Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Chana arrivals in all major markets like Delhi, Nohar, Bhadra, Sawai Madhopur and Bikaner line has decreased by 70-75% now at this point of time and stock in physical market is said to be lower by 50% from last year.** Besides, there is no chance of import due to 70% duty and lower crop size (3.51 lakh tonne) in Australia. Demand from mills started increasing. So fundamental for cash market remains firm in the medium term. Actually, market seems disturbed due to bears game in futures and Nafed selling below MSP. However, it would not last long. Govt. may instruct Nafed to sell near MSP level. Agriwatch expects market to move up from current level. Export incentive might be increased. So stock holders should retain stock till Diwali. By then planting intensification too would be clear and govt. may increase MSP for rabi crop too on the pattern adopted for kharif crop. Cash market may move up to the level of Rs 4500-4600 by end Oct.
- **Lemon Tur in Mumbai market is being traded at Rs3375 to 3450 per qtl, depending on quality of crop.** Millers are active in buying in Narela, Bawana and Raiee line at Rs3550-3575 per qtl. New buying spree may push up price by Rs100 -150 from current level. Notably, arrival from Jaitua Tur in Katni, Indore line has decreased considerably. There is no supply from Nimuch line. So Agriwatch expects market to move up despite imported stock from Sudan and Mozambique is available. Imported stock is decreasing now. Millers are buying imported Tur and selling it at Rs5500-5600 in Varanasi, Dewaria and Gorakhpur line on delivered basis. As imported stock is decreasing, market is expected to get support at this level. Report of crop loss in Karnataka too seems favorable for cash market.
- **Moong crop got affected in Ajmer and Bikaner line by recent rains and discoloured grain is affecting price sentiments.** Shortage of quality grain in these areas and its higher price have eroded parity for Delhi market. Poor quality moong in Delhi market is being traded in the range of Rs4500 to Rs4600 per qtl. Even pressure from UP too has decreased now. Besides, sellers have retained stock of good quality in Allahabad line even at Rs5000 per qtl. Arrival from old stock too has decreased. However, new moong started hitting the market from Kishangarh region of Rajasthan. Arrival is below expectation from Kerkil line too. Arrival is expected to increase from Shekhawati line. So price of good quality crop may move up in coming weeks.
- **New kharif urad crop quality got affected by recent rains and it is being traded at Rs 2400-2500 per qtl.** In region of Lalitpur and Jhansi in UP and at Rs 2600-2700 per qtl in Shivpuri and Katni line. New arrival continues and poor quality is affecting price sentiments. There is no parity from Udgir and Latur line. As poor quality Urad is being traded at lower price, it is affecting price of SQ variety too. However, more downward trend is unlikely as buyers are expected to start new buying at prevailing lower price. Dal millers and stockists would prefer to buy and it would not allow market to move down further from current level. Stake holders should buy at this level. Likely procurement from mid Oct, lower production size and restricted import may remain supportive to urad cash market in coming weeks.
- **Masur market is expected to stay steady as stockists are unwilling to release stock at current level.** Import is likely to remain restricted due to 40% duty and price for imported masur would not be lower than Rs4000. This means price would trade up from this level in coming weeks despite Nafed selling through auction. Sowing in the region of Ganjwasoda, Mungawali, Sagar, Bhopal line in MP would continue till October and in Rajasthan it will commence from next week. Sowing in UP is expected from end Oct. Weak demand for malka and dal is affecting upward momentum and it is being traded at Rs 3900-4000 per qtl. Two vessels are expected in Oct but it would not affect price as import cost would be higher at ports. So market would move up in a span of time.
- **All India kharif Pulses area is lagging behind by 1.11 % to 137.93 against 139.49 lakh ha last year as on 20th Sep-2018.** Farmers have covered 45.83 lakh ha against 45.56 last year under Tur till date, higher by 0.58% from last year. **India imported 29172 MT chickpea from March to Aug-2018 at an average price of \$633.49 per tonne.** In August it imported 14430 MT against nil in July-2018. During the same period India exported 1.98 lakh MT including kabuli chana and dal at an average price of \$1132.98 per MT. For other pulses see table at page no-12. Total import in August was registered at 261005 MT. With 84401 MT Tur scored the highest volume followed by Urad at 68910 MT.
- **Burma offered Tur Lemon at \$350 per MT basis CNF Indian port. Likely, Old and new lemon Tur quotes remain same.** FAQ Urad is being offered at \$355 and SQ at \$475 per MT basis CNF Indian port. Kabuli Chana is being offered at 4655 and Hollan at 4690 per MT basis CNF. Moong Pakaku is being offered at \$710 per MT. CNF quotes have improved slightly in past two weeks.

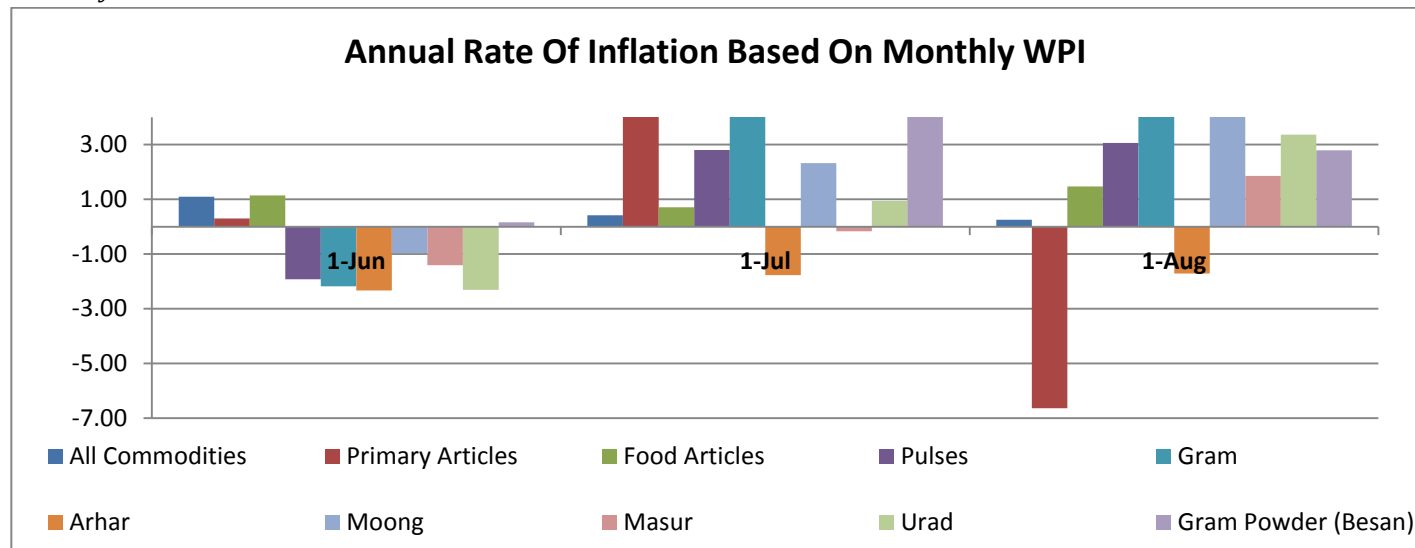

International Market:

- **Global chickpea market traded steady during the week under review, Demand remains weak** and higher availability of medium and small chana continues to weigh on market fundamental. According to Statistics Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400 MT for 2018-19. Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18. Prices are likely to move in the range of \$450 to \$480 per tonne.
- **Lentil Production in Canada is expected to decline by 15.31 % from 25.59 to 21.67 lakh tonne in 2018-19.** Import has been estimated same as last year at 35,000 MT. Despite lower production carryout is expected to decrease slightly from 8.76 to 8 lakh tonne. Even area is expected to decline by 14.47 % to 15.25 lakh ha. It was 17.83 lakh ha last year. Yield has been estimated to remain same as last year at 1.44 tonne per ha. Export may increase by 16.88 % to 18 lakh tonne in 2018-19. It was 15.40 lakh tonne in 2017-18. Prices are likely to hinge in the range of \$370 to 400 per MT
- **Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19. it was 16.56 lakh ha last year.** Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonne. Prices are likely to hover in the range of \$220 to \$250 per MT.
- **Chickpeas export from Canada increased by 16% from 108 to 116 thousand MT for 2017-18** due to aggressive buying by Turkey and EU. Despite India being out of global market carryout remained almost unchanged at 1 thousand MT like previous year. The average price decreased slightly from \$1000 to \$950 per MT in 2017-18 due to tight global side. This year (for 2018-19) production is expected to increase sharply due to higher area. Major chickpeas growing states are Saskatchewan and Alberta where maximum chickpeas are produced, almost 90 percent. Total supply is expected to increase from 150 to 273 thousand MT due to higher production estimate in 2018-19. Import is expected to remain at lower level and it may decrease from 47 to 8 thousand MT this year. Average price is expected to decrease considerably as global supply side is ample right now. It may hinge in between \$450 to \$485 per MT. Area in US is expected to increase to 0.66 million acres. Production in US may increase to 0.43 MMT in 2018-19.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18.** Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Even lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India is out of global market right now due to ample availability of pulses in India.
- **Myanmar exported around 7 lakh tonne pulses and beans in last six months beginning from April-2018** despite restricted buying by Indian importers. Till August India imported pulses and beans from Myanmar under restricted quota and considering the ample availability in domestic market, India is not going to allow pulses import beyond limit with imposed certain conditions/licence to import according to Min Ko Oo, secretary of Myanmar Pulses, Beans & Sesame Seeds Merchants Association.
- **Normally, Myanmar imports 12 to 15 lakh tonne pulses and beans annually. This year Myanmar might be able to export 12 lakh tonne pulses and beans.** Pulses prices are lower in Myanmar as major buyers like India is almost out of market. Besides India, Bangladesh, Pakistan, and Nepal buy beans and pulses from Myanmar
- **Lentil markets traded slightly down from previous week as harvests are on in both the United States and Canada.** Pressure is likely to be on in August as farmers seem to sell 50 % of their crop as soon as possible. Markets were not helped by rising tensions between the United States and Turkey. Fears that will devolve into another trade war had a negative impact on the value of the Turkish Lira.
- **Global peas market traded under pressure before likely commencement of harvesting in northern hemisphere.** Major buyers like India & Pakistan are out of market right now and others are waiting for new crop pressure to build up. However, trading activities are seen in feed grade peas. Exporters in Canada have enough stock to cater the incoming

demand in the weeks ahead. After harvestimng pressure coming to an end ,stockists/exporters may be active once again,that may help prices to recover from mid August.

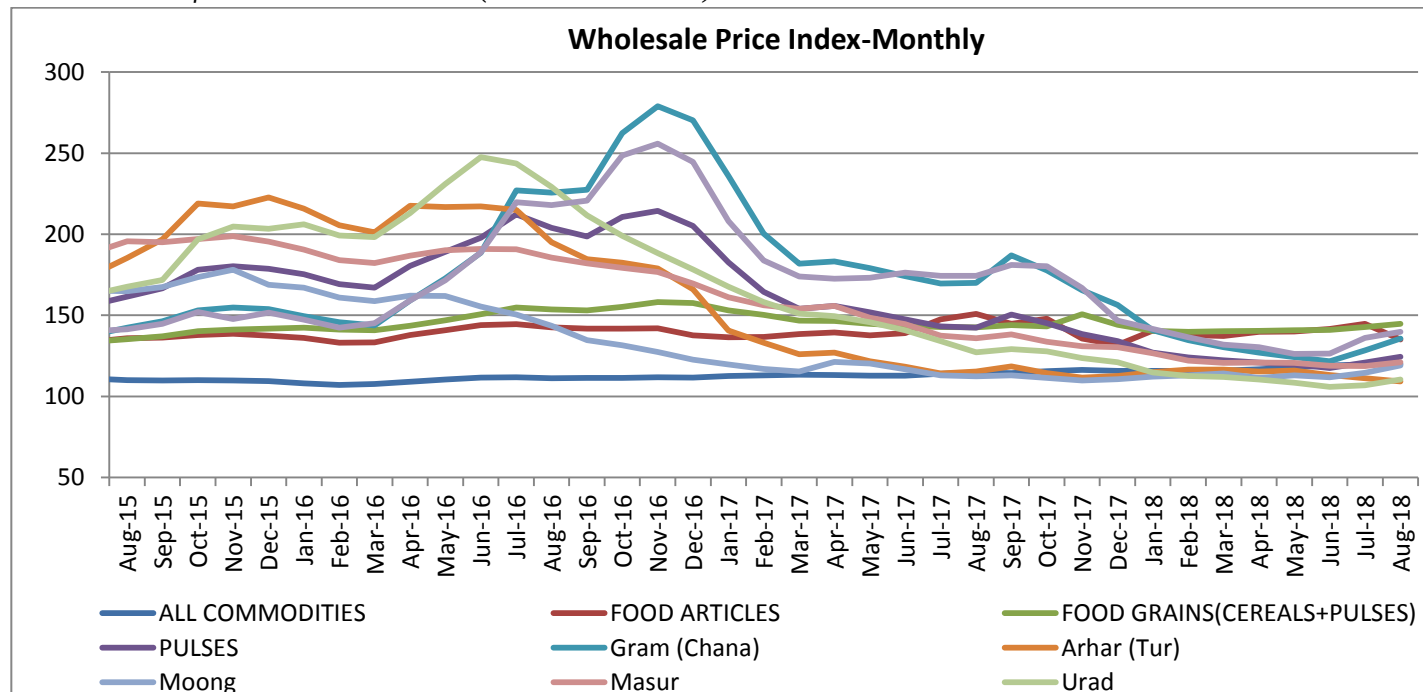

Weekly Outlook: -Pulses are likely to trade range bound to slightly firm this week..

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 3.5 point from 120.8 in Jul to 124.5.in Aug-2018.

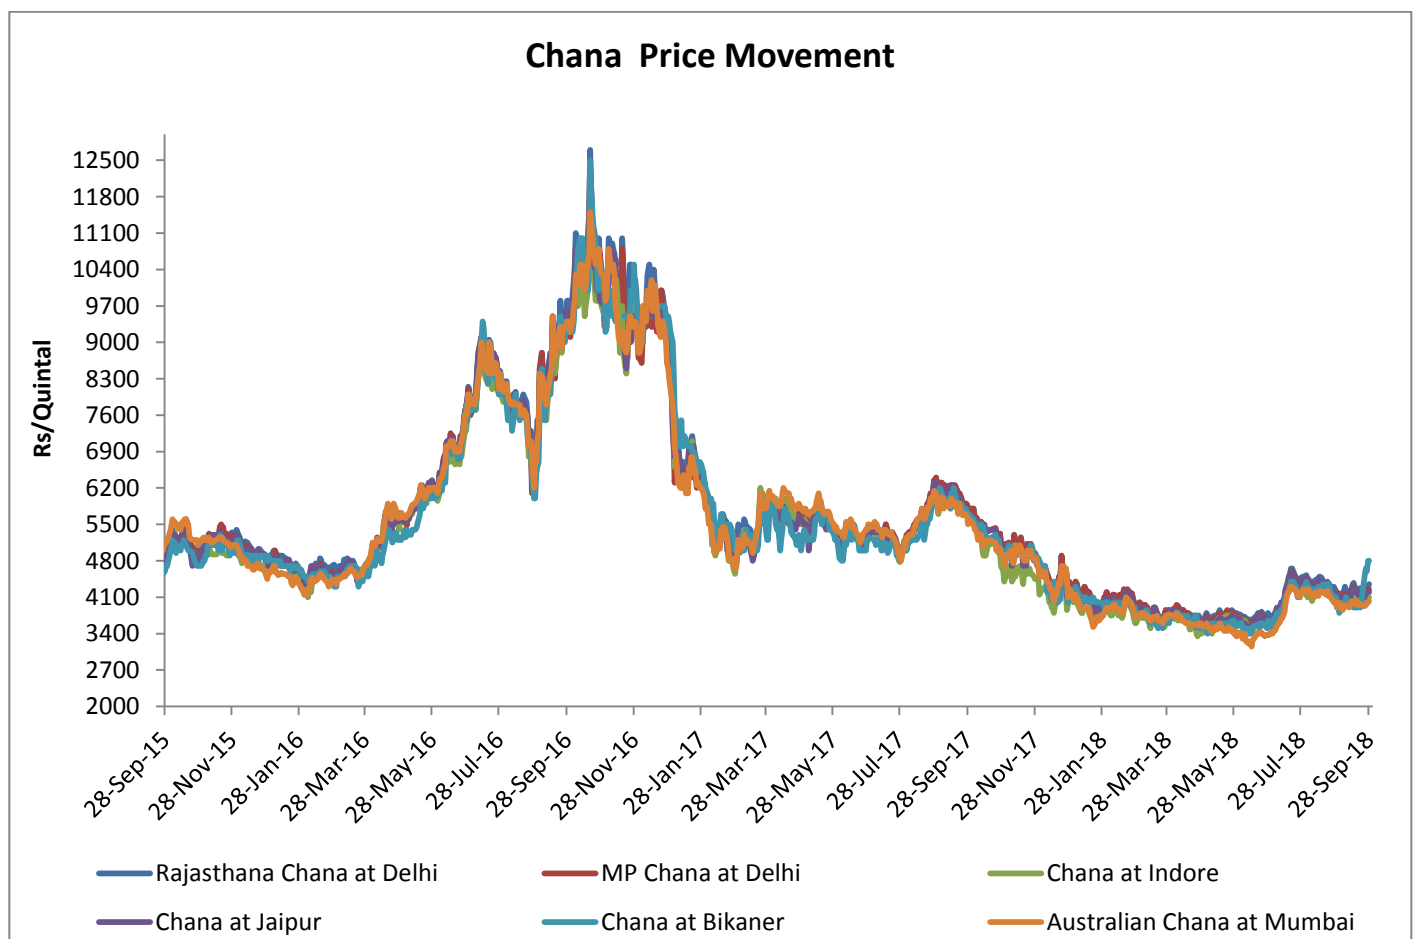

Pulses-Wise Scenario:

Chana

Current Scenario:

Cash chana market is likely to stay steady to slightly firm as Nafed may restrict sale or sell it around MSP. There is lower arrivals in major markets and stockists are unwilling to sell it at prevalent market price. It would keep market to trade firm in the coming weeks. Demand remains below expectation even at this point of time against all expectation. It may improve soon. Nafed has huge stock of 27.50 lakh tonne and its continuous release from central pool in the range of Rs 3800 to Rs 4050 had capped market. In Delhi market chana traded at Rs 4250 to Rs 4350 and would continue to trade firm amid narrow window of import due to higher duty. Demand is likely to improve. Chana in Delhi market is being traded at Rs 4250-4350 per qtl. Higher offtake may push price further up. Agriwatch expects steady to slightly firm movement in the near to medium term.

Chana in Delhi market is being traded at Rs 4250-4350 per qtl. All India average price for Chana increased by 3.98 percent to Rs 4216 per qtl. Imported gram (old imported crop) price increased by 0.22 percent to Rs 3976 per Qtl. Australian chana is being quoted at Rs 4025. Following graph illustrates the chana price movement in different markets:

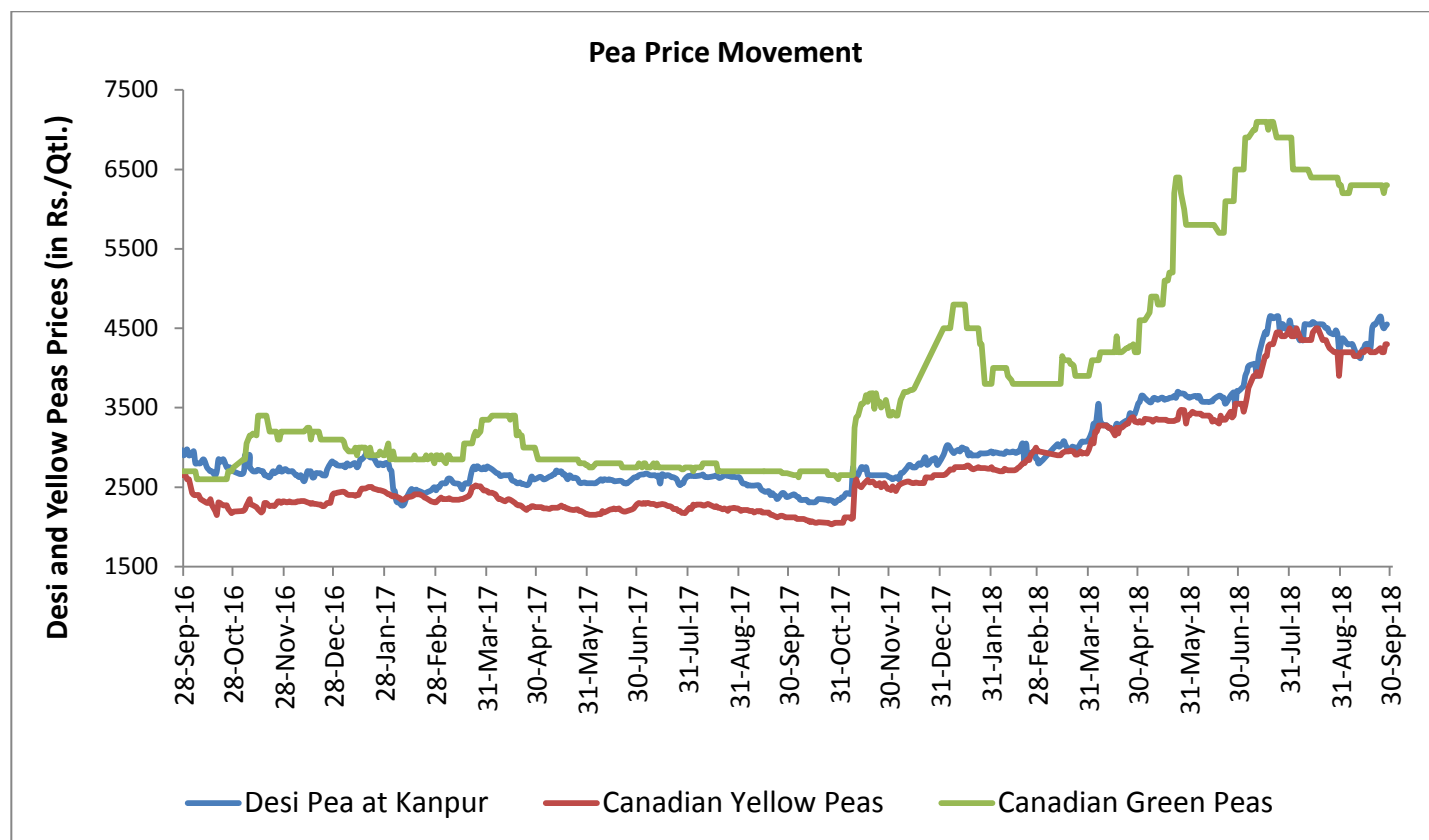

Market Outlook: Chana may trade steady to slightly firm this week too.

Peas (Matar):

Market Recap:

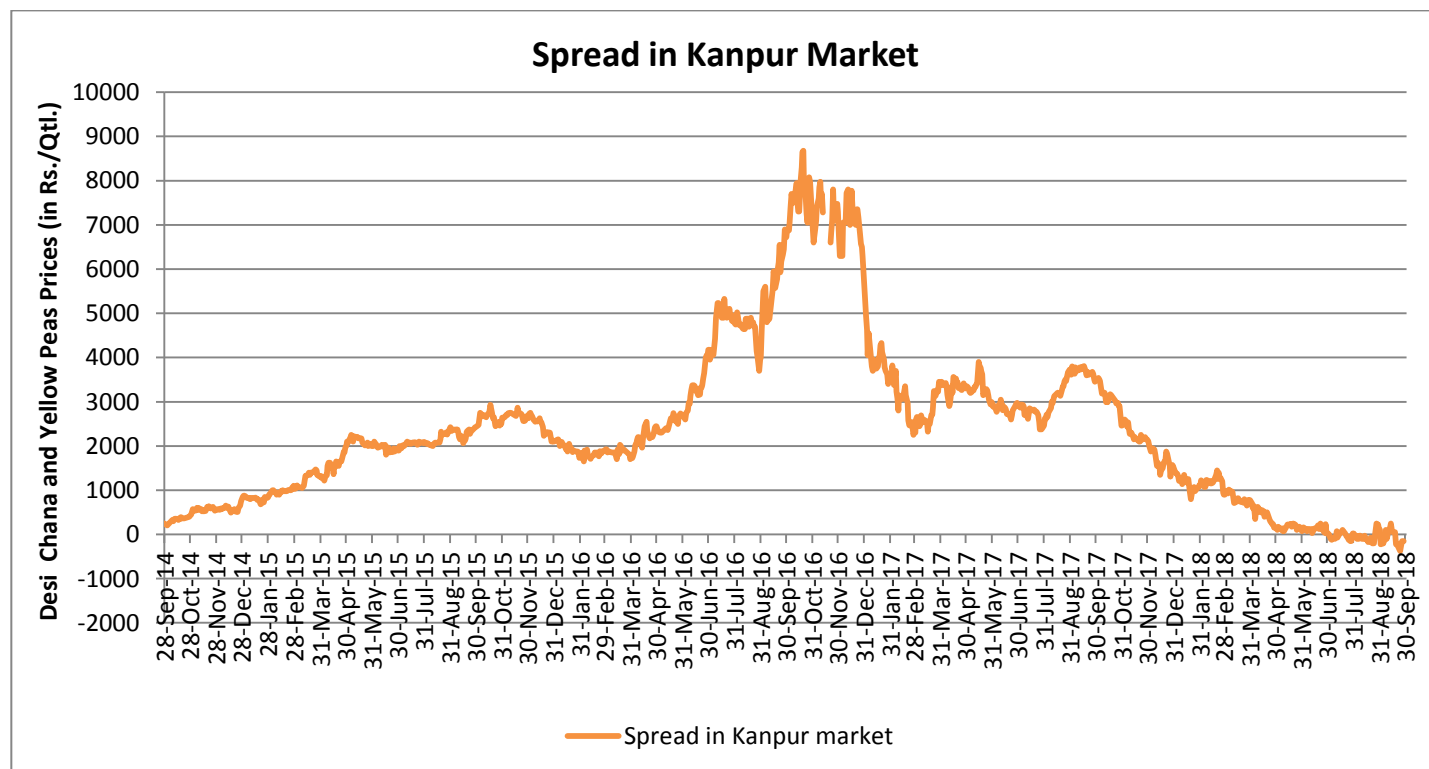

Available stock of peas at various ports is said to be over 1.30 lakh tonnes and in domestic market it has been pegged at around 1.05 lakh tonne. So there is comfortable stock position right now. Besides, demand for peas has been affected by lower chana price. However, with improving chana price pea market is bound to recover once again. So market is expected to stay steady to slightly firm. Peas may trade Rs 4200-4350 once again. Stake holders should hold stock. As demand is expected to improve, market may move up soon at the level of 4400-4500 depending on chana price movement. Import is not possible till December.

Current Market Dynamics & Outlook:

At Kanpur, Desi Peas traded firm at Rs 4500- due to improved offtake from retailers/stockists. Canadian pea in Mumbai market traded firm too at Rs 4300. It may move further down by Rs 100 as chana is moving up. If chana moves up further, it may support pea market in coming weeks. Stake holders should buy on dip. Green pea is being traded at Rs 6300 per qtl. in Mumbai market.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved into negative zone once again due to improved peas price this week. Spread is expected to move in the range of 150 to 250 per quintal in the coming weeks, on relative movement in Chana prices. Overall outlook seems steady to slightly firm. Buying on dip is good, as imported pea costing remain higher.

Market Outlook: Outlook remains steady to slightly firm.

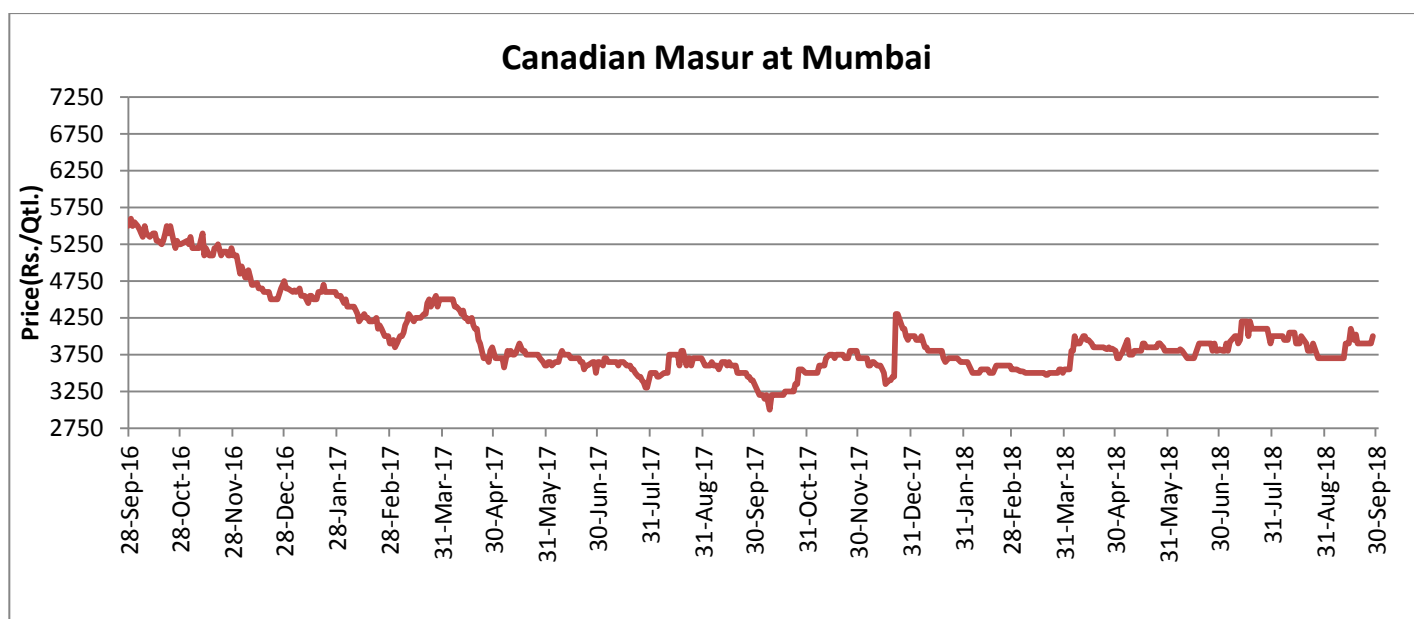

Lentils (Masoor):

Market Recap:

Tur remains competitor for lentil in India now has eaten 30 to 35% market share in local market. Market participants say that around one lakh tonne red lentil is available at ports like Kolkatta, Mundra, Hazira and Navasheva. There is an assumption that total crop size this year is over 12 lakh tonne in 2017-18. Besides, Nafed has ample stock around 2.75 lakh tonne including new and old. So demand is unlikely to improve smartly in coming weeks. It would cap market. Further lower side correction is unlikely as demand is expected to improve due to decreasing stock in mills. Besides, govt is considering increase in duty. If govt raises duty further, some support is expected otherwise nominal firmness might be seen in Oct. Nafed has already started selling lentil through auction. It would keep market capped to a certain extent in the short term. Stake holder should wait for correction and hold stock.

Current Scenario:

Weekly average price traded slightly weak to Rs 3875 per qtl in Kanpur. Currently in Mumbai, it is being quoted up by 0.25% at Rs 4000 per qtl. Steady tone may prevail this week as demand at current level is expected from Oct from retail sector. Mills stock coming down and govt may increase duty that is under consideration.

Market Outlook: Prices are likely to notice steady to firm tone this week.

Pigeon Pea (Tur/Toor):

Market Recap:

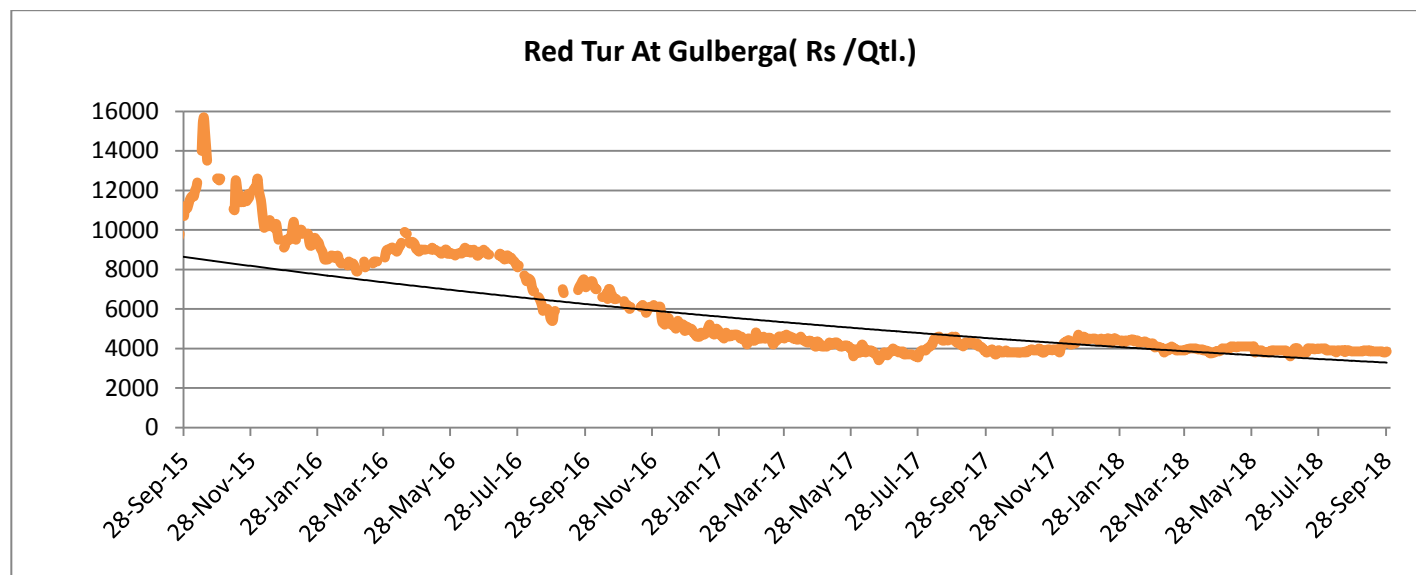

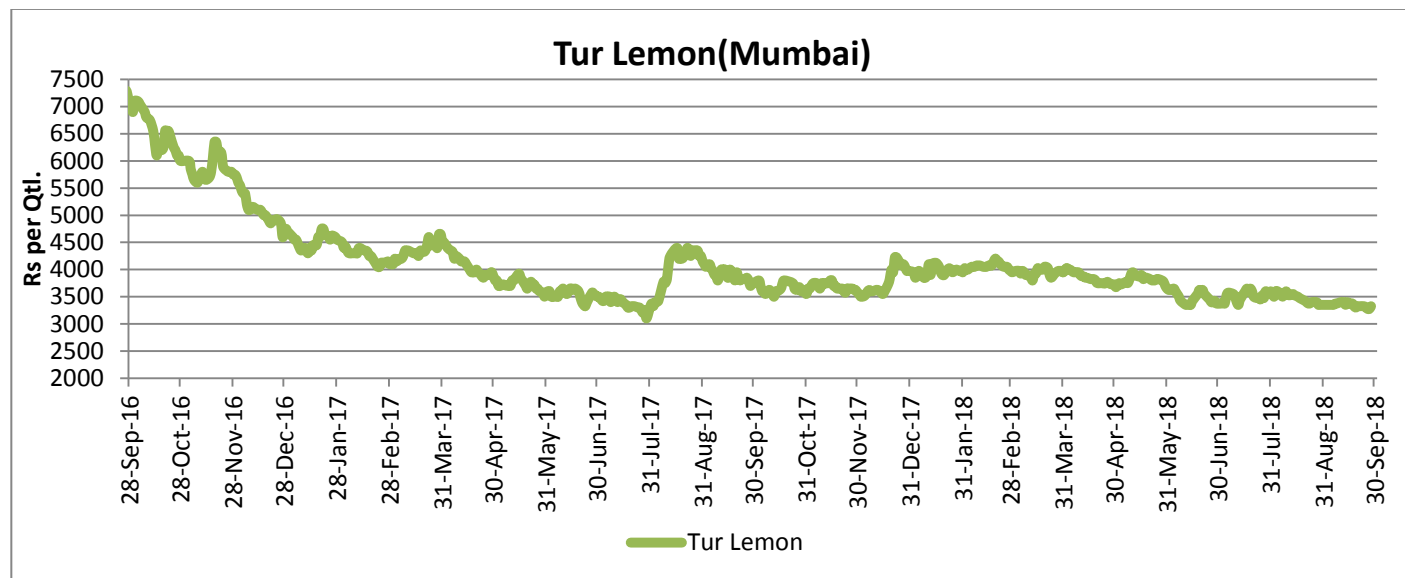

Kharif Tur area have crossed last year's level now and is up by 0.58 % to 45.83 lakh ha as on 20th Sep-2018. Area in AP is running behind by 11.74 % to 2.18 against normal of 2.22 lakh ha. It is lower in Gujarat by 6.63 to 2.52 lakh ha against normal of 2.47 lakh ha. It is lower in Jharkhand by 6.08 % to 2.28 lakh ha against normal of 2.04 lakh ha. In major producing states it is up in Karnataka by 12.86% to 9.92 lakh ha against normal of 8.17 lakh ha. It is 3.12% lower in Maharashtra to 12.34 against normal of 12.41 lakh ha. So far it is down in MP by 1.85% to 6.35 lakh ha. Normal area in MP is 5.57 lakh ha. It is up in Telangana and UP by 10.54 and 3.12 % to 2.77 and 3.46 lakh ha.

Overall scenario for Tur price seems positive and production is expected to be near at 38.98 lakh tonne in 2018-19 despite crop loss in some parts of major producing states. Availability would remain at comfortable level this year too. Festive demand may push up Tur price in coming weeks.

Current Market Dynamics & Outlook:

Burma offered Tur Lemon at \$350 per MT basis cNF Indian port. Linkly, Old and new lemon Tur quotes remain same. Despite smart gains in prices at origin, there is import parity and import seems possible to the level of 3.5 lakh tonne in current MY. Market should stabilize near 4000-4400 in the near to medium term. Stock in private hands has come down. Festive season commences and demand is likely to improve in coming weeks.

Market Outlook: Tur prices are likely to show steady to slightly firm movement this in the weeks ahead as trading activities are likely to improve amid festive demand.

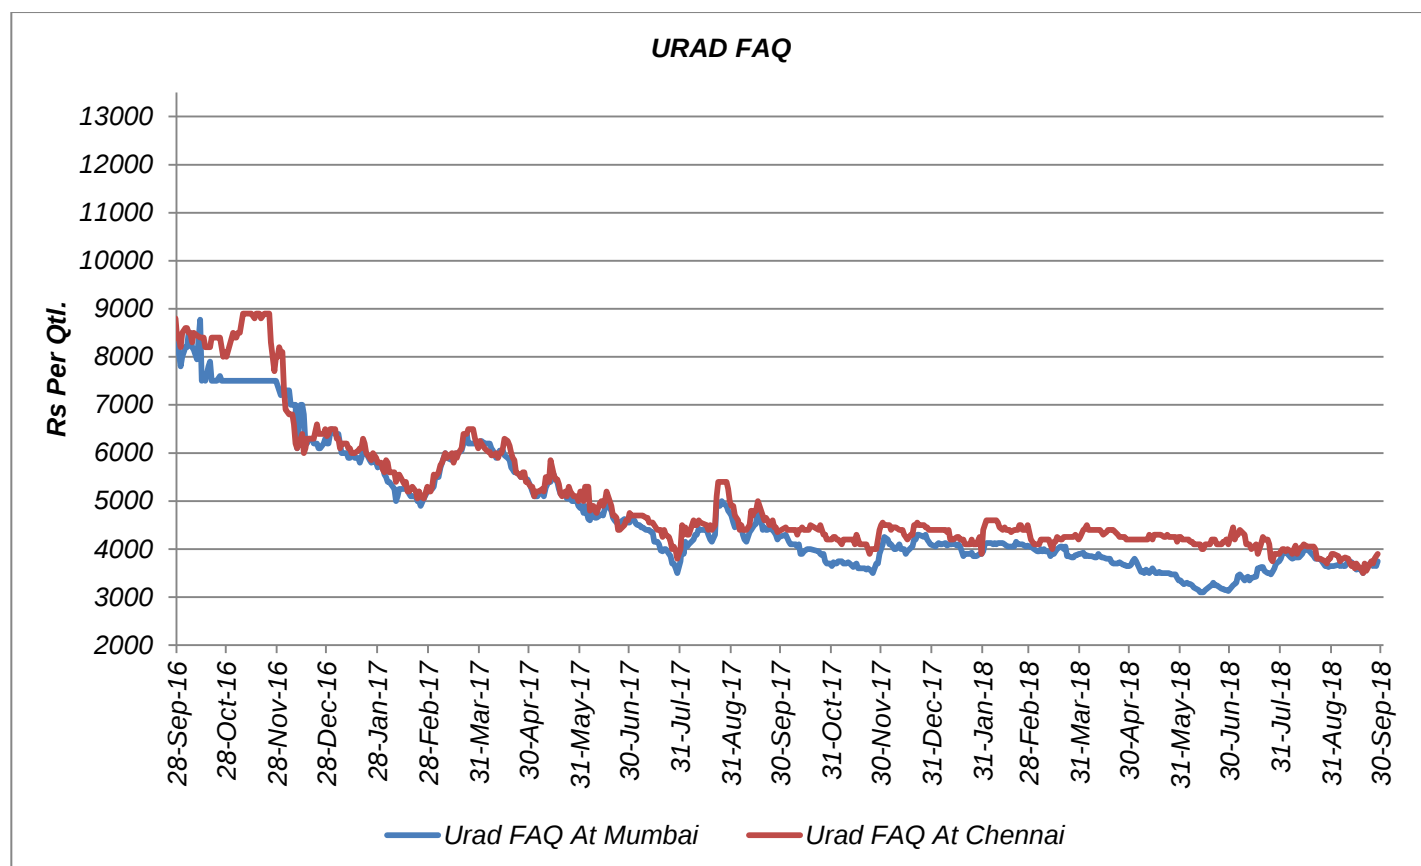

Black Matpe (Urad):

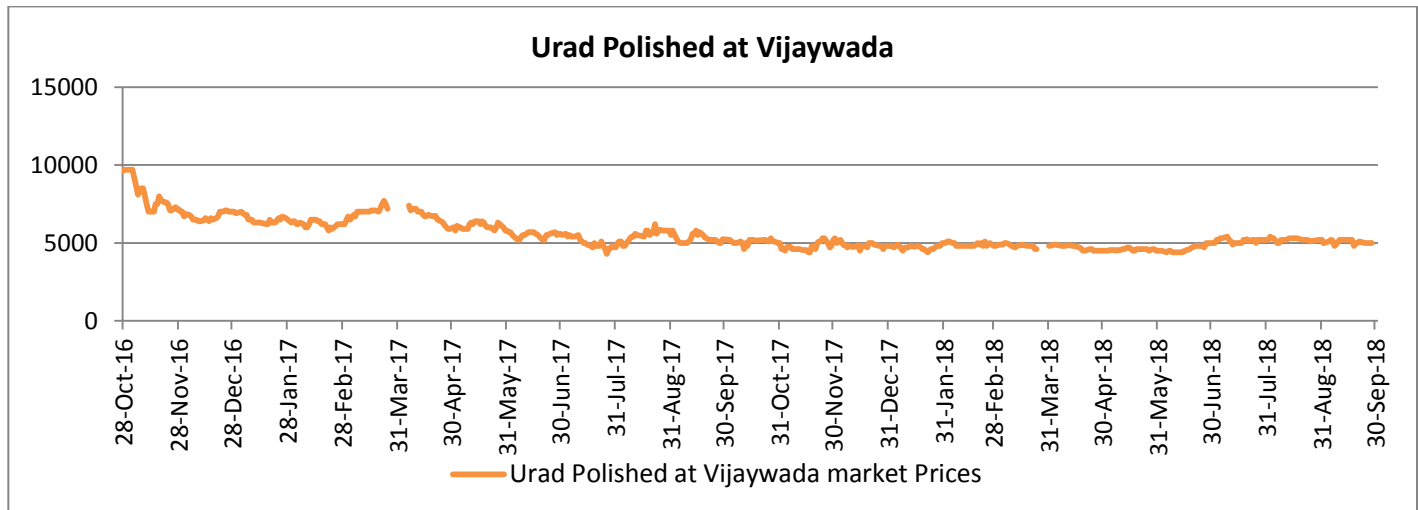

Agriwatch 1st adv estimate for kharif Urad is 18.81 lakh tonne for 2018-19, lower by around 0.38 lakh tonne from last year due to lower area coverage and some crop loss in pockets of major growing states. Total kharif rabi production is estimated at 24.58 lakh tonne for 2018-19. It was 25.47 lakh tonne in 2017-18. Lower area coverage by 12.5 to 38.02 lakh ha so far in comparison to last year till 1st week of Sep and import cap of 1.5 lakh tonne for the year amid report of crop loss in Rajasthan and Maharashtra may lend support to urad cash market in coming weeks. Arrival of old Urad in mandis is almost over now. However, old stock is available in Shivpuri, Katni Agra, Bhopal line in plenty. Lower stock of imported Urad and likely procurement at new MSP may push up price to a certain extent. Demand is weak and may improve from Oct.

Kharif Urad area is running behind by 8.97 lakh ha from last year to 40.37 lakh ha as on 20th Sep-2018. Actually, major producer of kharif Urad is MP, Uttar Pradesh, Maharashtra and Rajasthan. Area is down in MP by 7.66 % to 16.52 lakh ha, it is down in Maharashtra by 22.31 % to 3.75 lakh ha and by 12.62 % to 4.72 lakh ha in Rajasthan. However, it is up by 15.44% to 6.88 lakh ha in UP. So production is expected to decrease this year from 25.47 to 24.58 lakh tonne including 5.77 lakh tonne rabi crop.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.3700-3750 per Qtl.) and Chennai (Rs.3900-3950 Qtl.) noticed firm tone. It traded steady in Vijaywada too. Steady to firm movement might be seen in Urad market, due to improved demand at lower level. The following graph shows the price movement in different markets:-

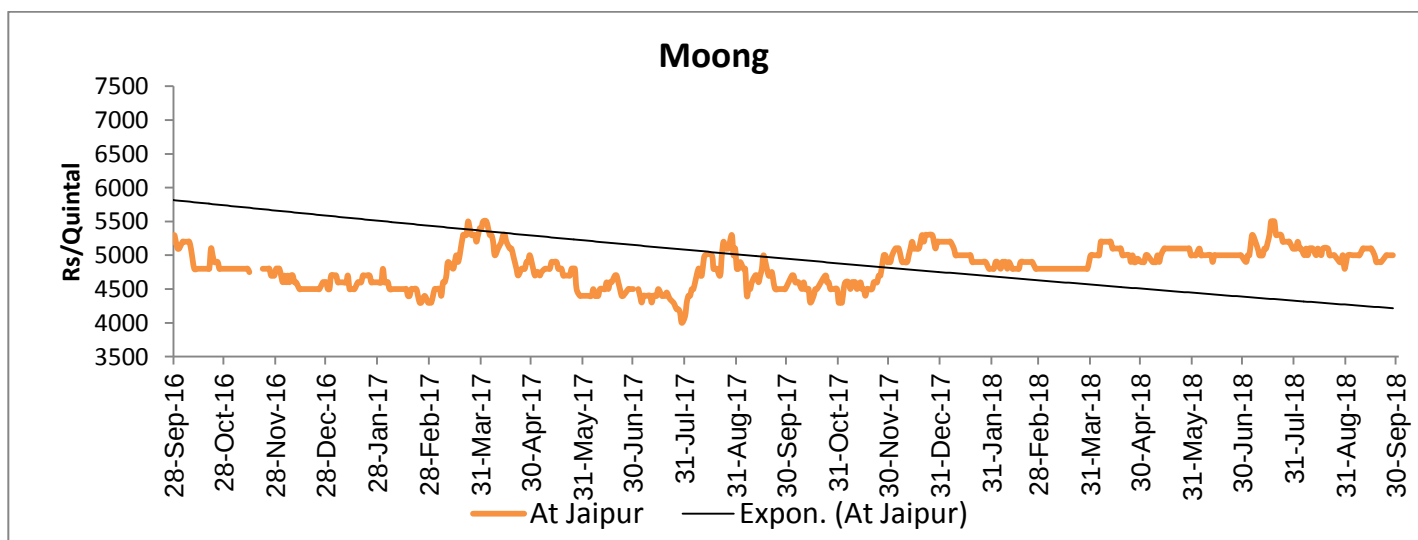

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week too.

Green Gram (Moong):

Despite 7.41 % higher kharif Moong area (34.36 lakh ha) this year so far and commencement of new arrival in Karnataka, Telangana and AP, bearish trend is unlikely to prevail in coming weeks. Among major producing states, area is up by 22.46 % to 19.23 lakh ha in Rajasthan, 15.25% to 4.23 in Karnataka only. In other major states like Maharashtra, Telangana, Odisha, MP and Gujarat it is down by 10.93, 18.11, 15.33, 7.89 and 52.31 % respectively. Besides, there are reports of lower sowing in Kekri kishangarh, Shekhawati and Merta line. Under these developing scenario, Moong stayed steady in Kanpur, Allahabad region. Rains have affected standing crop in Maharashtra too. There is not much stock in dal mills located in Jalgaon, Akola. Commencement of procurement in Karnataka too remains supportive to cash moong market. Cash market may move up further as soon as demand for DhJoya and chilka increases.

Market Recap:

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

**Pulses Import & Average CiF:**
