Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Tur market traded slightly up on the back of improved demand from retail market**, growing fear of lower yield in Maharashtra, Karnataka and Gujarat due to moisture stress in the field. Crop is under flowering stage. Besides, higher MSP (Rs 5675) for new crop, govt's intention to re-launch futures in tur and urad, likely higher export incentive (10 to 15 %) and uncertain weather condition may support tur cash market in the weeks ahead. Pressure of higher stock is coming down ahead of new crop, two months away from now. Import would be limited under restricted quota. However, any big spike is unlikely as selling from central pool stock continues. Govt would procure tur at new MSP, so private participation is expected to be lower due to huge gap between MSP and prevailing market price. Private trade retention may increase on the hope of improvement in price. Cash market is likely to stay steady to slightly firm in the short to medium term. In Gulbarga market tur is being traded at Rs 3700-3900 per qtl.
- **Urad arrival from kharif crop is lower by 20 % than normal expectation and there is a quality issue too** with rains affected crop. As crop size is lower and procurement under price support scheme, Bhavantar Yojna is about to begin. Besides, demand is expected to improve from current level due to festive season while import volume would be limited at 1.5 lakh tonne. So Agriwatch expects market to move up from current level during the period of procurement. As govt. agencies have stopped auction, it too would support Urad market in coming weeks. Besides, futures in Urad & Tur is likely as concerned authorities seem ready to allow it once again after 2007. Now Sebi has to decide. Overall outlook remains firm for Urad.
- **Arrival pressure from kharif moong crop has not built up in major markets so far. Besides, there is a quality issue** in Karnataka, Maharashtra, Rajasthan. So, arrival of quality crop is much lower than expectation. Next big crop is expected in summer from MP only. In MP, lower rainfall would not allow farmers to increase area under moong despite higher MSP (Rs 6975). Besides, there is good demand in moong and moong dal. Govt would procure higher quantity due to upcoming election. So moong price is unlikely to come down. Selling from central pool is expected not before mid Dec. Import is not possible beyond limit. So emerging scenario hints moong to go up from current level. It may move up by 300 to 400 per qtl. in the near term.
- **Cash chana market traded steady to slightly firm in Delhi market and it traded at Rs 4300-4350 (Rajasthan line) and Rs 4250-4275 (MP line).** Arrival in Delhi market was reported at 30-35 motors. Australian chana in Mumbai was quoted at Rs 4050-4100 while it was traded at Rs 4100-4150 at Mundra, Kandla ports. Chana Kanta in Rajkot market was traded at Rs 3900-3925 and Desi at Rs 3875-3900. Arrival was registered at 700 bags. Chana cash market is expected to trade steady to slightly firm despite Nafed selling at various states. Festive demand would continue to support chana market at current level. Private stock is said to be lower at 1.5 to 1.8 MMT, lower than 0.5 to 0.6 MMT as per market source. So maximum stock is with Nafed. Sowing begins in south India amid moisture stress in field.
- **Nafed decided to stop selling moong and Urad from its stock and commenced procurement in Rajasthan** and other states. Other procurement agencies too are expected to be active soon. It may support moong market in coming weeks. Private participation would be limited as MSP is much higher than prevailing price. Moong is being traded at Rs 5000 to 5500 in various markets right now and with commencement of procurement it may move up by Rs 200 to 300 in coming weeks. However, poor quality (due to rains affected crop) of crop may restrict any major jump in moong market.
- **As per trade Sources, India has exported 1000.45 MT of Lentil at an average FoB of \$821.65 per tonne** during the month of September -2018 compared to 711.75 MT at an average FoB of \$893.78 per tonne in August-2018. Vessel (Sea Breeze) with 32350.00 tonnes of lentil is at berth for discharge. The vessel Sea Breeze is at berth since 04th October 2018.
- **Peas market is expected to remain firm and increase by Rs 100-150 per quintal in short to medium term** due to increase in demand and fall in stock at ports by around 50 percent. Furthermore government has increased restriction on pea until 31st December 2018.

International Market:

- **Chickpea market traded steady to slightly lower as supply from farmer's end was seen higher than actual demand.** Demand from North American millers/exporters remained weak. It continued to pressurize chickpea prices.

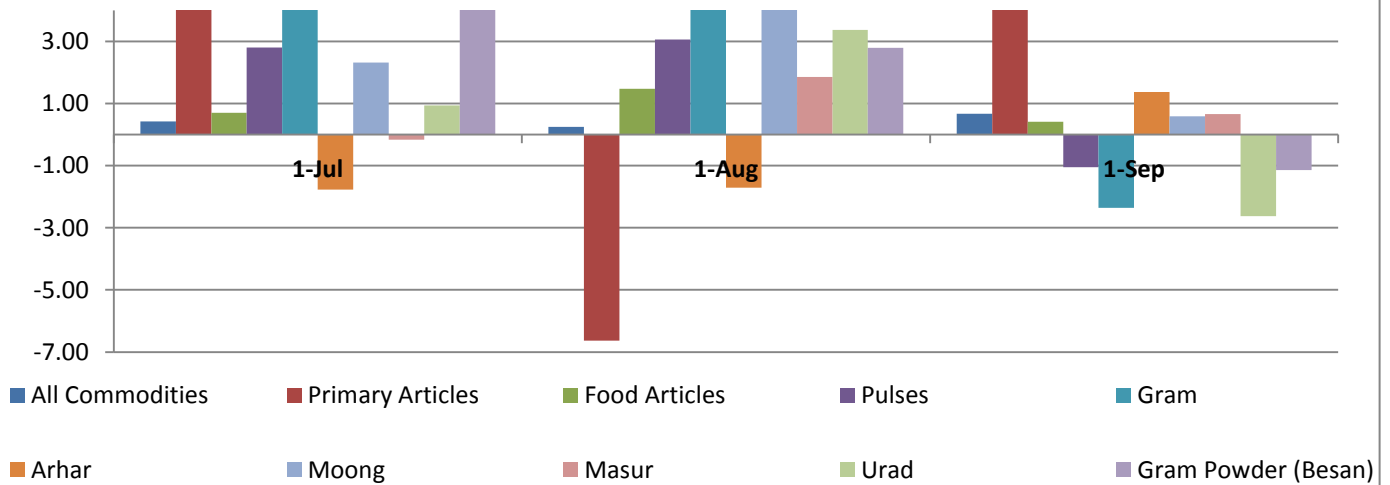

Offering for farmers too have decreased. Farmers are getting 21% lower price now in comparison to mid Aug-2018. Canadian Farmers too are getting 13 % lower price during the period. As demand remains weak, any spike in global chickpea market is unlikely. Major buyers, India, remains out of the market. Range bound movement might be seen in the short term.

- **Lentil Production in Canada is expected to decline by 15.31 % from 25.59 to 21.67 lakh tonne in 2018-19.** Import has been estimated same as last year at 35,000 MT. Despite lower production carryout is expected to decrease slightly from 8.76 to 8 lakh tonne. Even area is expected to decline by 14.47 % to 15.25 lakh ha. It was 17.83 lakh ha last year. Yield has been estimated to remain same as last year at 1.44 tonne per ha. Export may increase by 16.88 % to 18 lakh tonne in 2018-19. It was 15.40 lakh tonne in 2017-18. Prices are likely to hinge in the range of \$370 to 400 per MT
- **As per USDA, dry bean production in U.S. is expected to fall by 6 percent to 1.23 MMT even after 20 percent decrease in sowing as yields are expected to be higher compared to last year.** Dry bean exports from U.S. have registered a 12 percent increase during September '17- June '18 compared to September '16- June '17. Top destinations included Mexico, Canada, Italy and UK.
- **Canadian chickpeas market traded unstable during the week under review as temperature in growing belts was seen at freezing point at the time of harvesting.** Around 25 % crop is yet to be harvested. Quality concern for standing crop is increasing. Market experts say that crop size may be lower than previous expectation. It may decline from 2.83 to 2.58 lakh tonne as per Canada statistics.
- **Global chickpea market traded steady during the week under review. Demand remains weak** and higher availability of medium and small chana continues to weigh on market fundamental. According to Statistics, Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400 MT for 2018-19. Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18. Prices are likely to move in the range of \$450 to \$480 per tonne.
- **Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19. It was 16.56 lakh ha last year.** Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonne. Prices are likely to hover in the range of \$220 to \$250 per MT.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18.** Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Even lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India is out of global market right now due to ample availability of pulses in India.
- **Myanmar exported around 7 lakh tonne pulses and beans in last six months beginning from April-2018** despite restricted buying by Indian importers. Till August, India imported pulses and beans from Myanmar under restricted quota and considering the ample availability in domestic market, India is not going to allow pulses import beyond limit with certain conditions/licence to import according to Min Ko Oo, secretary of Myanmar Pulses, Beans & Sesame Seeds Merchants Association.
- **Normally, Myanmar imports 12 to 15 lakh tonne pulses and beans annually. This year Myanmar might be able to export 12 lakh tonne pulses and beans.** Pulses prices are lower in Myanmar as major buyers like India is almost out of market. Besides India, Bangladesh, Pakistan, and Nepal buy beans and pulses from Myanmar

Weekly Outlook: -Pulses are likely to trade range bound this week..

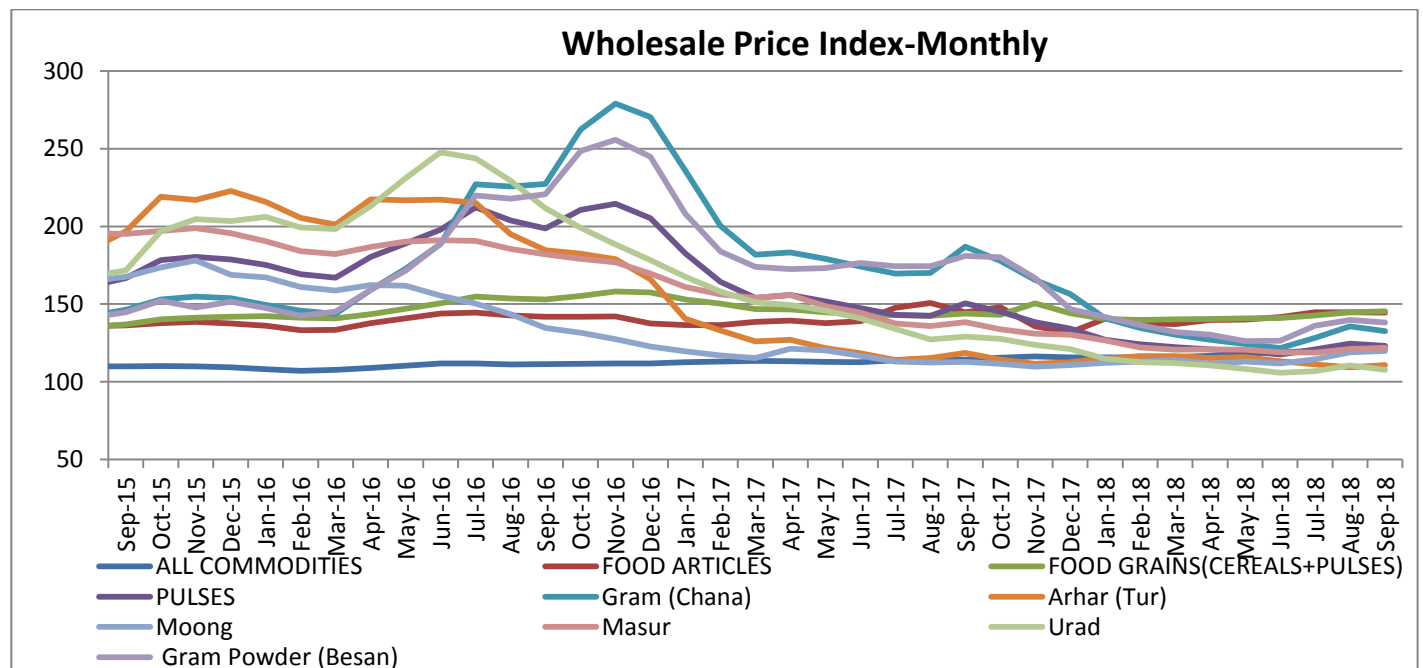

Monthly Wholesale Price Index:

Annual Rate Of Inflation Based On Monthly WPI

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 1.3 point from 124.5 in Aug to 123.2 in Sep-2018.

Pulses-Wise Scenario:

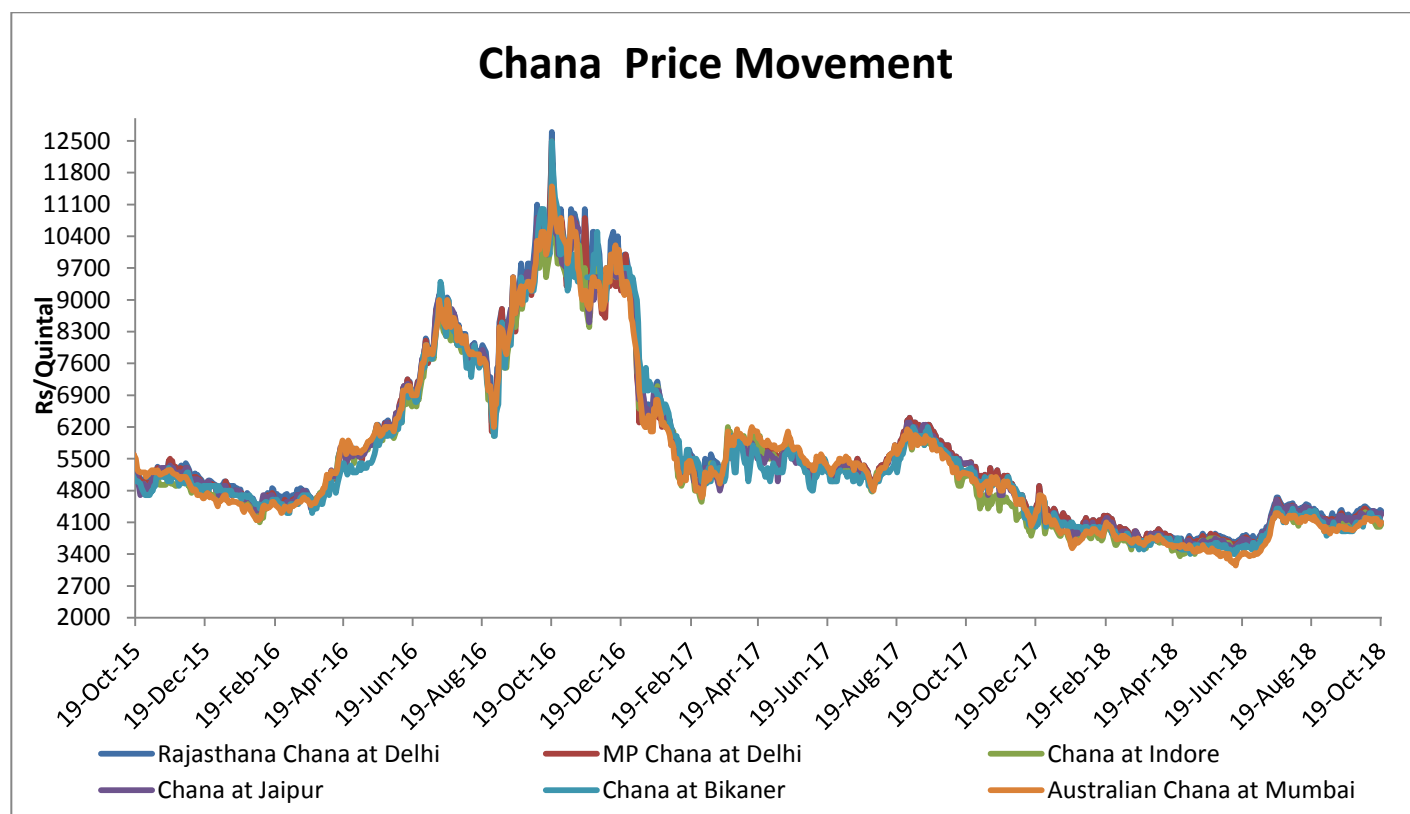

Chana

Current Scenario:

Chana cash market is likely to stay steady and may move slightly up as buyers seem active at this level. Any major spike in chana market is unlikely as there is hefty stock available in central pool and continuous release from central pool stock through auction caps uptrend right now. Sowing has started in south Indian states and area in these states may decline by 10 to 15% this year due to moisture stress in the field and lower price realization by farmers. As all India sowing picture would emerge around 15th Nov, impact of lower coverage in south India on all India area would be visible. If overall area decreases by 10%, then chana price may move up and may touch MSP of Rs4620. Right now in Delhi market chana is being traded at Rs4250 to Rs4300. Futures remains unsupportive for chana cash market. Stock in private hands is lower. Weather condition during growth stage too remains crucial for price trend. Demand for dalis is improving, so Agriwatch expects improvement in chana price in coming months. Stake holders should retain stock.

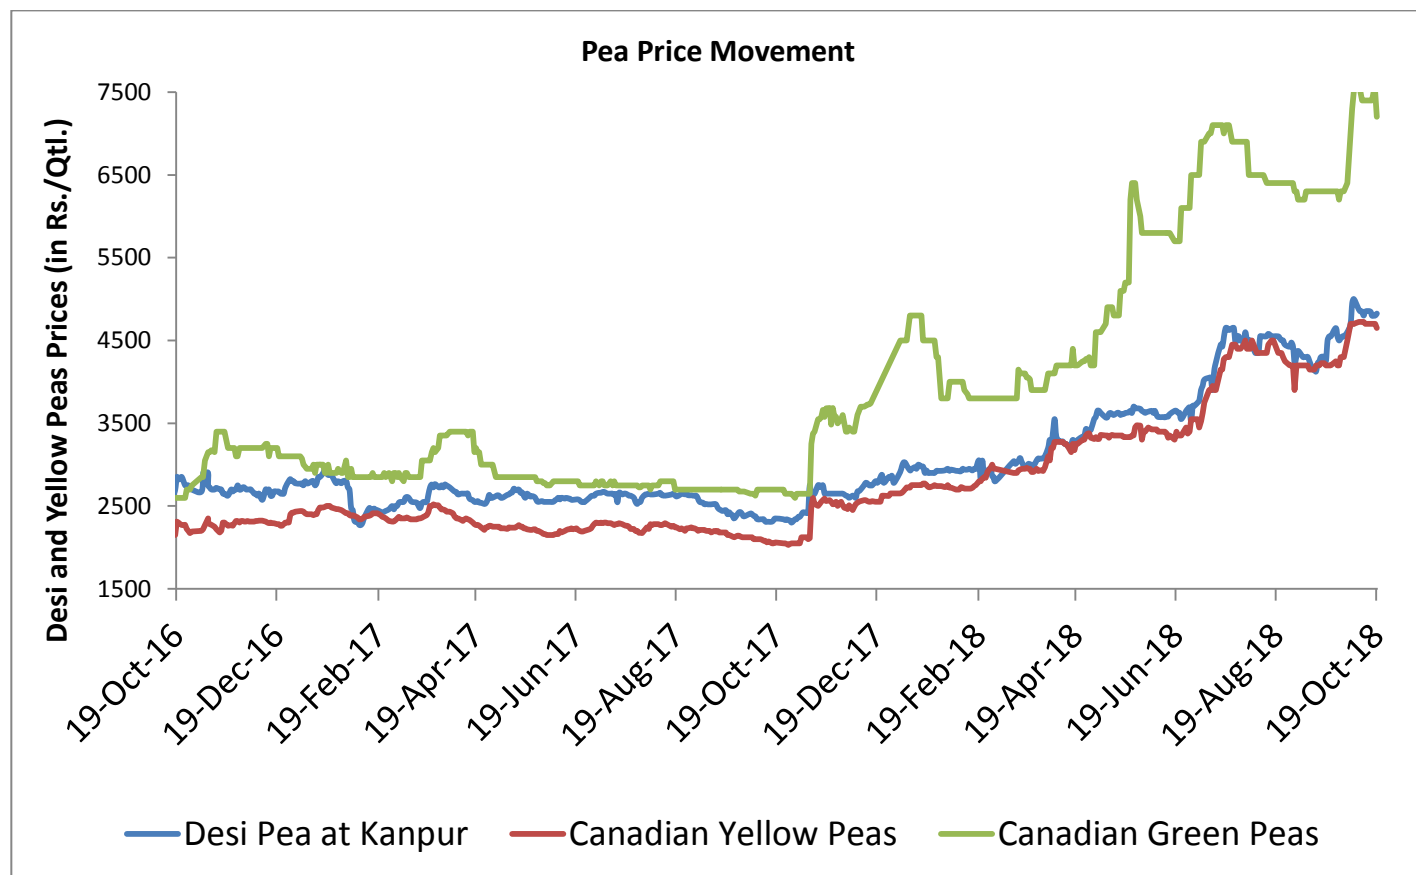

All India average price for Chana decreased by 1.73 percent from Rs 4197 per qtl. Australian Chana price too decreased by 1.21% to Rs 4110 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly firm this week.

Peas (Matar):

Market Recap:

Pea prices gained smartly by the end of Sep due to restriction on import extended till Dec. However, it could not sustain its uptrend despite decreasing stock at ports. Demand decreased at higher level and decrease in chana price too pressurized pea market..Stock available in domestic market and at ports is said to be lower than consumption till Dec.Prices may move down by Rs 100-150 more from current level as chana/chana dal are cheaper right now.Firmness in pae market depends on chana price movement India has imported 34757.26 MT of yellow pea at an average CiF of \$274.95 per tonnes during the month of August -2018. Of the total quantity around 16977 tonnes has been purchased from Russia, 16592.48 tonnes from Ukraine and the remaining quantity from Unites States and Canada India has imported 4626.03 MT of green pea at an average CiF of \$312.38 per tonnes during the month of August-2018. Of the total quantity around 3864.87 tonnes has been purchased from Canada and the remaining quantity from Unites States. Overall tone seems steady to slightly weak.

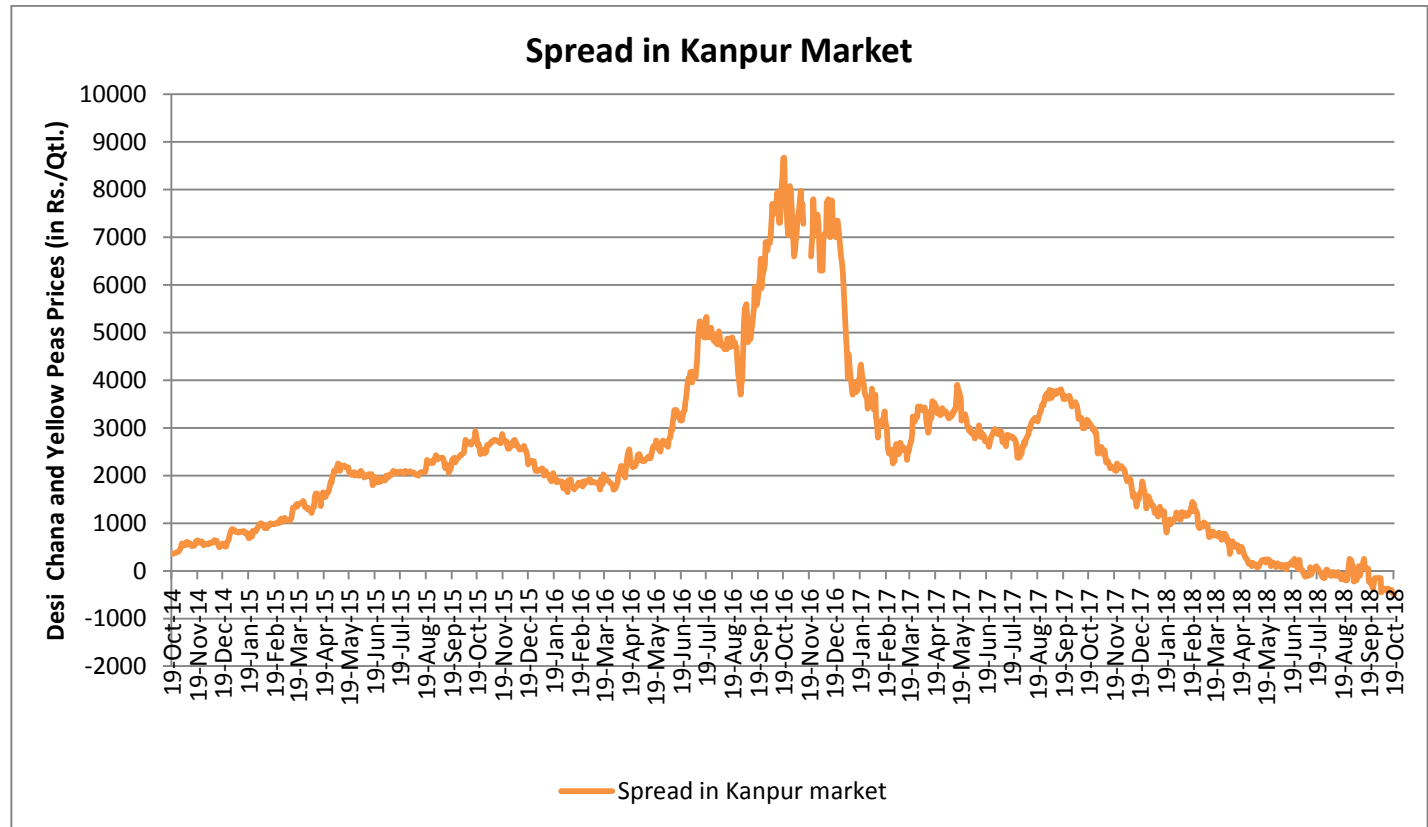

Current Market Dynamics & Outlook:

Pea traded at Rs 4800 in Kanpur market,slightly lower than last week due to lower demand at higher level. Higher import cost, import restriction till Dec and lower stock in domestic market may remain supportive in the medium term. Import is not possible till 30th Dec-2018.So, stake holders should buy after downward correction.It may move down to Rs4600-4650 this week.. Consumers have option as other pulses are ruling lower,specially chana.Soany big spike is unlikely despite import restriction till Dec.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved smartly in negative zone due to smart gain in pea price. Spread is expected to move in the negative range of 400 to 600 per quintal in Oct on relative movement in Chana prices. Overall outlook seems steady to slightly weak.

Market Outlook: Outlook remains steady to slightly weak.

Lentils (Masoor):

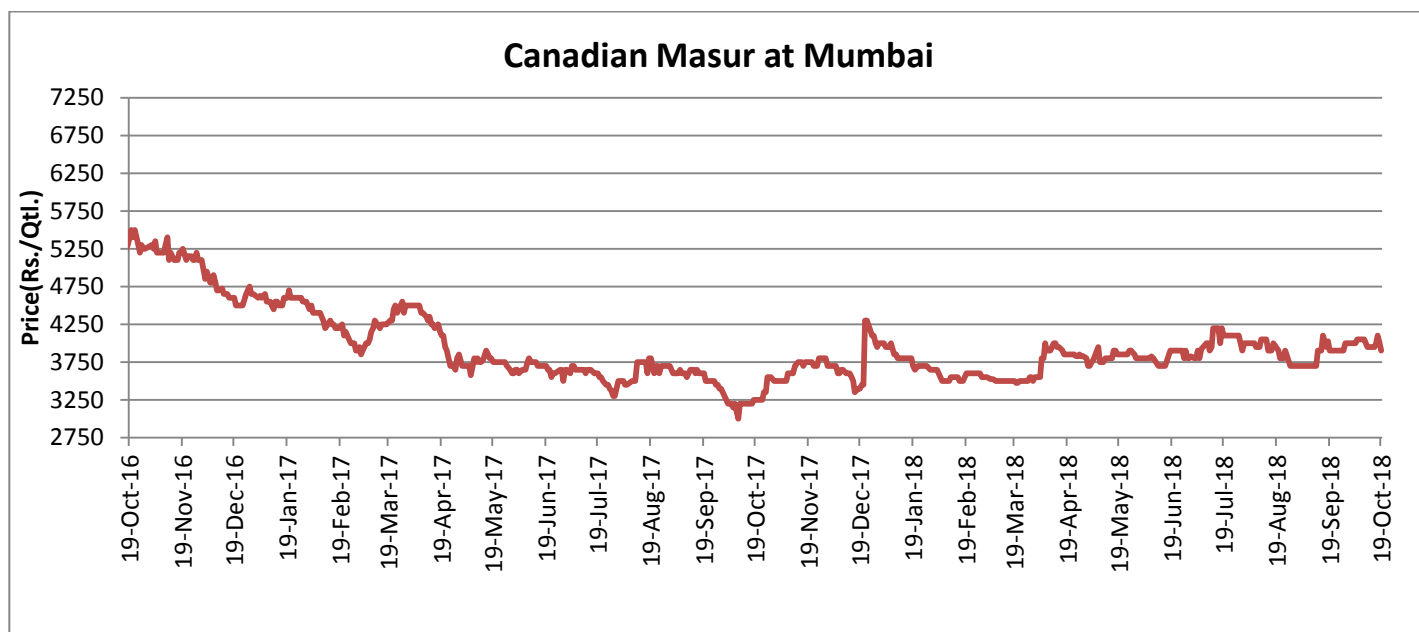

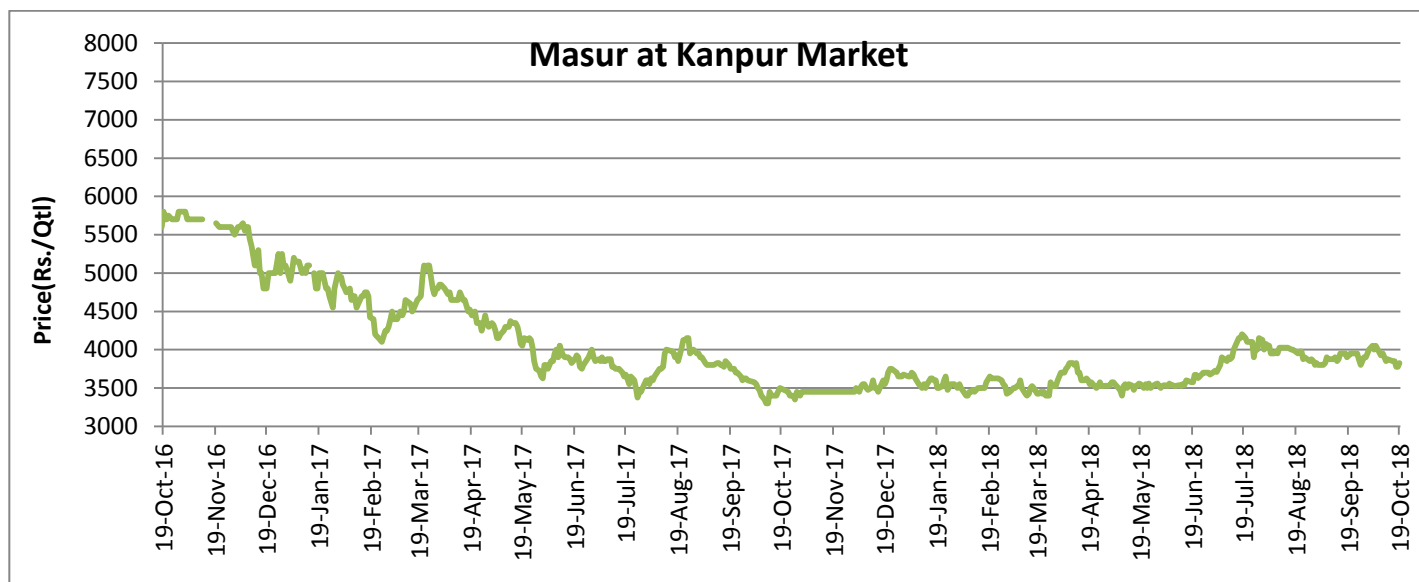

Market Recap:

As per trade Sources, India has exported 1000.45 MT of Lentil at an average FoB of \$821.65 per tonne during the month of September -2018 compared to 711.75 MT at an average FoB of \$893.78 per tonne in August-2018. Vessel (Sea Breeze) with 32350.00 tonnes of lentil is at berth for discharge. The vessel Sea Breeze is at berth since 04th October 2018. Despite continuous import Lentil market is expected to move steady to firm on expectation of import duty hike and export incentive in Oct. Import quantity remains restricted amid hope of improvement in demand due to festive season. As there is plenty of stock lying in NAFED godowns, any major spike is unlikely. India has imported 34757.26 MT of yellow pea at an average CiF of \$274.95 per tonnes during the month of August -2018.

Current Scenario:

In Oct-2018, average price in key market Kanpur was down by 1.51 % to Rs 3815 per qtl. MoM basis. Prices are likely to trade steady to slightly firm in Oct to a certain extent.

Market Outlook: Prices are likely to notice steady to firm tone this week.

Pigeon Pea (Tur/Toor):

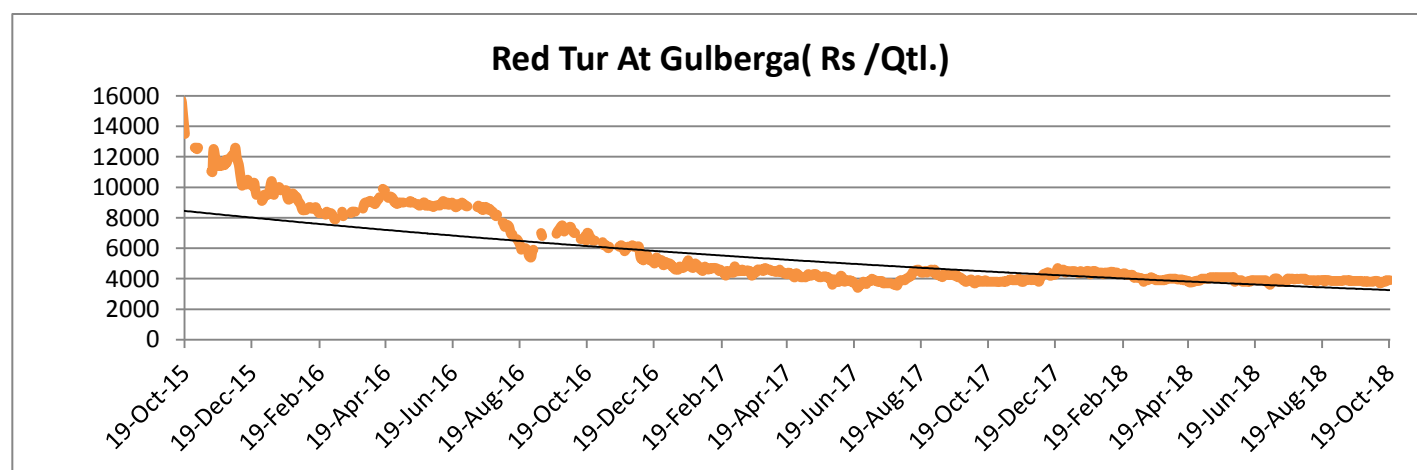

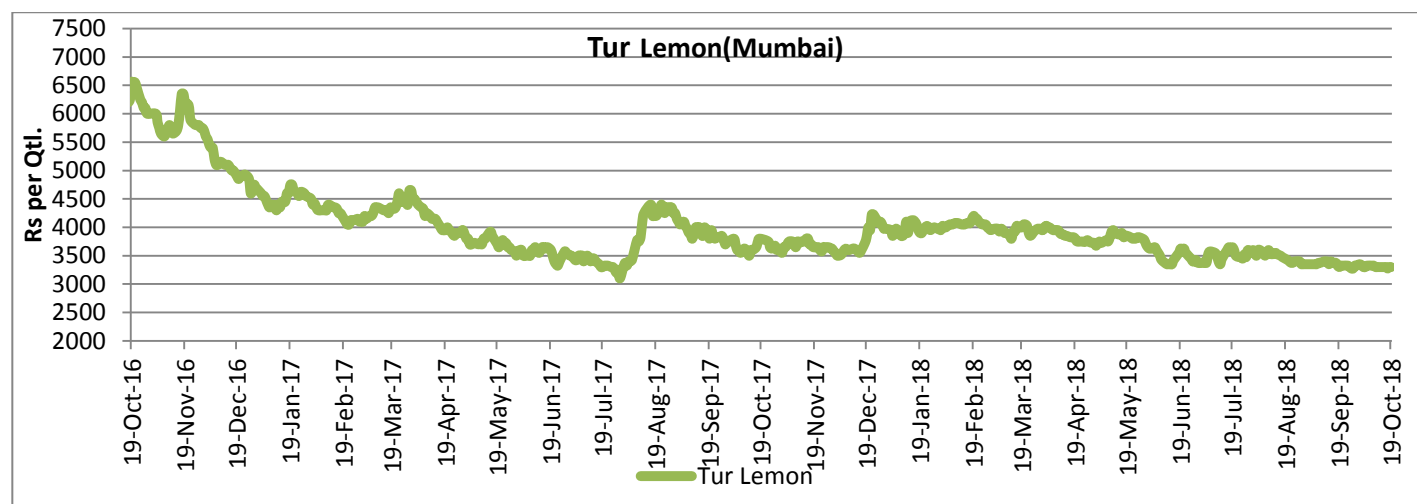

Market Recap:

Tur market traded slightly up on the back of improved demand from retail market, growing fear of lower yield in Maharashtra, Karnataka and Gujarat due to moisture stress in the field. Crop is under flowering stage. Besides, higher MSP (Rs5675) for new crop, govt's intension to re-launch futures in tur and urad, likely higher export incentive (10 to 15 %) and uncertain weather condition may support tur cash market in the weeks ahead. Pressure of higher stock is coming down ahead of new crop, two months away from now. Import would be limited under restricted quota. However, any big spike is unlikely as selling from central pool stock continues. Govt would procure tur at new MSP, so private participation is expected to be lower due to huge gap between MSP and prevailing market price. Private trade retention may increase on the hope of improvement in price. Cash market is likely to stay steady to slightly firm

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675). Burma offered lemon tur new & old at \$350 per tonne basis Indian port. Linkely was offered at \$360 per tonne basis Indian port. Overall trend seems firm. In Sep-2018, average price in Mumbai market was down by 1.13 % to Rs 3345 per qtl. due to poor demand against higher supply side.

Market Outlook: Tur prices are likely to show steady to slightly firm movement this in the weeks ahead as trading activities are likely to improve amid festive demand. (Likely futures online trade) may support market.

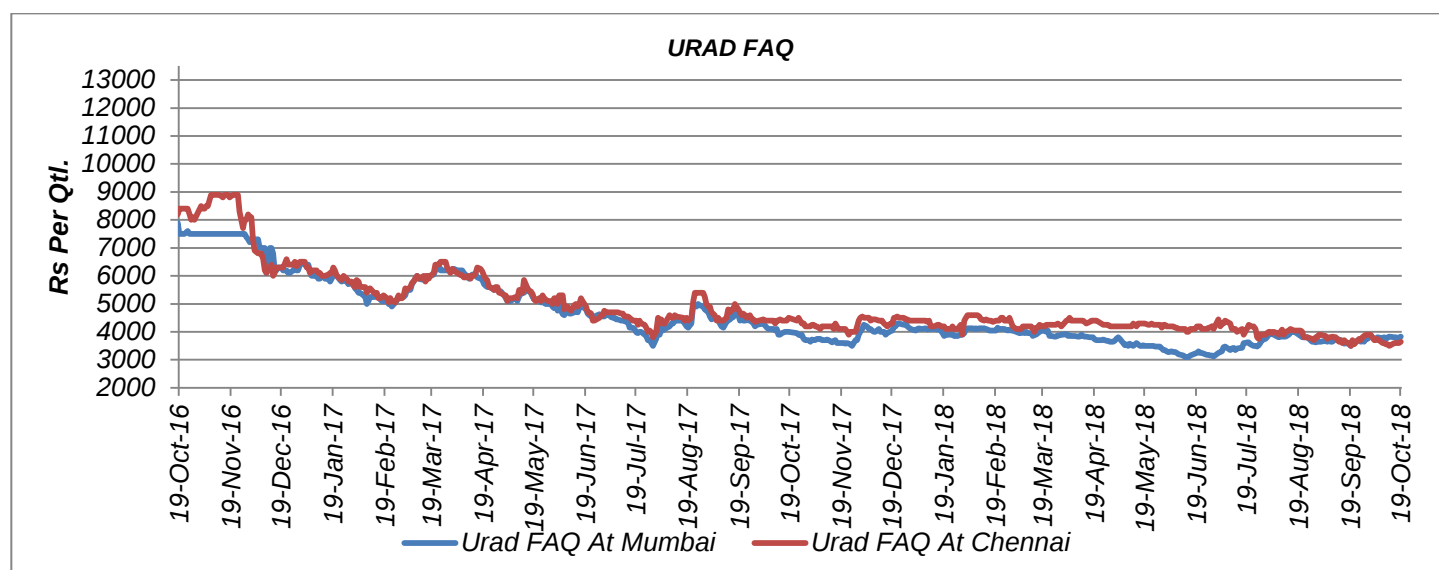

Black Matpe (Urad):

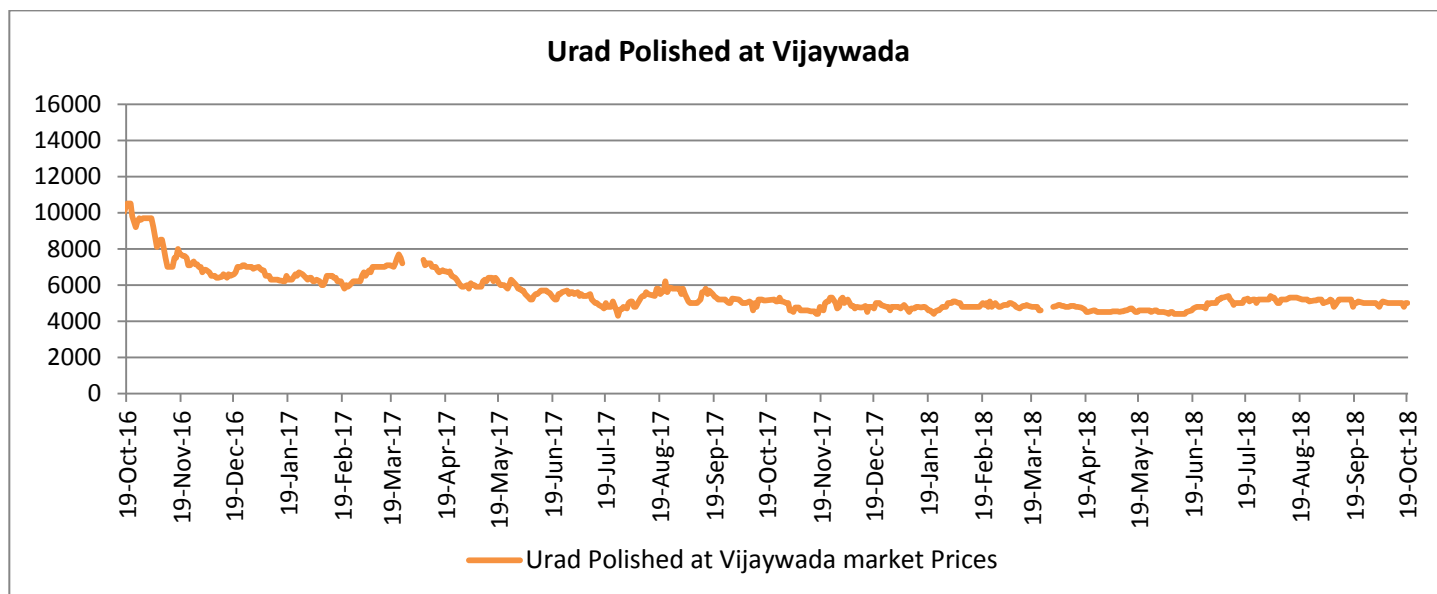

Urad arrival from kharif crop is lower by 20 % than normal expectation and there is a quality issue too with rains affected crop. As crop size is lower and procurement under price support scheme, Bhavantar Yojna is about to begin. Besides, demand is expected to improve from current level due to festive season while import volume would be limited at 1.5 lakh tonne. So Agriwatch expects market to move up from current level during the period of procurement. As govt. agencies have stopped auction, it too would support Urad market in coming weeks. Besides, futures in Urad & Tur is likely as concerned authorities seem ready to allow it once again after 2007. Now Sebi has to decide. Overall out look remains firm for Urad.

Kharif Urad area is lagging by 8.97 lakh ha from last year to 40.37 Lakh ha as on 20th Sep-2018. Actually, major producer of kharif Urad is MP, Uttar Pradesh, Maharashtra and Rajasthan. Area is down in MP by 7.66 % to 16.52 lakh ha, it is down in Maharashtra by 22.31 % to 3.75 lakh ha and by 12.62 % to 4.72 lakh ha in Rajasthan. However, it is up by 15.44% to 6.88 lakh ha in UP. So production is expected to decrease this year from 25.47 to 24.58 lakh tonne including 5.77 lakh tonne rabi crop.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.3600-3700 per Qtl.) and Chennai (Rs.3800-3850 Qtl.) noticed weak tone. It traded steady in Vijaywada too. Steady to firm movement might be seen in Urad market, due to improved demand at lower level. The following graph shows the prices movement in different markets:-

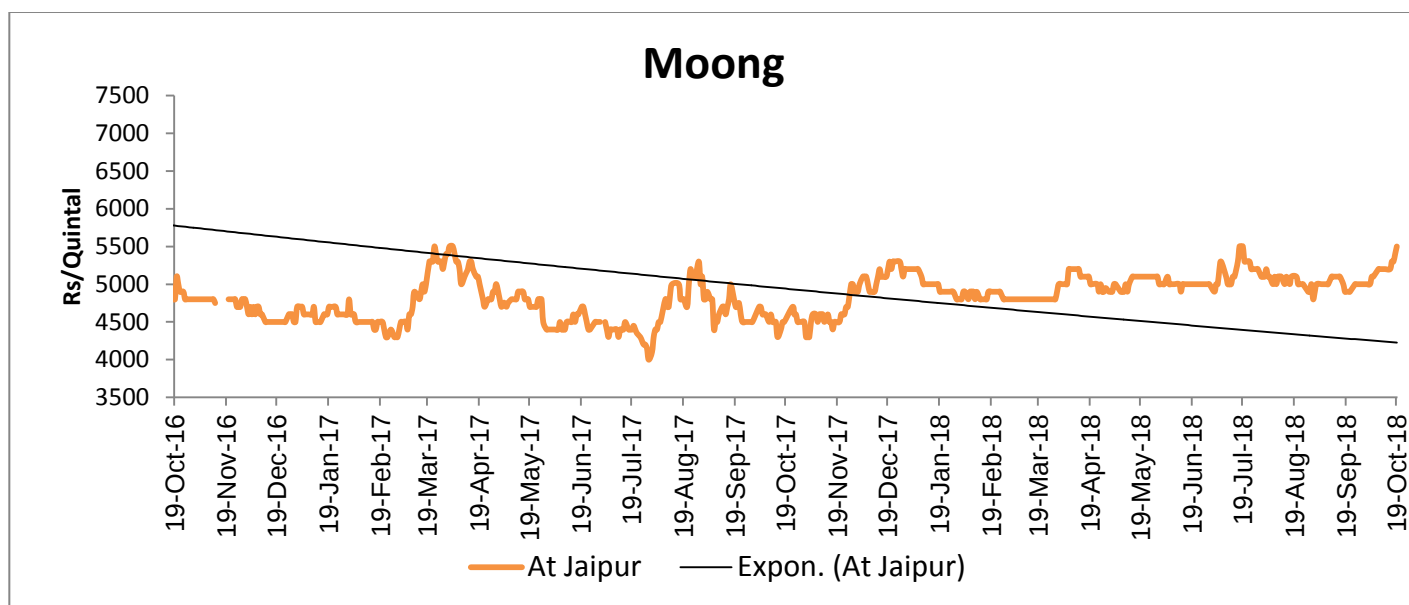

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week too.

Green Gram (Moong):

Market Recap:

Arrival pressure from kharif moong crop has not build up in major markets so far. Besides, there is a quality issue in Karnataka, Maharashtra, Rajasthan. So, arrival of quality crop is much lower than expectation. Next big crop is expected in summer from MP only. In MP, lower rainfall would not allow farmers to increase area under moong despite higher MSP (RS6975). Besides, there is good demand in moong and moong dal. Govt would procure higher quantity due to upcoming election. So moong price is unlikely to come down. Selling from central pool is expected not before mid Dec. Import is not possible beyond limit. So emerging scenario hints moong to go up from current level. It may move up by 300 to 400 per qtl. in the near term.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Outlook –We expect prices to move steady to slightly firm in the coming days.

- ❖ Chart depicts steady to slightly firm movement in Oct.
- ❖ RSI is moving up in neutral region.
- ❖ Expected price band for Chana in Delhi is 4200 to 4450 levels in this month.

Strategy: Buy on dip

Trade Recommendations: Go long around 4250 with the first target of 4350 and second target 4400 with stop loss at 4150 level.

Chana Physical

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4200	4275	4400	4550

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement.

**Peas:****Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart**

Outlook - We expect prices to notice weak movement in this month taking clue from weak chana, sluggish demand despite import restriction and decreasing stock at ports.

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4500- 4800 in this month.

Strategy: Buy on dip

Trade Recommendations: Go long around 4600 with the first target of 4700 and second target 4750 with stop loss at 4550 level.
