Highlights-Domestic Market

- **All India Kharif sowing area of pulses, is lagging by 41.07 % to 10.72 lakh ha against 18.18 lakh ha last year as on 29th June-2018.** Tur & Moong area is running behind by 18.62 and 53.44 % to 4.74 & 3.06 lakh ha. Normal kharif area under Tur is 41.90 lakh ha while it is 24.93 lakh ha for Moong. Urad area too is running behind by 37.64 to 1.25 lakh ha so far. Revival of monsoon and recent rains in major growing belts has increased sowing activities once again and coverage area is likely to improve in coming weeks.
- **Pressure continued on Tur market during the week under review. Higher stock in private hands as well as in central pool and weak demand amid continuous release from central pool and private stock at prevailing market price has eased supply side in the market.** Big buyers like mills are buying only for 15 days requirements. Besides, there is a rumour in the market that dal distributed through PDS is coming into small hotels. In addition to this, fear of higher quantity sale from central pool stock from Sep too, is weighing on market fundamentals. Besides, import in limited quantity at cheaper price is likely to continue. It would continue to cap market in the near term. Tur in Gulberga is being traded at Rs 3600 to Rs 3900 per qtl. Steady to weak movement is likely to continue this week too despite lower area coverage so far.
- **As expected by Agriwatch, Urad cash market could not sustain at previous level and it lost around Rs 50 per qtl in major mandis, during the week under review.** New Urad in Bursi mandi in Maharashtra started pressurizing prices of Urad once again. Around 750 bags hit Bursi mandi and traded in the range of Rs 3100 to Rs 3750 per qtl. New arrival in MP started. Crop condition is said to be good. New arrival is expected to affect market at least for a month. Overall tone in cash Urad market remains weak.
- **Bulk buyers are not active as inner tonne in cash moong market remains weak. Need based buying remains unsupportive to the cash market.** Release from stockists and central pool stock and expectation of similar acreage as last year, would not allow market to improve in the near term. However, it traded steady at Rs 5000 in Jaipur market. Actually, market is well aware of hefty stock lying with govt. As procurement drive is on for summer crop, stock is likely to move up further. Steady to weak tone may prevail this week too despite lower area coverage.
- **India has revised import duty on Chana from 60 to 70% plus surcharge for US origin Chickpeas.** It has also revised import duty on lentil from 30% to 40% plus surcharge for US origin lentil. It will be applicable from 4th August-2018. Import duty will remain same for other origins as was applicable before this hike.
- **Indian importers imported total 114244.86 MT pulses in May-2018, lower by 3.11 % from previous month.** The latest import data shows that green peas import increased by 158 % to 6961.54 MT in May. For details see import table given below.
- **There is no respite for Chana cash market as buyers remained sidelined under prevailing weak inner tone.** Trading activities remain limited. Hefty stock (over 28 lakh tonne) accumulated in central pool and its likely release from August onward, are discouraging private buying. There is a common perception in the market that govt would start selling Chana much below MSP price like other pulses. So any major recovery at this point of time is unlikely. Chana in Delhi market may trade in the range of Rs 3550 to Rs 3850 in the near term.
- **Lentil cash market is facing demand problem and there is talk in the market that consumers are shifting from massor to tur.** It has affected normal demand in the market. Besides, there is 235140.65 MT stock in central pool and it may go up further as procurement is still on. Govt would start selling it before kharif crop starts. It would

restrict cash market from move up one way. As prices have come down, slight recovery is expected as stock of imported masoor is decreasing fast.

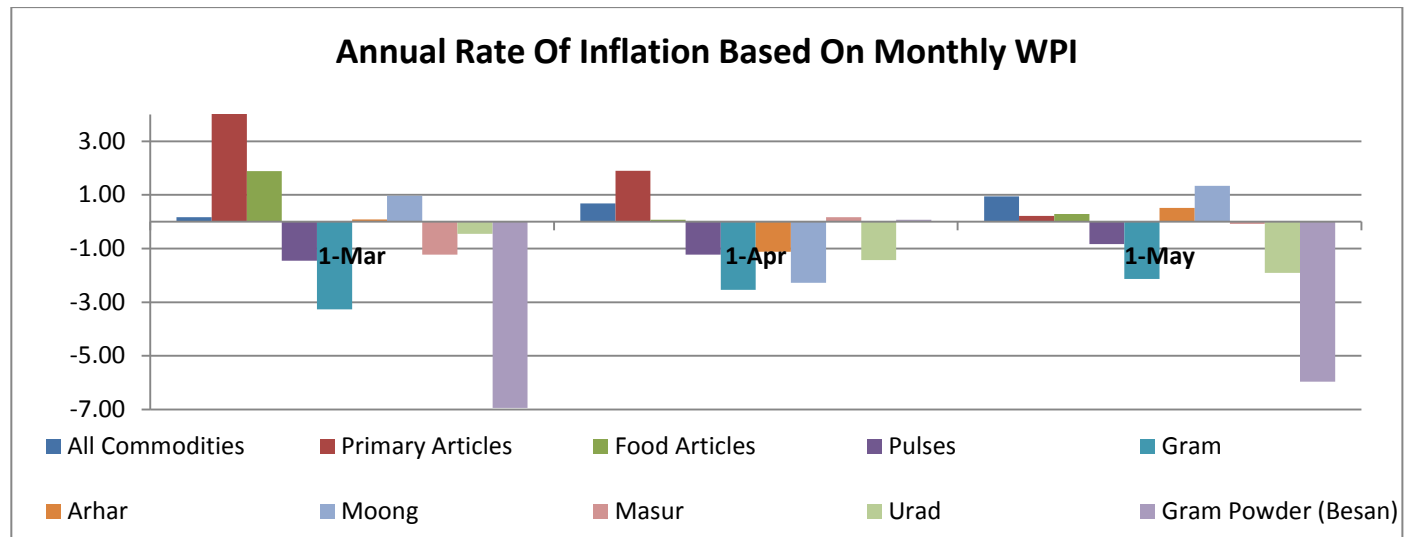

International Market:

- **The latest release of The Canadian Grain Commission, hints that Canada exported** around 19600MT lentils through licensed facilities in May-2018. It was lower than 83,900MT shipped in May-2017. It is 17000MT lower than April. Canada had exported 36600MT in April-2018. Total export in this marketing year was registered at 254,800 MT against 784,600MT during the corresponding time last year. Demand remains unexpectedly at lower level.
- **The latest release of The Canadian Grain Commission hints that Canada exported** around 373,000 MT pea through licensed terminal in May-2018. Data does not include containers export. The exported volume is higher by 85% from 2.01 lakh MT exported in May-2017. It is almost double from exported volume of 1.77 lakh MT in April-2018. India imported around 30,000 MT from Canada in May-2018.
- **80% of newly sown pulses crop in Canada, are passing through normal developmental stages** and almost 20% are below normal development stages. Recent rains in major growing areas have helped standing crops in most of the regions. More rains are required for better growth of pulses. According to Saskatchewan Agriculture and Food crops some areas are still stressed and showing the impact of dry conditions. Available moisture level in the field is not enough to ensure better growth of the crop. However, some areas like East and central Saskatchewan condition remains favorable.
- **Field Pea exporters in France are trying to fulfill regional demand as opportunity in bulk importers countries remains bleak.** France exported around 19310 MT pea in April month, lower by 9 % from 21235 MT shipped in March-2018. However, it is almost double from April-2017 when France exported only 10,940 MT pea. Major buyers were Belgium, Netherlands, Spain and Italy. These 4 countries brought 18093MT together out of 21235 MT shipped in April-2018.
- **Chickpea production in US is likely to increase from 3.13(2017) to 4.34 lakh tonne in 2018.** Lentil production may be steady at around 3.39 lakh tonne this year. Pea production too would increase from 6.43 to 6.69 lakh tonne in 2018. Sowing of pulses continues in US and Canada. As major buyers are almost out of the market, global pulses market may stay steady to slightly weak in coming weeks.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown - says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for hummus, is another factor behind the strength in chickpeas market.
- **Chickpeas production in Australia is expected to decrease by 47.85 % to 10.45 lakh tonne in 2017-18** from record 2004 lakh tonne 2016-17. Despite 4.43 % higher area coverage, production is bound to decrease drastically due to hot and dry weather condition prevalent in the major growing regions. Chickpeas area increased from 1069 to 1144 thousand ha in 2017-18.
- **Lentils area in Canada is bound to decline from 23.72 to 17.43 lakh ha in 2017-18.** It is lower by 23.54 % from last year. Yield is expected to improve from 1.45 to 1.55 t per ha. Total production is expected to decline by 16 % from 32.48 to 27.25 lakh ha. As production, would decline, total supply would decline by 10.43 % to 30.35 lakh t. Average price in 2017-18 may rule in the range of C\$720 to 750 per T.

- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

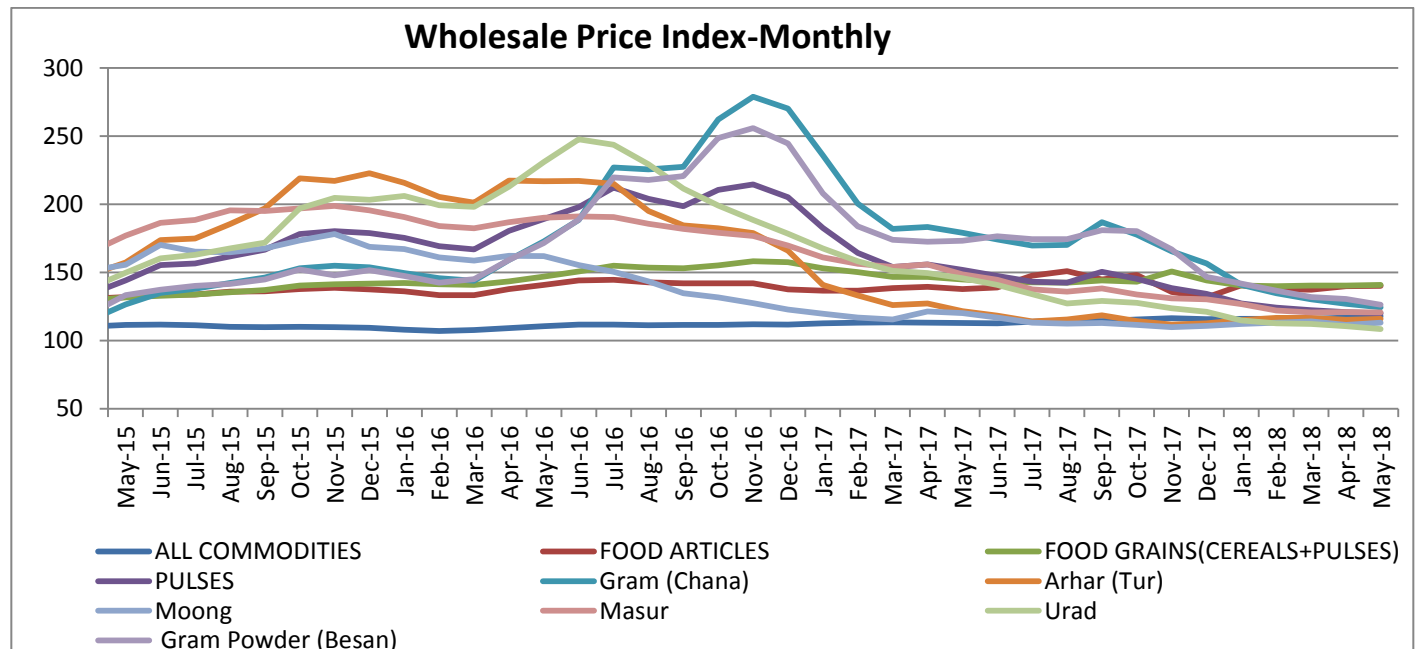

Weekly Outlook: -Pulses are likely to steady to slightly weak.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

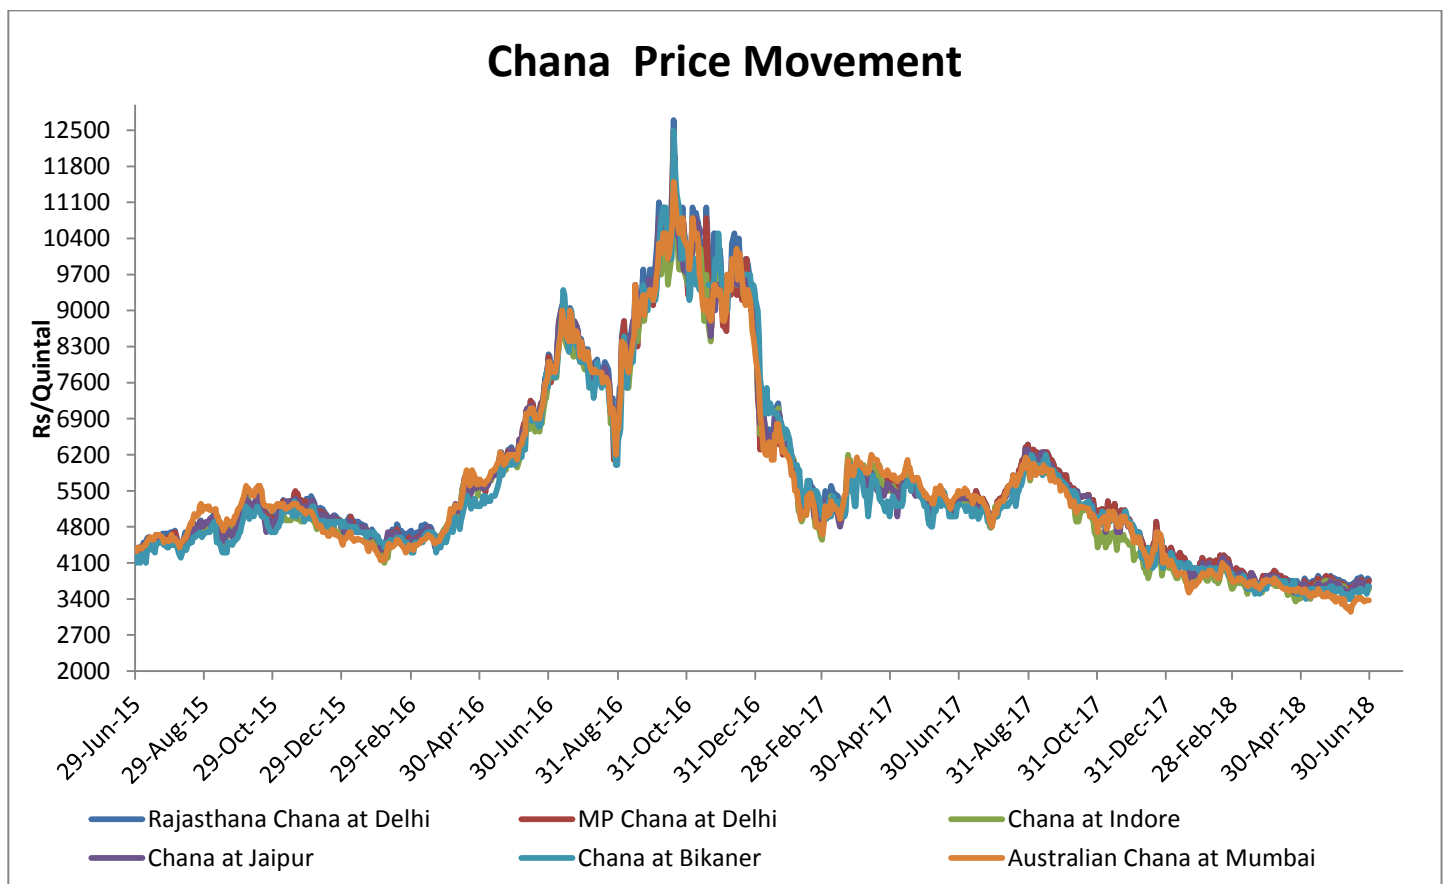

Pulses WPI decreased by 1 point from 120.8 in April to 119.8 in May-2018.

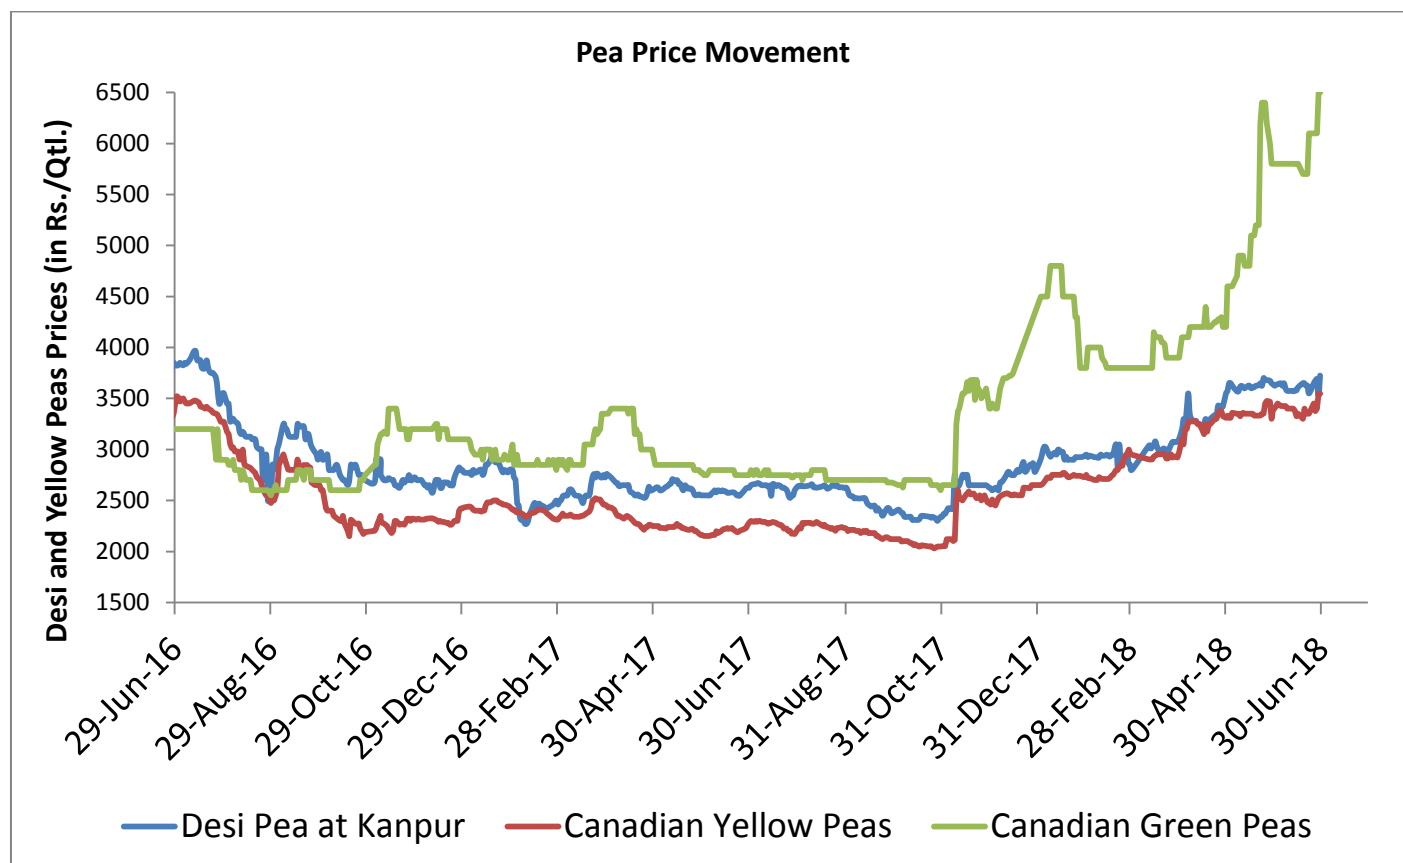

Pulses-Wise Scenario:**Chana****Current Scenario:**

There is no respite for Chana cash market as buyers remained sidelined under prevailing weak inner tone. Trading activities remain limited. Hefty stock (over 28 lakh tonne) accumulated in central pool and its likely release August onwards, are discouraging private buying. There is a common perception in the market that govt would start selling Chana much below MSP price like other pulses. So any major recovery at this point of time is unlikely. Chana in Delhi market may trade in the range of Rs 3550 to Rs 3850 in the near term. In a latest development India has revised import duty on Chana from 60 to 70% plus surcharge for US origin Chickpeas. However, it would not help market, as volume imported from US is negligible. It will be applicable from 4th August-2018. Import duty will remain same for other origins as was applicable before this hike.

All India average price for Chana decreased by 1.14 percent to Rs 3641 per qtl. Australian Chana (old imported crop) price decreased by 1.31 percent to Rs 3370 per 100kg. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade range bound this week.

Peas (Matar):**Market Recap:**

Pea market is unlikely to trade firm this week as there is no support from cash chana market. Besides, there is plenty of stock available at port. Market sources say that there is 2.5 lakh tonne pea available at Mundra, Kandla, Hazira & Dahej ports. Besides, 1.30 lakh tonne at Tuticorin, Vizak, Kakinada, Kolkatta ports. In Kanpur there is 12000 MT yeow pea and 50,000 MT desi pea stock is available. Around 1.5 lakh tonne pea is likely to hit Indian port this week. So there is plenty of stock and it would restrict uptrend in coming weeks. However, green pea stock is comparatively lower.

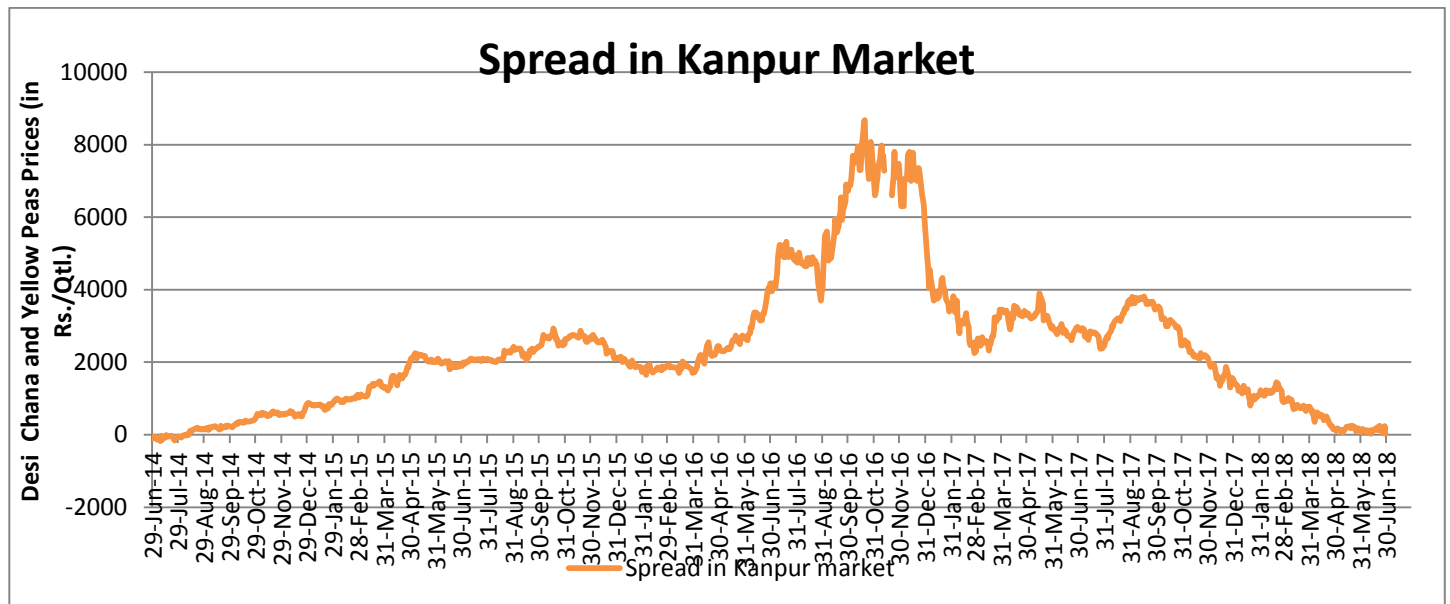

Current Market Dynamics & Outlook:

At Kanpur, Desi Peas traded up by 0.91% at Rs 3653- due to good offtake from retailers. Canadian pea in Mumbai market traded up by 3.43% to 3465. However higher availability at port and weak chana market would not support market at current level. Downward correction is expected this week. Stake holders should buy on dip. Green pea is being traded at Rs 6000-6100 per qtl. in Mumbai.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market decreased by Rs 89 to Rs 81 per qtl owing to increased prices of peas and almost stable chana price. Spread is expected to move in the range of 75 to 150 per quintal in the coming weeks, on relative movement in Chana prices. Overall outlook seems steady to slightly weak. Buying on dip is good, as imported pea costing would be higher. Selling at port at discounted price may affect pea price in domestic market in coming weeks.

Market Outlook: Outlook remains steady to slightly weak.

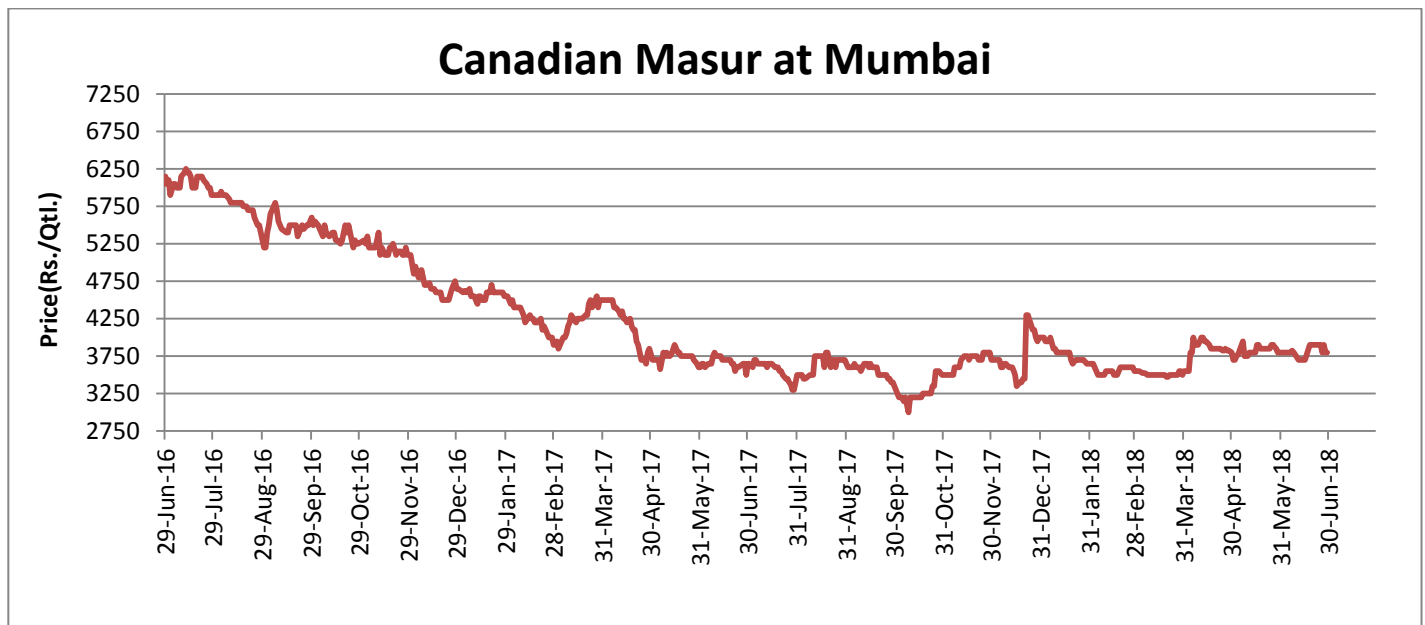

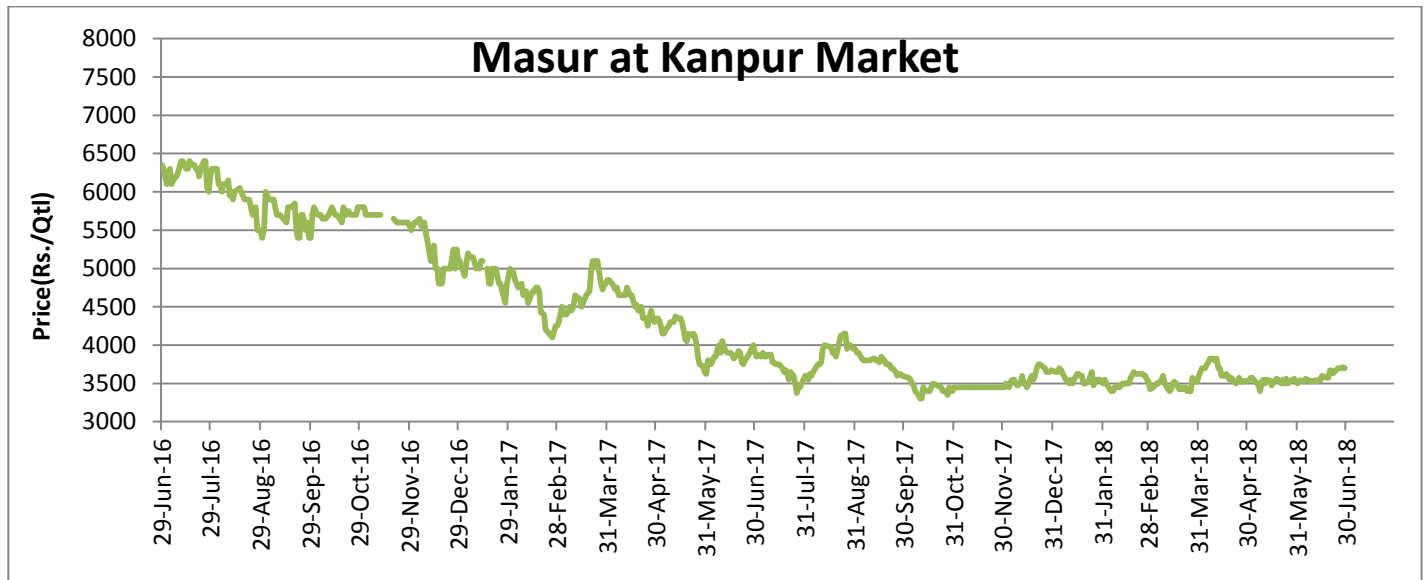

Lentils (Masoor):

Market Recap:

Masur in Kanpur market traded up by 2.15% to Rs3702 per qtl. as available stock in local market is said to be lower by 20 % from last year. Stockists too have retained stock in anticipation of higher price due to 30 % applicable duty. For American origin Lentil, it has been increased to 40 %. However, imported lentil in Mumbai and Kolkatta market decreased slightly as demand from retail ends has decreased. As lentil dal price is higher in domestic market, consumers are shifting to Tur dal, which is comparatively cheaper than masur dal right now. Steady to slightly weak tone might be seen in coming weeks. Supply side is at comfortable level.

Current Scenario:

Weekly average price traded up by 2.15 % to Rs 3702 per qtl. Currently in Mumbai, it is being quoted at Rs 3800 per qtl, down by 2.56 % to Rs3800 per qtl.. Steady to weak tone may prevail this week too, as demand is unlikely to improve.

Market Outlook: Prices are likely to notice steady to slightly weak tone this week.

Pigeon Pea (Tur/Toor):

Market Recap:

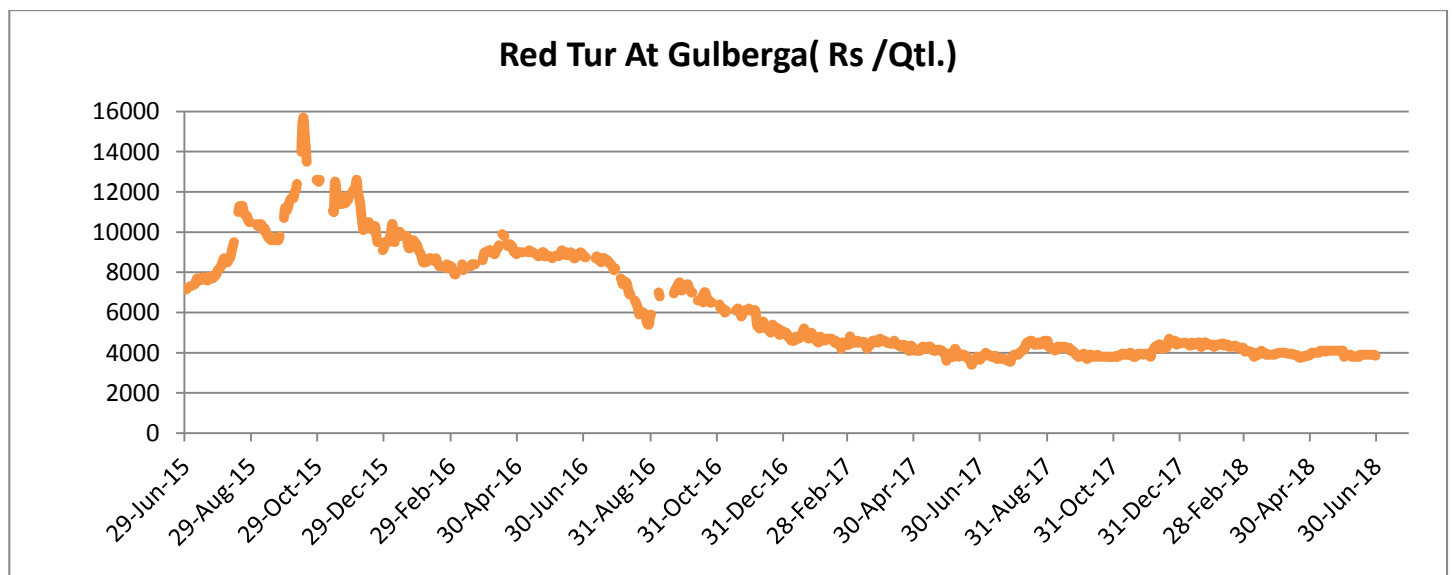

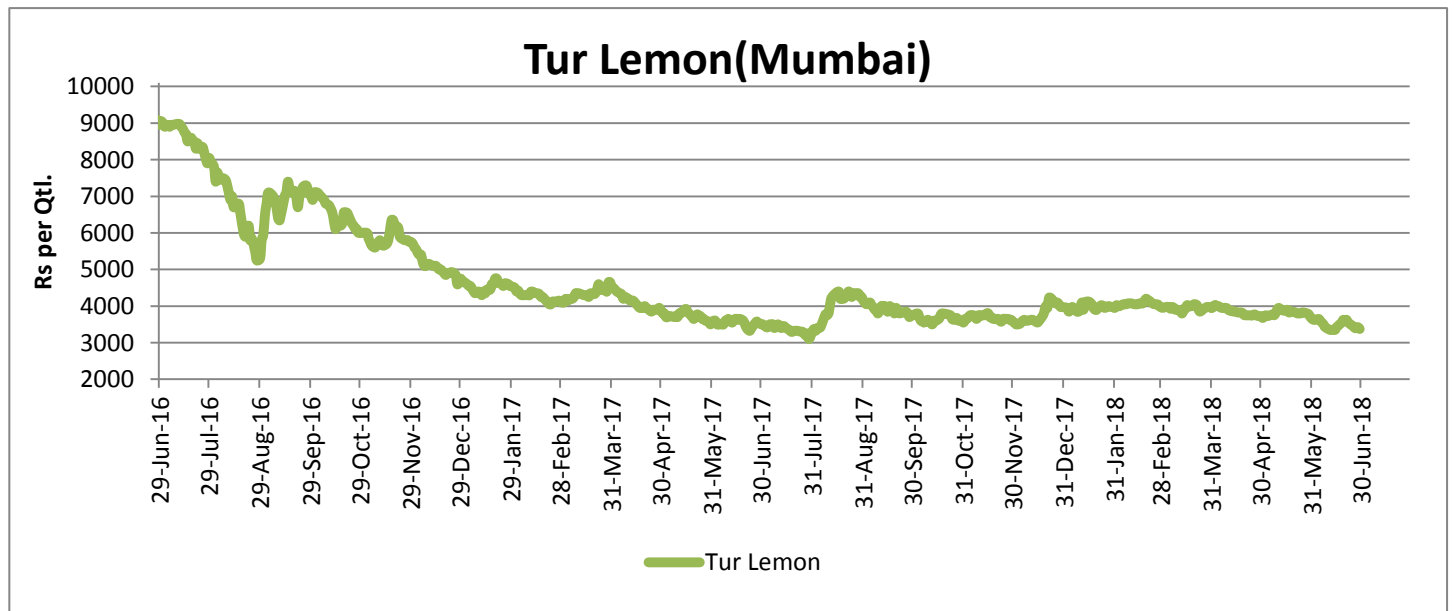

Pressure continued on Tur market during the week under review. Higher stock in private as well as in central pool and weak demand amid continuous release from central pool and private stock at prevailing market price, has eased supply side in the market. Big buyers like mills are buying only for 15 days requirements. Besides, there is a rumour in the market that dal distributed through PDS is coming into small hotels. Over and above it, fear of higher quantity sale from central pool stock from Sep too is weighing on market fundamentals. Besides, import in limited quantity at cheaper price is likely to continue. It would

continue to cap market in the near term. Tur in Gulberga is being traded at Rs 3600 to Rs3900 per qtl. Steady to weak movement is likely to continue this week too.

Current Market Dynamics & Outlook:

Myanmar is offering lemon Tur (old) at \$430 per tonne and new Lemon Tur (Linkely) at \$450 per tonne basis Indian ports. Despite smart gains in prices at origin, there is import parity and import seems possible to the level of 3.5 lakh tonne in current MY. Selling through auction from central pool stock too continues and it would help keep the prices under leash so that consumers are not burdened with sudden high prices.

Market Outlook: Tur prices are likely to show steady to slightly weak movement this week.

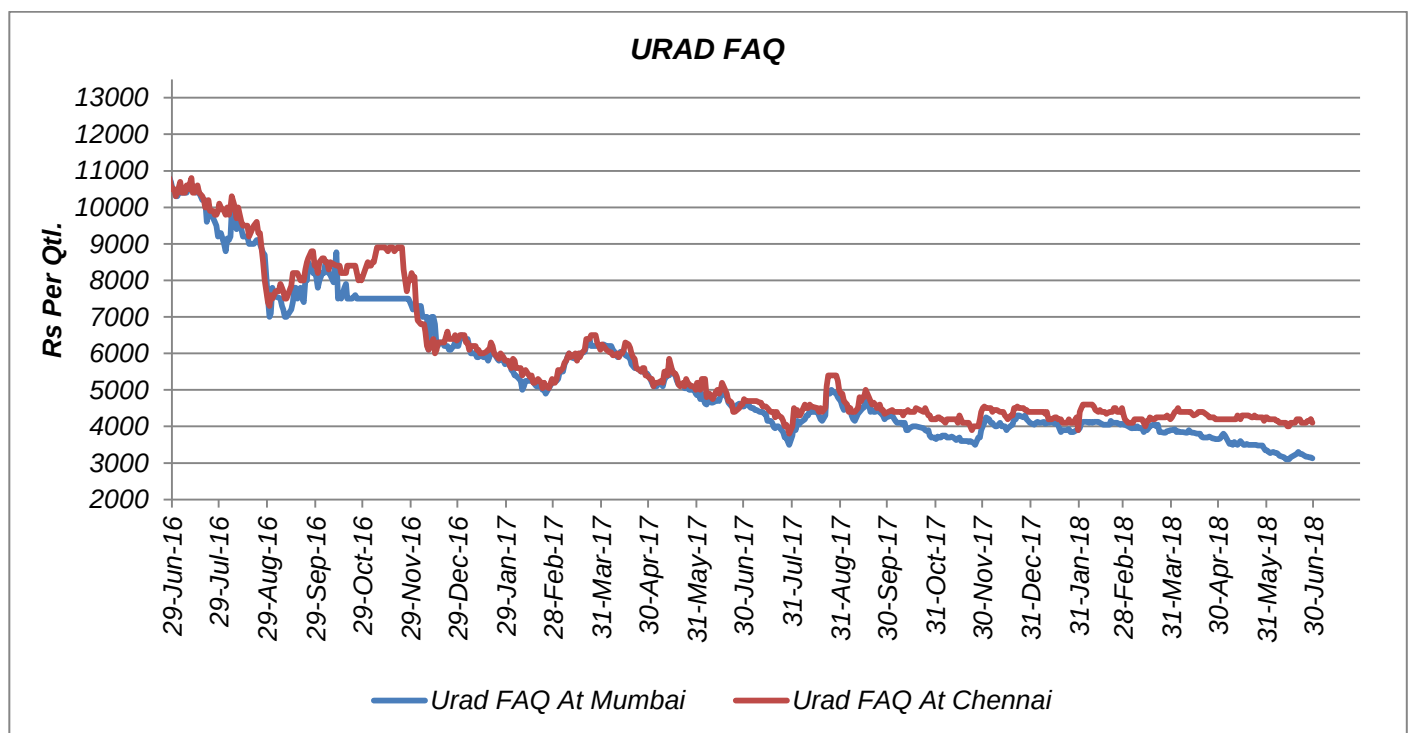

Black Matpe (Urad):

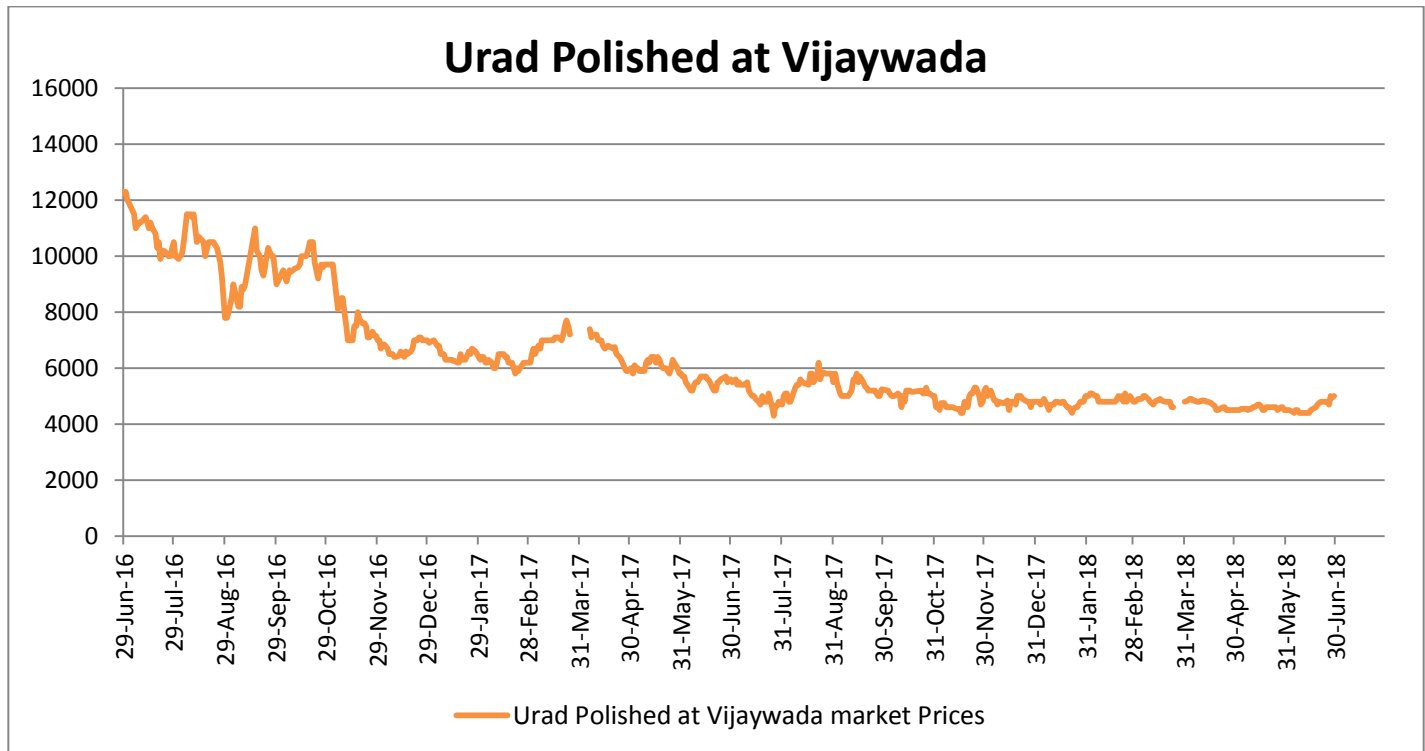

As expected by Agriwatch, cash market could not sustain at previous level and it lost Rs 50 per qtl in major mandis during the week under review. New Urad in Bursi mandi in Maharashtra started pressurizing prices of Urad once again. Around 750 bags hit Bursi mandi and traded in the range of Rs 3120 to Rs 37800 per qtl. New arrival in MP is expected from next week. Crop condition is said to be good. New arrival is expected to affect market at least for a month. Overall tone in cash Urad market remains weak despite depleting stock at mills end. Urad kharif pulses sowing as on 29th June, is lagging by 37.64% from 2.00 to 1.25 lakh ha. Total kharif pulses sowing is down by 41.07% to 10.72 lakh ha against 18.18 lakh ha. Sowing is likely to pick up from July, as monsoon has revived again.

Myanmar is offering FAQ Urad at \$450 per tonne and SQ at \$570 per tonne basis against Indian (Chennai) prevailing price of \$625 per tonne. Imports to India are feasible at these prices and may occur soon as DGFT has allowed conditional import for the millers under allocated quota of 1.5 lakh tonne for current MY.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.3200-3250Qtl.) and Chennai (Rs.4050-4100Qtl.) noticed weak tone. It traded down in Vijaywada too. Steady to weak movement might be seen in Urad market, due to lack of demand at higher level. The following graph shows the prices movement in different markets:-

Market Outlook: *Urad Prices are likely to show steady to weak momentum this week too.*

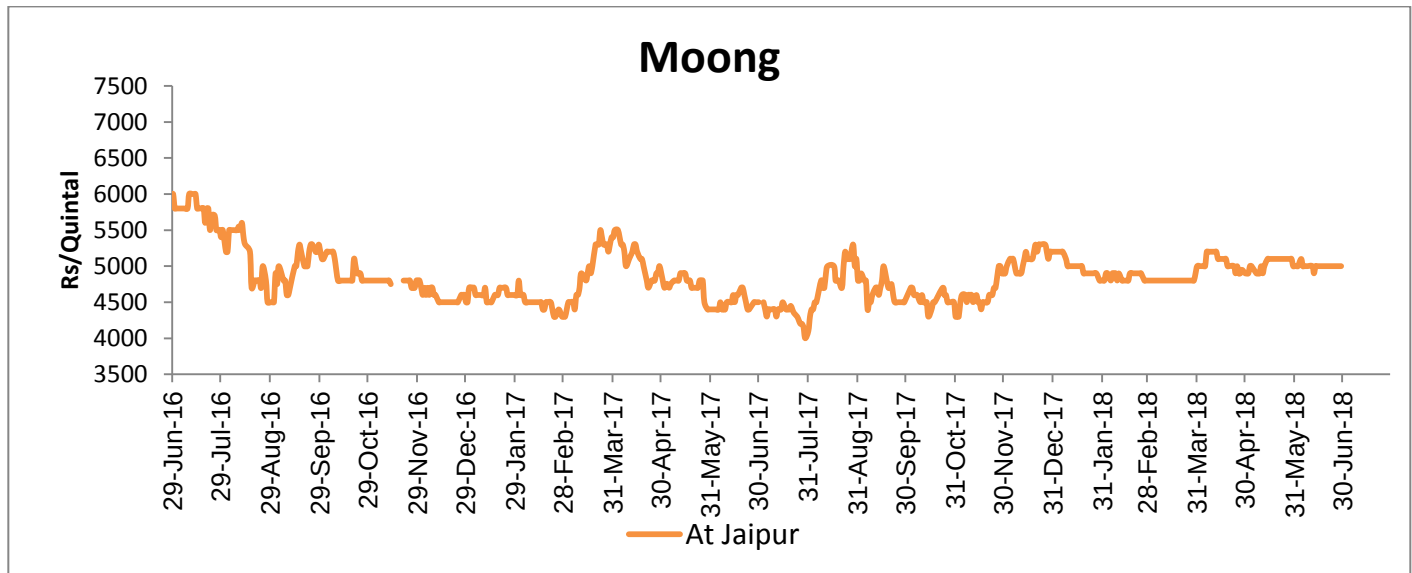

Green Gram (Moong):

Market Recap:

Bulk buyers are not active as inner tonne in cash moong market remains weak. Need based buying remains unsupportive to the cash market. Release from stockists and central pool stock and expectation of similar acreage as last year, would not allow market to improve in the near term. However, it traded steady at Rs 5000 in Jaipur market. Actually, market is well aware of hefty stock lying with govt. As procurement drive is on for summer crop, stock is likely to move up further. Steady to weak tone may prevail this week too.

Moong sowing is lagging behind by 53.44 % to 3.06 lakh ha against 6.58 lakh ha last year as on 29th June. However, it is likely to improve in coming weeks as monsoon has revived again. It is lagging by 33.33% to 0.04 lakh ha in AP. However, it is up in Karnataka by 26% to 1.99 lakh ha as on 29th June-2018.

Agriwatch preliminary estimate for 2018-19 kharif /Rabi crop stands at 18.04 lakh tonne against 19.25 lakh tonne produced last year. The preliminary estimate is based on farmer's pre-sowing intention. Farmers may shift some Moong area to soybean, groundnut, chilli and cotton this year. However, likely good rainfall, may improve yield this year kharif season. Carryout is higher, so any unexpected firmness is unlikely.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
