Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- All India kharif Pulses area is lagging behind by 2.2 % to 134.41 against 137.45 lakh ha** last year as on 7th Sep-2018. Farmers have covered 45.20 lakh ha against 45.11 last year under Tur till date, slightly higher than last year. Normal area under Tur is 41.90 lakh ha. However, Urad area is lagging behind by 12.5 % to 38.02 against 43.44 lakh ha. Normal area of kharif Urad is 27 lakh ha. Moong area is running up by 7.3 % to 34.05 lakh ha against 31.72 lakh ha last year. Normal area under Moong is 24.93 lakh ha. Other pulses area too is down by 0.1 % than last year. It is 16,34 against 16.35 lakh ha so far against normal of 15.83 lakh ha. Area under Kulthi has decreased by 3 % to 0.81 lakh ha against normal of 2.27 lakh ha so far.
- Heavy rainfall in Hadauti region from last two-three days has increased concern for Urad farmers.** Water logging in Urad field in many growing places in Rajasthan may damage urad crop standing in the field. Rajasthan has covered 4.72 lakh ha so far against 5.40 lakh ha last year. If rains continue, yield may drop by 10 to 15 % this year. However, acreage in UP and Maharashtra is likely to negate crop loss in Rajasthan to a certain extent. The major concern is lower acreage in MP, the largest Urad producing state, is lagging behind by 16.66% to 14.91 lakh ha. In other states, there is good rainfall and crop condition is said to be satisfactory so far. So better yield is expected in these states. Around 65 to 126 mm rainfall has been reported in the Hadauti region over the last three days.
- Chana market traded steady despite weak demand from bulk buyers.** Recent cancellation of tenders by Nafed due to lower bids has helped market to sustain at current level. If Nafed sticks with its intention not to sell below MSP, cash chana market may stay steady to slightly firm. Total stock with govt and private hands is said to be around 50 lakh tonne. If consumption continues with 8 lakh tonne per month, market should move up by Rs 200 to 300 from current level. In Delhi market chana is being traded at Rs 4100 to Rs 4200 per qtl.
- Tur Area in AP is down by 8.33 % to 1.98 lakh ha, it is down by 3.4 % to 6.24 in MP. However, it is up by 12.74 % to 9.91 in Karnataka and 11.15 % to 2.77 lakh ha in Telangana.** It is down by 4.05% to 12.20 in Maharashtra. Overall Tur area is up slightly from last year. There is report of some damage in MP and Rajasthan. But higher acreage in other states and good rainfall may increase yield too. So there is a good hope for bumper crop once again. More downward trend in Tur is unlikely. Steady to slightly firm trend might be seen.
- Moong market is unlikely to trade lower as stockists are unwilling to sell stock.** Despite higher area coverage amid commencement of procurement in Karnataka at MSP would keep market supported at current level. In some markets prices are ruling lower due to high moisture level in the crop. Demand is normal and cash market should stay steady at current level. Overall medium term outlook seems firm. In Jaipur moong is being traded at Rs 5100 per qtl. Central govt has approved 23,250 MT Moong buying from Karnataka. The entire quantity would be procured under price support scheme from ongoing kharif marketing season. It will continue for three months.
- Lentil domestic market is likely to stay steady in the near term.** Demand from cash and bulk users is likely to improve by the end of this month and it may lend support to cash market to a certain level. Masur in Kanpur market is being traded at Rs 3850 -3900. Import flow remains very slow due to higher duty and good availability in domestic market. Stockists are unwilling to sell stock at current price. Overall outlook in the medium term remains firm.
- India imported total 120256 MT pulses in July against 178849 MT in Jun-2018. It is 32.76 percent lower than Jun.** Out of total import Urad and yellow pea topped in list with 42702 & 40919.6 MT respectively. There is no import of chana in July against 3024.2 MT in June. Tur, Urad and Moong import increased by 49.9, 451.96 & 741.68 percent from June. Tur import increased from 11910 to 17862 MT, Moong from 799 to 6732.19 MT and Urad from 7736.4 to 42702 MT in July. However, green pea import decreased from 8524 to 4023 MT during the review period. Even lentil and yellow pea import decreased from 11908 to 6859.3 MT and 128719 to 40919.6 MTK in July. Kidney bean from 6197.42 to 1157.04 MT. Overall, pulses import volume has decreased. From March-2018 to July-2018 India has imported total 604505 MT pulses so far.
- Government's Estimate: As per govt.'s 4th adv. estimate released on 28th August-2018 govt. has revised up production size of other pulses including Masur.** It has estimated 1.22 MMT production in 2016-17 and for 2017-18 it has projected

1.61 MMT. Traders view it at higher side. Lentil market is expected to trade steady due to low domestic demand. Furthermore export demand is also low as Nepal is offering lentils at \$840 per tonne for export to Bangladesh whereas Indian exporters are offering lentils at \$880 per tonne for the same destination. However, there is no short supply in the market. Stockiest and government are unlikely to release stock in bulk quantity. Stake holders should buy on dip.

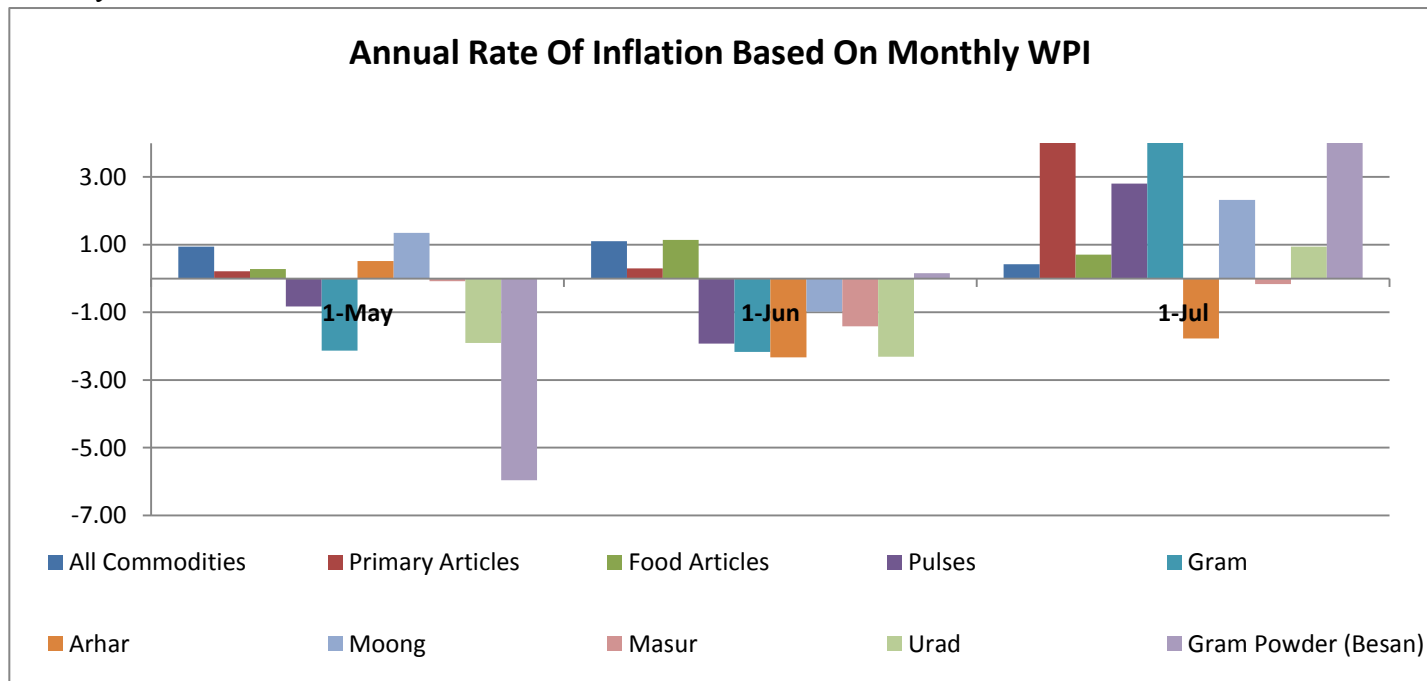

International Market:

- **Stock position of lentil and peas in Canada has increased considerably due to lower exports.** Canada used to export a good share of lentil and peas to India. However, good domestic availability and import restrictions imposed by India have decreased exports from Canada. The Pea carryout has increased to 6.5 lakh tonnes compared to 3.0 lakh tonnes in previous year. Lentil ending stock has increased to 8.76 lakh tonnes, up by 178 percent compared to previous year.
- **Global chickpea markets were traded almost unchanged in amid limited trading activities during the week under review.** Price may dip further. Buyers are waiting for downward correction and they may start buying after slight correction for shipping needs for winter season. Harvesting in Canada is 30% over now and new crop availability is said to be around 80,000 MT, it is almost double that was seen last year. It was 37-38000 MT last year..
- **The global chickpea markets continued to trade weak during the past week, bidding prices for big caliber product could not be affected from medium and small caliber.** As per Statistics Canada, farmers thought yields would average 1,315 pounds per acre for a 264,100 MT crop, compared to last year's average of 1,251 pounds per acre for a 118,600 harvest result.
- **With bearish USDA crop report global chickpea market traded under pressure.** However, lower crop size in Australia & Tanzania may support chickpeas a market in coming weeks. Production of chickpea in US may jump to a record level this year. Area under chickpea in US has increased from 623800 acres to 822,000 acres. The USDA reckons farmers planted 211,200 acres of small chickpeas, up from 179,500 last year; and 608,500 acres of large, compared to last year's 439,300 acres. Higher area in US can make up lower crop size in Australia to some extent. Fundamental for chickpea has started changing into positive now. It may continue to support global chickpea market.
- **Canadian Desi Chickpeas markets finished the 2017-18 marketing year with prices falling 21% below the recent three year average annual price on inter-dealer markets in that country.** Analysis of the monthly price pattern reveals the highest monthly average was \$915.00 per MT in September, while the lowest monthly average trading level was \$512.50 per MT in April. During the latest three year period, the highest monthly average trading level was \$870.83 per MT in June, compared to the lowest monthly average of \$777.50 per MT in February.
- **As per the latest market update production of Chickpeas in Australia may be around 3.09 lakh tonne.** Queensland production has been pegged at 2.17 lakh tonne. Field Pea production may touch 3.01 lakh tonne, Lentil production has been pegged at 3.47 lakh tonne. total pulses production including Lupins and Faba beans has been pegged at 1713 lakh tonne. It is 72% lower in case of chickpeas, 9% up in case of peas, 26% down in case of lentils when compared to 2017.
- **Lentil markets traded slightly down from previous week as harvests are on in both the United States and Canada.** Pressure is likely to on in August as farmers seem to sell 50 % of their crop as soon as possible. Markets were not helped by rising tensions between the United States and Turkey. Fears that will devolve into another trade war had a negative impact on the value of the Turkish lira.
- **Global peas market traded under pressure before likely commencement of harvesting in northern hemisphere.** Major buyers like India & Pakistan are out of market right now and others are waiting for new crop pressure to build up. However, trading activities are seen in feed grade peas. Exporters in Canada have enough stock to cater the incoming demand in the weeks ahead. After harvest pressure coming to an end, stockists/exporters may be active once again, that may help prices to recover from mid August.
- **Canada lentil area is said to be lower than intended by one million acres to 3.77 MMT.** Agri experts expected it to be 4.05 million acres. Actually, at the time of sowing prices remained subdued and it impacted farmers to reduce area from 4.05 to 3.37 million ha. Canada had planted 4.4 million acres in 2018. Under current prevailing condition production would be only slip from last year's 2.559 million metric ton (MT) harvest to 2.495 million this year.

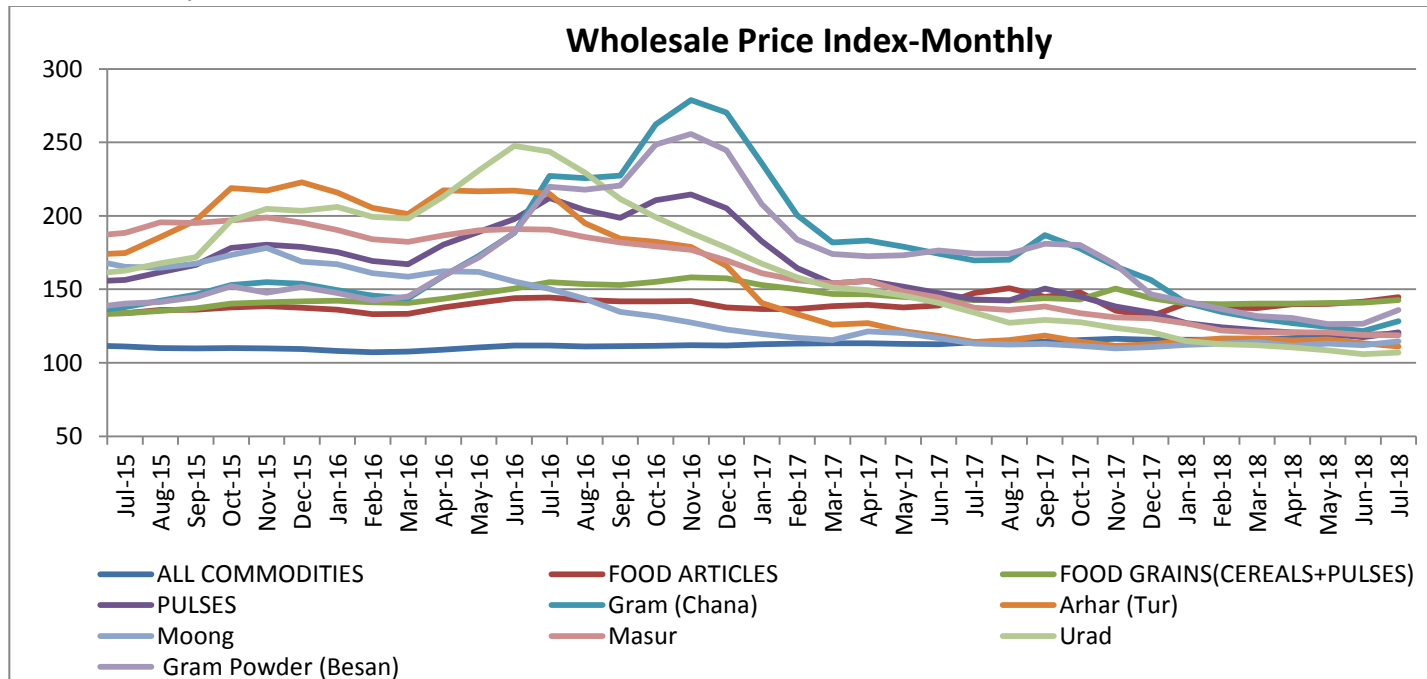

Weekly Outlook: -Pulses are likely to trade steady to slightly weak this week.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 3.3 point from 117.5 in Jun to 120.8 in Jul-2018.

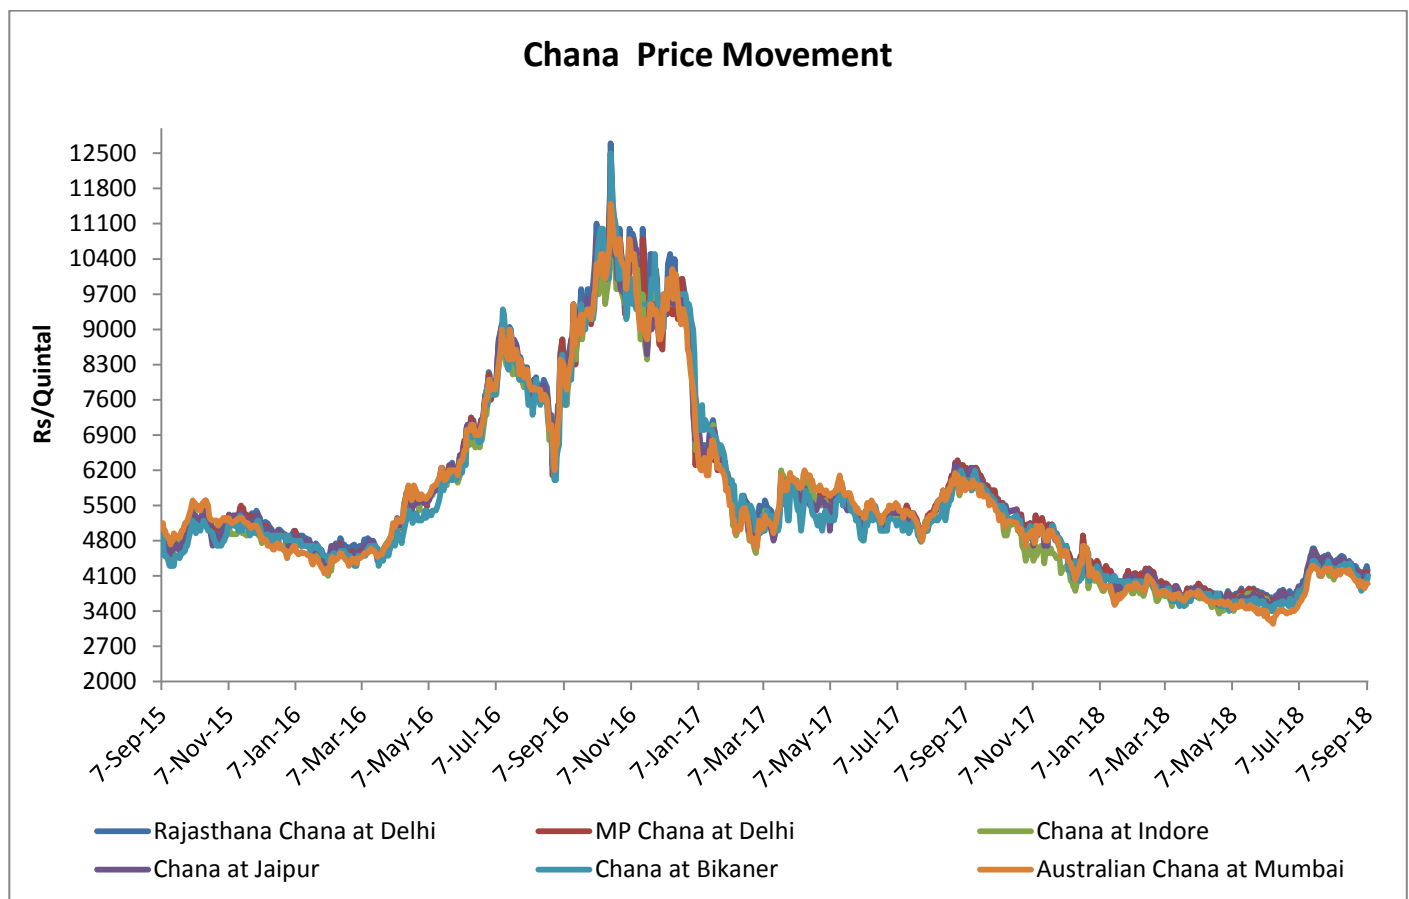

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded under pressure despite rejection of tender due to lower price. It has helped market to sustain at current level. However, Nafed has to sell it in coming weeks and it would continue to restrict upward momentum. Demand in retail market is not upto the mark and availability of other pulses at cheaper rate too would remain price limiting factor in coming weeks. Chana in Delhi market is being traded at Rs 4100-4200 per qtl. Oftake is weak and Agriwatch expects steady movement in the short term.

Chana in Delhi market is being traded at Rs 4100-4150 per qtl. All India average price for Chana decreased by 0.12 percent to Rs 4082.5 per qtl. Imported gram (old imported crop) price decreased by 1.12 percent to Rs 3929 per Qtl. Australian chana is being quoted at Rs 3950-3975. Following graph illustrates the chana price movement in different markets:

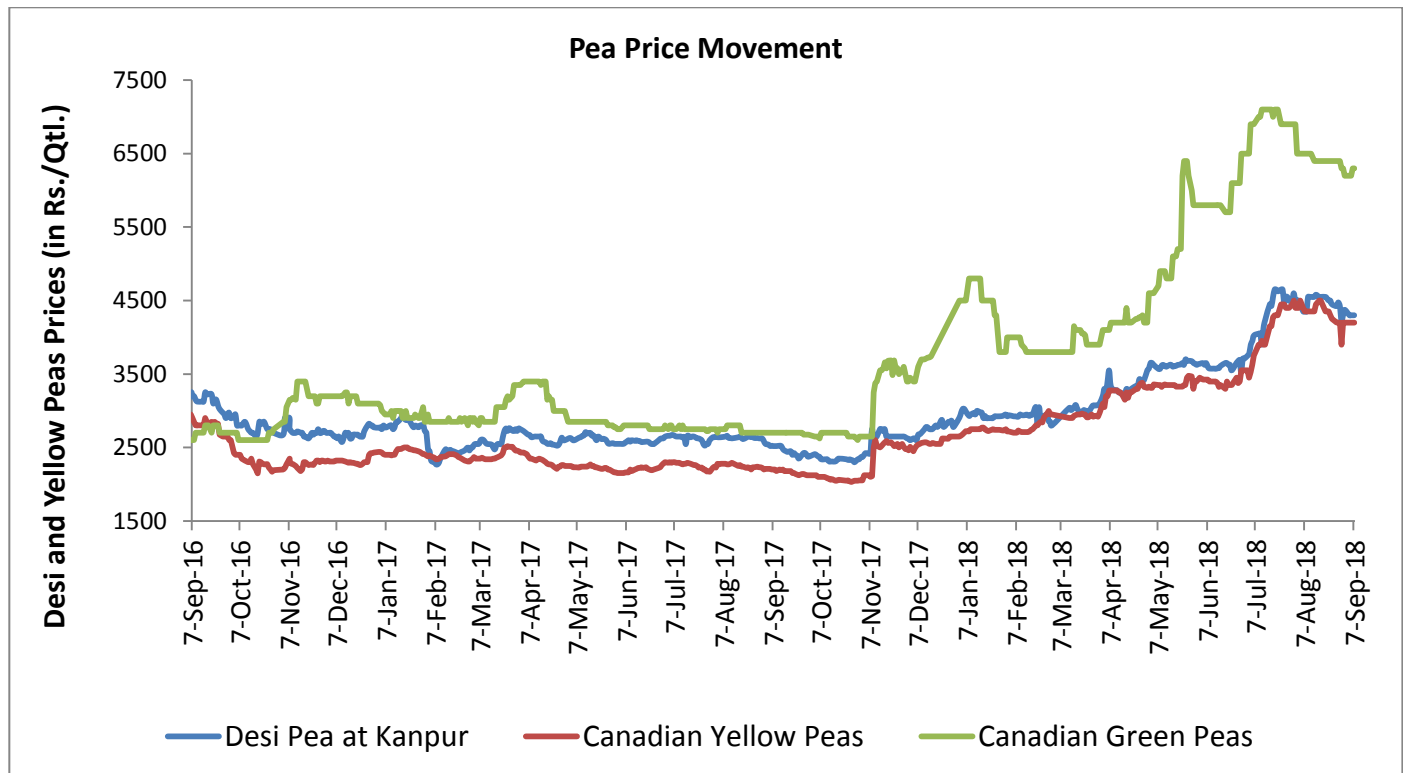

Market Outlook: Chana may trade steady to slightly weak this week too.

Peas (Matar):

Market Recap:

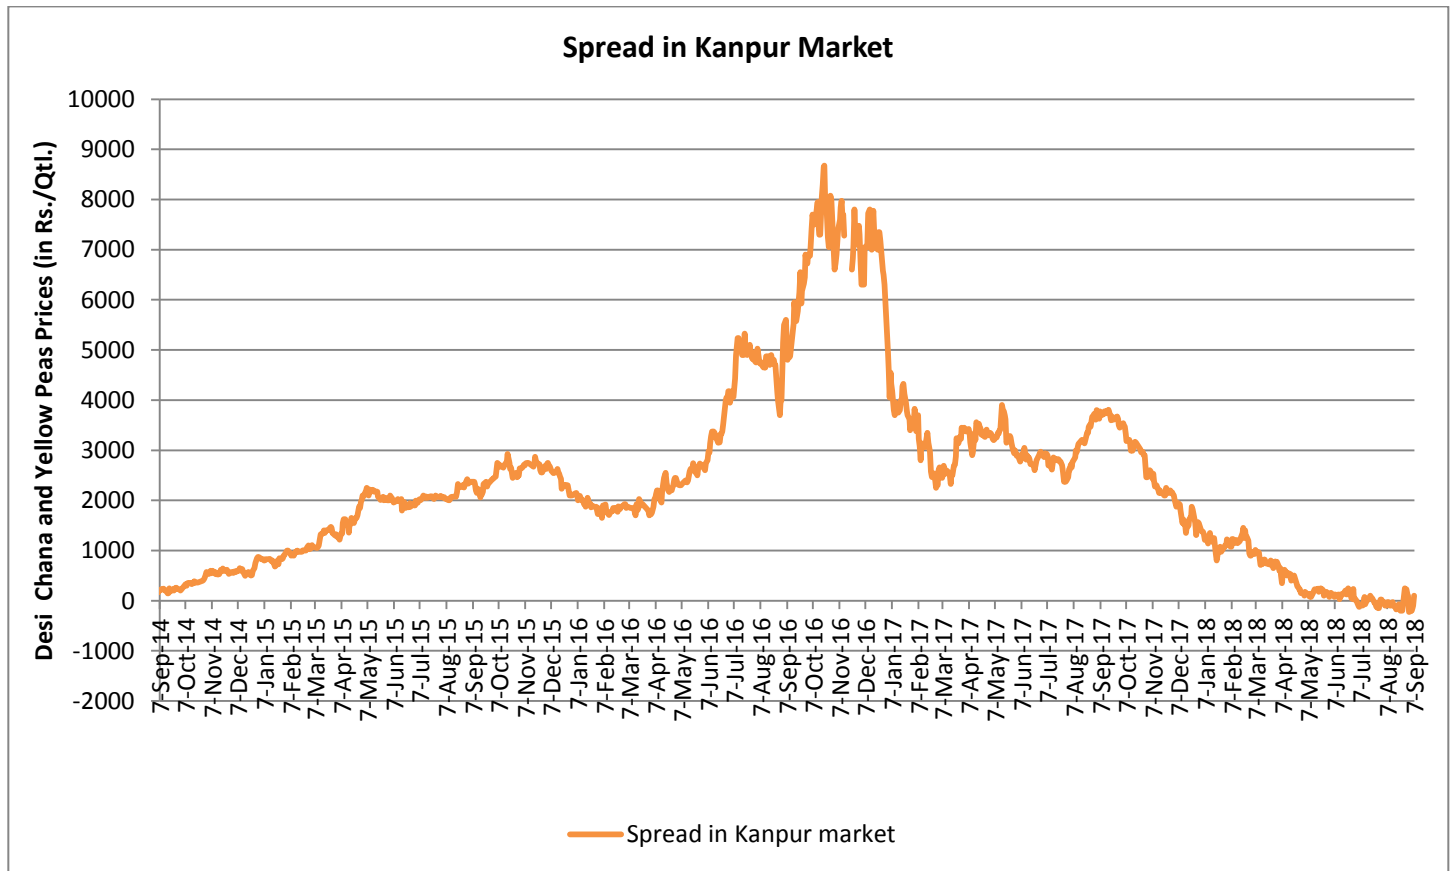

Available stock of peas at various ports is said to be over 1.75 lakh tonnes and in domestic market it has been pegged at around 1.5 lakh tonne. So there is comfortable stock position right now. Besides, demand for peas has been affected by lower chana price. So market is expected to move further down from current level. Peas may touch Rs 4000-4100 once again. At this level stake holders should buy. As demand is expected to improve, market may move up soon after touching 4000-4100 level.

Current Market Dynamics & Outlook:

At Kanpur, Desi Peas traded down by 050 % at Rs 4200- due to weak offtake from retailers/stockists. Canadian pea in Mumbai market traded up by 047 % to 4200. It may move further down by Rs 100 as chana is getting weaker. Weak demand and decreasing chana price would pressurize peas market. Slight downward correction is expected this week too. Stake holders should buy on dip. Green pea is being traded at RS6300-6350 per qtl. in Mumbai market.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved into positive zone now due to lower peas price this week. Spread is expected to move in the range of 100 to 150 per quintal in the coming weeks, on relative movement in Chana prices. Overall outlook seems steady to slightly weak. Buying on dip is good, as imported pea costing remain be higher.

Market Outlook: Outlook remains steady to slightly weak.

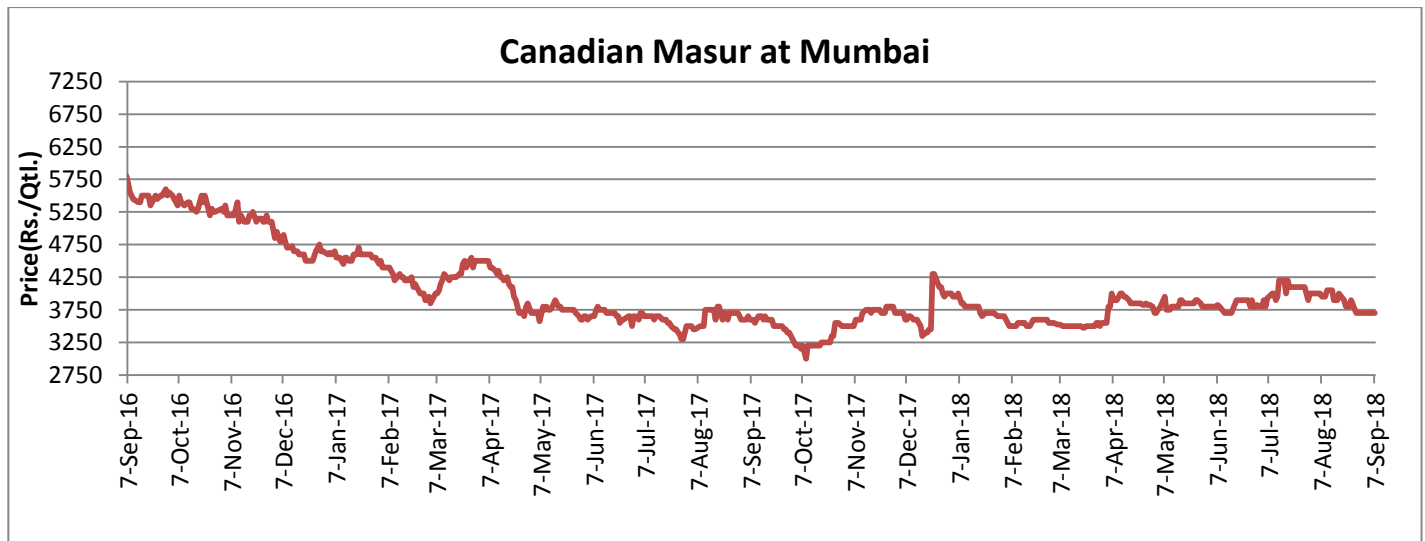

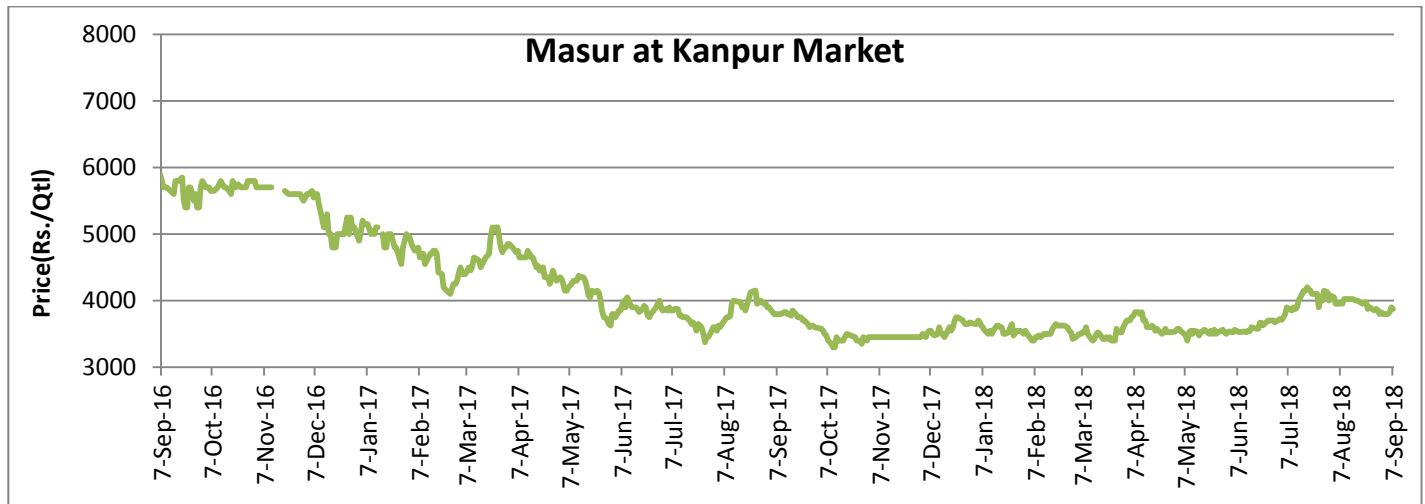

Lentils (Masoor):

Market Recap:

Tur remains competitor for lentil in India now has eaten 30 to 35% market share in local market. Market participants say that around one lakh tonne red lentil is available at ports like Kolkatta, Mundra, Hazira and Navasheva. There is an assumption that total crop size this year may be over 12 lakh tonne in 2017-18. Besides, Nafed has ample stock around 2.75 lakh tonne including new and old. So demand is unlikely to improve smartly in coming months. It would cap market to getting firmer. Further lower side correction is unlikely. If govt raises duty further, some support is expected otherwise nominal firmness might be seen in Oct. Nafed has already started selling lentil through auction. It would keep market subdued in the short term.

Current Scenario:

Weekly average price traded almost steady to Rs 3840 per qtl in Kanpur. Currently in Mumbai, it is being quoted down by 1.25% at Rs 3700 per qtl, ... Steady to weak tone may prevail this week too, as demand is yet to pick up.

Market Outlook: Prices are likely to notice steady to weak tone this week.

Pigeon Pea (Tur/Toor):

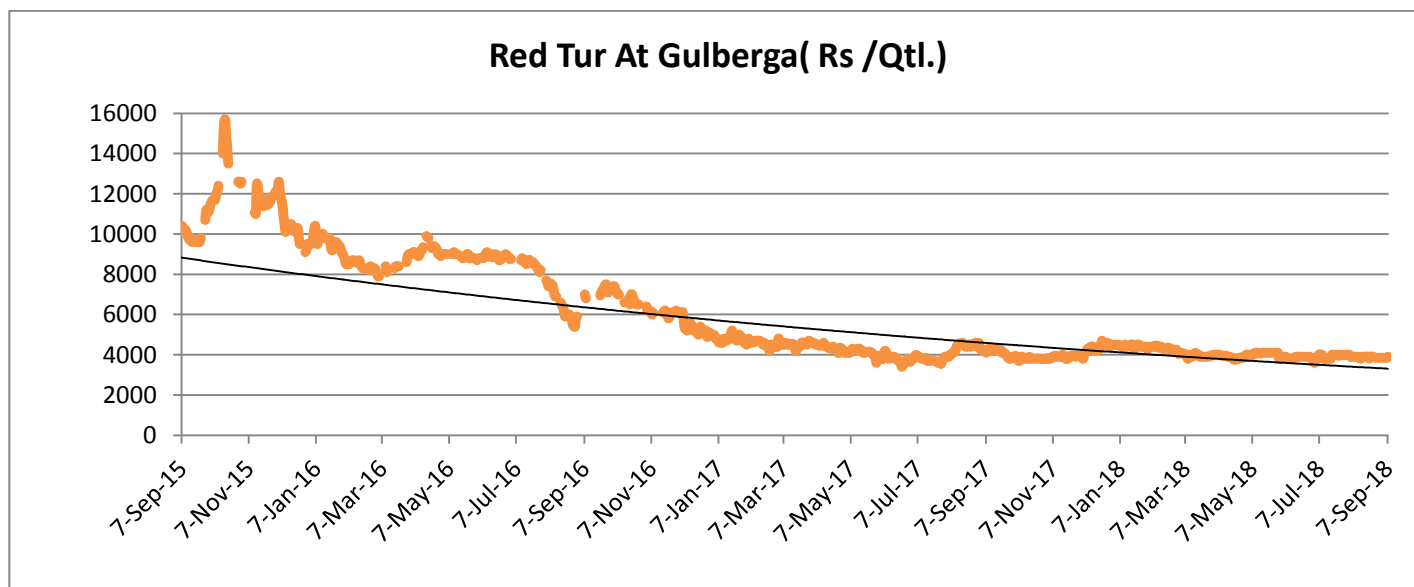

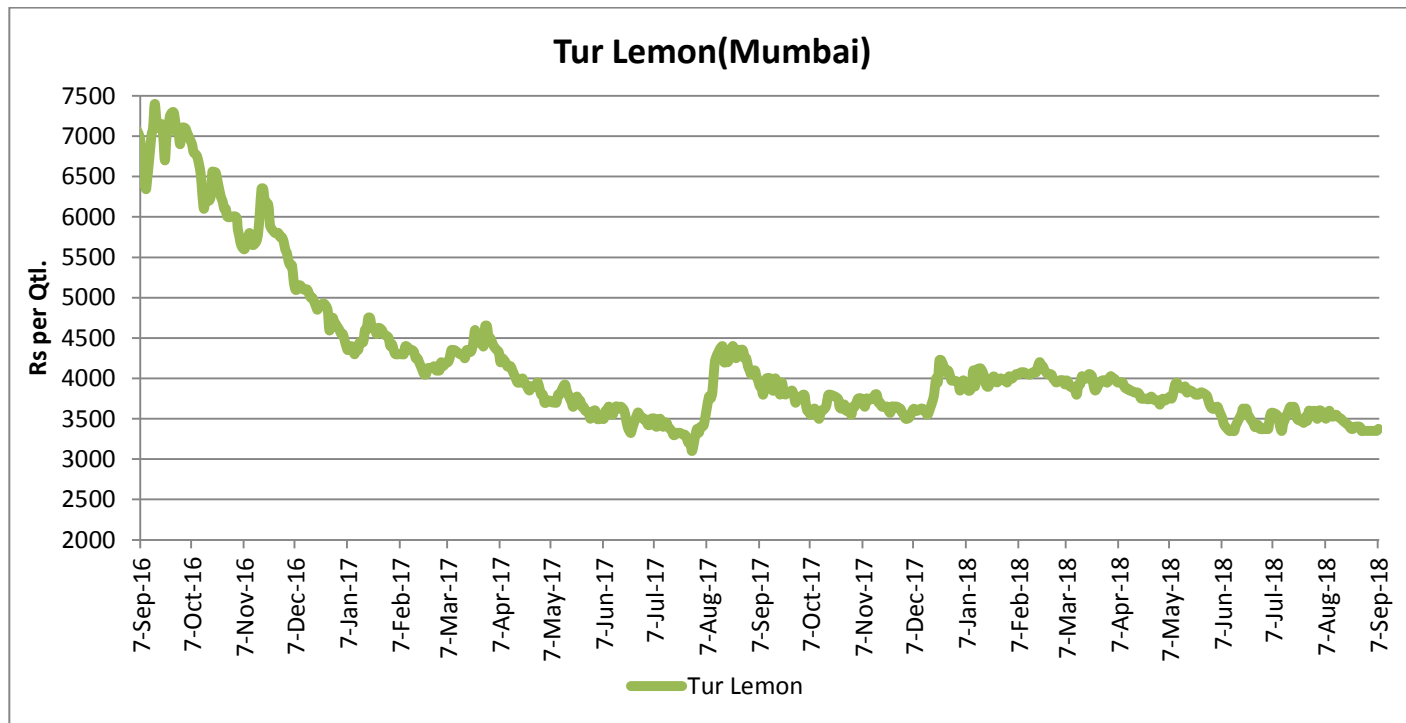

Market Recap:

Despite some damage report of Tur crop due to recent flooding in MP and Rajasthan, prices ruled under pressure as area coverage has crossed last year's level to 45.20 lakh ha, 9 thousand ha up from last year. As palting is still on, it may move up to 46 lakh ha. If we consider 1 lakh ha damage, total area would be around 45 lakh ha, almost same as last year. Besides, 275 containers has been imported on Navha Sheva port on 6th Sep from Myanmar. So pressure is likely to continue on Tur dal market. In Gulberga market Tur would continue to trade in the range of Rs3650 to 3850 per qtl. Normally tur dal demand increases from Sep and continues till Nov when new crop hits the market. So Agriwatch expects prices to stabilize near current level and move up once demand for festive season starts.

Current Market Dynamics & Outlook:

Mayanmar offered lemon tur (new & old) at \$ 310 per tonne. Basis Indian port. Linkly too is being offered at \$325 per tonne Despite smart gains in prices at origin, there is import parity and import seems possible to the level of 3.5 lakh tonne in current MY. Market should stabilize near 4000-4500 in the near to medium term. Stock in private hands has come down. Festive season commences and demand is likely to improve in coming weeks.

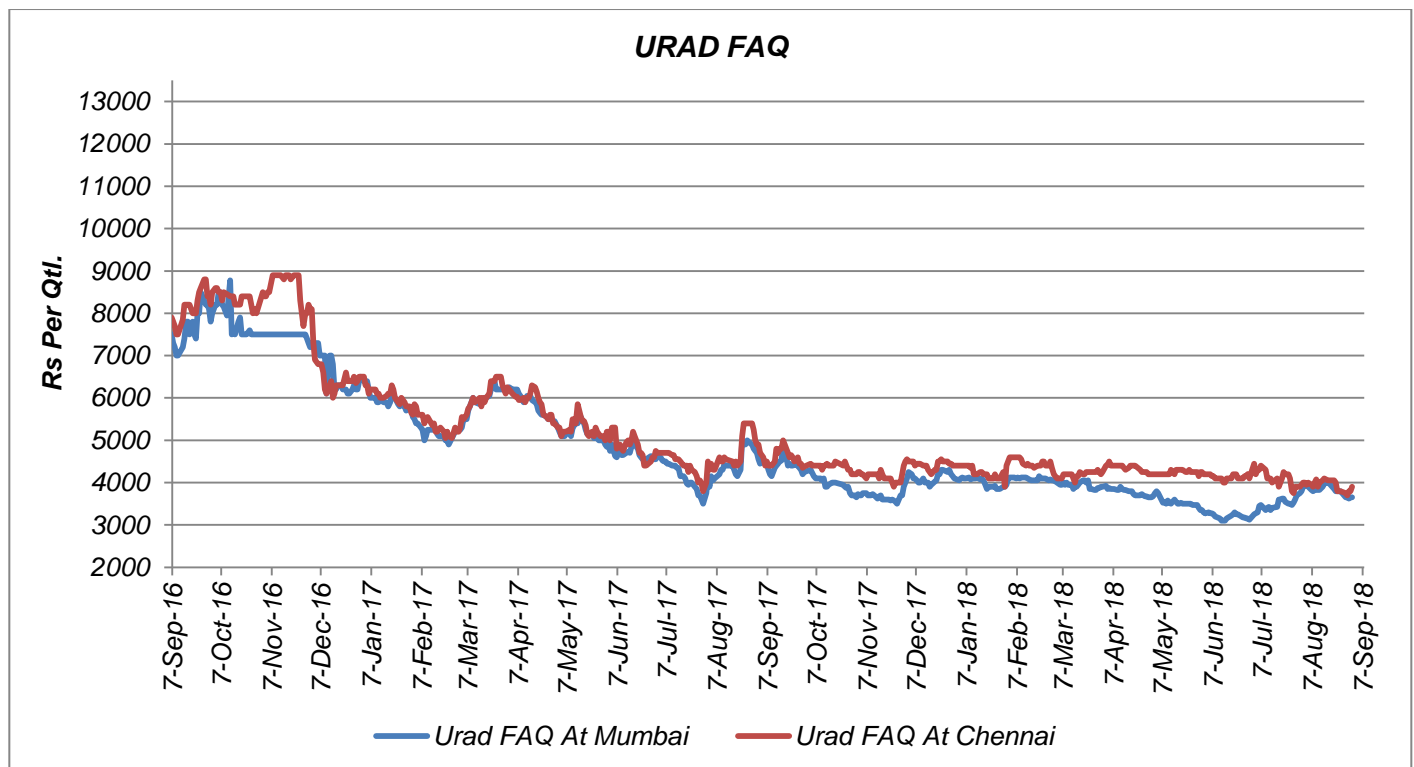

Market Outlook: Tur prices are likely to show steady movement this week as trading activities remained sluggish.

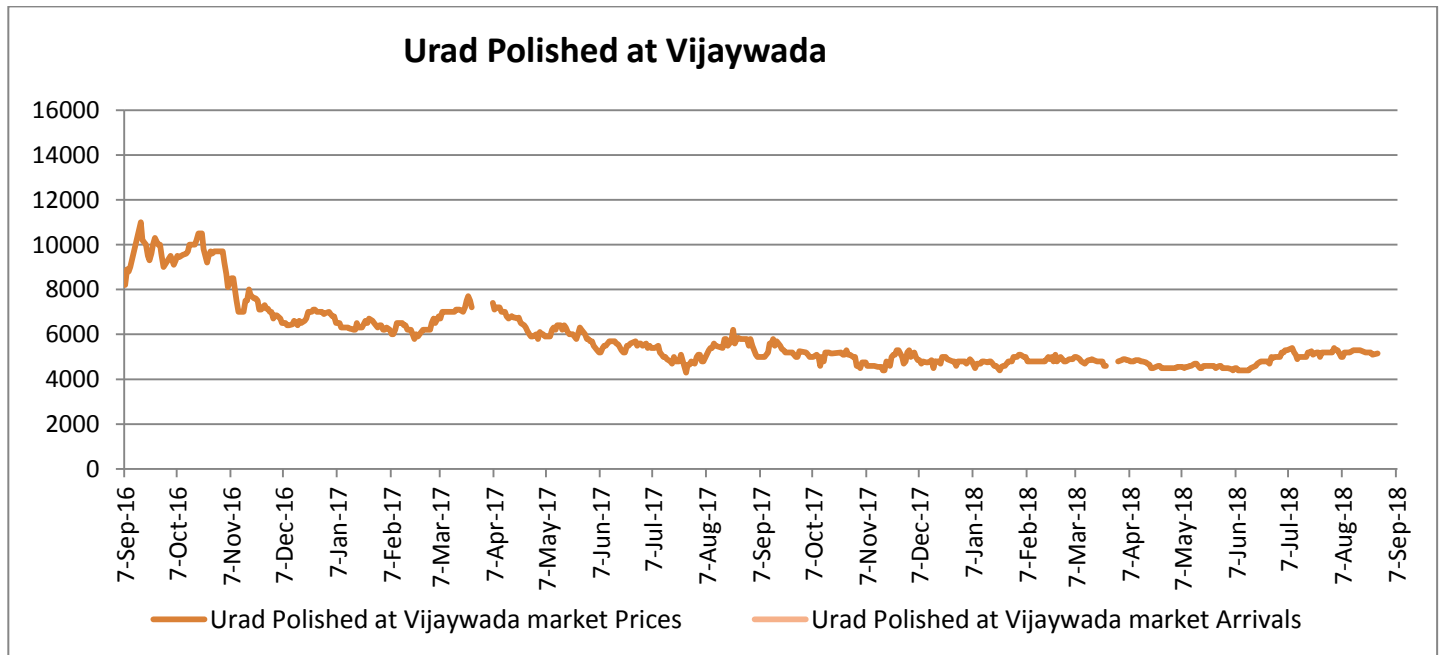

Black Matpe (Urad):

Despite lower area coverage by 12.5% to 38.02 lakh ha so far, urad price remained under pressure due to weak demand from bulk buyers and new arrivals. Unsold old stock has capped any firm momentum. As arrival in coming weeks is bound to increase, any major upsurge is unlikely until govt starts procurement. In Mumbai market Urad FAQ is being traded at Rs 3650 to Rs3850 per qtl and in Chennai it is being traded at Rs3850 to Rs3950. New crop quality is good so far. Lower kharif area may support urad price in the medium term. Higher MSP and restricted urad import may push up urad price in the medium term. FAQ Urad is expected to stabilize near Rs.3700/4100 per quintal. SQ may trade at Rs 4900-5400 in the near to medium term. Myanmar is offering FAQ Urad at \$315 per tonne and SQ at \$430 per tonne basis against Indian (Chennai) prevailing price of \$615-25 per tonne. Imports to India are feasible at these prices and may occur soon as DGFT has allowed conditional import for the millers under allocated quota of 1.5 lakh tonne for current MY.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.3650-3750 per Qtl.) and Chennai (Rs.3850-3950 Qtl.) noticed weak tone. It traded steady in Vijaywada too. Range bound movement might be seen in Urad market, due to weak demand at higher level. The following graph shows the prices movement in different markets:-

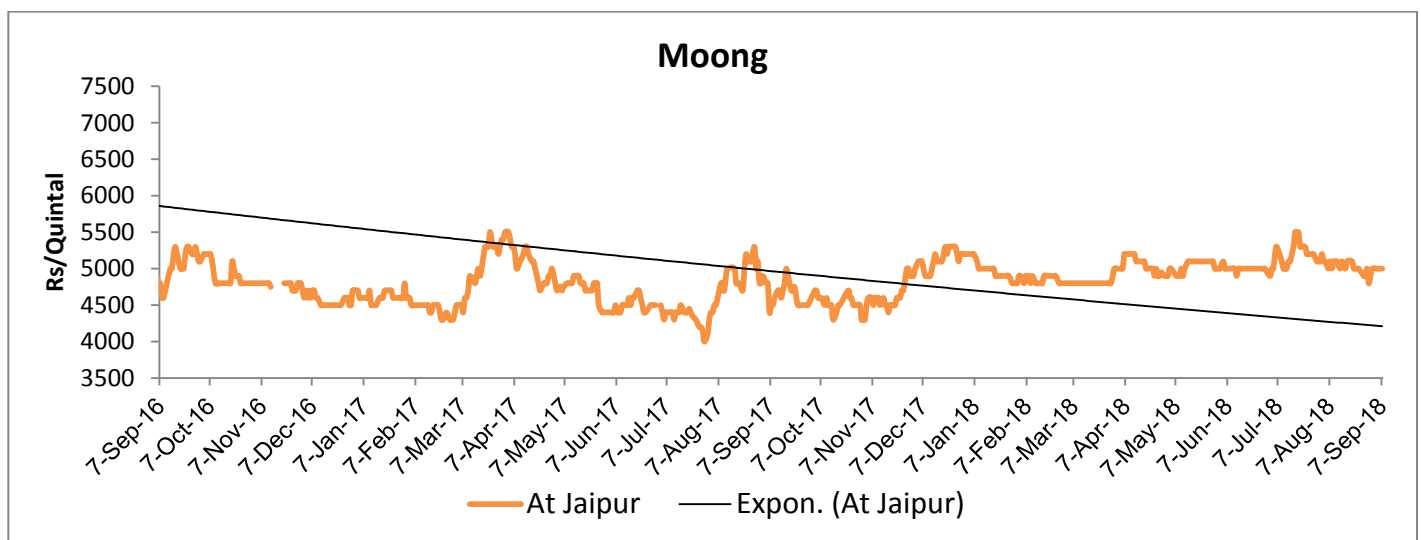

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week .

Green Gram (Moong):

The Maharashtra govt has sought 15000 MT pulses per month from central govt at subsidized rates. In August the cabinet had approved a proposal given by the agriculture ministry that the centre would provide pulses at a discount of Rs 15 per kg on whole sale rate to state govt and that would be then sold under PDS. Under this approved scheme, states/UT are offered to lift 3.48 MMT Chana, Masur moong and Urad at a discount of Rs 15 over wholesale market price. Out of total Mah govt has sought 10000 Mt chana and 5000 Mt moong, which would be sold from mid Sep. New arrivals of moong in various mandis have capped uptrend and market is likely to trade weak.

Market Recap:

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to show steady to weak movement in the coming days.

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for chickpea is 4000 to 4300 in this week in Delhi market.

Strategy: Buy on dip

Trade Recommendations: Market participants are advised to go long near 4000 levels for a target of 4200 and 4250 with a stop loss at 3950 on closing basis.

Chana Physical

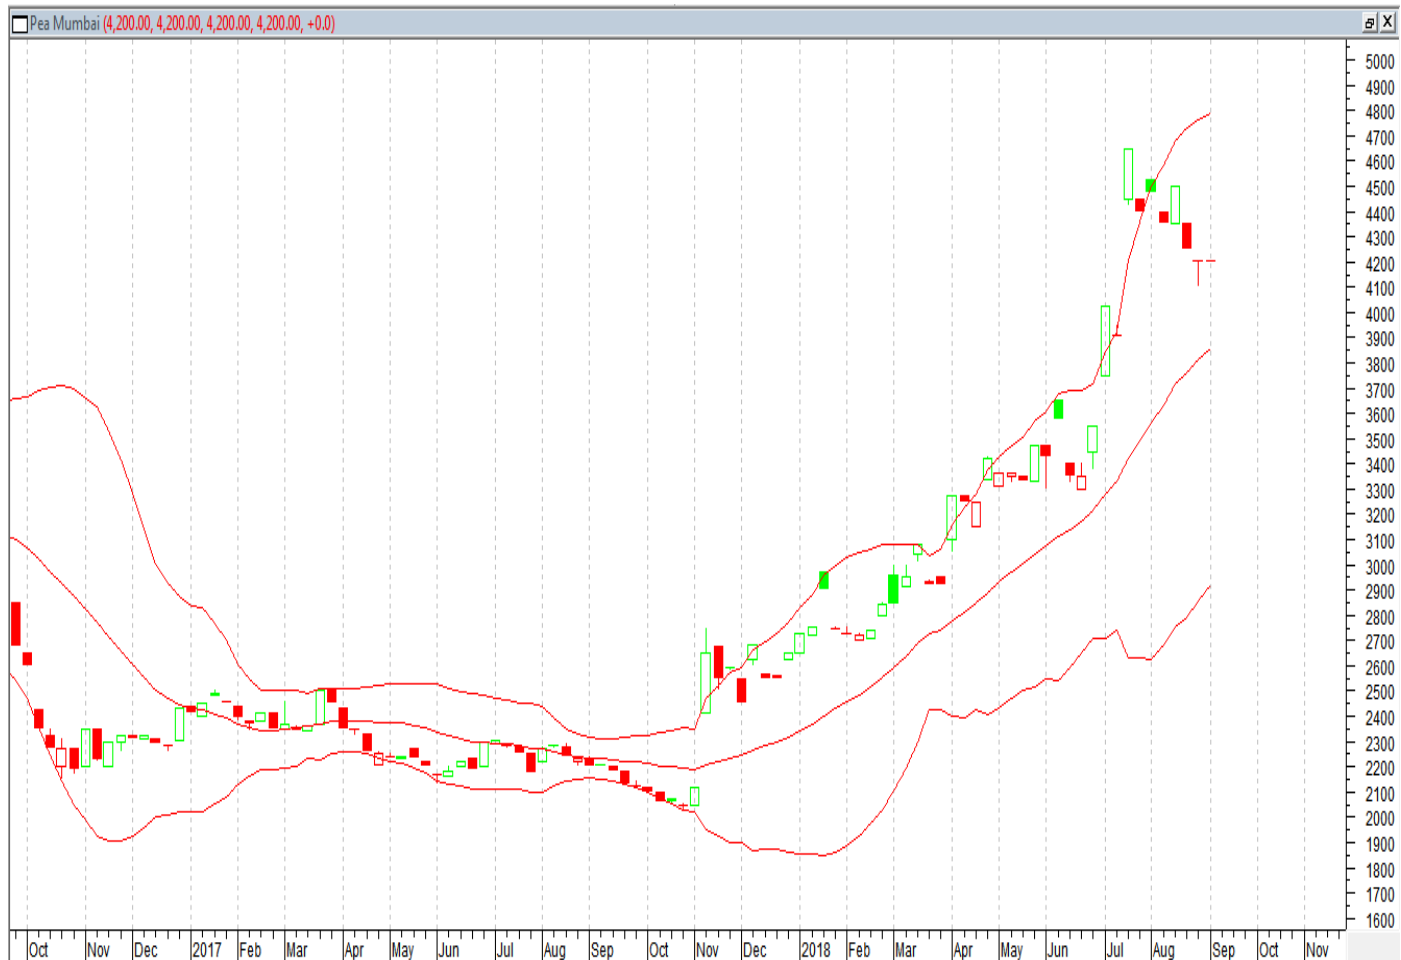

Support & Resistance				
S2	S1	PCP	R1	R2
3800	3950	4100	4300	4400

Spot Market outlook: Chana prices are likely to show weak movement.

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook – Agriwatch expects prices to show steady to slightly weak movement in the coming days.

- Candlestick chart denotes steady to slightly weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4100-4350 level in this week.

Strategy: Buy on dip

Recommendations: Buy around 4150 with the first target of 4250 and second target 4300 with stop loss at 4100 level.
