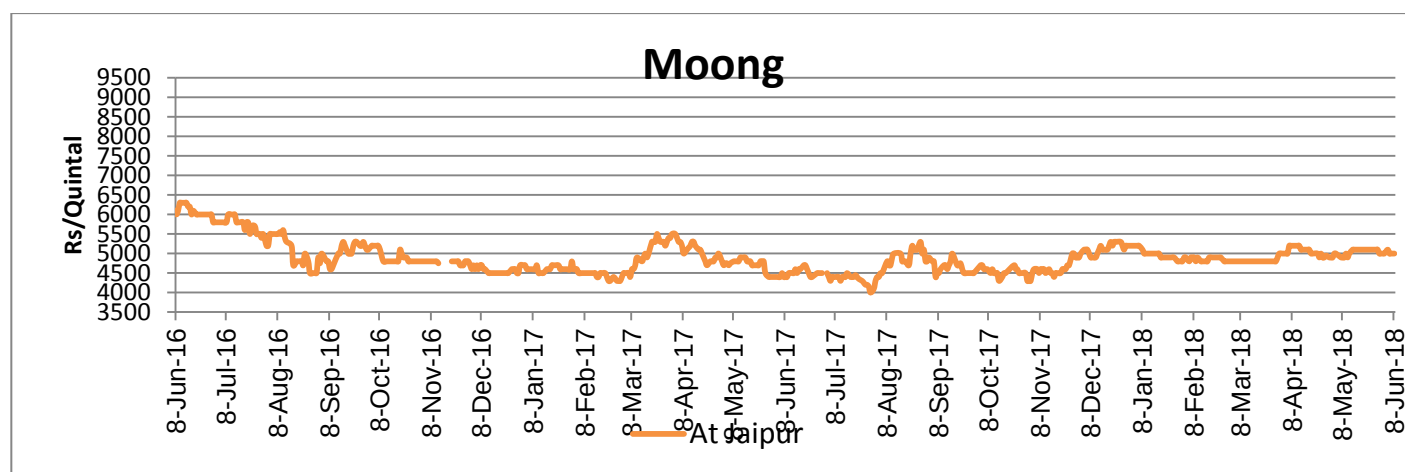

Market Outlook: Urad Prices are likely to show steady to weak momentum this week too.

Green Gram (Moong):

Market Recap:

Moong market traded steady despite new arrival in Bihar and U.P. Quality of new moong is good and pressure would continue till 20th June. Rains and hailstorm have affected moong crop in Gaya region. If it continues quality may affect and mogar may be discoloured. As stock in central pool is over 1.87 lakh tone, supply side is expected to be normal. As on 25.05.2018, Nafed has procured 2.02 lakh tonne. Out of this only 19000 tonne has been sold out. Demand is weak and steady to weak tone may prevail in moong market in next two-three weeks more.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
