Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

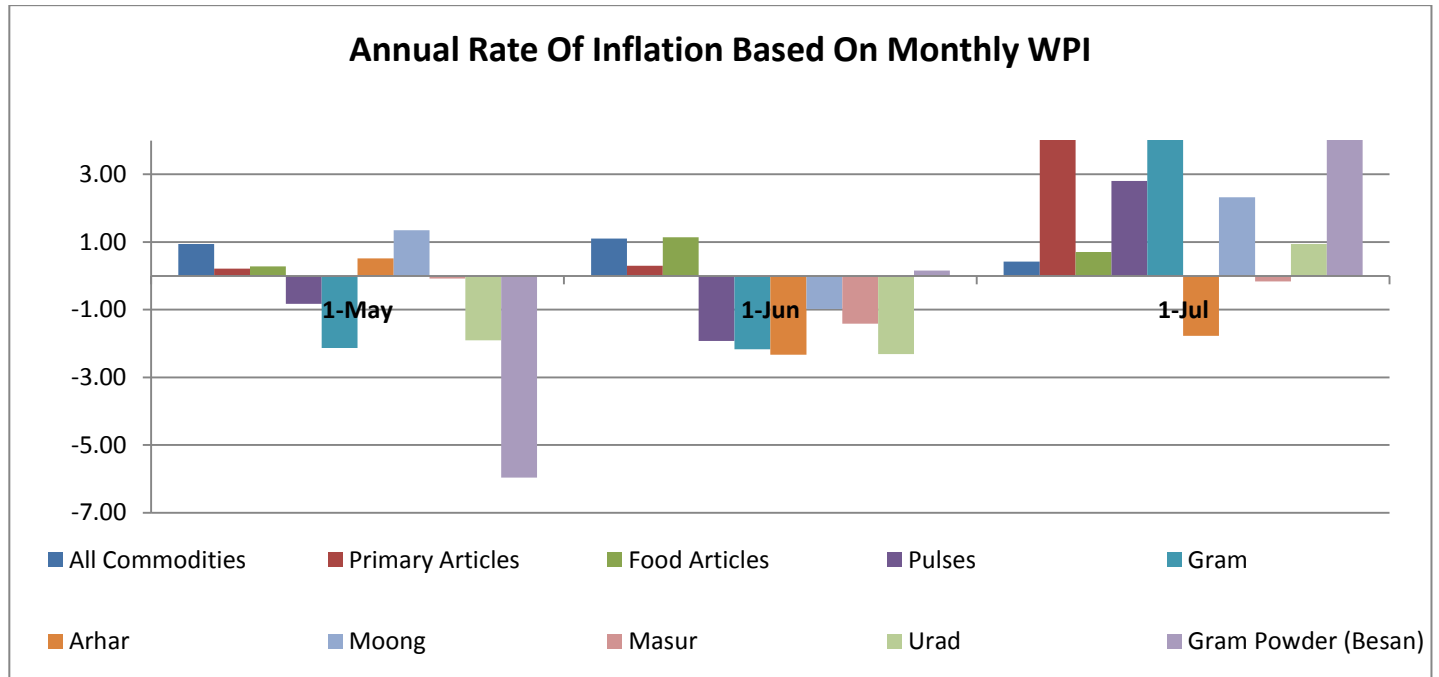

- All All India kharif Pulses area is lagging behind by 2.5 % to 132.66 against 136.12 lakh ha** last year as on 31st Aug 2018. Farmers have covered 44.47 lakh ha against 44.70 last year under Tur till date, slightly lower than last year. Normal area under Tur is 41.90 lakh ha. However, Urad area is lagging behind by 12.8 % to 37.57 against 43.09 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 6.5 % to 33.70 lakh ha against 31.65 lakh ha last year. Normal area under Moong is 24.93 lakh ha. Other pulses area too is up by 0.9 % than last year. It is 16,15 against 16.00 lakh ha so far against normal of 15.83 lakh ha. Area under Kulthi has increased by 47.09 % to 0.73 lakh ha against normal of 2.27 lakh ha so far.
- Nafed has offered 13135.84 MT chana for sale through tender with condition of minimum** purchase quantity of 100 MT in Maharashtra. Godamwise quantity details are as follows: Puntamba-3840.55MT, Badnera-6182.72 MT, Nagpur-2398.15MT, Sangli-583.10 MT, Akola-131.32 MT. Besides, Nafed has offered 4500 MT chana for sale in Rajasthan too. Chana is available at CWC Chomu-500MT, CWC-1 Kota-1000, RSWC Chomu-2000MT and CWC-2 Kota-1000 MT. Results for bidding are awaited.
- India imported total 120256 MT pulses in July against 178849 MT in Jun-2018. It is 32.76 percent lower than Jun.** Out of total import Urad and yellow pea topped in list with 42702 & 40919.6 MT respectively. There is no import of chana in July against 3024.2MT in June. Tur, Urad and Moong import increased by 49.9, 451.96 & 741.68 percent from June. Tur import increased from 11910 to 17862 MT, Moong from 799 to 6732.19MT and Urad from 7736.4 to 42702MT in July. However, green pea import decreased from 8524 to 4023 MT during the review period. Even lentil and yellow pea import decreased from 11908 to 6859.3MT and 128719 to 40919.6MTK in July. Kidney bean from 6197.42 to 1157.04 MT. Overall, pulses import volume has decreased. From March-2018 to July-2018 India has imported total 604505 MT pulses so far.
- Central govt has approved 23,250 MT Moong buying from Karnataka. The entire quantity** would be procured under price support scheme from ongoing kharif marketing season. As per official from agriculture department, the decision has been taken in view of lower prevailing price of moong in open markets and save farmers from distress sale and ensure MSP. Notably govt. has fixed MSP for moong at Rs 6975 per qtl. for ongoing kharif season. The procurement would be conducted through FCI, Nafed, NCCF and FMAC. The procurement would continue for three months and farmers would receive payments within 15 day after selling their crop. Arrival for Moong is at full swing in Karnataka while it has just started from MP, Maharashtra and Rajasthan. As govt would start buying on MSP (6975 per qtl.) for supporting price, any major dip from current level is unlikely.
- Chana cash market may trade range bound as Nafed continued to offer Chana for sale.** However, in Rajkot tender has been cancelled due to lower bid price. This means Nafed is not eager to sell at lower price. It may support chana at current price. Besides, demand for Chana dal is likely to improve and stock in private hands is said to be 50% lower than last year. Nafed may retain stock of 1 MMT as buffer, so chana may move up again to some extent. Area under Chana is bound to decline in AP as farmers have planted red chilli and they can't grow chana in that field. However, area in Rajasthan, MP and Maharashtra may decide price trend.
- Urad and Tur market traded almost steady in major markets.** Pressure might be seen on Urad as new crop is at hand and there is ample stock available in private hands. Demand for urad dal remains weak. However, govt agencies would start procuring Urad on MSP. So any downtrend from current level is unlikely. Tur market may trade steady as there is balanced supply-demand side right now. Crop condition is good and recent showers of rains are considered beneficial for standing crop. Some damage report in Karnataka may be covered good crop condition in other states.
- Myanmar offered lemon tur (new & old) at \$ 310 per tonne. Basis Indian port. Linkly too is being offered** at \$325 per tonne, urad FAQ was offered up by \$5 to \$315 and SQ at \$430 basis Indian port. Chana v2 Kabuli was offered at \$625 per tonne and Hollan at \$670 per tonne. Moong Pakaku was offered at \$710 per tonne.
- Governments Estimate: As per govt.'s 4th adv. estimate released on 28th August-2018 govt. has revised up** production size of other pulses including Masur. It has estimated 1.22 MMT production in 2016-17 and for

2017-18 it has projected 1.61 MMT. Traders view it at higher side. Lentil market is expected to trade steady due to low domestic demand. Furthermore export demand is also low as Nepal is offering lentils at \$840 per tonne for export to Bangladesh whereas Indian exporters are offering lentils at \$880 per tonne for the same destination. However, there is no short supply in the market. Stockiest and government are unlikely to release stock in bulk quantity. Stake holders should buy on dip.

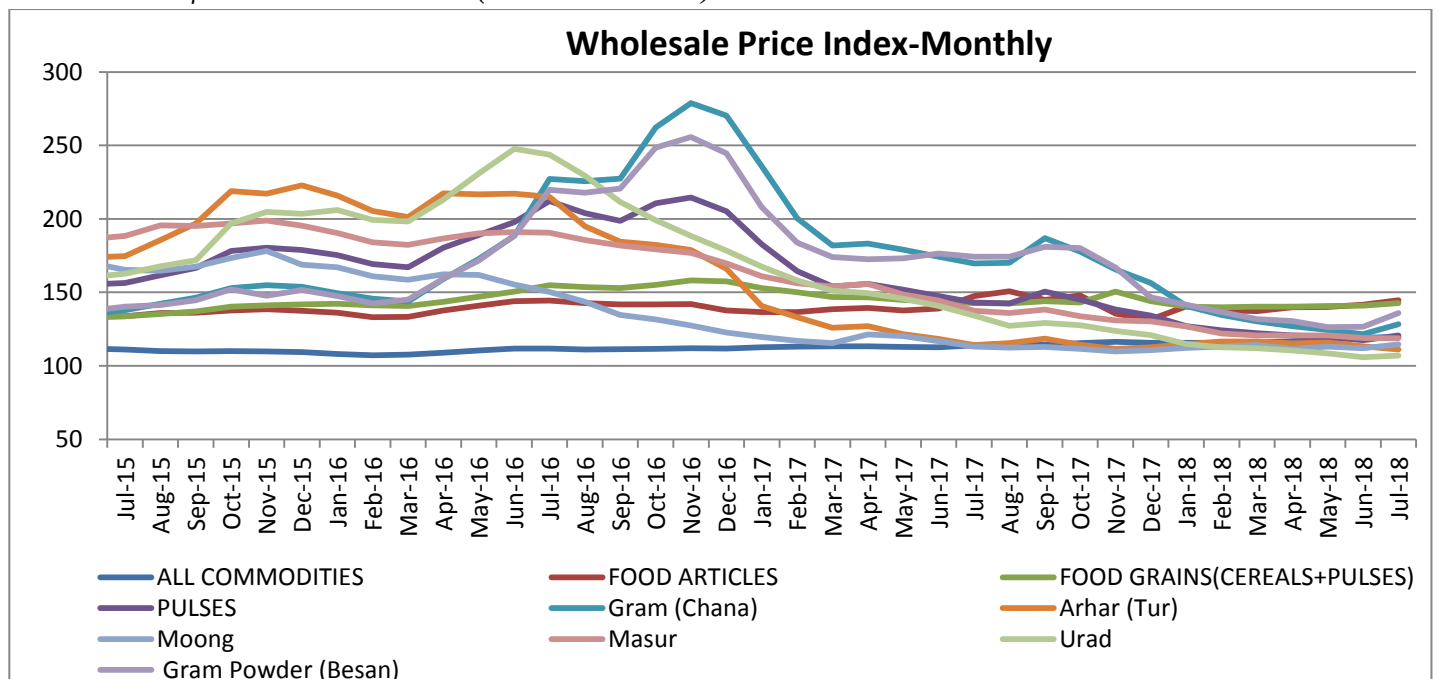

International Market:

- **Statistics Canada estimated pea yields at 2.217 pounds per seeded acre for a 3.635 million metric tons (MT) crop**, down from last year's 4.112 million MT harvest. Provincial agriculture departments reckon yields are closer to 2,269 pounds for a 3.72 million MT crop.
- **The global chickpea markets continued to trade weak during the past week, bidding prices for big caliber product could not be affected from medium and small caliber.** As per Statistics Canada, farmers thought yields would average 1,315 pounds per acre for a 264,100 MT crop, compared to last year's average of 1,251 pounds per acre for a 118,600 harvest result.
- **With bearish USDA crop report global chickpea market traded under pressure.** However, lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623,800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- **Canadian Desi Chickpeas markets finished the 2017-18 marketing year with prices falling 21% below the recent three year average annual price on inter-dealer markets in that country.** Analysis of the monthly price pattern reveals the highest monthly average was \$915.00 per MT in September, while the lowest monthly average trading level was \$512.50 per MT in April. During the latest three year period, the highest monthly average trading level was \$870.83 per MT in June, compared to the lowest monthly average of \$777.50 per MT in February.
- **As per the latest market update production of Chickpeas in Australia may be around 3.09 lakh tonne.** Queensland production has been pegged at 2.17 lakh tonne. Field Pea production may touch 3.01 lakh tonne, Lentil production has been pegged at 3.47 lakh tonne. Total pulses production including Lupins and Faba beans has been pegged at 1713 lakh tonne. It is 72% lower in case of chickpeas, 9% up in case of peas, 26% down in case of lentils when compared to 2017.
- **Lentil markets traded slightly down from previous week as harvests are on in both the United States and Canada.** Pressure is likely to be on in August as farmers seem to sell 50 % of their crop as soon as possible. Markets were not helped by rising tensions between the United States and Turkey. Fears that will devolve into another trade war had a negative impact on the value of the Turkish lira.
- **Global peas market traded under pressure before likely commencement of harvesting in northern hemisphere.** Major buyers like India & Pakistan are out of market right now and others are waiting for new crop pressure to build up. However, trading activities are seen in feed grade peas. Exporters in Canada have enough stock to cater the incoming demand in the weeks ahead. After harvesting pressure coming to an end, stockists/exporters may be active once again, that may help prices to recover from mid August.
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak this week.

Monthly Wholesale Price Index:**Annual Rate Of Inflation:**

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 3.3 point from 117.5 in Jun to 120.8 in Jul-2018.

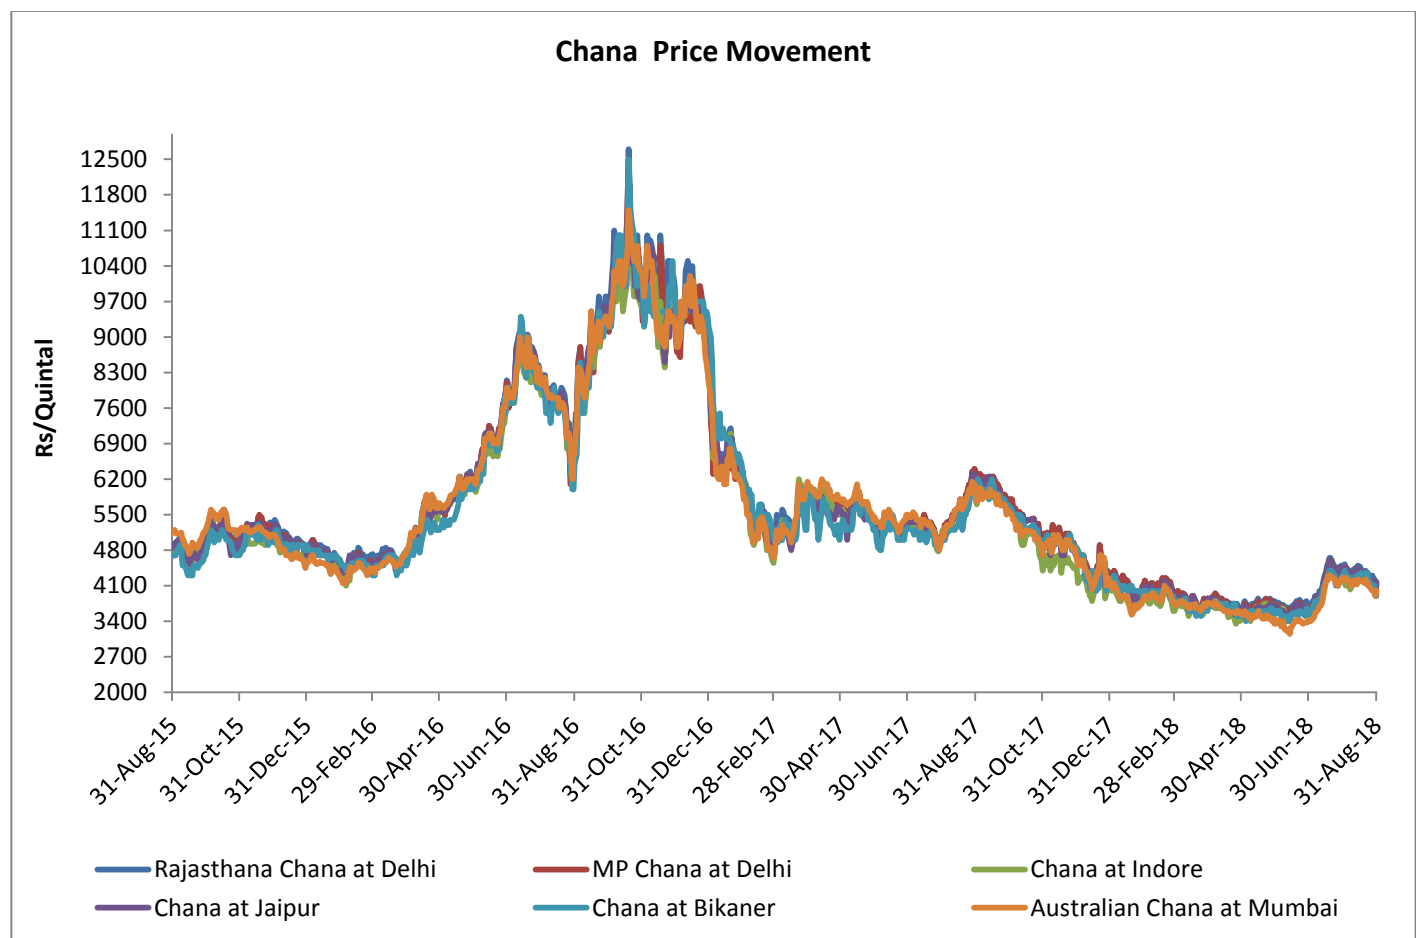

Pulses-Wise Scenario:

Chana

Current Scenario:

Nafed selling through auction in Mah,Raj,MP and AP has pressurized chana cash market last week and prices are expected to stay weak as millers would prefer to buy chana from central pool. In fact selling decision from central pool stock has directly affected demand in cash market and resultantly cash market moved down by Rs 200 during the week. In coming weeks upside movement would be limited as availability is expected to be ample. However, lower bids for Nafed Chana may encourage Nafed to restrict bulk selling through auction. The future course of chana price would depend on Nafed strategy and planting intension of farmers in Oct.

Chana in Delhi market is being traded at Rs 4100-4150 per qtl. All India average price for Chana decreased by 4.35 percent to Rs 4086 per qtl. Imported gram (old imported crop) price decreased by 4.35 percent to Rs 3975 per Qtl. Australian chana is being quoted at Rs 4000. Following graph illustrates the chana price movement in different markets:

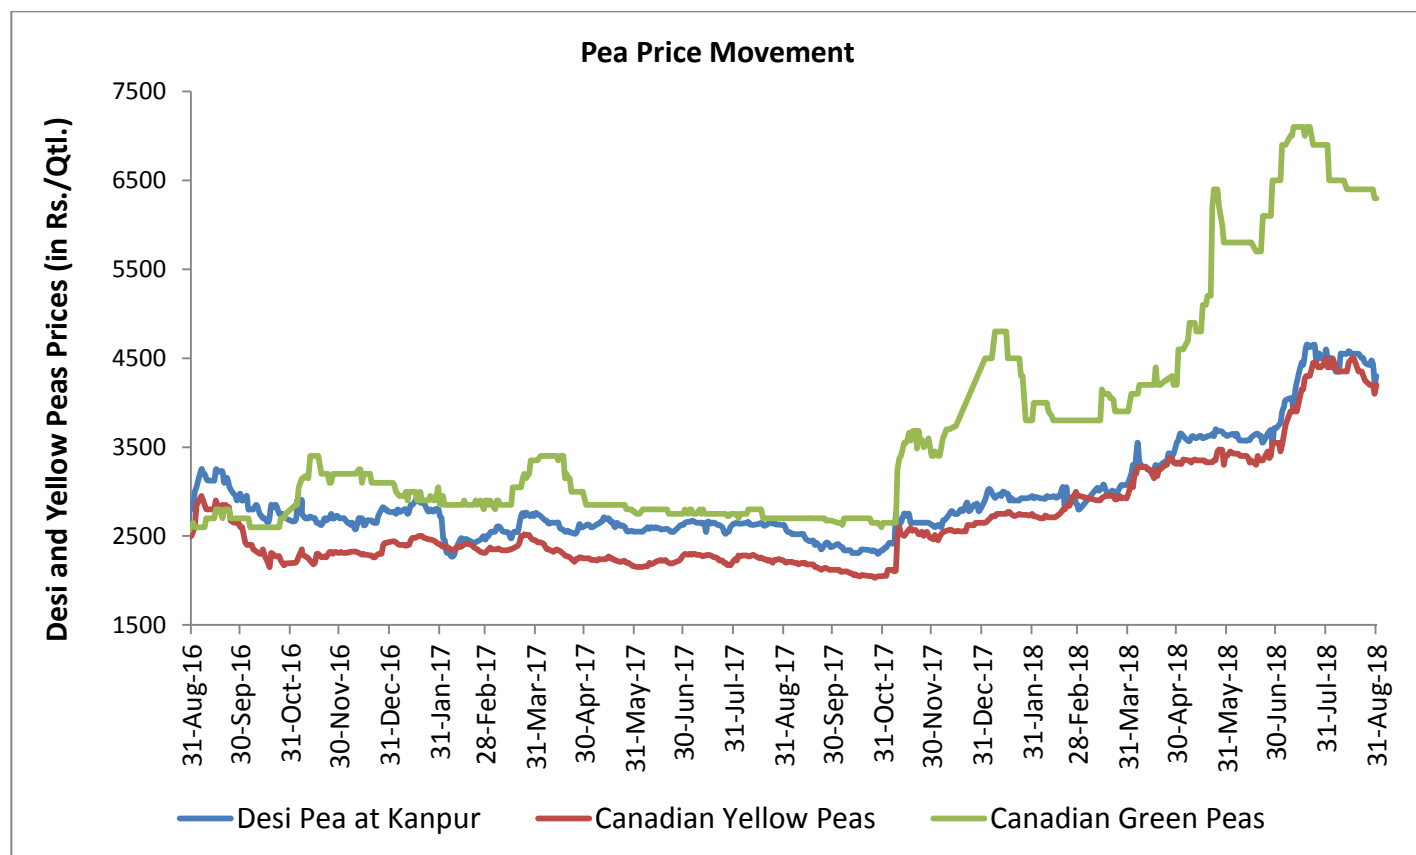

Market Outlook: Chana may trade steady to slightly weak this week too.

Peas (Matar):

Market Recap:

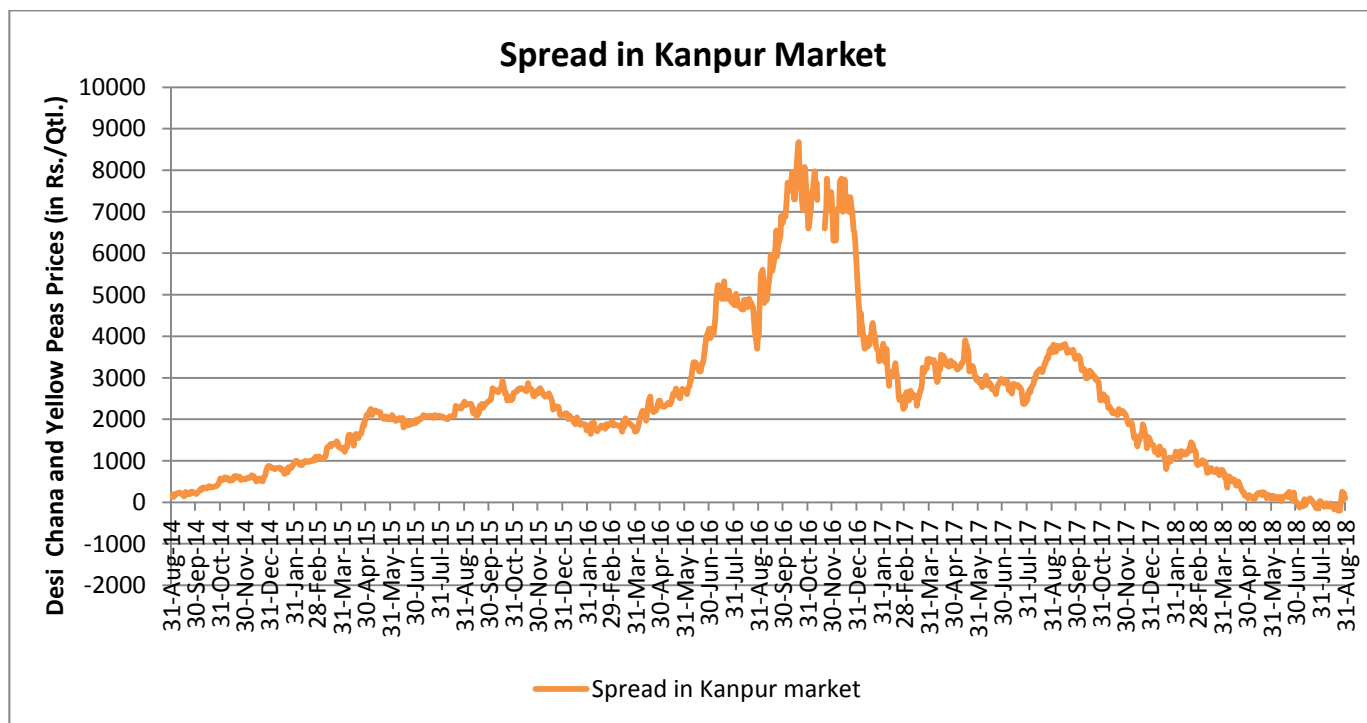

Available stock of peas at various ports is said to be over 1.75 lakh tonnes and in domestic market it has been pegged at around 1.5 lakh tonne. So there is comfortable stock position right now. Besides, demand for peas has been affected by lower chana price. So market is expected to move further down from current level. Peas may touch Rs 4000-4100 once again. At this level stake holders should buy. As demand is expected to improve, market may move up soon after touching 4000-4100 level.

Current Market Dynamics & Outlook:

At Kanpur, Desi Peas traded down by 3.08 % at Rs 4270- due to weak offtake from retailers/stockists. Canadian pea in Mumbai market traded down by 4.17 % to 4140. However, it may move further down by Rs 100 as chana is getting weaker. Weak demand and decreasing chana price would pressurize peas market. Slight downward correction is expected this week too. Stake holders should buy on dip. Green pea is being traded at RS6300-6350 per qtl. in Mumbai market.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved into positive zone now due to lower peas price this week. Spread is expected to move in the range of 100 to 150 per quintal in the coming weeks, on relative movement in Chana prices. Overall outlook seems steady to slightly weak. Buying on dip is good, as imported pea costing remain be higher.

Market Outlook: Outlook remains steady to slightly weak.

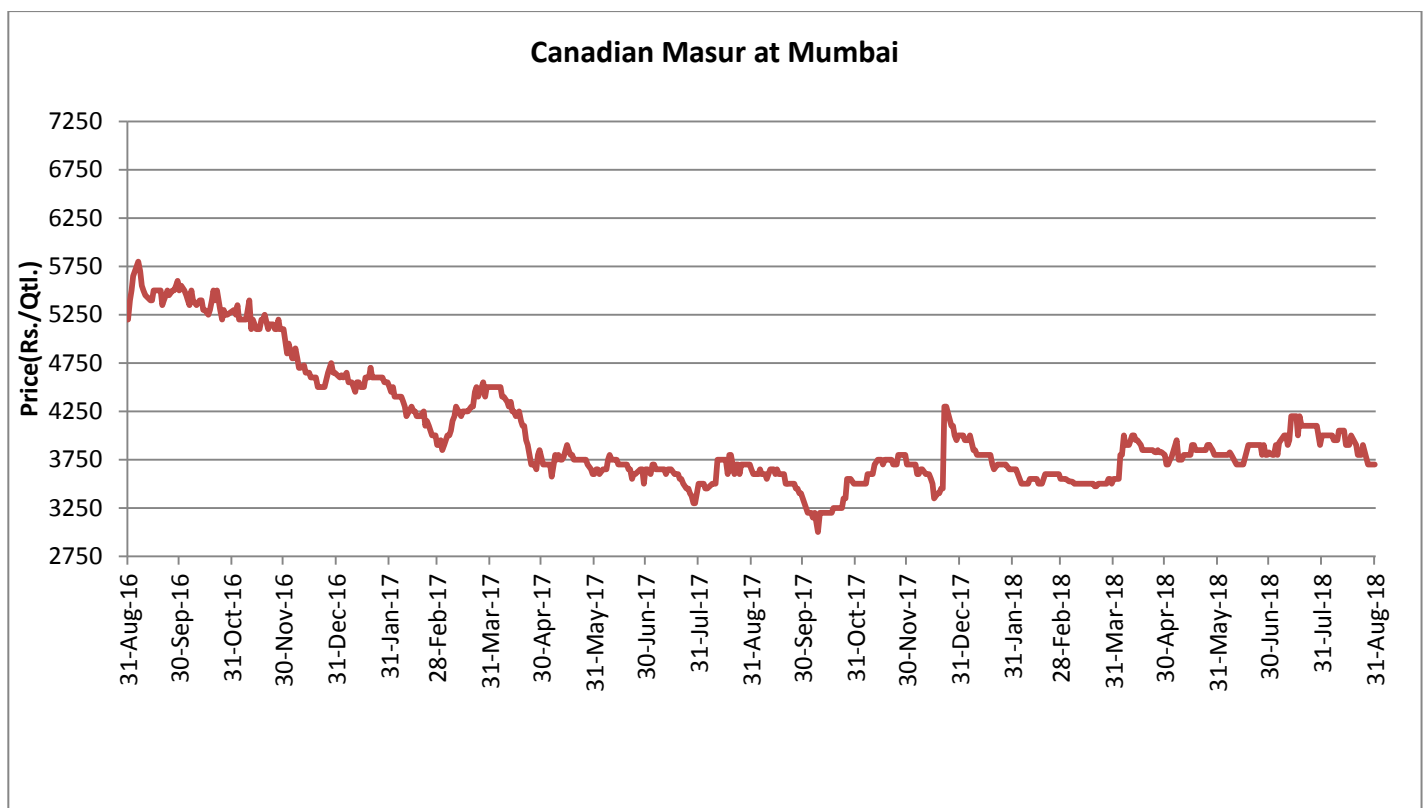

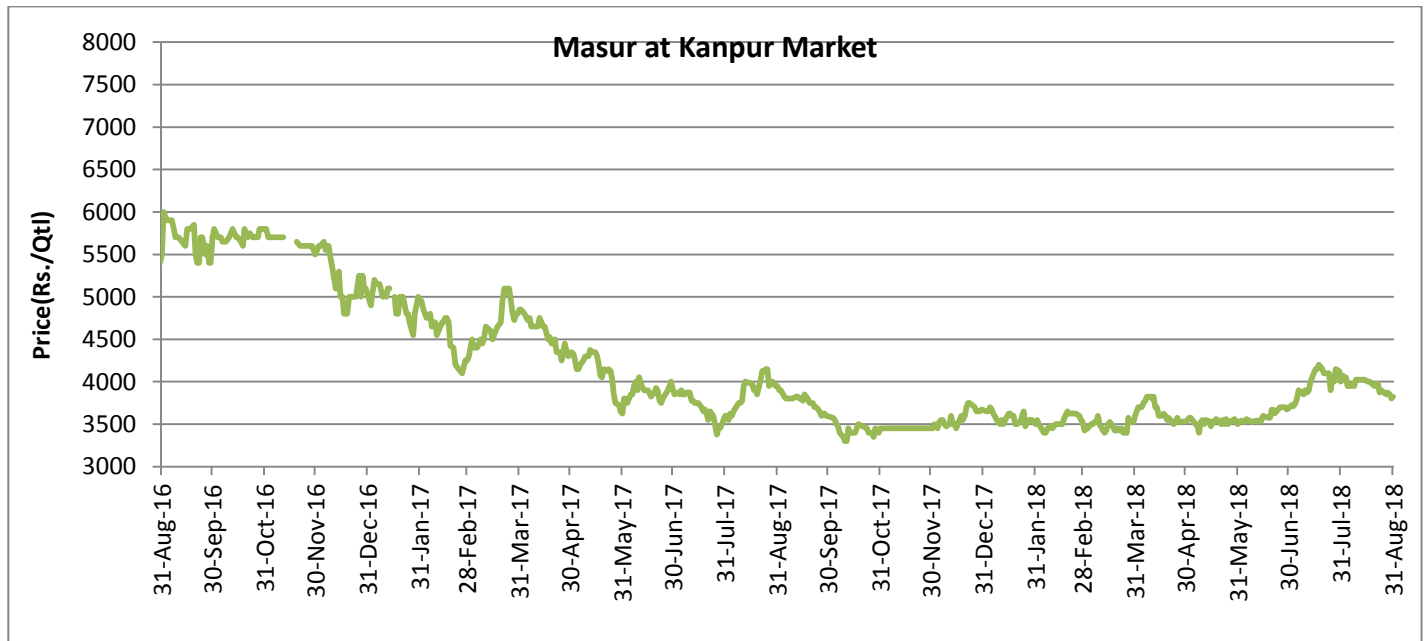

Lentils (Masoor):

Market Recap:

As per latest update, NAFED will sell lentil at MSP of Rs 4150 per quintal. NAFED has procured 243450.18 MT in MP and UP till 7th July-2018. Government has offered 23994.12 tonnes of lentils in four tender since 13th August until 04th September. Quantity sold by NAFED won't make much difference as it will be consumed locally. Furthermore, buyers may be reluctant in participating in lentil tenders offered by NAFED, as domestic price of lentil in open market is ruling below MSP. Lentil market is expected to trade steady due to low domestic demand. Furthermore export demand is also low as Nepal is offering lentils at \$840 per tonne for export to Bangladesh whereas Indian exporters are offering lentils at \$880 per tonne for the same destination. However, there is no short supply in the market. Stockiest and government are unlikely to release stock in bulk quantity. Stake holders should buy on dip.

Current Scenario:

Weekly average price traded down by 2.41 % to Rs 3840 per qtl in Kanpur. Currently in Mumbai, it is being quoted down by 3.64 % at Rs 3700-3750 per qtl,... Steady to weak tone may prevail this week too, as demand is yet to pick up.

Market Outlook: Prices are likely to notice steady to weak tone this week.

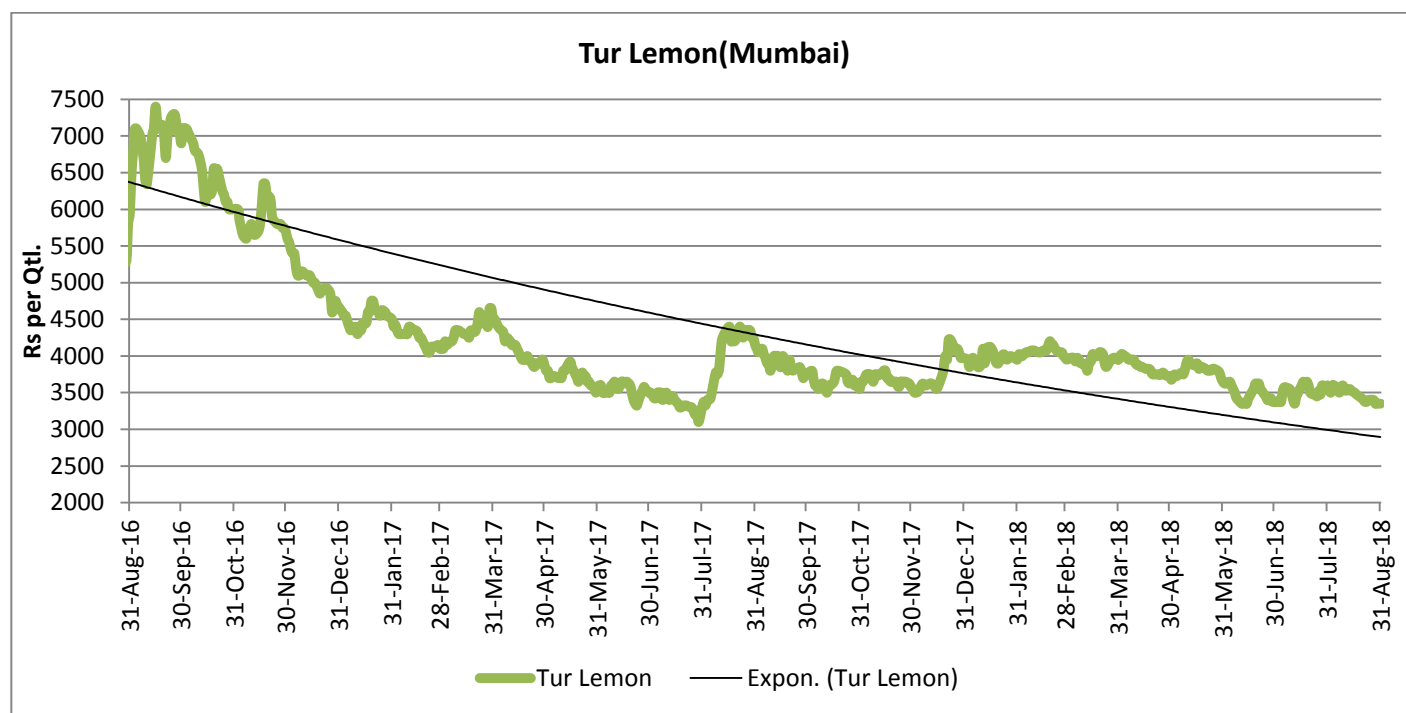

Pigeon Pea (Tur/Toor):

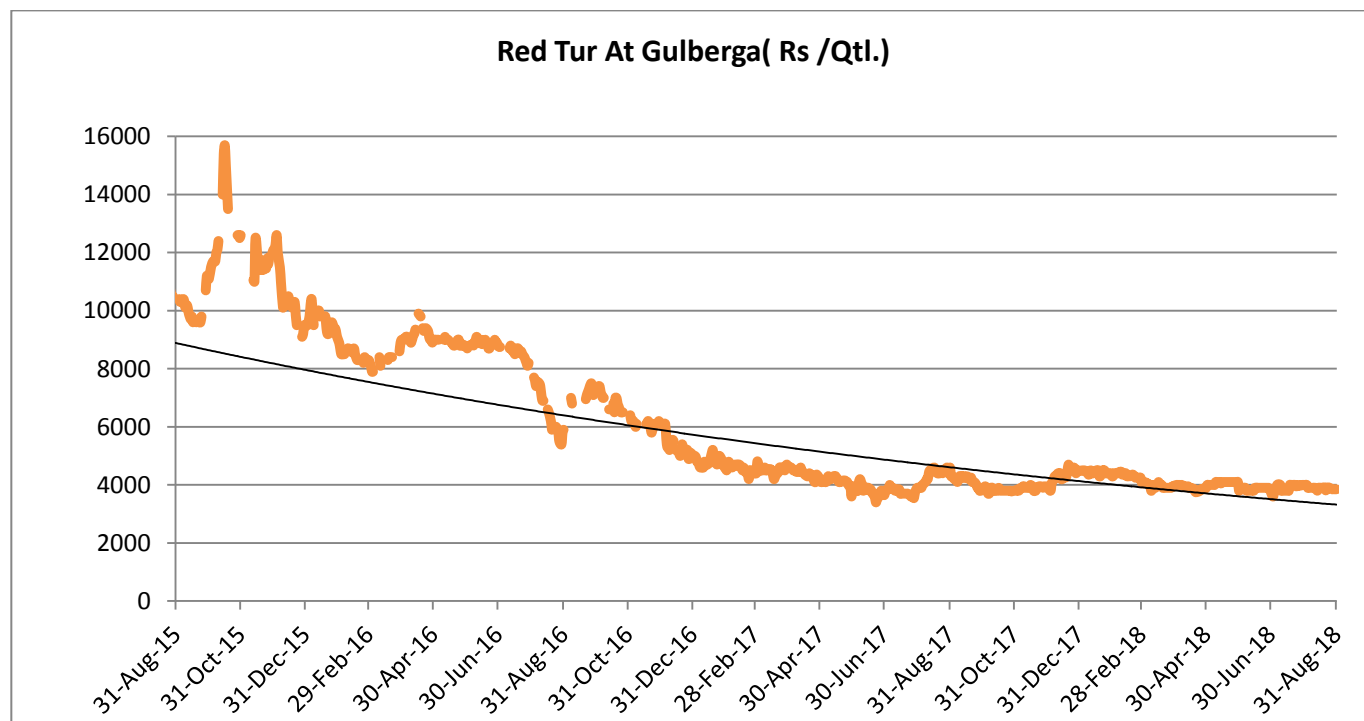

Market Recap:

Demand for dal remains limited despite ongoing festive season. Millers are not buying large quantities as available stock of dal is said to be sufficient to cater the need for 15 to 20 days. Tur market extended its loss further by Rs.75 to Rs.3725 in Gulbarga market. As major growing region of Karnataka is facing drought-like condition and there are some reports of damage from AP too, it may limit downside in coming weeks. In other states crop condition is good. So overall crop size is likely to be slightly higher than last year. Normally tur dal demand increases from Sep and continues till Nov when new crop hits the market. So Agriwatch expects prices to stabilize near current level and move up once demand for festive season starts.

Current Market Dynamics & Outlook:

Mayanmar offered lemon tur (new & old) at \$ 310 per tonne. Basis Indian port. Linkly too is being offered at \$325 per tonne. Despite smart gains in prices at origin, there is import parity and import seems possible to the level of 3.5 lakh tonne in current MY. Govt may restrict selling through auction till Aug amid lower coverage may support cash market. Market should stabilize near 4200-4500 in the near to medium term. Stock in private hands has come down. Festive season commences and demand is likely to improve in coming weeks.

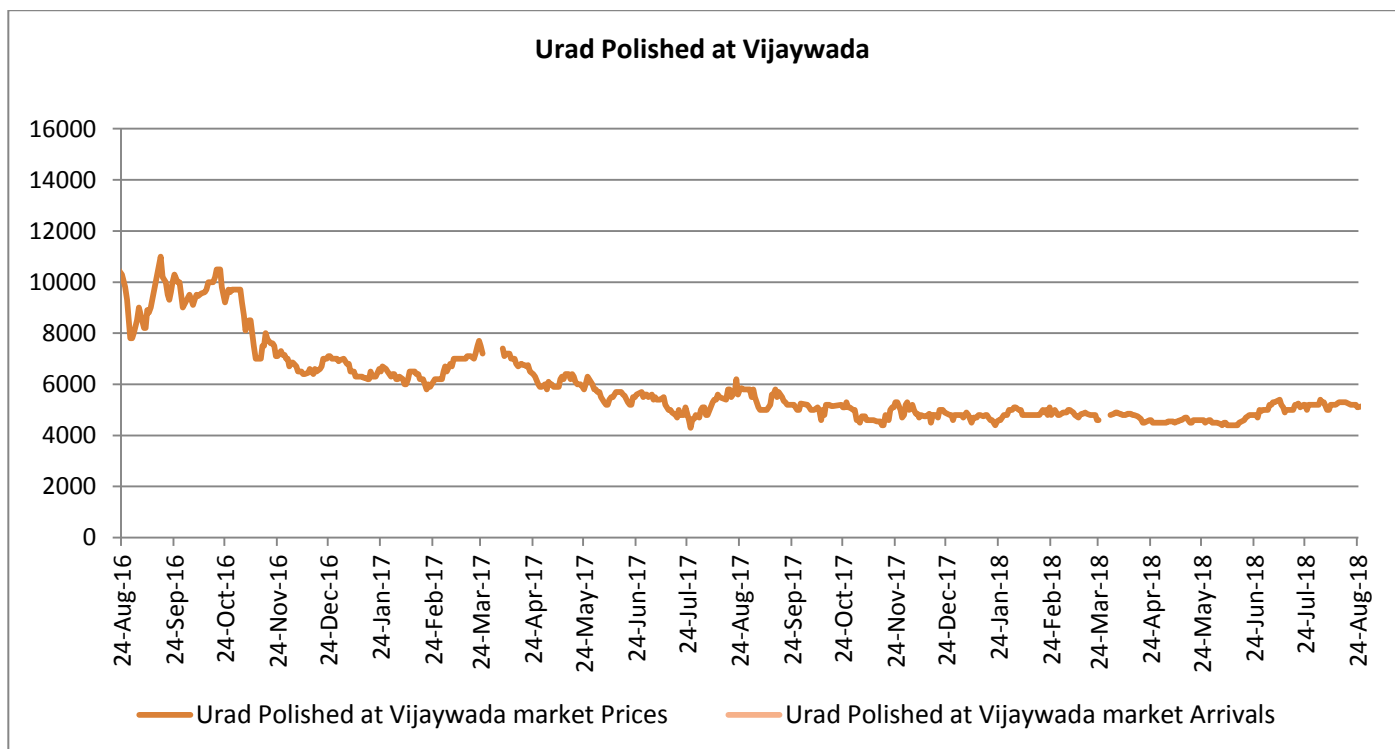

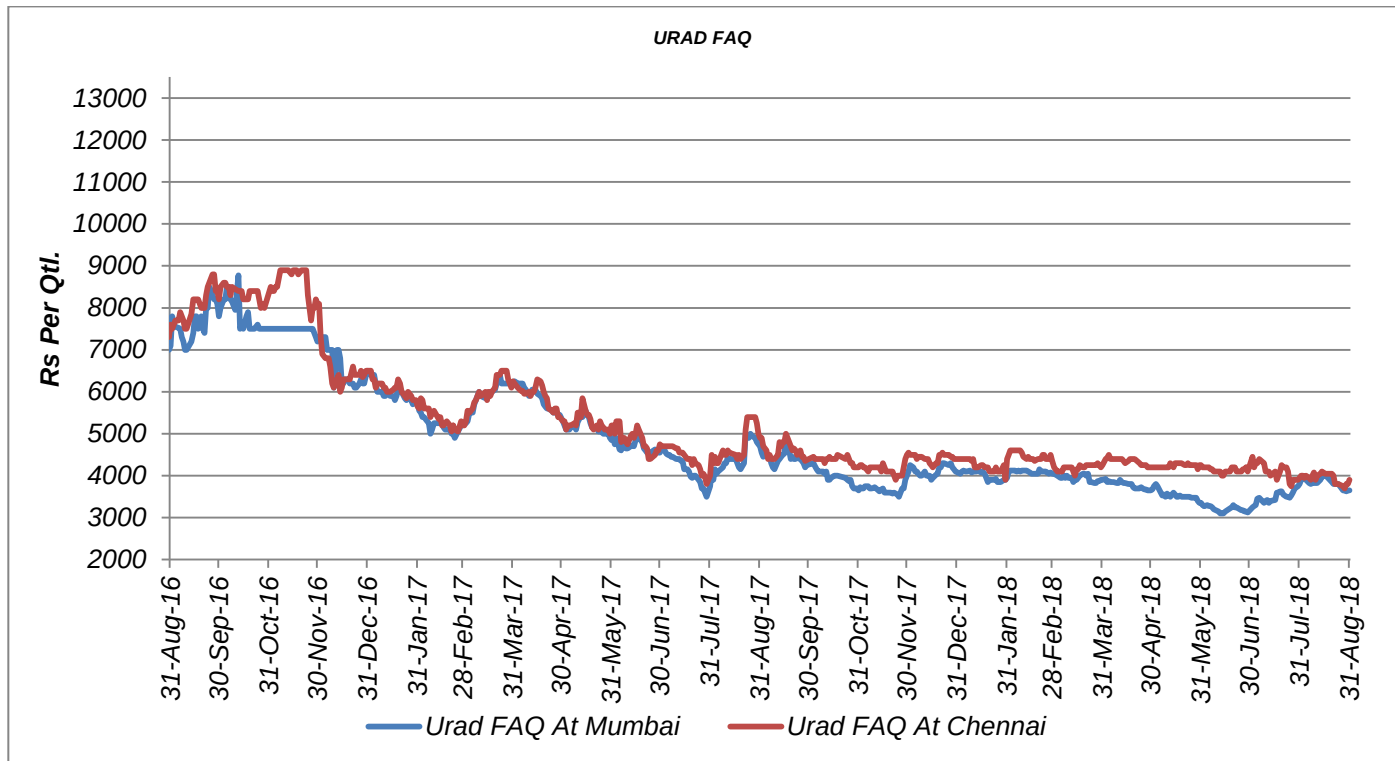

Market Outlook: Tur prices are likely to show steady movement this week as trading activities remained sluggish.

Black Matpe (Urad):

As expected by Agriwatch last week Urad market traded steady to slightly weak and traded down by Rs 100 to Rs 3800-3900 in Chennai market. As demand for Urad dal is weak, any major recovery in market is unlikely in the near term. Rangebound movement is expected this week. Pressure on market is unlikely to build up as central pool stock is coming down and lower area coverage would remain supportive to cash market to some extent in the medium term. Lower kharif area may support urad price in the medium term. Higher MSP and restricted urad import may push up urad price in the medium term. FAQ Urad is expected to stabilize near Rs.3700/4100 per quintal. SQ may trade at Rs 4900-5400 in the near to medium term. Myanmar is offering FAQ Urad at \$315 per tonne and SQ at \$430 per tonne basis against Indian (Chennai) prevailing price of \$615-25 per tonne. Imports to India are feasible at these prices and may occur soon as DGFT has allowed conditional import for the millers under allocated quota of 1.5 lakh tonne for current MY.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.3650-3750 per Qtl.) and Chennai (Rs.3850-3950 Qtl.) noticed weak tone. It traded steady in Vijaywada too. Range bound movement might be seen in Urad market, due to weak demand at higher level. The following graph shows the prices movement in different markets:-

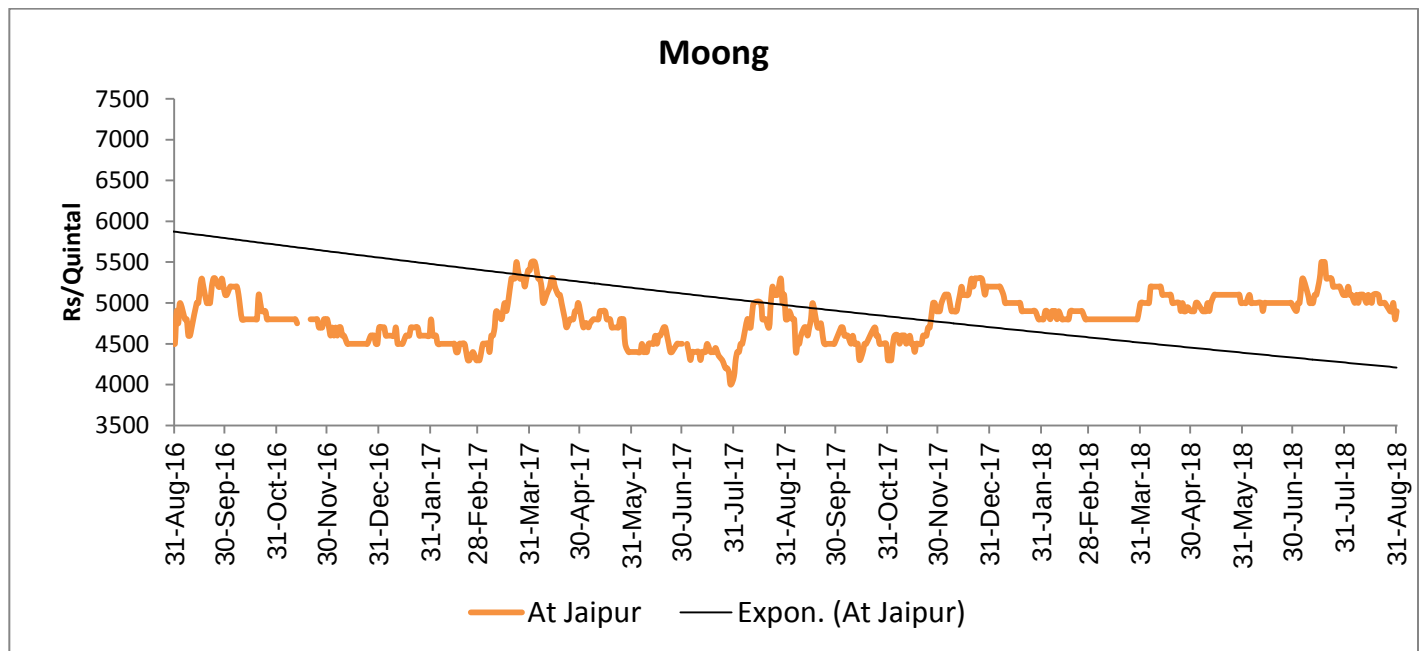

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week .

Green Gram (Moong):

There is no parity for moong from any markets. However, weak demand for dal has suppressed moong price in major domestic markets. As supply is lower from Rajasthan this year, further downside from current level is unlikely. There are reports of lower crop from Kekri, Shekhawati and Kishangarh regions. Besides, some quality issue may surface from Akola and Khamgaon regions of Maharashtra. Moong from Kanpur and Allahabad is of lower quality. All these developments may keep moong market supported. It is being traded at Rs4400 to Rs 5300 per qtl in Kanpur. Besides, govt. would procure moong at MSP. So any major dip in cash moong market is unlikely. In Jaipur market moong is being traded at Rs.4900.

Market Recap:

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
