Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market

- All India kharif Pulses area is lagging behind by 9.56 % to 60.56 against 66.97 lakh ha last year** as on 13th July 2018. Farmers have covered 22.18 lakh ha against 22.64 last year under Tur till date, lower by 2 %. Normal area under Tur is 41.90 lakh ha. However, Urad area is up by 15.17 % to 15.78 against 13.70 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running behind by 5.47 % to 17.51 lakh ha against 18.52 lakh ha last year. Normal area under Moong is 24.93 lakh ha. other pulses area too is lower by 61.31% to 4.60 lakh ha than last year. Farmers had covered 11.90 lakh ha under other pulses last year. However, area under Kulthi has increased by 132 % to 0.49 lakh ha against normal of 2.27 lakh ha.
- Fundamental for chana market is changing fast despite huge stock (27.54 lakh tonne)** accumulated in central pool and in private hands. Average monthly consumption of chana is around 7.5 lakh tonne. This means we have consumed around 30 lakh tonne in last four month and we need around 60 lakh tonne for next 8 months. This means traders /stockists/farmers have around 49/50 lakh tonne chana in their hands. Against 75 lakh tonne stock our requirement for 8 months is 60 lakh tonne. Out of this govt has 27.54 lakh tonne stock and govt. stock is expected to enter into market not before Oct.
- Besides, global market has only 6.0 lakh tonne marketable surplus including likely new crop** of 4.5 lakh tonne in Australia. Against this total global demand for chickpeas has been projected at 5.5 lakh tonne for next 8 months. This means global chickpeas market is bound to move up and It would provide opportunity for export chana. Govt has extended export incentive of 7% from June to 20th Sept. Assuming 7 % export incentive and firmness in global market India can export 1 lakh tonne in B, desh 7&2 lakh tonne in other countries. All these emerging scenario chana is unlikely to rule below MSP in coming months. Cash market is likely to trade in the range of Rs4000 to Rs4500 in July.
- Tur market is expected to improve from current level by Rs 200 to 300 per qtl** in coming weeks. Higher MSP for new crop, lower all India area coverage by 15 to 20% and increasing intention of retaining stock by stockists amid slower pace of release from central pool stock are likely to support Tur market in weeks ahead. Stock in private hands is said to be decreased by 50 % from normal. It would continue to lend support to cash market. Maximum stock is in central pool and restricted release seems favorable for Tur market. Tur in Gulberga market traded steady at Rs3800 -Rs4000 per qtl. It is good to buy after correction of Rs100-125 from current level.
- Urad market could not sustain its uptrend and traded at Rs 4000-4100 per qtl in Chennai.** Good demand amid higher MSP may help market to trade at current level. As loading is under process in Burma and is expected to hit Indian market by 20 to 24th July, firmness may be contained at higher level. However, with continuation of good demand in domestic market any major dip is unlikely. Urad market is expected to stabilize at Rs 4000/4500 per qtl. SQ may trade at Rs 5000 -5400 in the near term. It is good to buy on dip.
- Moong market too may trade up as retention would increase due to higher MSP** for new kharif crop. It may touch MSP level soon. However, higher availability in govt.'s custody and new crop expected to hit market by August end may restrict uptrend in the market. Area under moong is expected to increase by 30 % and it will add surplus. Overall scenario for moong in the short term seems firm. In Jaipur market moong traded at Rs 5200-5300 per qtl. Millers are active at this price right now. Buy around at Rs5000-5200. Area is likely to improve this kharif season on the back of higher MSP.
- Even lentil and peas prices are expected to move up getting support from other pulses.** Lentil import at 30 % duty from Canada/Australia & at 40% from US origin would make it costly. Marketable surplus in domestic

market is expected to come down by August end. Besides, likely higher MSP for new crop (50% higher than production cost) in October would support market. Lentil and pea price may move up by 200 to 300 from current level.

- **Indian importers imported total 114244.86MT pulses in May-2018, lower by 3.11 % from previous month.** The latest import data shows that green peas import increased by 158 % to 6961.54 MT in May. For details see import table given below.

International Market:

- **Global Chickpeas demand-supply scenario seems balanced right now, barring India.** Total marketable surplus is around 6 lakh tonne including Australian new estimated crop size of 4.5 lakh tonne. Against it demand is around 5.25 lakh tonne in next 9 to 12 months including 2 lakh tonne demand from Pakistan. This means availability is only 0.75 lakh tonne higher than projected demand. Situation may be changed if India starts importing from Burma & Tanzania without duty. Marketable surplus in both countries is said to be around 1 lakh tonne. Prices of Chana in India have started firming up and at current prices it comes to around \$510-515 per tonne. If prices move up further, Indian importers can start importing from Burma and Myanmar. It would push up global chickpeas price in coming months.
- **Peas demand from France has increased from European union. It has lent much needed support to pea market in France.** However, import volume from France in May was registered at 17,910 MT, lower by 7% to 19,310 MT loaded in April. France had exported 9,490 MT in May last year. France has exported total 268,720 MT peas so far in the season. Belgium brought around 12,300 MT, Netherlands brought 2015 MT and Spain purchased around 1,925 MT.
- **Global Chickpeas market traded almost mixed while gap between large and medium caliber has started increasing.** Even growers bids have been on decrease from May-2018. US farmers bids decreased by 26 % to \$705 MT. In Canada it decreased by 19% to \$490 in last two months. Recovery is expected at current level.
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.
- **Chickpeas area in Canada & US has been registered higher than previous intention.** US farmers have planted 6.62 lakh acres against intention of 6.65 lakh acres. Farmers have covered 2.05 lakh acres under small chickpeas while Kabuli area increased from 3.46 to 4.57 lakh acres this year. Chickpeas area in Canada increased from 3.46 to 4.68 lakh acres. Unofficial Statistics Canada data suggests Canada planted 13,800 acres of desi, 445,900 acres of kabuli and 9,200 acres of other types such as B-90.
- **The latest release of The Canadian Grain Commission hints that Canada exported around 373,000 MT pea through licensed terminal in May-2018.** Data does not include containers export. The exported volume is higher by 85% from 2.01 lakh MT exported in May-2017. It is almost double from exported volume of 1.77 lakh MT in April-2018. India imported around 30,000 MT from Canada in May-2018.
- **80% of newly sown pulses crop in Canada, are passing through normal developmental stages** and almost 20% are below normal development stages. Recent rains in major growing areas have helped standing crops in most of the regions. More rains are required for better growth of pulses. According to Saskatchewan Agriculture and

Food crops some area are still stressed and showing the impact of dry conditions. Available moisture level in the field is not enough to ensure better growth of the crop. However, some areas like East and central Saskatchewan condition remains favorable.

- **Chickpea production in US is likely to increase from 3.13(2017) to 4.34 lakh tonne in 2018.** Lentil production may be steady at around 3.39 lakh tonne this year. Pea production too would increase from 6.43 to 6.69 lakh tonne in 2018. Sowing of pulses continues in US and Canada. As major buyers are almost out of the market, global pulses market may stay steady to slightly weak in coming weeks.
- **Chickpeas area in Canada is likely to increase considerably from 1.6 lakh acres to 2.79 lakh acres in 2018.** While chickpeas are riskier to grow than lentils, the relative returns were starting to look better for chickpeas in the regions they're grown-says Carl Potts, executive director of the Saskatchewan Pulse Growers. According to him, growing North American demand for hummus, is another factor behind the strength in chickpeas market.
- **Lentils production in Australia too is bound to decline from 8.3 to 4.19 lakh tonne in 2017-18.** It is almost 50 % down from last year. Lentils area was reported higher by 16 % at 3.55 lakh ha. Due to rough weather condition Lentils production, would decline to 4.19 lakh tonne. Field peas production too, is bound to decline by 32.47 % to 2.8 lakh tonne in 2017-18. Australia had produced 4.15 lakh tonne field peas in 2016-17.

Weekly Outlook: -Pulses are likely to mixed this week..

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 2.3 point from 119.8 in May to 117.5 in Jun-2018.

Pulses-Wise Scenario:

Chana

Current Scenario:

Improved demand for chana from millers and negligible arrivals in mandis amid unwillingness by stockists to sell at current level have lent support to cash chana market in the week under review. Market participants are expecting higher MSP for chana in Oct like other kharif pulses. Besides, maximum stock is in govt.'s custody and govt is in no hurry to release it in open market. All these developments have pushed chana price up. Chana market is expected to stabilize near Rs4200/4500 in coming weeks. Buyers should buy on dip.

All India average price for Chana increased by 2.43 percent to Rs 3708 per qtl. Imported gram (old imported crop) price increased by 5.82 percent to Rs 3924 per Qtl. Australian chana is being quoted at Rs3950. Following graph illustrates the chana price movement in different markets:

Chana Price Movement

Market Outlook: Chana may trade steady to slightly firm this week too

Peas (Matar):

Market Recap:

Pea Price Movement

Pea market is likely to trade firm this week too as there is expected support from cash chana market. Besides, there is good offtake from stock available at ports. Market sources say that there is 1.5 lakh tonne pea available at Mundra, Kandla, Hazira & Dahej ports. Besides, 1.00 lakh tonne at Tuticorin, Vizak, Kakinada, Kolkatta ports. In Kanpur there is 10,000 MT yeow pea and 40,000 MT desi pea stock is available. Around 1.5 lakh tonne pea is likely to hit Indian port in next two weeks. So there is plenty of stock and it would restrict uptrend in coming weeks. However, green pea stock is comparatively lower and it may move further up after slight correction. It is good to buy on dip.

Current Market Dynamics & Outlook:

At Kanpur, Desi Peas traded up by 4.85 % at Rs 4071- due to good offtake from retailers/stockists. Canadian pea in Mumbai market traded up by 2.10% to 3900 It may move further up despite higher availability at port. Costly import and improving chana price would continue to support peas market. However, downward correction is expected this week. Stake holders should buy on dip. Green pea is being traded at RS7000-7100 per qtl. in Mumbai.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved into negative zone now due to higher peas price this week. Spread is expected to move in the range of -50 to -100 per quintal in the coming weeks, on relative movement in Chana prices. Overall outlook seems steady to slightly firm. Buying on dip is good, as imported pea costing would be higher.

Market Outlook: Outlook remains steady to slightly firm.

Lentils (Masoor):

Market Recap:

Masur in Kanpur market traded up by 3.38% to Rs3905 per qtl. as available stock in local market is said to be lower by 25 % from last year. Stockists too have retained stock in anticipation of higher price due to 30 % applicable duty. For American origin Lentil, it has been increased to 40 %. However, imported lentil in Mumbai and Kolkatta market decreased slightly as demand from retail ends has decreased. As lentil dal price is higher in domestic market, consumers are shifting to Tur dal, which is comparatively cheaper than masur dal right now. So any spike at this level is unexpected. Steady tone may prevail in lentil cash market this week too.

Current Scenario:

Weekly average price traded up by 3.38 % to Rs 3905 per qtl. Currently in Mumbai, it is being quoted at Rs 4200 per qtl, up by 1.48 %.. Steady to slightly firm tone may prevail this week too, as demand is likely to improve in coming weeks

Market Outlook: Prices are likely to notice steady to slightly firm tone this week.

Pigeon Pea (Tur/Toor):

Market Recap:

Tur market is expected to improve from current level by Rs 100 to 200 per qtl in coming weeks. Higher MSP for new crop, lower all India area coverage by 15 to 20% and increasing intention of retaining stock by stockists amid slower pace of release from central pool stock are likely to support Tur market in weeks ahead. Stock in private hands is said to be decreased by 50 % from normal. It would continue to lend support to cash market. Maximum stock is in central pool and restricted release seems favorable for Tur market. Tur in Gulberga market stayed steady at Rs3800 -Rs4000 per qtl. It is good to buy after correction of Rs100-125 from current level..

Current Market Dynamics & Outlook:

Myanmar is offering lemon Tur (old) at \$440 per tonne and new Lemon Tur (Linkely) at \$460 per tonne basis Indian ports. Despite smart gains in prices at origin, there is import parity and import seems possible to the level of 3.5 lakh tonne in current MY. Govt may restrict selling through auction till Aug amid lower coverage may support cash market. Market should stabilize near 4200-4500 in the near to medium term. Stock in private hands has come down.

Red Tur At Gulberga(Rs /Qtl.)

Market Outlook: Tur prices are likely to show steady to slightly firm movement this week.

Black Matpe (Urad):

Urad market could not sustain its upward momentum and traded down at Rs 3900 to Rs 4100 per quintal in Chennai. Demand at higher level got affected. As supply side is higher at improved level, any major decline is unlikely in coming weeks. Higher MSP may encourage farmers to grow more Urad in kharif season. FAQ Urad is expected to stabilize near Rs 4000/4500 per quintal. SQ may trade at Rs 5000-5500 in the near term.

Myanmar is offering FAQ Urad at \$450 per tonne and SQ at \$570 per tonne basis against Indian (Chennai) prevailing price of \$625-35 per tonne. Imports to India are feasible at these prices and may occur soon as DGFT has allowed conditional import for the millers under allocated quota of 1.5 lakh tonne for current MY.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.3400-3475Qtl.) and Chennai (Rs.4000-4200 Qtl.) noticed weak tone. It traded down in Vijaywada too. Steady movement might be seen in Urad market, due to good demand at higher level. The following graph shows the prices movement in different markets:-

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week too.

Green Gram (Moong):

Moong market too may trade up as retention would increase due to higher MSP for new kharif crop. It may touch MSP level soon. However, higher availability in govt.'s custody and new crop expected to hit market by

August end may restrict uptrend in the market. Area under moong is expected to increase by 30 % and it will add surplus. Overall scenario for moong in the short term seems firm. In Jaipur market moong traded at Rs 5200-5300 per qtl. Millers are active at this price right now. Millers are active at current price. Buying around 5100 is good.

Market Recap:

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.
