Commodity-wise Domestic, International Prices and Arrivals at Different Centers**Highlights-Domestic Market**

- **All India kharif Pulses area is lagging behind by 2.92 % to 124.15 against 127.89 lakh ha** last year as on 10th Aug 2018. Farmers have covered 42.17 lakh ha against 42.24 last year under Tur till date, down by 0.17 %. Normal area under Tur is 41.90 lakh ha. Even Urad area is lagging behind by 11.99 % to 34.93 against 39.69 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 6.11 % to 32.13 lakh ha against 30.28 lakh ha last year. Normal area under Moong is 24.93 lakh ha. Other pulses area too is lower by 6.68 % than last year. It is 14.26 against 15.28 lakh ha so far against normal of 15.83 lakh ha. However, area under Kulthi has increased by 67.51 % to 0.66 lakh ha against normal of 2.27 lakh ha
- **Chana cash market is bound to trade firm in domestic market as chana stock available in central pool would not be sold out in cash market.** Govt would consume it through PDS and midday meal. Private trades are unlikely to sell chana at current level as they know that import from Australia is not possible due to increasing price and lower crop size (around 3.5 lakh tonne against 10.53 lakh tonne last year). Even Tanzanian crop is lower in size and prices are increasing continuously. Private trades have started exporting chana to Bangladesh and around 5000 MT have been brought by B, desh traders so far.
- **Market size of B, desh is around 2 lakh tonne and India can export around 75000 MT Chana** this year. Besides, there is an increasing possibility of export to Pakistan as new govt. may allow chana import from India. Besides, festival demand in domestic market may lend support to chana market. All these developments may push up chana price to Rs 5000 level soon. Exporters would not leave any stone unturned regarding export opportunity with 7% export incentive. In Delhi market chana traded at Rs 4450-4500 per qtl. Overall sentiments remain firm in the short to medium term.
- **Area under major kharif Pulses has crossed the level of 42 lakh ha so far as projected by Agriwatch.** As sowing is at final stage, any major recovery in Tur area is unlikely now. Farmers have covered around 43 lakh ha last year. This year almost same area coverage is likely despite fear of lower acreage. Actually higher MSP and good rainfall in growing belt have covered lower area coverage in last two weeks. So production is expected to be same as last year in normal condition. As demand in domestic market is likely to improve, Tur price is expected to move up from current level. Stock available in central pool would not come in physical market and govt would try to consume it through various welfare schemes. It would lend support to Tur market in coming weeks.
- **As expected by Agriwatch last week Urad market traded down by Rs 100 to Rs 3850-3950 in Chennai market.** As demand for Urad dal is weak, any major recovery in market is unlikely in the near term. Range bound movement is expected this week. Pressure on market is unlikely to build up as central pool stock is coming down and it would cap downward trend. Lower kharif area may support urad price in the medium term. Higher MSP and restricted urad import may push up urad price in the medium term to a certain extent. FAQ Urad is expected to stabilize near Rs. 3900/4300 per quintal. SQ may trade at Rs 5000-5500 in the near to medium term
- **Moong market is likely to trade steady to slightly firm as private trades are unwilling to sell at this level** despite continuous selling from central pool stock at various centers. Stock in central pool is decreasing while demand for moong and moong dal is improving. Millers are active at higher level and it would support market at current level despite arrivals from summer crop. Besides, higher MSP may push market up from current level as market expects higher procurement from kharif crop at Rs 6975 per qtl. Jaipur market may trade in the range of Rs 5000 to Rs 5400 per qtl. this week.
- **Myanmar offered lemon tur (new & old) at \$ 380 per tonne. Basis Indian port. Linky too is being offered** at \$380 per tonne, down by \$10, urad FAQ was offered down by \$5 to \$310 and SQ at \$455 basis Indian port. Chana v2 Kabuli was offered at \$620 per tonne and Hollan at \$655 per tonne. Moong Pakaku was offered at \$680 per tonne.
- **Lentil market may trade steady to slightly weak this week. Domestic demand for dal may support** market to a certain extent. Uptrend in Masur market is unlikely to continue despite lower availability of imported stock in Kolkata and Mumbai. It would not allow market to go unexpectedly down. However, market should not ignore huge stock (243450.18 MT) in central pool procured during the season. Other price limiting factor is lower price for Tur and it is directly affecting Masur dal consumers right now. Tur dal is still available at Rs 55-60 per kg against 50 to 55 per kg for Masur. So consumers have option to shift from Masur to Tur. Govt. agencies have around 10 lakh tonne Tur stock and

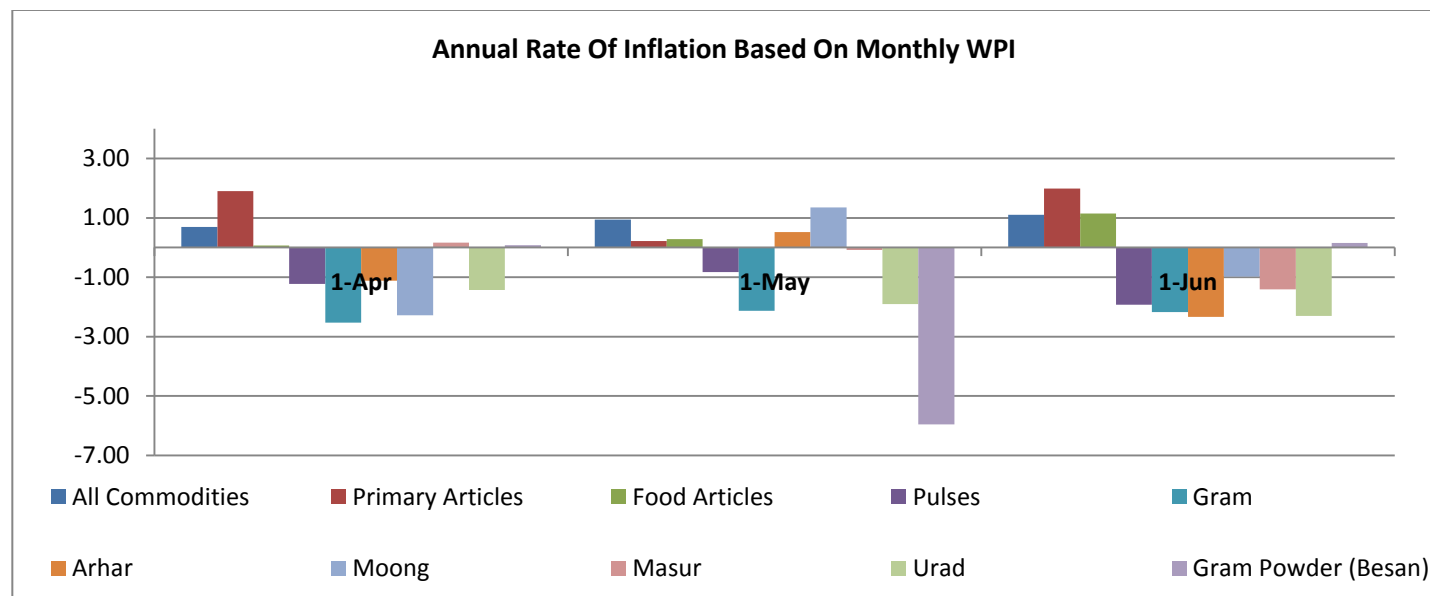

they would start liquidating it before Nov when new crop hits the market. It would pressurize lentil price in the months ahead.

International Market:

- **With bearish USDA crop report global chickpea market traded under pressure. However, lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks.** Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623,800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- **As per the latest market update production of Chickpeas in Australia may be around 3.09 lakh tonne.** Queensland production has been pegged at 2.17 lakh tonne. Field Pea production may touch 3.01 lakh tonne, Lentil production has been pegged at 3.47 lakh tonne. Total pulses production including Lupins and Faba beans has been pegged at 1713 lakh tonne. It is 72% lower in case of chickpeas, 9% up in case of peas, 26% down in case of lentils when compared to 2017.
- **Lentil markets traded slightly down from previous week as harvests are on in both the United States and Canada.** Pressure is likely to be on in August as farmers seem to sell 50 % of their crop as soon as possible. Markets were not helped by rising tensions between the United States and Turkey. Fears that will devolve into another trade war had a negative impact on the value of the Turkish lira.
- **Lentil Production in Turkey has been pegged down by 12% to 3.8 lakh tonne from last year.** The reason of lower production is mainly attributed to bad weather condition in parts of south eastern region. Harvesting is over by first week of July. In some particular region farmers have lost 50 % yield due to heavy rains and water lodging. However chickpeas area increased due to govt.'s support and higher return in 2018. The major chickpeas producing regions are Central Anatolia and somewhat in the Southeastern region. This year chickpeas production has been pegged at 5.5 lakh tonne, up by 15 % from last year. The GOT announced the MY 2018/19 chickpeas procurement price on June 25, 2018 at 3,250 TL/MT (around \$700/MT).
- **The Canadian Grain Commission latest update shows that Canada has 29,800 metric tons lentils** through licensed facilities in June against 68,600 MT were shipped the same month last year, while movement is up from the 19,600 MT shipped the previous month. Thus total export for the current marketing year touched 284,600 MT against 853,100 MT during the same period last season.
- **Masur Crop condition in Canada is said to be good so far. the latest update shows that 55% Masur crop is in good condition while 28% is in fair condition and 9% is said to be in bad condition.** Harvesting of masur early sown crop may start from 2nd week of August. Canada has huge old stock of Masur (around 18-20 lakh tonne) and India being out of market, Canadian exporters may seek other buyers to consume its surplus stock. It may pressurize global masur market to some extent in coming week.
- **Global peas market traded under pressure before likely commencement of harvesting in northern hemisphere.** Major buyers like India & Pakistan are out of market right now and others are waiting for new crop pressure to build up. However, trading activities are seen in feed grade peas. Exporters in Canada have enough stock to cater the incoming demand in the weeks ahead. After harvesting pressure coming to an end, stockists/exporters may be active once again, that may help prices to recover from mid August.
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.

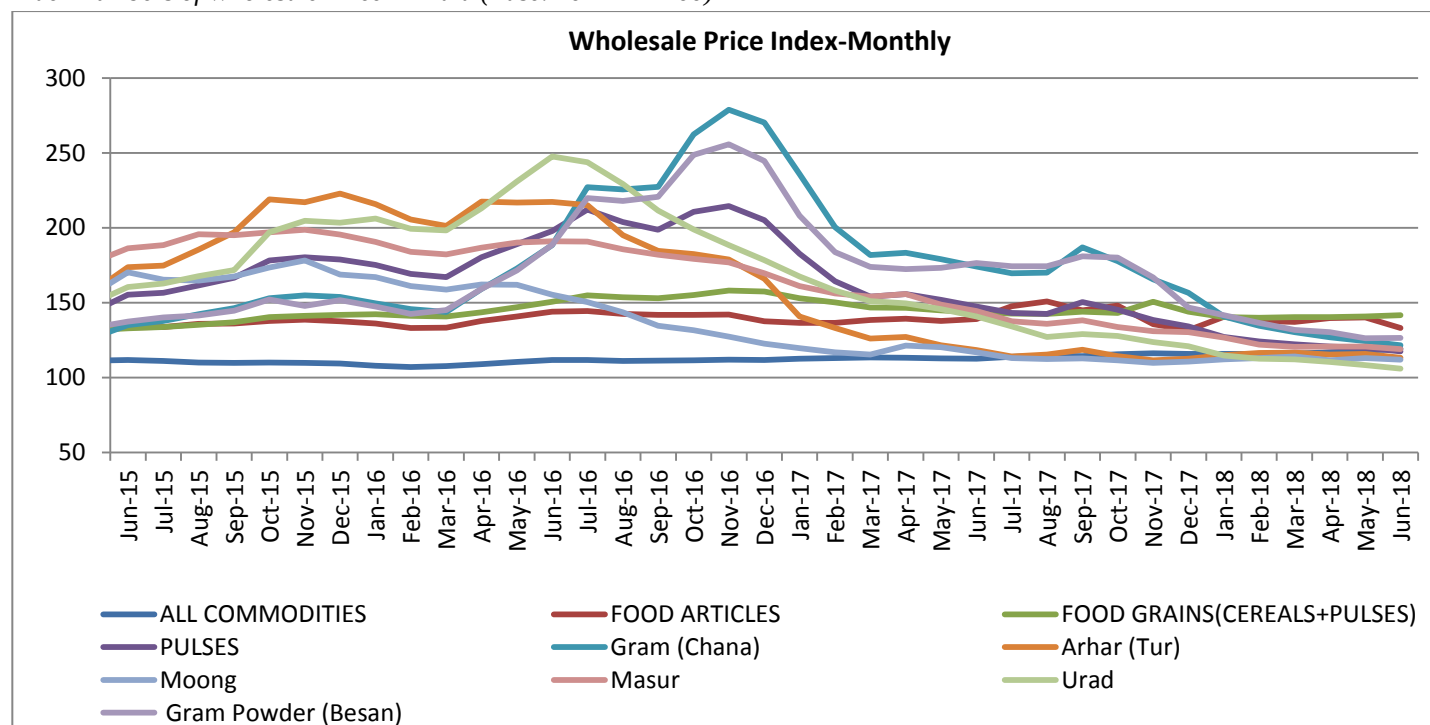

Weekly Outlook: -Pulses are likely to trade steady to slightly firm this week.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 2.3 point from 119.8 in May to 117.5 in Jun-2018.

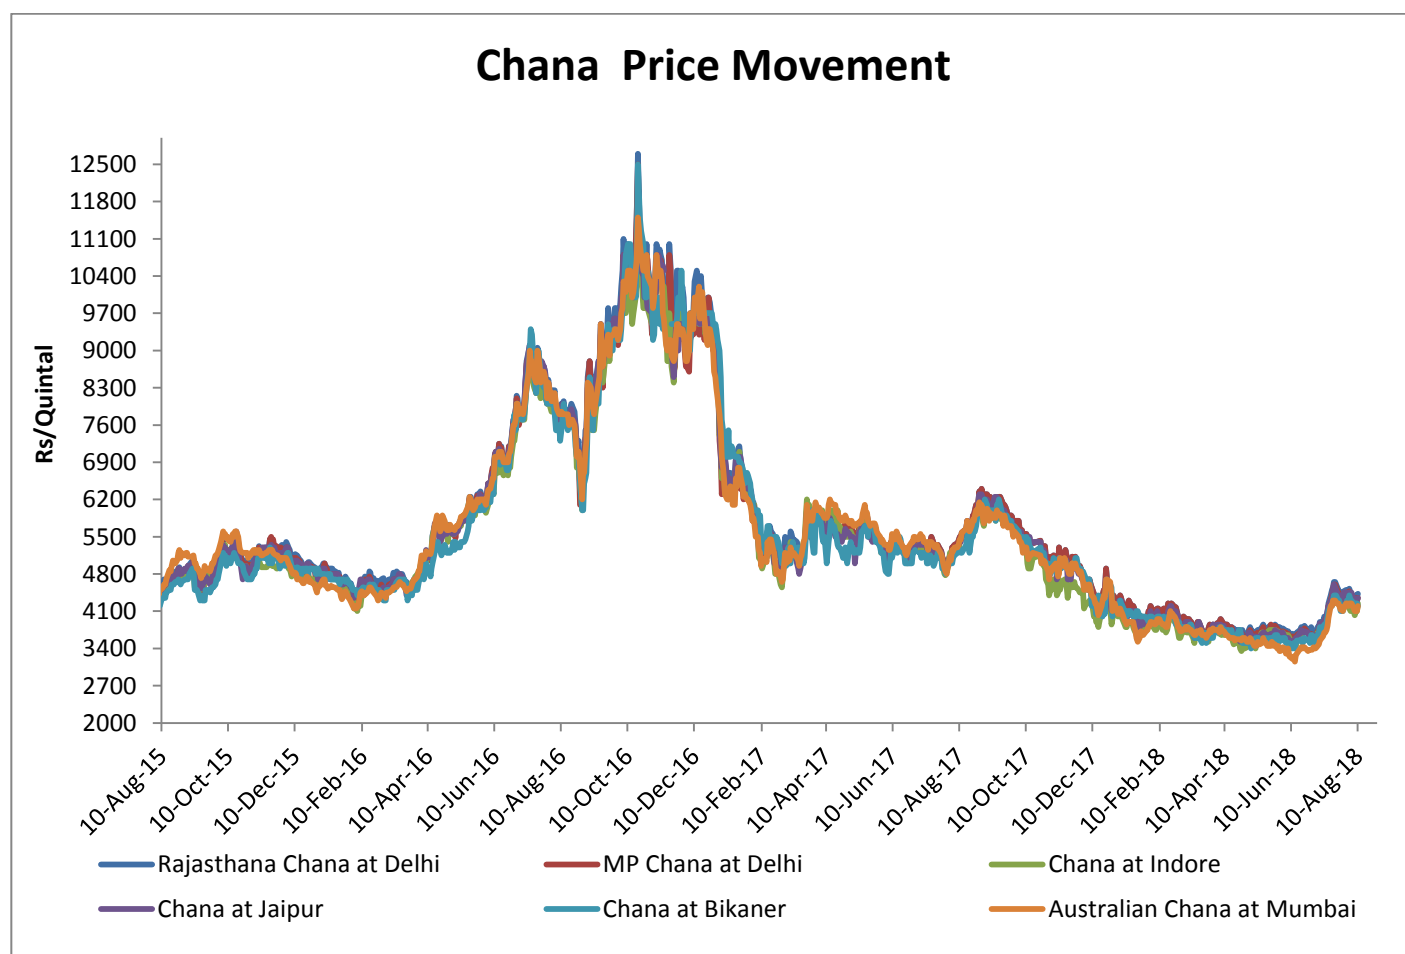

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market is bound to trade firm in domestic market as chana stock available in central pool would not be sold out in cash market. Govt would consume it through PDS and midday meal. Private trades are unlikely to sell chana at current level as they know that import from Australia is not possible due to increasing price, import duty and lower crop size (around 3.5 lakh tonne against 10.53 lakh tonne last year). Even Tanzanian crop is lower in size and prices are increasing continuously. Private traders have started retaining stock and it may push chana market up in coming weeks.

All India average price for Chana decreased by 2.47 percent to Rs 4354 per qtl. Imported gram (old imported crop) price decreased by 2.08 percent to Rs 4140 per Qtl. Australian chana is being quoted at Rs 4250-4300. Following graph illustrates the chana price movement in different markets:

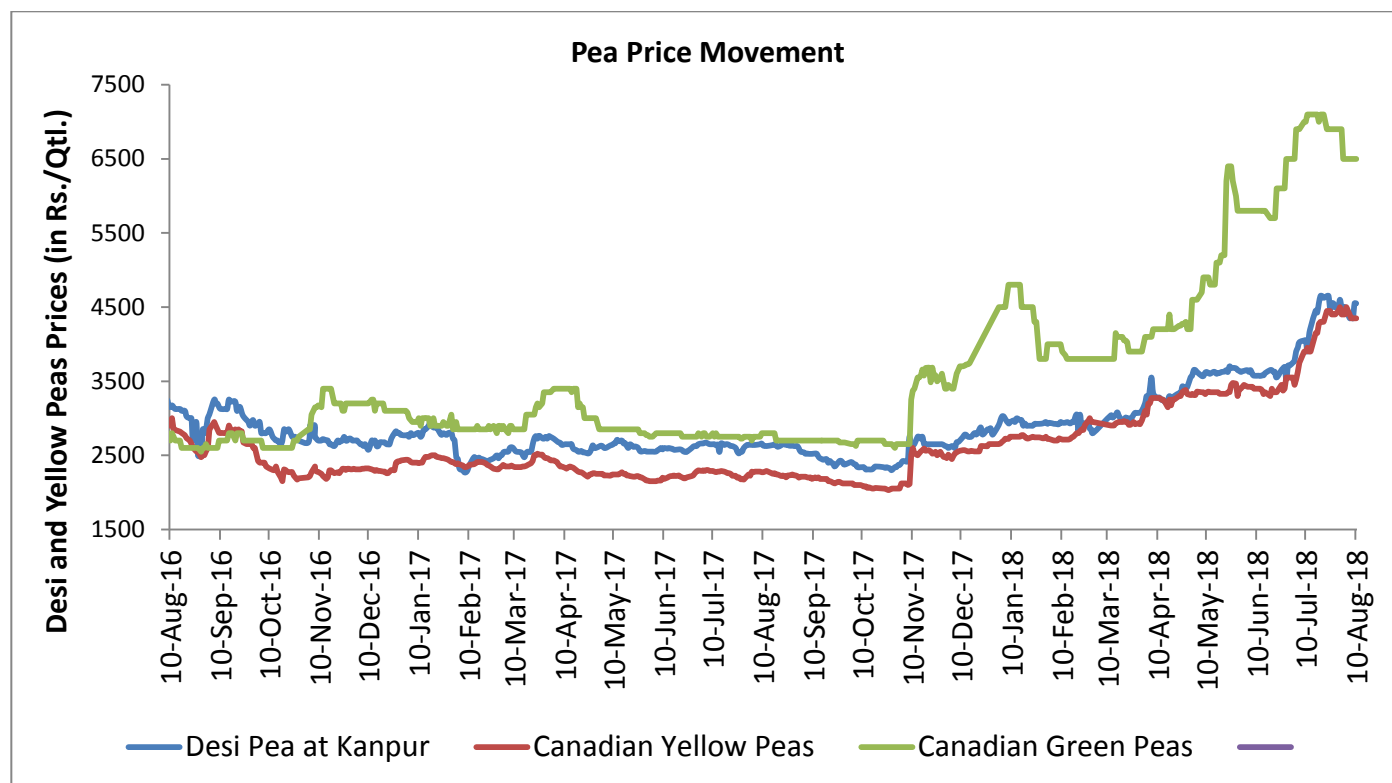

Market Outlook: Chana may trade steady to slightly firm this week too.

Peas (Matar):

Market Recap:

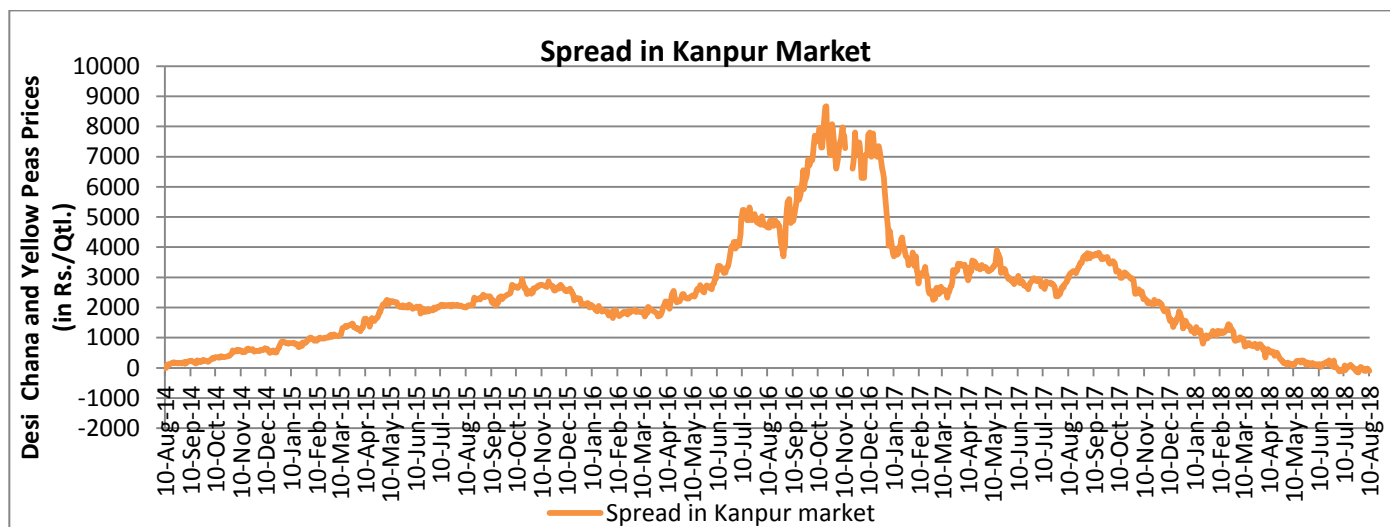

Availability of pea in domestic market is not enough to pressurize market amid good demand from retail sector and bulk buyers. Till September, import is not possible. So pea market is likely to trade firm taking clue from firm chana market. There is good offtake from stock available at ports. Market sources say that there is 1.00 lakh tonne pea available at Mundra, Kandla, Hazira & Dahej ports. Besides, 0.60 lakh tonne at Tuticorin, Vizak, Kakinada, Kolkatta ports. In Kanpur there is 8,000 MT yeow pea and 35,000 MT desi pea stock is available. Even green pea stock is comparatively lower and it may move further up after slight downward correction. It is good to buy on dip. Peas from Ukraine is being offered at Rs4300 per qtl at Mumbai, Hazira and Mundra ports.

Current Market Dynamics & Outlook:

At Kanpur, Desi Peas traded UP by 0.64 % at Rs 4550- due to good offtake from retailers/stockists. Canadian pea in Mumbai market traded down by 0.72 % to 4350. However, it may move firm as chana is getting firmer. Costly import and improving chana price would continue to support peas market. However, slight downward correction is expected this week. Stake holders should buy on dip. Green pea is being traded at RS6500-6600 per qtl. in Mumbai.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved into negative zone now due to higher peas price this week. Spread is expected to move in the range of 75 to 150 per quintal in the coming weeks, on relative movement in Chana prices. Overall outlook seems steady to slightly weak. Buying on dip is good, as imported pea costing remain be higher.

Market Outlook: Outlook remains steady to slightly weak.

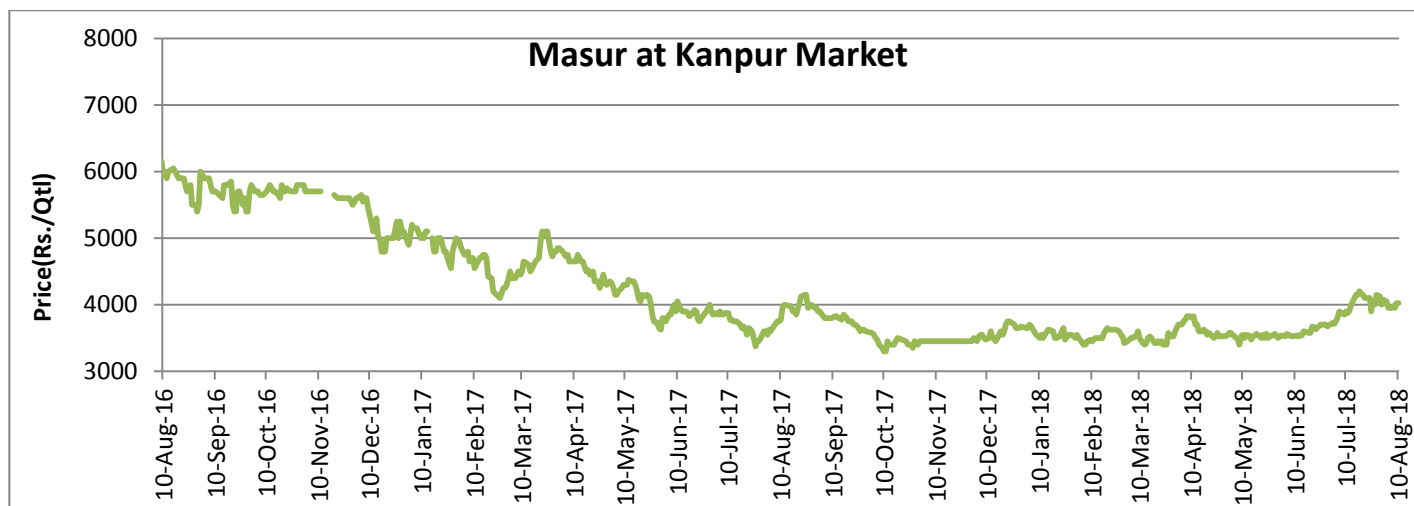

Lentils (Masoor):

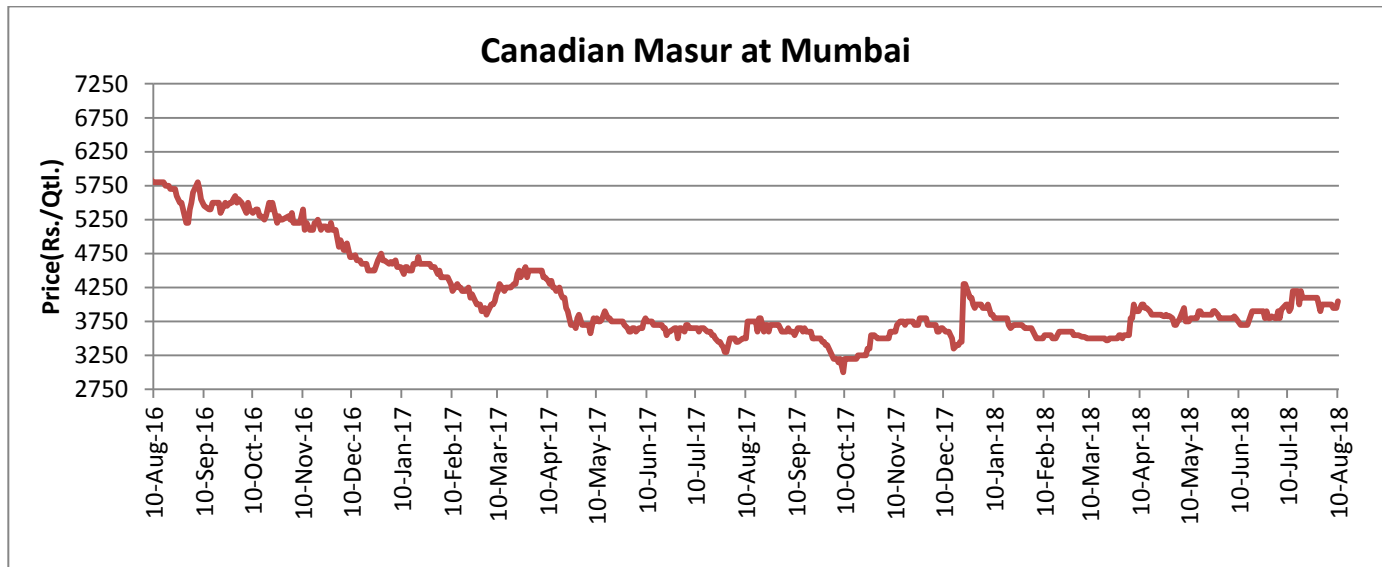

Market Recap:

Selling from central pool stock starts and it may drag down lentil price to some extent. Lentil market may trade steady to slightly weak this week. Domestic demand for dal may support market to a certain extent. Uptrend in Masur market is unlikely to continue despite lower availability of imported stock in Kolkata and Mumbai. It would not allow market to go unexpectedly down. However, market should not ignore huge stock (243450.18MT) in central pool procured during the season. Other price limiting factor is lower price for Tur and it is directly affecting Masur dal consumers right now. Tur dal is still available at Rs55-60 per kg against 50 to 55 per kg for Masur. So consumers have option to shift from Masur to Tur. Govt. agencies have around 10 lakh tonne Tur stock and they would start liquidating it before Nov when new crop hits the market. It would pressurize lentil price in the months ahead.

Current Scenario:

Weekly average price traded down by 2.67 % to Rs 3925 per qtl in Kanpur. Currently in Mumbai, it is being quoted at Rs 4000-4100 per qtl, slightly down.. Steady to slightly weak tone may prevail this week too, as demand is yet to pick up.

Market Outlook: Prices are likely to notice steady to slightly weak tone this week.

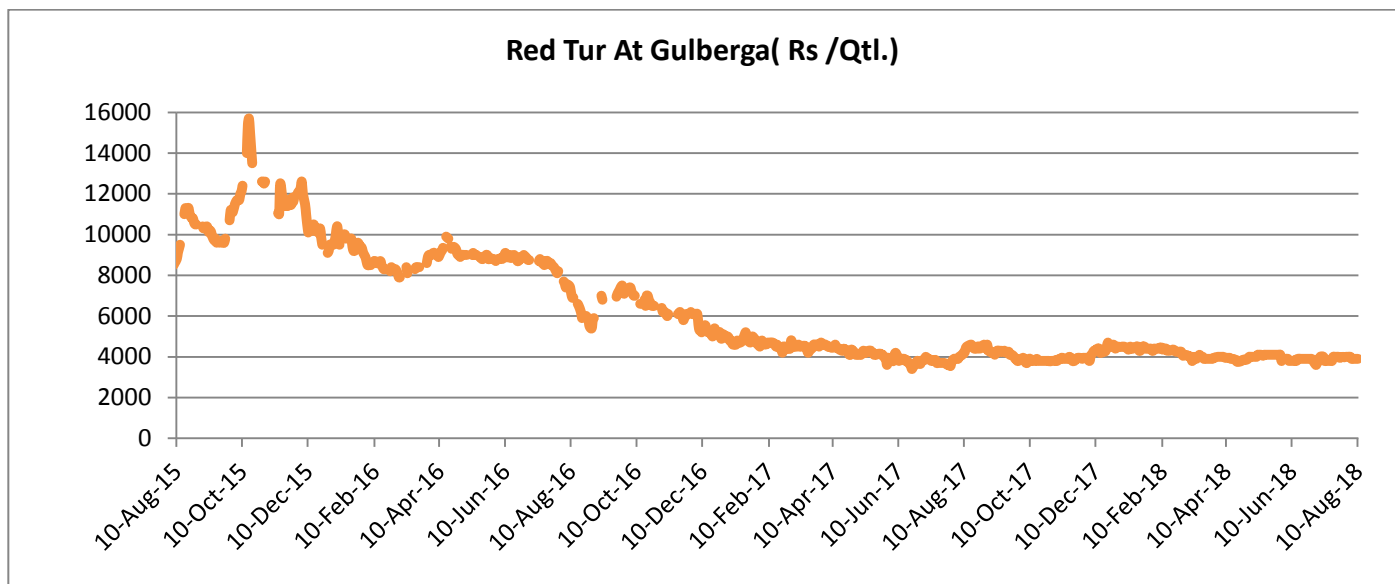

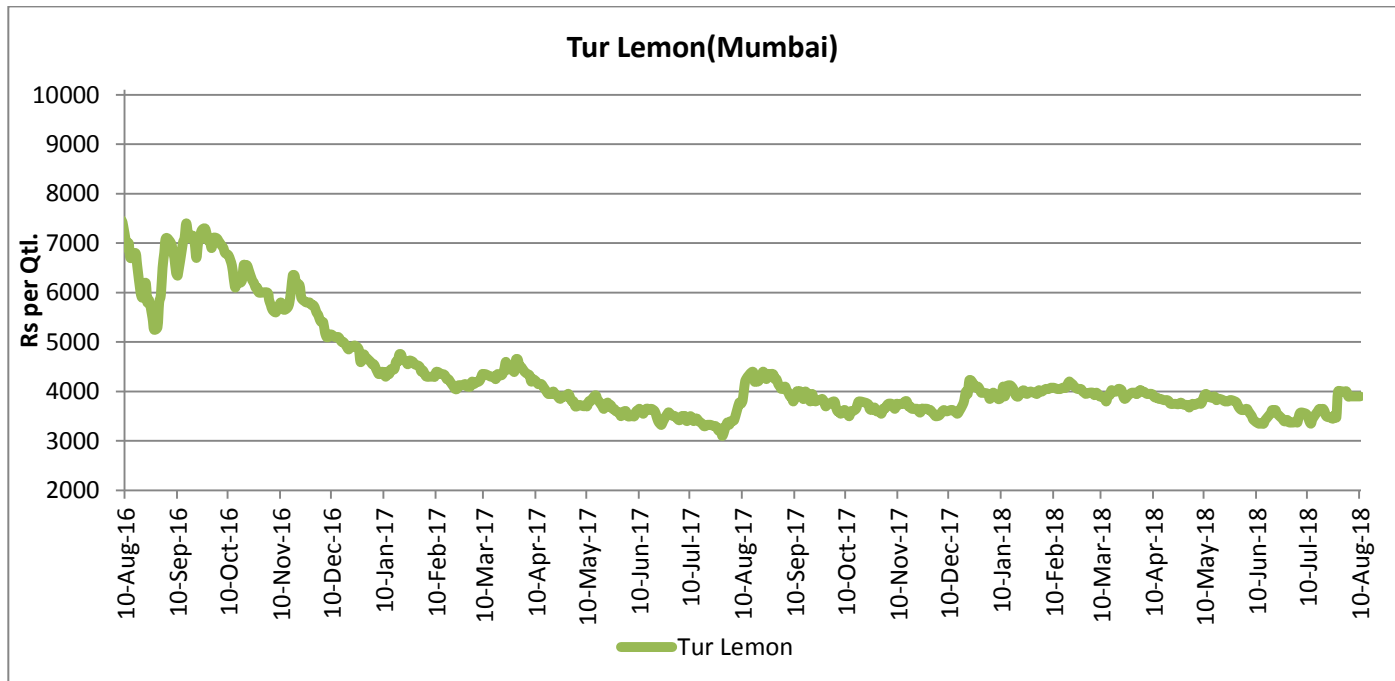

Pigeon Pea (Tur/Toor):

Market Recap:

Area under major kharif Pulses has crossed the level of 42 lakh ha so far as projected by Agriwatch. As sowing is at final stage, any major recovery in Tur area is unlikely now. Farmers have covered around 43 lakh ha last year. This year almost same area coverage is likely despite fear of lower acreage. Actually higher MSP and good rainfall in growing belt have covered lower area coverage in last two weeks. So production is expected to be same as last year in normal condition. As demand in domestic market is likely to improve, Tur price is expected to move up from current level. Stock available in central pool would not come in physical market and govt would try to consume it through various welfare schemes. It would lend support to Tur market in coming weeks.

Current Market Dynamics & Outlook:

Myanmar is offering lemon Tur (old) at \$380 per tonne and new Lemon Tur (Linkely) at \$390 per tonne basis Indian ports. Despite smart gains in prices at origin, there is import parity and import seems possible to the level of 3.5 lakh tonne in current MY. Govt may restrict selling through auction till Aug amid lower coverage may support cash market. Market should stabilize near 4200-4500 in the near to medium term. Stock in private hands has come down. Festive season commences and demand is likely to improve in coming weeks.

Market Outlook: Tur prices are likely to show steady to slightly firm movement this week as trading activities increased due to calling of transporters strike.

Black Matpe (Urad):

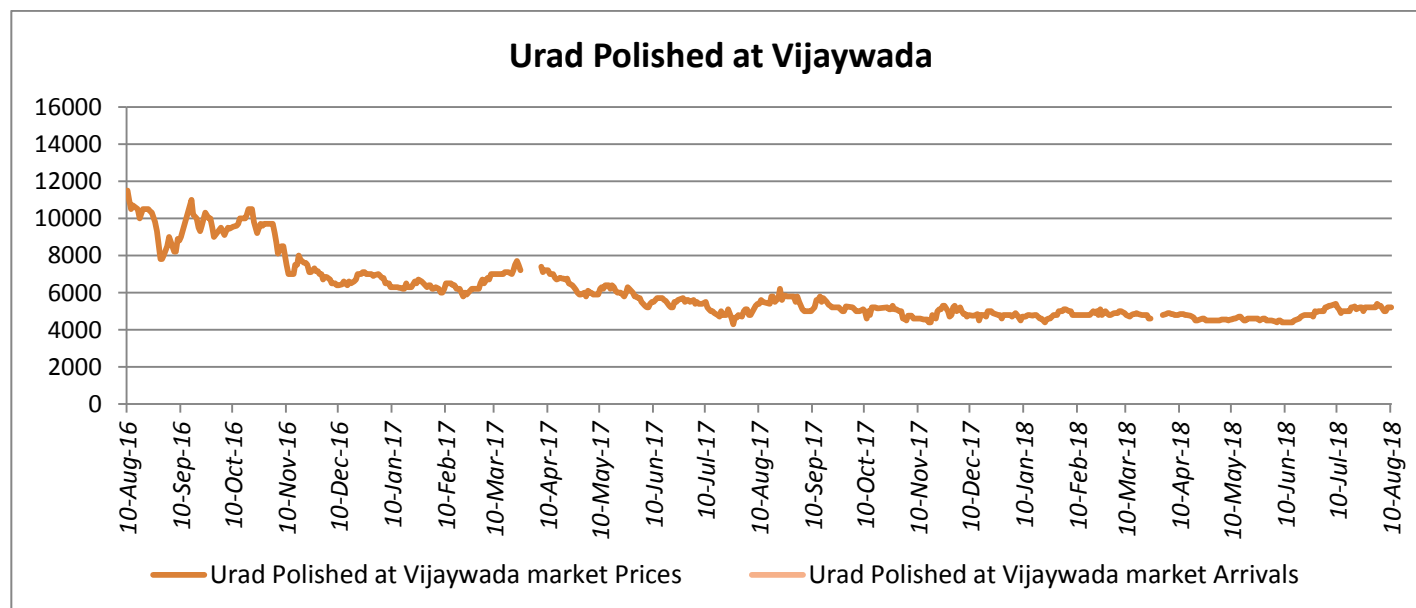

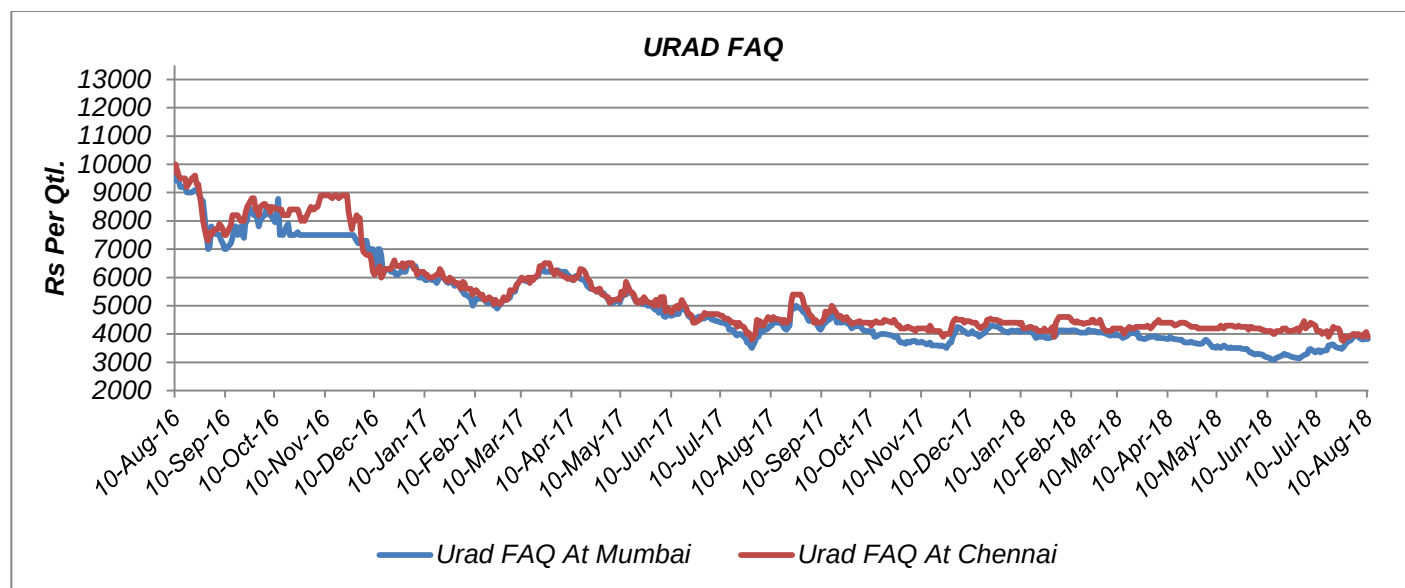

Urad market stayed steady to slightly weak due to transporters strike and traded down by Rs 100 to Rs 3850 -3900 per quintal in Chennai. As movement remained restricted, almost halted, demand was seen subdued. With strike coming to an end normal trading activities are likely to resume and it may support price at lower level. Besides, lower kharif acreage, likely festive demand may remain supportive to cash market to a certain extent. Higher MSP may encourage farmers to grow more Urad in kharif season. FAQ Urad is expected to stabilize near Rs 4000/4400 per quintal. SQ may trade at Rs 5000-5500 in the near to medium term.

Myanmar is offering FAQ Urad at \$315 per tonne and SQ at \$465 per tonne basis against Indian (Chennai) prevailing price of \$635-45 per tonne. Imports to India are feasible at these prices and may occur soon as DGFT has allowed conditional import for the millers under allocated quota of 1.5 lakh tonne for current MY.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.3650-3750 per Qtl.) and Chennai (Rs.3900-4050 Qtl.) noticed steady tone. It traded steady in Vijaywada too. Range bound movement might be seen in Urad market, due to weak demand at higher level. The following graph shows the prices movement in different markets:-

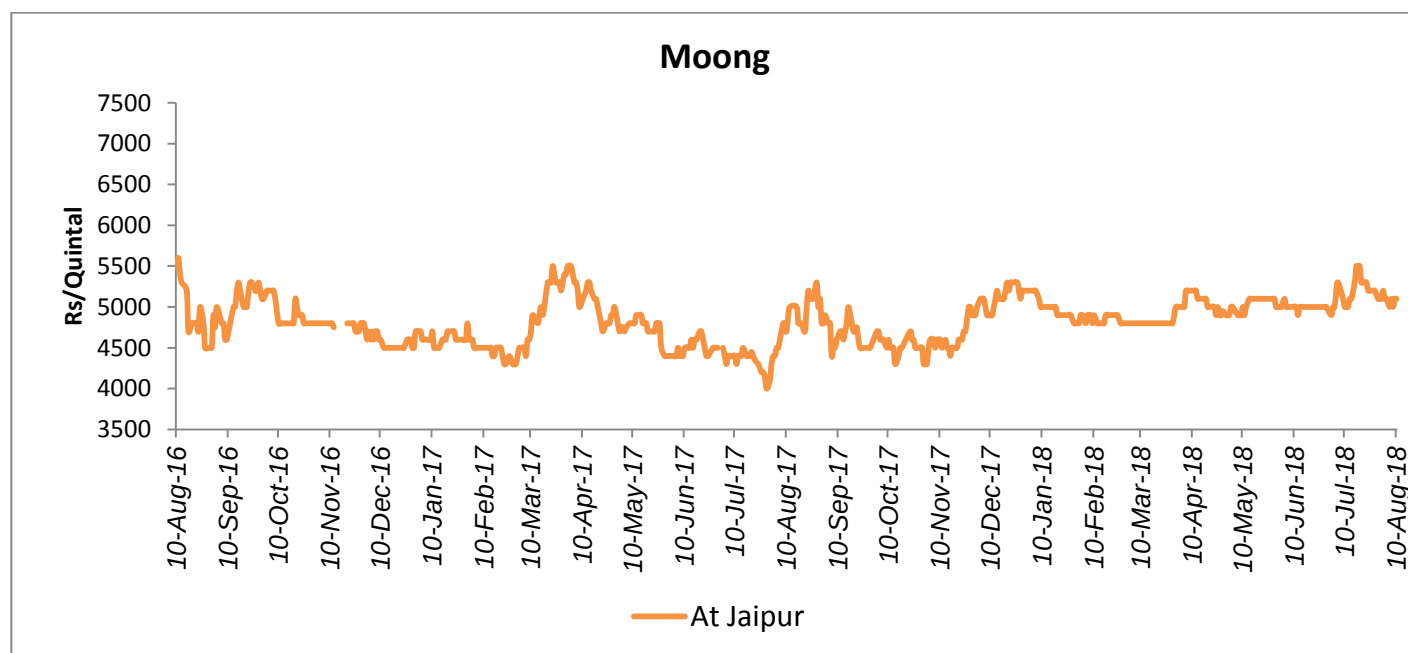

Market Outlook: Urad Prices are likely to show steady momentum this week .

Green Gram (Moong):

Moong market is likely to trade steady to slightly firm as private trades are unwilling to sell at this level despite continuous selling from central pool stock at various centers. Stock in central pool is decreasing while demand for moong and moong dal is improving. Millers are active at higher level and it would support market at current level despite arrivals from summer crop. Besides, higher MSP may push market up from current level as market expects higher procurement from kharif crop at Rs 6975 per qtl. Jaipur market may trade in the range of Rs 5000 to Rs 5400 per qtl. this week. Stake holders should buy on dip.

Market Recap:

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
