Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **All India Pulses Kharif pulses sowing area is lagging behind by 9.8 % to 2.53 lakh ha** against 2.79 lakh ha last year as on 15th June-2018. Tur & Kulthi area is running ahead by 13.10 and 113.33 % to 0.51 & 0.16 lakh ha. Normal kharif area under Tur is 41.90 lakh ha while it is 2.26 lakh ha for kulthi. Sowing pace has got delayed by lack of rains in many growing states. Fresh showers of rains are expected from next week again. See details in table below at page no -12:
- **Urad kharif area too is lagging behind by 29.10 % to 0.47 lakh ha against 0.67 lakh ha** last year till date. Normal kharif Urad area is 26.99 lakh ha. Farmer's preliminary sowing intention shows that some Urad area might be shifted to other lucrative crops like Soybean, Groundnut and Chili.
- **Even kharif Moong area is running behind by 7.59 % to 0.69 lakh ha so far. Normal area** under moong is 24.92 lakh ha. As farmers have received better price for moong in comparison to other pulses, any major decline in area is unlikely. Production size would depend on rains in growing regions.
- **All round demand at lower level from mills Tur in Mumbai** driven Tur price up by Rs 100 to Rs 3650 per qtl. Even lemon tur moved up to Rs 3680 per qtl. In Narela mandi dal millers interest was seen at Rs 3625 per qtl. At current price new stockists were seen taking interest in Tur. They brought 1000 bags in Delhi. As there is a fear of lower acreage too, tur market is likely to move up by Rs 200 to Rs 250 more from current level in the weeks ahead. Market is expected to stabilize near 3850-3900 in Delhi.
- **Import of urad seems under parity amid ample availability of domestic stock. There is no short supply** of Urad in domestic market. SQ urad may move up as there is good demand for it. In comparison to producing region Urad is trading lower by Rs 200 in Delhi market. So buyers are active in Delhi. Besides, there is no stock in mills and stockists too have sold out 75 to 80 % stock due to liquidity crunch. It would push up urad price by Rs 200 from current level this week. However, stake holders should sell Urad at higher level as ample stock is available in domestic market.
- **There is a report of 30 to 40 % lower crop in Bihar and UP. Resultantly arrival is not** increasing as per expectation. Despite lower demand for dhoya and chilka dal and affected purchasing power due to liquidity crunch moong is likely to trade at current level. Dal mills are active. Moong from Allahabad line was traded up by Rs 100 to Rs 4800-4850. Moong market is expected to trade in the range of Rs 4800 to Rs 5200 per qtl. this week.
- **Arrival of chana in mandis of Rajasthan and MP is decreasing so fast. Arrivals in these mandis** have decreased by 20 to 25 % in comparison to last year at this point of time. Despite imposition of 60% import duty and lower arrival prices are ruling below expectation. As demand for marriage season begins, there is a chance of improvement in chana price in coming weeks. Chana may move up by Rs 200 in next two weeks.
- **All India Chana procurement under price support scheme reached at record high at 2258654.792 MT** till 6th June-2018. Procurement is still on in some states. Total figure may touch 25 lakh tonne as Nafed continues to procure Chana till 20th June in two states. The highest procurement (1431675.447 MT) has been registered in MP, followed by Rajasthan (395318.248 MT), Karnataka (127301.264 MT), Maharashtra (108039.644), Gujarat (65647.039 MT), Andhra Pradesh (77662.450 MT), Telangana (50000.059 MT) and UP (3010.65 MT). Procurement target is over in AP, Telangana and Karnataka. Higher procurement this year signals lower private participation as it weakens inner tone.

- **Yellow pea import is not possible till 30th June-2018 as quota set for one lakh tonne is over and it has helped market to move up suddenly.** After June import would resume at 50 percent import duty. Till then steady to slightly firm trend may prevail in yellow & green pea market.

International Market:

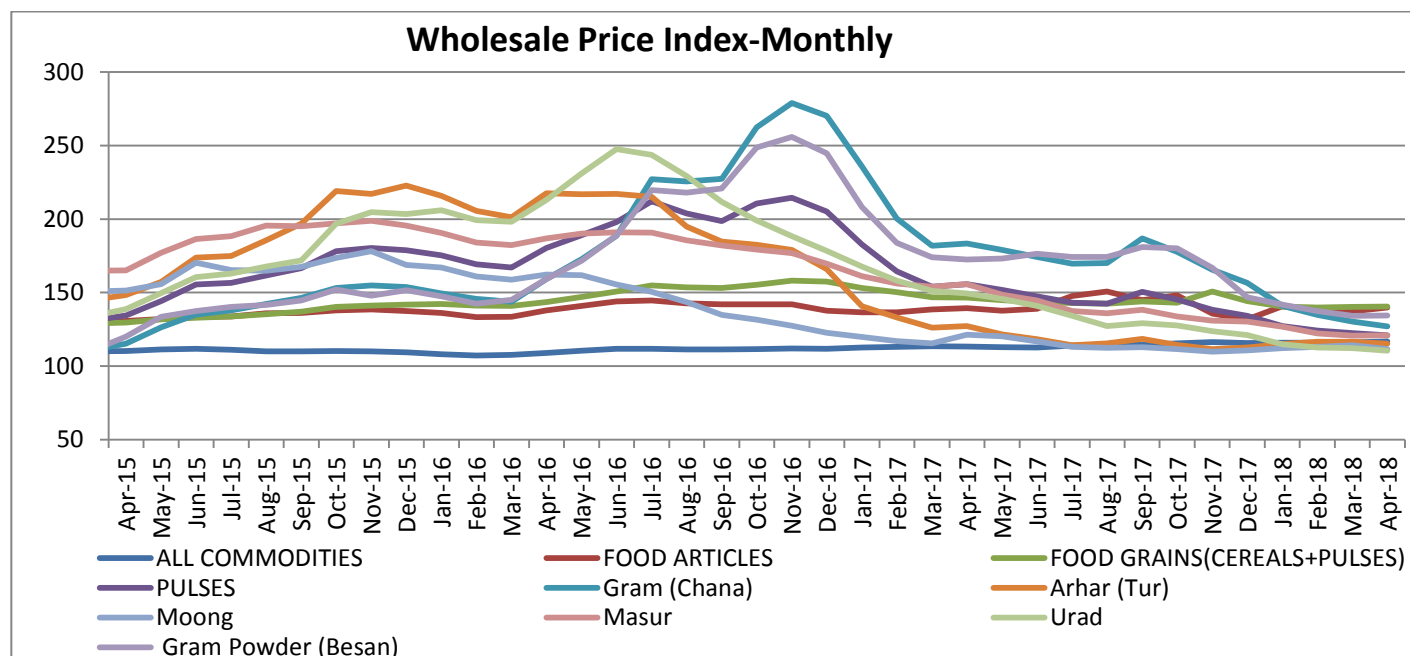

- **A trade war between China and the U.S. appears to be looming.** Chinese threats of retaliation to President Trump's announced tariffs on Chinese goods have come to fruition. The Chinese government announced on June 15th, the list of their own tariffs on U.S. imports, including pulse crops, that will take effect on July 6, 2018. The Chinese tariffs include a 25% tariff on dry peas, lentils and chickpeas, both for consumption and seeds for planting. Many dried beans are also on the list, including dry kidney beans, cow beans, broad beans, and red beans-(source- Washington DC office released)
- **As per Canadian Grain Commission latest report Canada has exported around 1.78 lakh tonne pea in April-2018.** The quantity may be higher as it does not include export in containers. Official data might be slightly higher. Canada had exported 4.18 lakh tonne in April-2017, higher by 57 % from export in April-2018. However, it is quite higher from March shipment 57,500 MT. Higher export and improved demand may push pea price up in global market despite weak demand from India at this point of time.
- **Canada exported 36,600 MT lentil in April-2018, It is higher by 3500 MT shipped in April-2017.** Canada had exported 33,100 MT lentil in April-2017. It is also higher than March shipment (17,900 MT). B, desh and US were major buyers for lentil in April-2018. However, total shipped quantity in this MY has been registered at 235,200 MT while last year till April it was 700,600 MT.
- **The current 2017-18 season for pulses in Black Sea Region is coming to an end now.** Ukraine & Russia are major pea producing countries now. Pea production contributes 75 to 80 % in total pulses production in these countries. In 2017 both countries harvested bumper pea crop. Export of pea from these countries continues to increase from last two years. Ukraine exported record volume of peas during the first ten months of the 2017/18 season. This is already up 50% from the whole of MY 2016/17. This year too Ukraine & Russia would continue to dominate global pea trade despite lower price.
- **Chickpea production in US is likely to increase from 3.13(2017) to 4.34 lakh tonne in 2018.** Lentil production may be steady at around 3.39 lakh tonne this year. Pea production too would increase from 6.43 to 6.69 lakh tonne in 2018. Sowing of pulses continues in US and Canada. As major buyers are almost out of the market, global pulses market may stay steady to slightly weak in coming weeks.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for hummus, is another factor behind the strength in chickpeas market..
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 %

from 32.48 to 27.25 lakh ha. As production, would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.

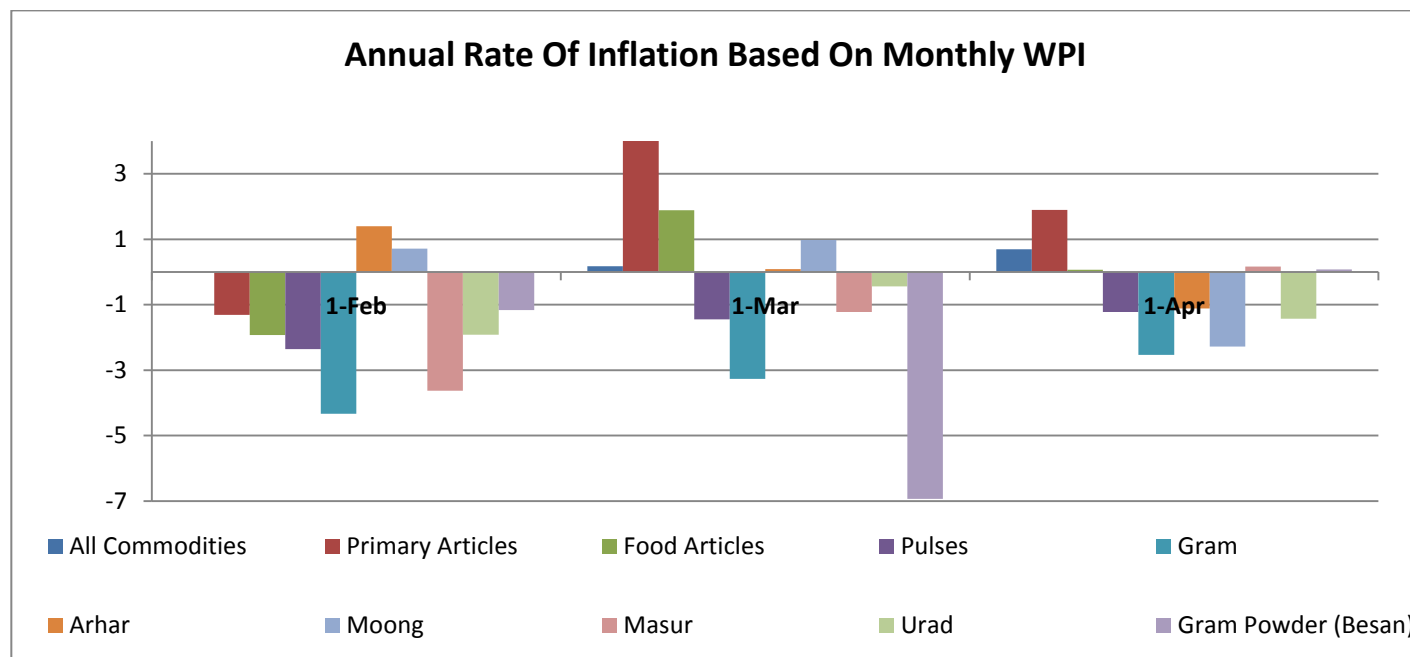

- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

Weekly Outlook: -Pulses are likely to steady to slightly firm.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 1.5 point from 122.3 in Mar to 120.8 in Apr-2018.

Pulses-Wise Scenario:

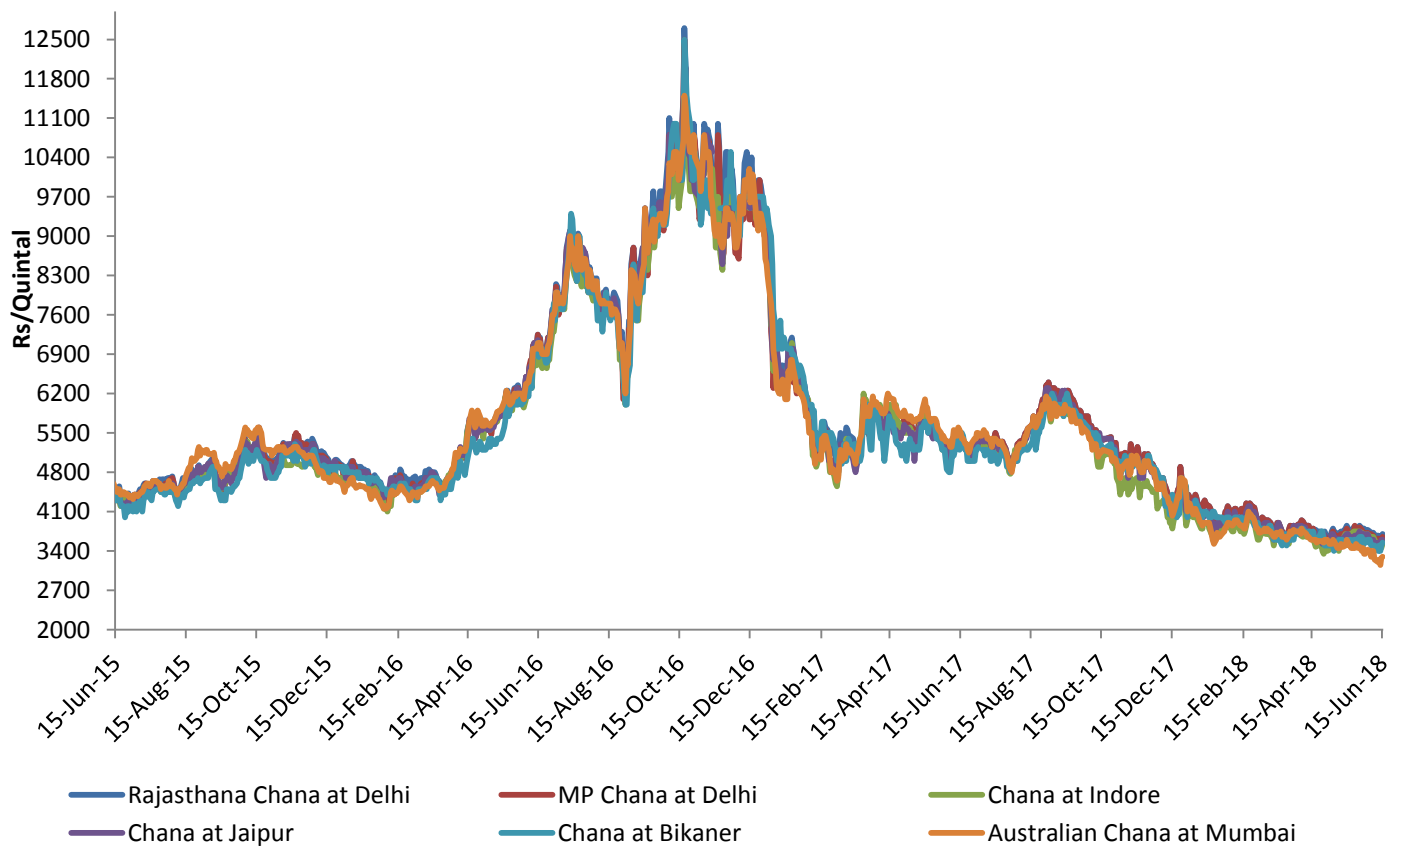

Chana

Current Scenario:

Arrival in mandis are decreasing while there is an improvement of demand due to millers increased interest at lower price. There is a common view in the market that market should stabilize near 3900-4000 in coming weeks. As govt has imple chana stock, more upward momentum is unlikely.

All India average price for Chana decreased by 1.21 percent to Rs 3530 per qtl. Australian Chana (old imported crop) price decreased by 0.91 percent to Rs 3300 per 100kg. Following graph illustrates the chana price movement in different markets:

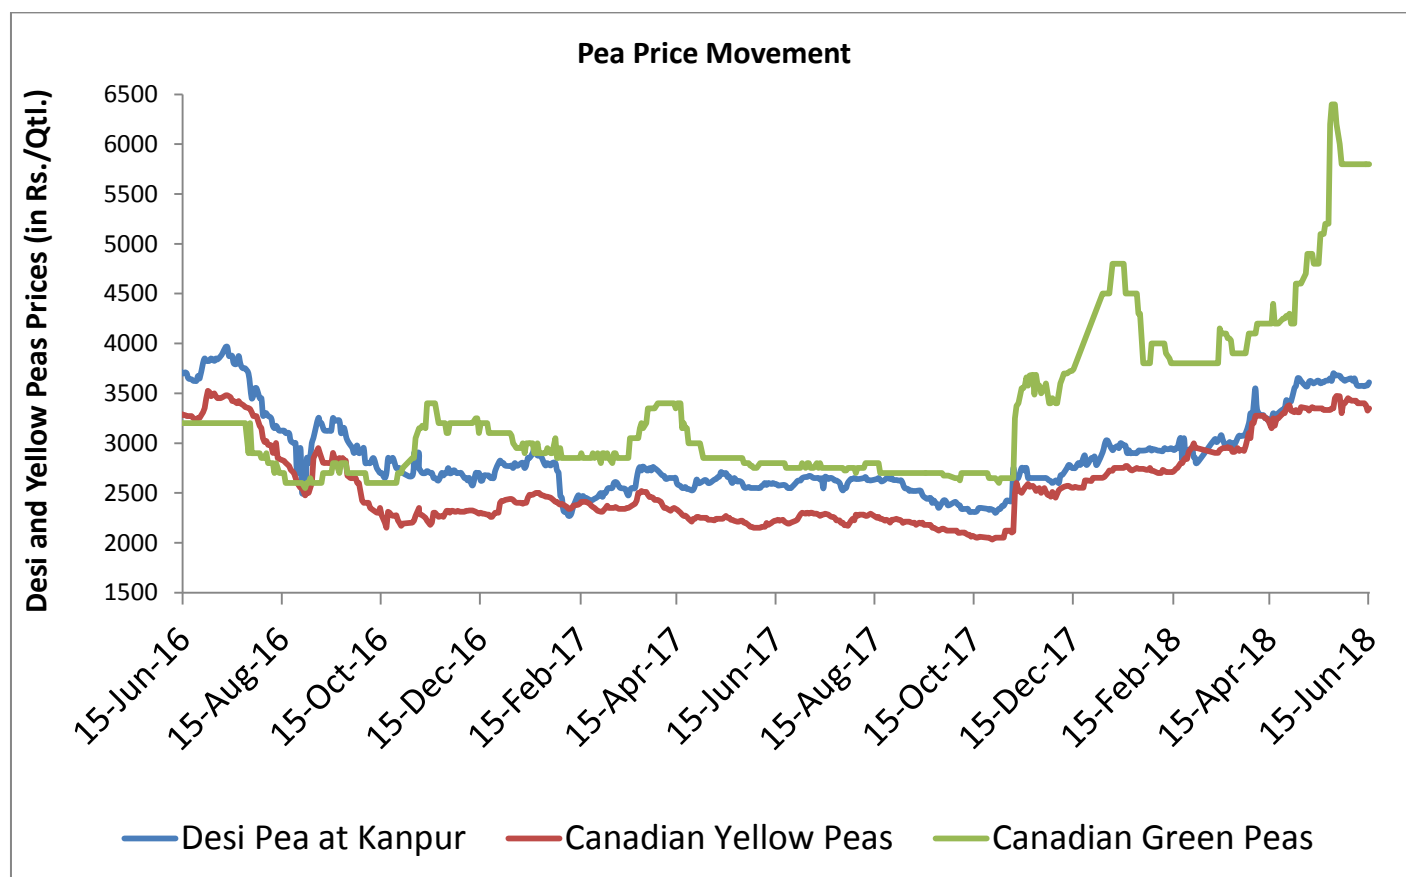

Chana Price Movement

Market Outlook: Steady to slightly firm tone seems possible this week.

Peas (Matar):

Market Recap:

Desi pea, green pea and Canadian pea traded down this week too due sluggish demand from retail market and declining chana price. However, overall tone seems firm in the medium term. Supply-demand side seems balance right now but may turn mismatched in coming month As chana price is decreasing continuously, it has affected peas price in market too. Right now, 50 % duty is applicable on all peas. All India average price stayed almost stable to Rs 4280 per qtl. In Kanpur market, it traded down at Rs 3575 per qtl. Higher import cost may remain supportive in the near to medium term. Import is not possible till 30th June, as quota of 1 lakh tonne from Apr to Jun-2018 is over now. Imported stock is decreasing continuously. Around 2 lakh tonne peas stock at various ports is likely to be lifted in next two months. So supply demand mismatch is obvious. It would help market to move up again.

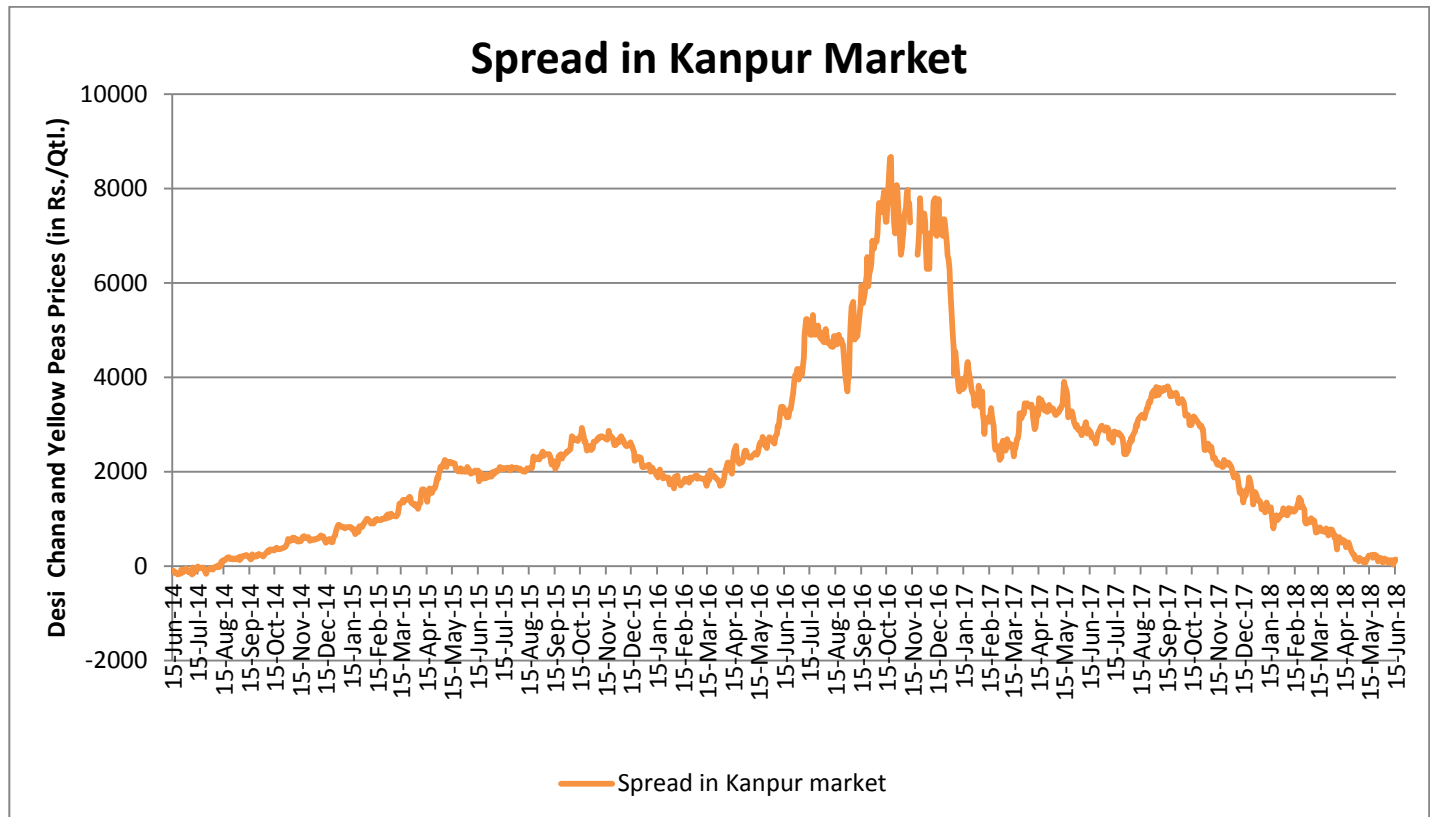

Current Market Dynamics & Outlook:

At Kanpur, Desi Peas traded down by 1.45 at Rs 3350- due to weak demand and decreased chana price. However, hope for improving chana demand and declining peas stock at port may support uptrend in the market. Russian pea is being traded at Rs 3150 in Mumbai while Canadian Matar, is being quoted at Rs 3350 per qtl. Green peas, was quoted at Rs 5750-5800 per qtl Market is expected to trade steady to slightly weak in the near term. With current applicable duty and quantity restriction, import volume is expected to remain restricted.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market decreased by Rs 22 to Rs 92 per qtl owing to decreased prices of peas and increasing chana price. Spread is expected to move in the range of 75 to 150 per quintal in the coming weeks, on relative movement in Chana prices. Overall outlook seems steady to slightly weak. Buying on dip is good, as imported pea costing would be higher. Imported stock is declining.

MarketOutlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

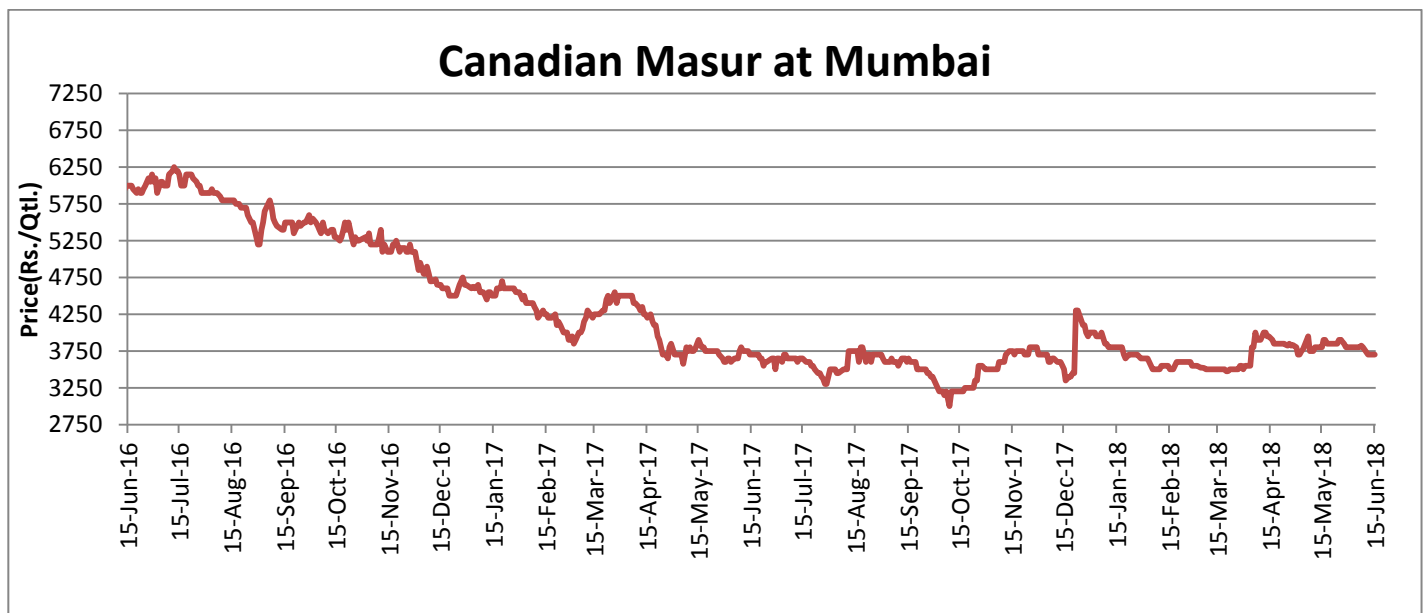

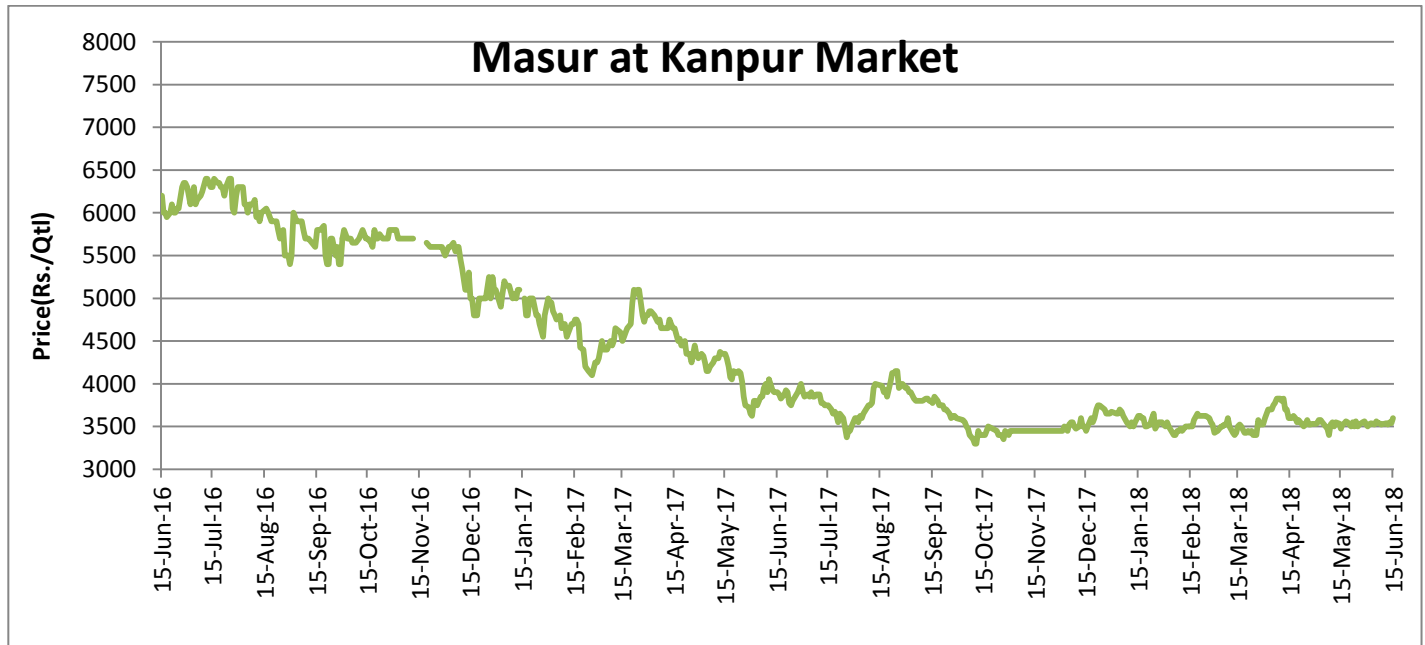

Market Recap:

Kanpur market opened with a weak note in the beginning of the week but recovered again at the end of the week. Imposition of 30% import duty would continue to restrict import. Arrival has decreased. Buyers should take possession after correction. Overall sentiments remain firm in the medium term. Stakeholders should buy on dip. Fresh demand from retail market is awaited Masur dal demand is likely to improve in coming weeks once again.

Current Scenario:

Weekly average price stayed almost steady to Rs 3541 per qtl. Currently in Mumbai it is being quoted at Rs 3805 per qtl. Steady tone may prevail this week too as demand is likely to improve. However, illegal import from neighboring countries and higher stock in central pool (over 2 lakh tonne so far) may cap uptrend as per market source.

Market Outlook: Prices are likely to notice steady tone this week.

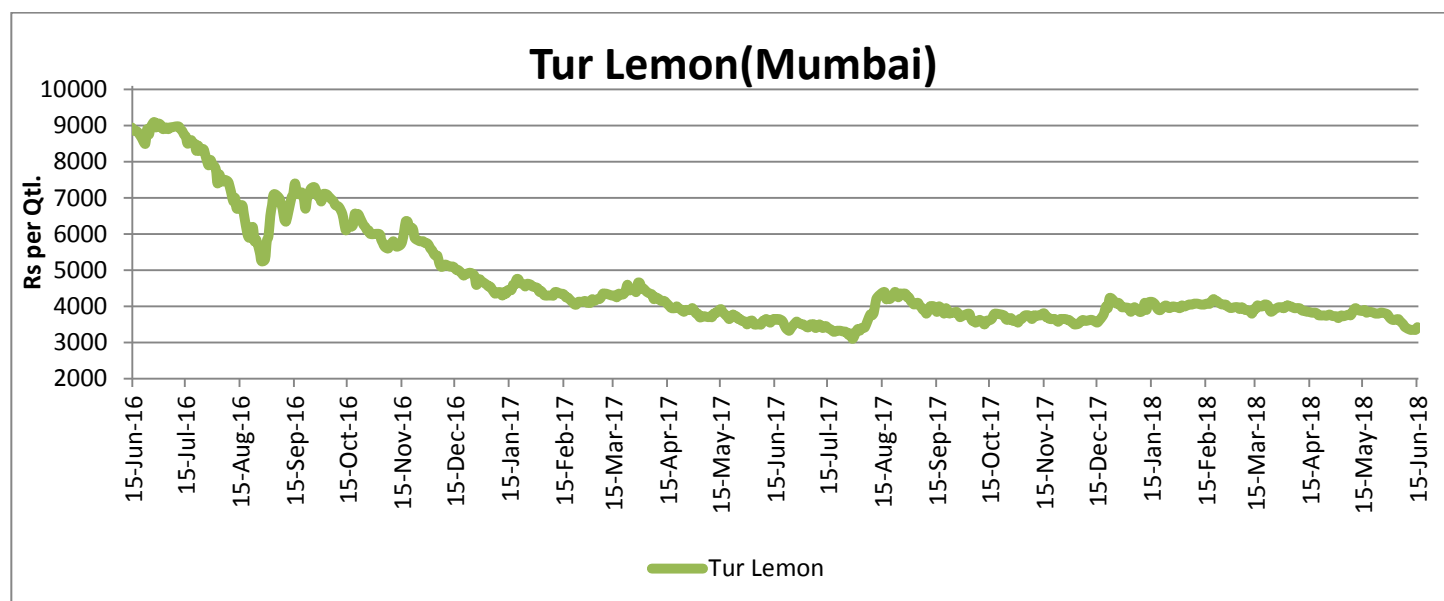

Pigeon Pea (Tur/Toor):

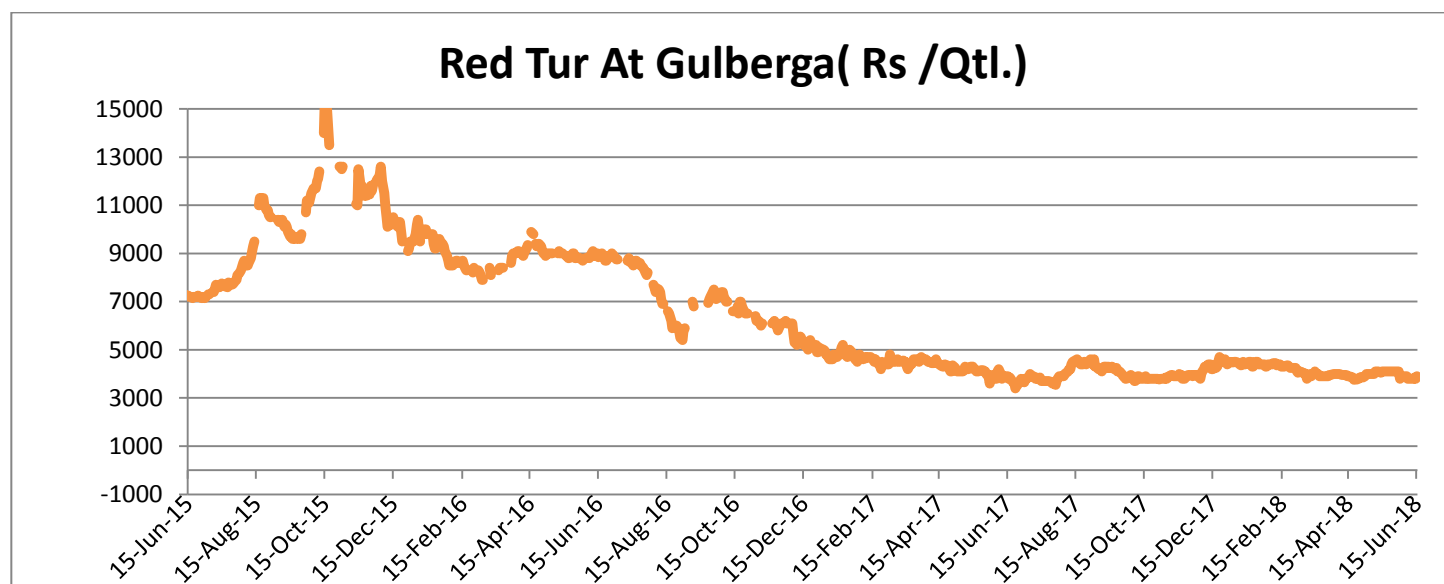

Market Recap:

All round demand at lower level from mills Tur in Mumbai driven Tur price up by Rs 100 to Rs 3650 per qtl. Even lemon tur moved up to Rs 3680 per qtl. In Narela mandi dal millers interest was seen at Rs 3625 per qtl. At current price new stockists were seen taking interest in Tur. They brought 1000 bags in Delhi. As there is a fear of lower acreage too, tur market is likely to move up by Rs 200 to Rs 250 more from current level in the weeks ahead. Market is expected to stabilize near 3850-3900 in Delhi..

Current Market Dynamics & Outlook:

Myanmar is offering lemon Tur (old) at \$440 per tonne and new Lemon Tur (Linkely) at \$450 per tonne basis Indian ports. Despite smart gains in prices at origin there is import parity and import seems possible to the level of 3.5 lakh tonne in current MY. Selling through auction from central pool stock too continues and it would help keep the prices under leash so that consumers are not burdened with high prices suddenly.

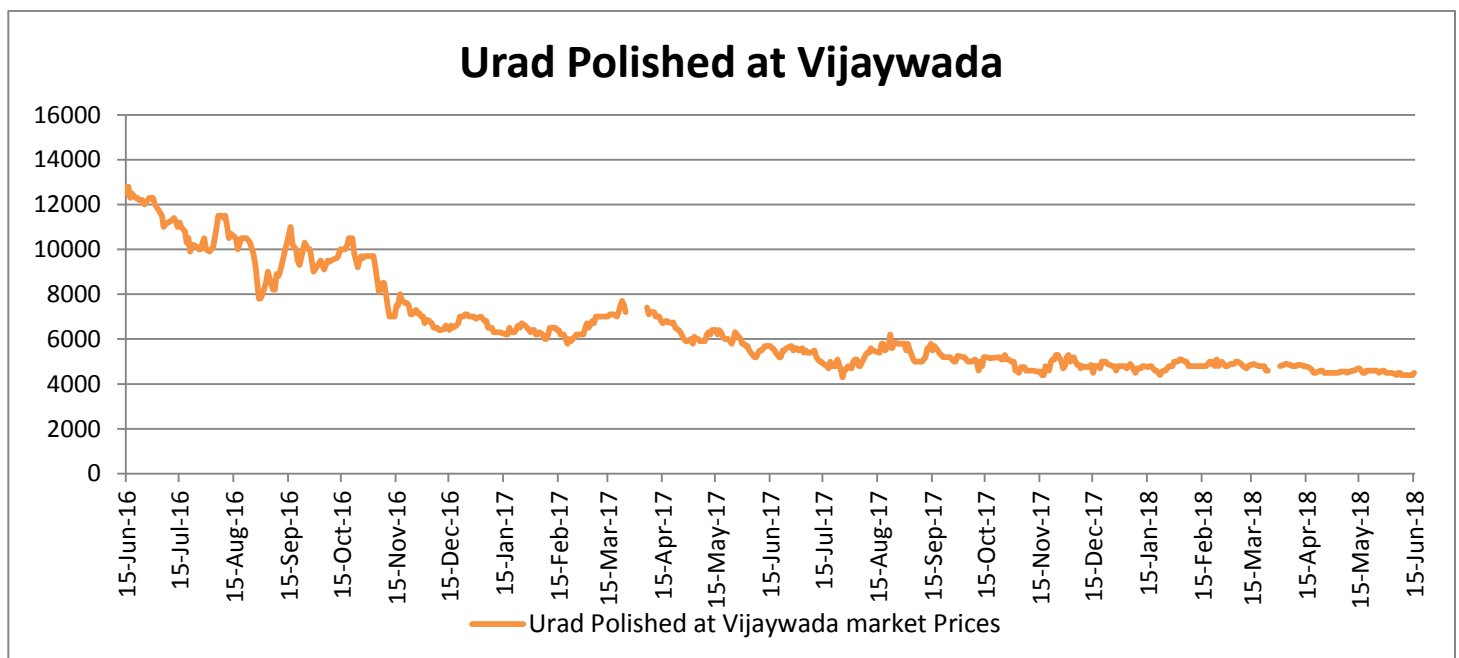

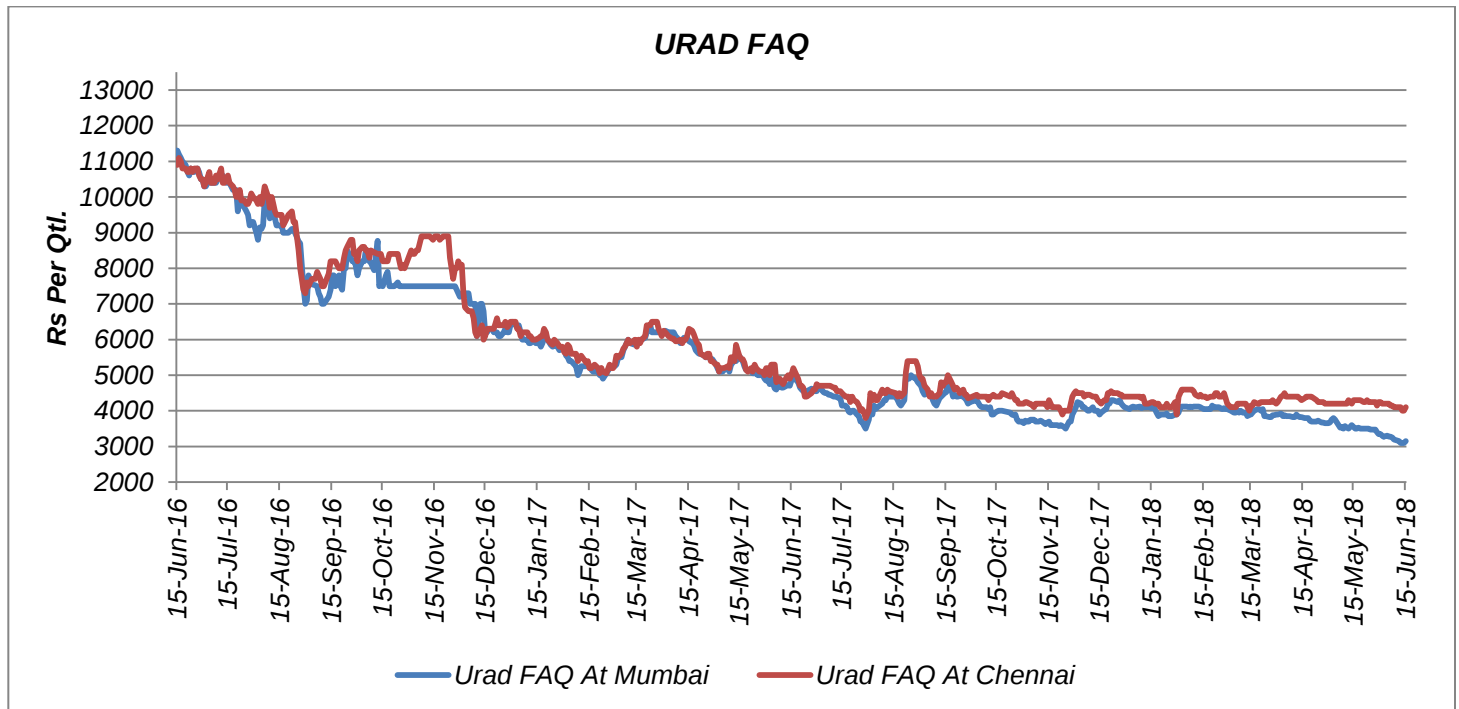

Market Outlook: Tur prices are likely to show steady to slightly firm movement this week..

Black Matpe (Urad):

Steady to weak tone is likely to prevail in Urad market due to normal supply –demand side. Higher acreage is anticipated due to good monsoon rainfall despite lower price realization. Increased quotes in Burma has capped downward trend in domestic market to some extent. However, higher stock in govt custody and hefty carryout would restrict any firm momentum in coming weeks. Selling from central pool stock would continue.. Import is possible as there is a cheaper availability of Urad in Burma despite recent uptrend in price there. Myanmar is offering FAQ Urad at \$450 per tonne and SQ at \$570 per tonne basis Indian ports against Indian (Chennai) prevailing price of \$625 per tonne. Imports to India are feasible at these prices and may occur soon as DGFT has allowed conditional import for the millers under allocated quota of 1.5 lakh tonne for current MY.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.3100-3200Qtl.) and Chennai (Rs.4100-4150Qtl.) noticed weak tone. It traded down in Vijaywara too. Steady to weak movement might be seen in Urad market due to lack of demand at higher level. The following graph shows the prices movement in different markets:-

Market Outlook: *Urad Prices are likely to show steady to weak momentum this week too.*

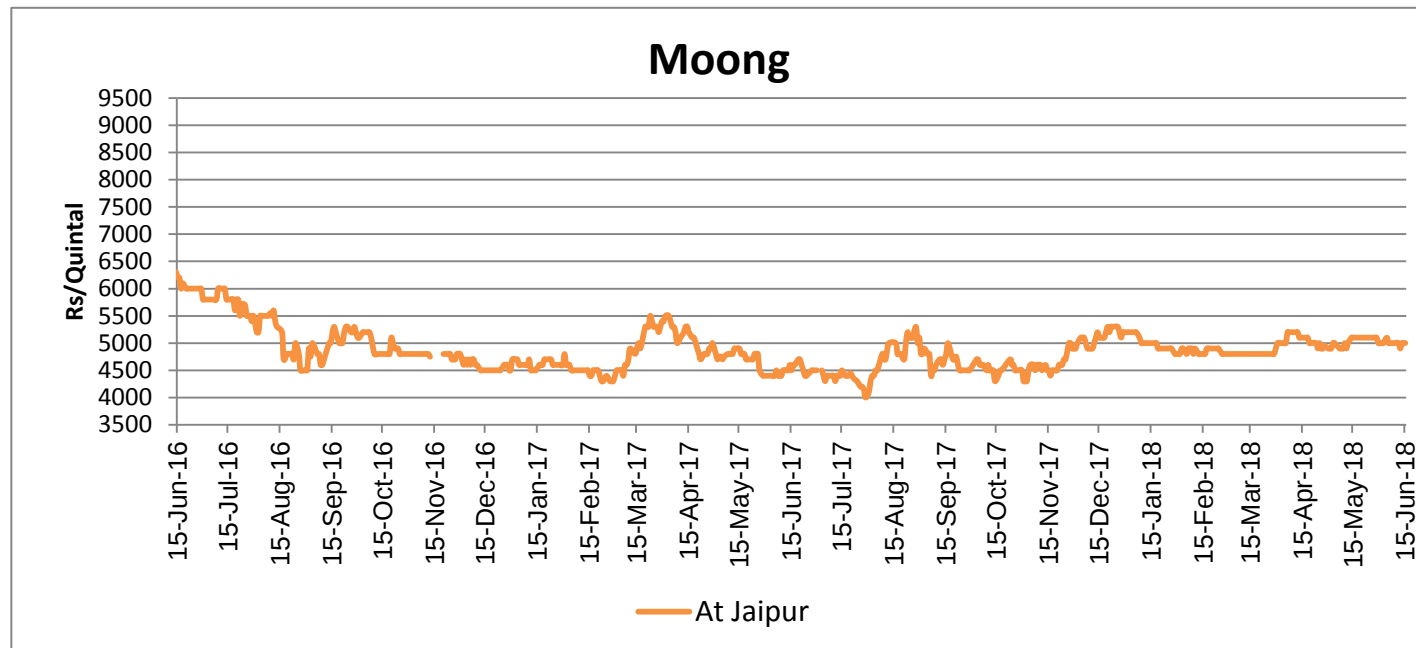

Green Gram (Moong):

Market Recap:

There is a report of 30 to 40 % lower crop in Bihar and UP. Resultantly arrival is not increasing as per expectation. Despite lower demand for dhoya and chilka dal and affected purchasing power due to liquidity crunch moong is likely to trade at current level. Dal mills are active. Moong from Allahabad line was traded up by Rs 100 to Rs 4800-4850. Moong market is expected to trade in the range of Rs 4800 to Rs 5200 per qtl. this week.

Agriwatch preliminary estimate for 2018-19 kharif /Rabi crop stands at 18.04 lakh tonne against 19.25 lakh tonne produced last year. The preliminary estimate is based on farmer's pre sowing intention. Farmer's may shift some Moong area to soybean, groundnut, chilli and cotton this year. However, likely good rainfall may improve yield this year in kharif season. Carryout is higher, so any unexpected firmness is unlikely.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Pulses Import & Average CiF:
