Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Tur demand from retail market has started improving and it would continue till Nov.** Old stock is coming down amid fear of lower yield is increasing due to less rainfall in Karnataka, Maharashtra and AP. In other states post monsoon rainfall is required. So next 30 days are very crucial. Govt. would procure new crop at higher MSP and around 30 to 40 % crop is expected to be procured by govt.'s agencies. So any downside movement is unlikely. In Gulberga market tur is being traded at Rs 3700-3900 per qtl. depending on quality. Import would be limited under restricted quota. However, any big spike is unlikely as selling from central pool stock continues. Govt would procure tur at new MSP, so private participation is expected to be lower due to huge gap between MSP and prevailing market price. Private trade retention may increase on the hope of improvement in price. Cash market is likely to stay steady to slightly firm in the short to medium term. In Gulberga market tur is being traded at Rs 3700-3900 per qtl.
- **Maharashtra Govt extends Registration deadline for Moong, Urad & Soybean to 15th Nov-2018.** Earlier it was till 24 Oct for Urad & Moong and 31st Oct for soybean. It has provided farmers much space for further registration. This means availability of Moong & Urad would decrease further for private trades. Mostly farmers would prefer to sell their produce to Govt.'s agencies. It would help market to recover further. Arrival in markets is coming down and buyers remain active. Commencement of procurement, lower crop size and restricted import may help market to recover further in coming weeks. Private trades are unwilling to sell while price is expected to improve further. Urad arrival from kharif crop is lower by 20 % than normal expectation and there is a quality issue too with rains affected crop. As crop size is lower and procurement under price support scheme, Bhavantar Yojna is about to begin.
- **Moong arrival from UP too is lower than normal expectation. There is no arrival from Ranchi in Bihar.** Arrival from Kanpur and Allahabad line continues and it is being consumed. However, flow is likely to decrease and would support cash market at current level. Stockists are unwilling to buy. It would drag price up by Rs 300-400 in coming weeks. Besides, there is a quality issue in Karnataka, Maharashtra, Rajasthan. So, arrival of quality crop is much lower than expectation. Next big crop is expected in summer from MP only. In MP, lower rainfall would not allow farmers to increase area under moong despite higher MSP (Rs 6975). Apart from it there is good demand in moong and moong dal. Govt would procure higher quantity due to upcoming election. So moong price is unlikely to come down. Selling from central pool is expected not before mid Dec. Import is not possible beyond limit. So emerging scenario hints moong to go up from current level. It may move up by 300 to 400 per qtl. in the near term.
- **Chana extended its loss despite firm inner tone. Nafed is continuously selling and it would continue to sale to feed the market needs.** However, stock position considered to be 4 to 4.2 MMT including private stock against requirement of 4 MMT till Feb-2019. So, if area decreases this year or new crop faces rough weather from growth to maturity stages, Prices would move up towards MSP level. Import is not possible at higher duty. There is a gossip in the market that cash market is unlikely to move down from current level. Demand is improving and uncertainty prevails on area right now. Chana in Delh market is being traded at Rs 4150 to 4250. It would move up after Diwali.
- **Lentil market is expected to trade steady to firm. As of now, Import demand from Bangladesh is low as** Indian export quotes are high. Nepal is offering lentils around \$800 per tonne for export to Bangladesh. Quality of Indian lentils is better than lentils offered by Nepal. However, there is no short supply in the market. Stake holders should buy on dip. Govt. has accepted the CACP recommendation of hike in Chana & Lentils MSP for Rabi marketing year 2019-20. Chana & Masur MSP has been increased from Rs 4400 & Rs 4250 to Rs 4620 & Rs 4475 per quintal respectively. Furthermore, an analysis of cost of production of Rabi crops shows that farmers will get a maximum return of 75.2 percent for gram and 76.7 percent for lentils.
- **Peas market is expected to remain firm and increase by Rs 100-150 per quintal in short to medium term** due to increase in demand and fall in stock at ports by around 50 percent. Furthermore government has increased restriction on pea until 31st December 2018.

International Market:

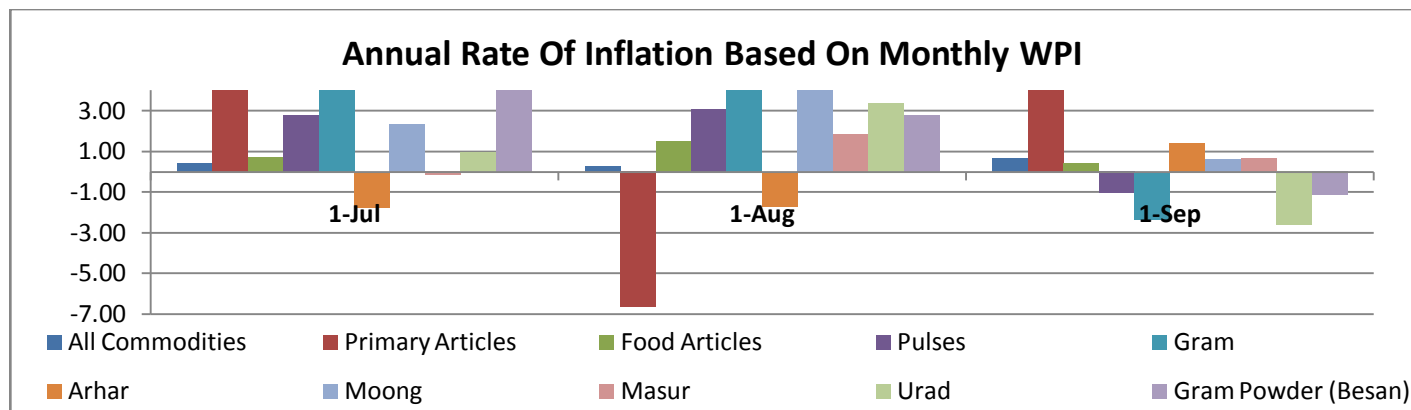

- **Agriculture department of Canada has estimated 1% higher yield than Statistics Canada.** the major difference has been seen in lentil production fig. Unofficial estimate points 23.7lakh MT production for lentil, which is almost 6% higher than Statistics Canada. harvesting of all pulses is almost over now. Efforts of more export to other countries than India might be seen in coming weeks. Higher production estimate may cap uptrend in global lentil market in coming weeks.
- **USDA production estimate for this year's crop is at higher side at 5.71lakh MT.** It is around 80 % higher than last year when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **Chickpea market traded steady to slightly lower as supply from farmer's end was seen higher than actual demand.** Demand from North American millers/exporters remained weak. It continued to pressurize chickpea prices. Offering for farmers too have decreased. Farmers are getting 21% lower price now in comparison to mid Aug-2018. Canadian Farmers too are getting 13 % lower price during the period. As demand remains weak, any spike in global chickpea market is unlikely. Major buyers, India, remains out of the market. Range bound movement might be seen in the short term.
- **Lentil Production in Canada is expected to decline by 15.31 % from 25.59 to 21.67 lakh tonne in 2018-19.** Import has been estimated same as last year at 35,000 MT. Despite lower production carryout is expected to decrease slightly from 8.76 to 8 lakh tonne. Even area is expected to decline by 14.47 % to 15.25 lakh ha. It was 17.83 lakh ha last year. Yield has been estimated to remain same as last year at 1.44 tonne per ha. Export may increase by 16.88 % to 18 lakh tonne in 2018-19. It was 15.40 lakh tonne in 2017-18. Prices are likely to hinge in the range of \$370 to 400 per MT
- **As per USDA, dry bean production in U.S. is expected to fall by 6 percent to 1.23 MMT even after 20 percent decrease in sowing as yields are expected to be higher compared to last year.** Dry bean exports from U.S. have registered a 12 percent increase during September '17- June '18 compared to September '16- June '17. Top destinations included Mexico, Canada, Italy and UK.
- **Canadian chickpeas market traded unstable during the week under review as temperature in growing belts was seen at freezing point at the time of harvesting.** Around 25 % crop is yet to be harvested. Quality concern for standing crop is increasing. Market experts say that crop size may be lower than previous expectation. It may decline from 2.83 to 2.58 lakh tonne as per Canada statistics.
- **Global chickpea market traded steady during the week under review. Demand remains weak** and higher availability of medium and small chana continues to weigh on market fundamental. According to Statistics, Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400 MT for 2018-19. Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18. Prices are likely to move in the range of \$450 to \$480 per tonne.
- **Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19.** it was 16.56 lakh ha last year. Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonne. prices are likely to hover in the range of \$220 to \$250 per MT.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19.** It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Even lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India is out of global market right now due to ample availability of pulses in India.
- **Myanmar exported around 7 lakh tonne pulses and beans in last six months beginning from April-2018** despite restricted buying by Indian importers. Till August, India imported pulses and beans from Myanmar under restricted quota and considering the ample availability in domestic market, India is not going to allow pulses import beyond limit with

certain conditions/licence to import-according to Min Ko Oo, secretary of Myanmar Pulses, Beans & Sesame Seeds Merchants Association.

- **Normally, Myanmar imports 12 to 15 lakh tonne pulses and beans annually. This year Myanmar might be able to export 12 lakh tonne pulses and beans. Pulses prices are lower in Myanmar as major buyers like India is almost out of market. Besides India, Bangladesh, Pakistan, and Nepal buy beans and pulses from Myanmar**

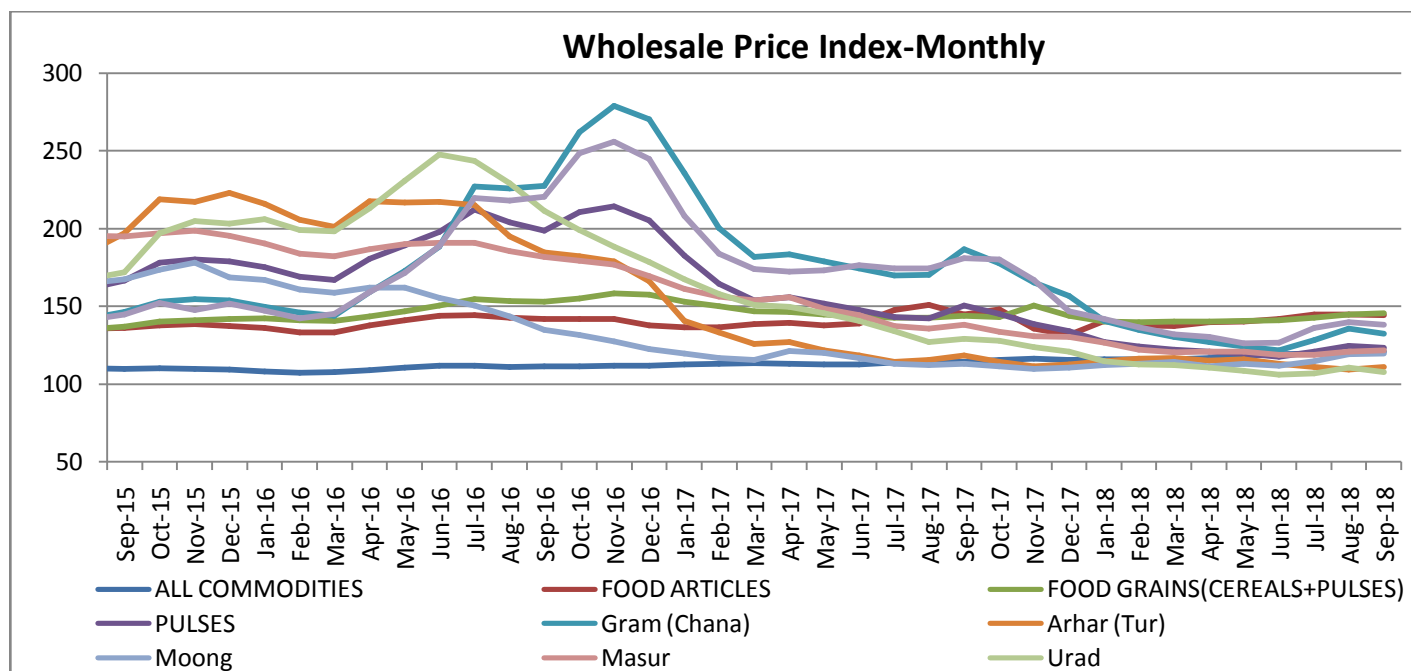

Weekly Outlook: -Pulses are likely to trade range bound this week..

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 1.3 point from 124.5 in Aug to 123.2 in Sep-2018.

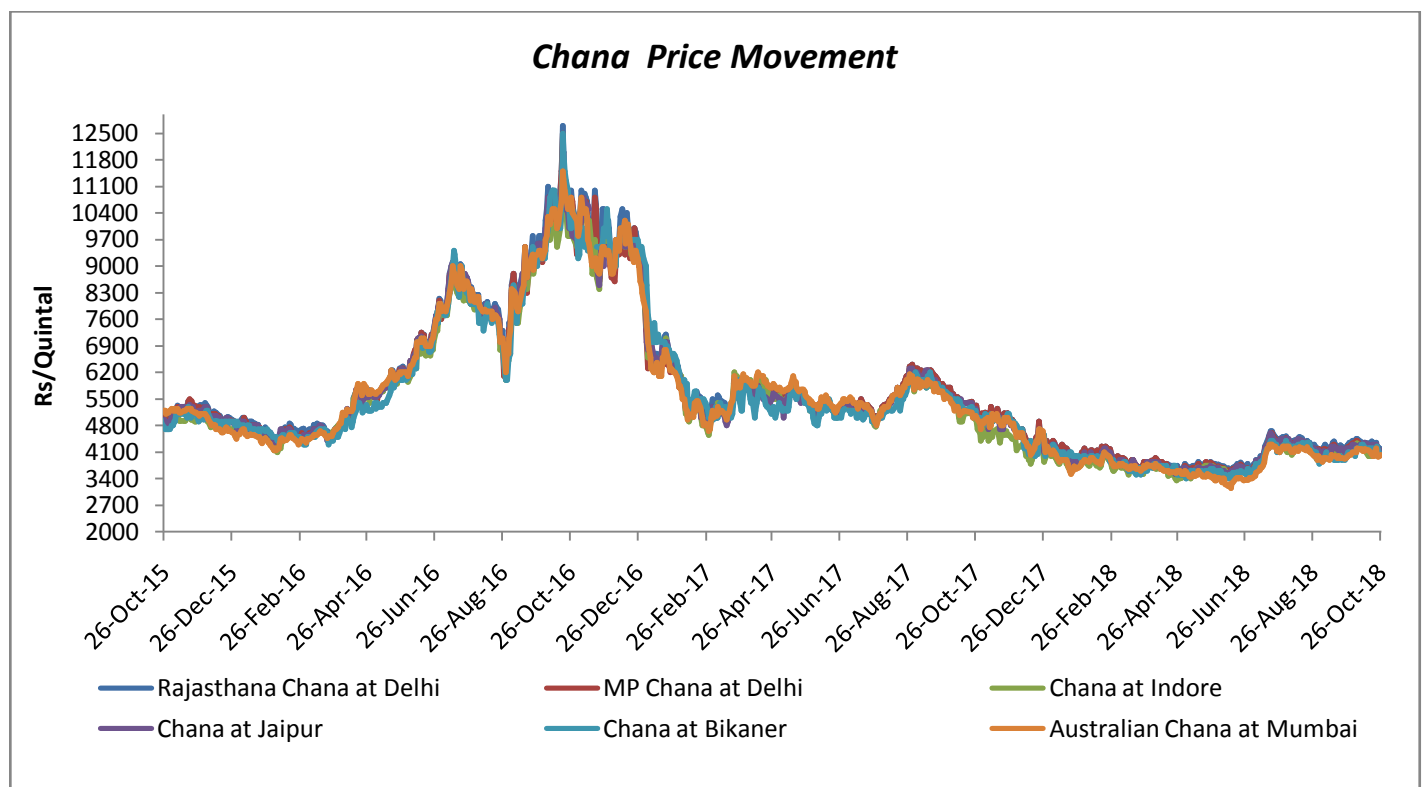

Pulses-Wise Scenario:

Chana

Current Scenario:

Despite weak futures chana cash market traded unchanged in Delhi market. It is likely to stay steady and may move slightly up as buyers seem active at this level. Any major spike in chana market is unlikely as there is hefty stock available in central pool and continuous release from central pool stock through auction caps uptrend right now. Sowing has started in south Indian states and area in these states may decline by 10 to 15% this year due to moisture stress in the field and lower price realization by farmers. As all India sowing picture would emerge around 15th Nov, impact of lower coverage in south India on all India area would be visible. If overall area decreases by 10%, then chana price may move up and may touch MSP of Rs4620. Right now in Delhi market chana is being traded at Rs4250 to Rs4300. Futures remains unsupportive for chana cash market. Stock in private hands is lower. Weather condition during growth stage too remains crucial for price trend. Demand for dalis improving, so Agriwatch expects improvement in chana price in coming months. Stake holders should retain stock.

All India average price for Chana decreased by 0.83 percent from Rs 4210 to 4175 per qtl. Australian Chana price too decreased by 2.0% to Rs 4000 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

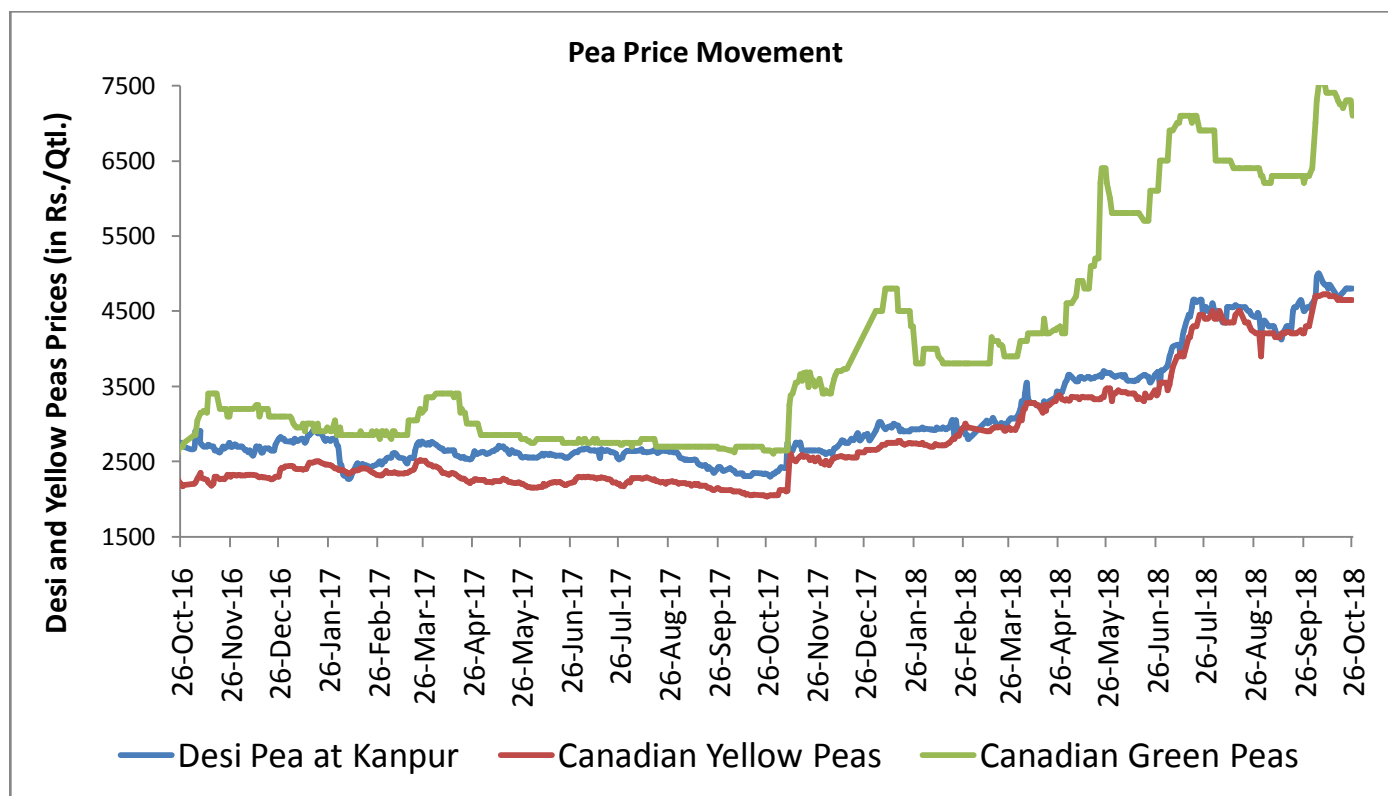

Market Outlook: Chana may trade steady to slightly firm this week.

Peas (Matar):

Market Recap:

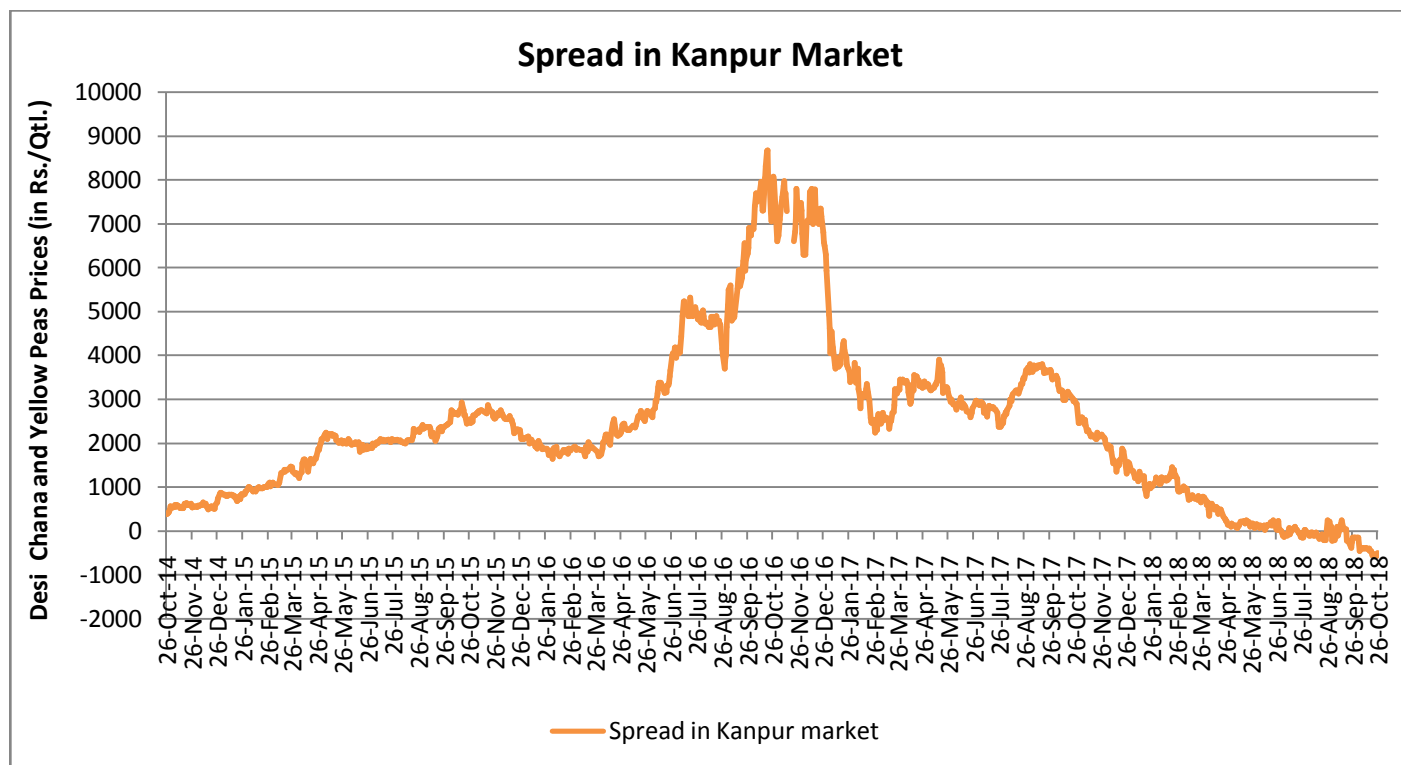

Pea prices could not sustain its uptrend despite decreasing stock at ports. Demand decreased at higher level and decrease in chana price too pressurized pea market..Stock available in domestic market and at ports is said to be lower than consumption till Dec.Prices may move down by Rs 100-150 more from current level as /chana dal are cheaper right now.Firmness in pae market depends on chana price movement. Stake holders should sell at current level.Area in MP and UP is lagging behind by 15 to 20% so far.However,it may pick up in Nov. Overall tone seems weak.

Current Market Dynamics & Outlook:

Pea traded at Rs 4800 in Kanpur market,slightly lower than last week due to lower demand at higher level. Higher import cost, import restriction till Dec and lower stock in domestic market may remain supportive in the medium term. Import is not possible till 30th Dec-2018.So, stake holders should buy after downward correction.It may move down to Rs4600-4650 this week.. Consumers have option as other pulses are ruling lower,specially chana.So any big spike is unlikely despite import restriction till Dec.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved smartly in negative zone due to smart gain in pea price. Spread is expected to move in the negative range of 400 to 600 per quintal in Oct on relative movement in Chana prices. Overall outlook seems steady to slightly weak.

Market Outlook: Outlook remains steady to slightly weak.

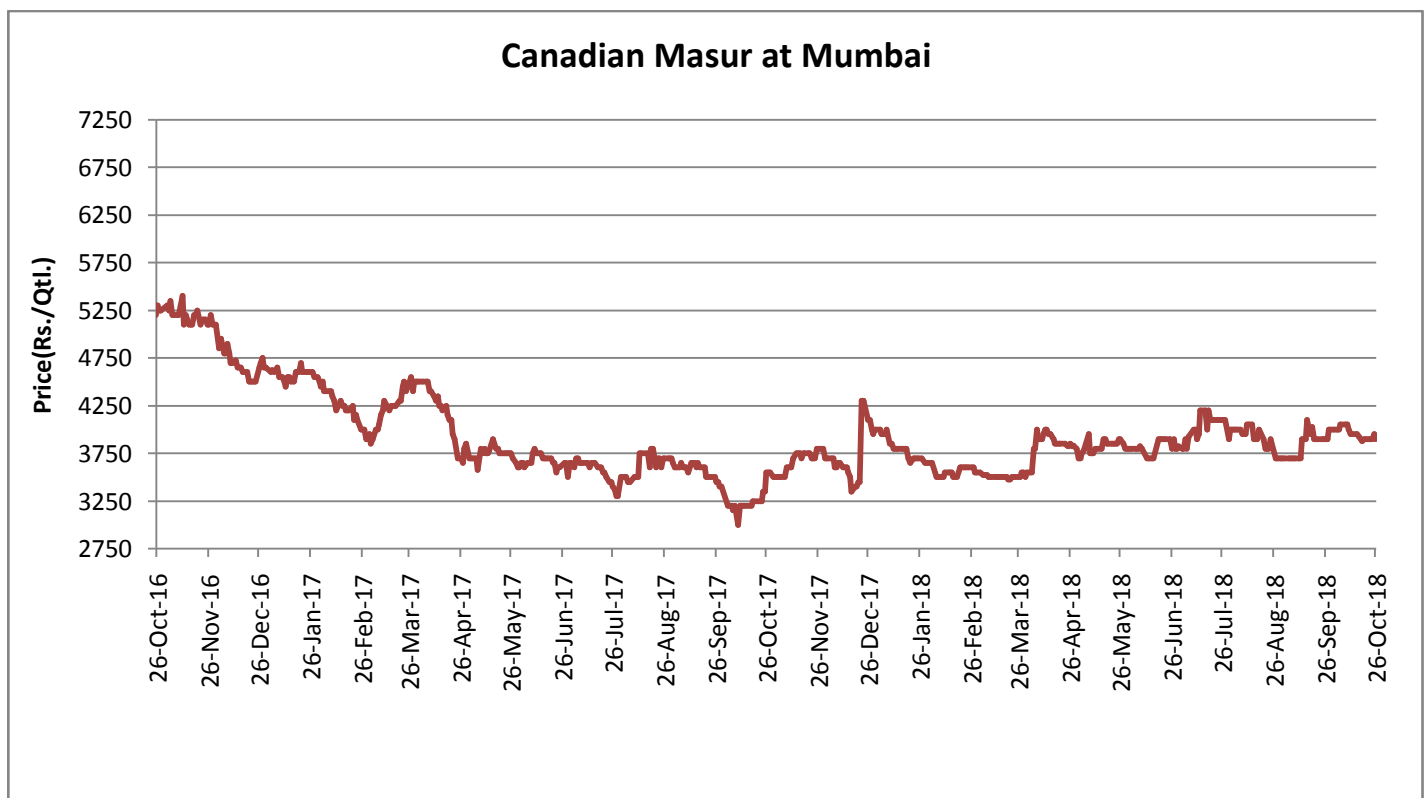

Lentils (Masoor):

Market Recap:

Masur market is likely to trade firm in coming weeks. demand is expected to improve after diwali. As per trade sources, India has exported 1000.45 MT of Lentil at an average FoB of \$821.65 per tonne during the month of September - 2018 compared to 711.75 MT at an average FoB of \$893.78 per tonne in August-2018. Vessel (Sea Breeze) with 32350.00 tonnes of lentil is at berth for discharge. The vessel Sea Breeze is at berth since 04th October 2018. Despite continuous import Lentil market is expected to move steady to firm on expectation of import duty hike and export incentive in Oct. Import quantity remains restricted amid hope of improvement in demand due to festive season. As there is plenty of stock lying in NAFED godowns, any major spike is unlikely. India has imported 34757.26 MT of yellow pea at an average CiF of \$274.95 per tonnes during the month of August -2018.

Current Scenario:

In Oct-2018, average price in key market Kanpur was down by 0.31 % to Rs 3775 per qtl. MoM basis. Prices are likely to trade steady to slightly firm in Oct to a certain extent.

Market Outlook: Prices are likely to notice steady to firm tonethis week.

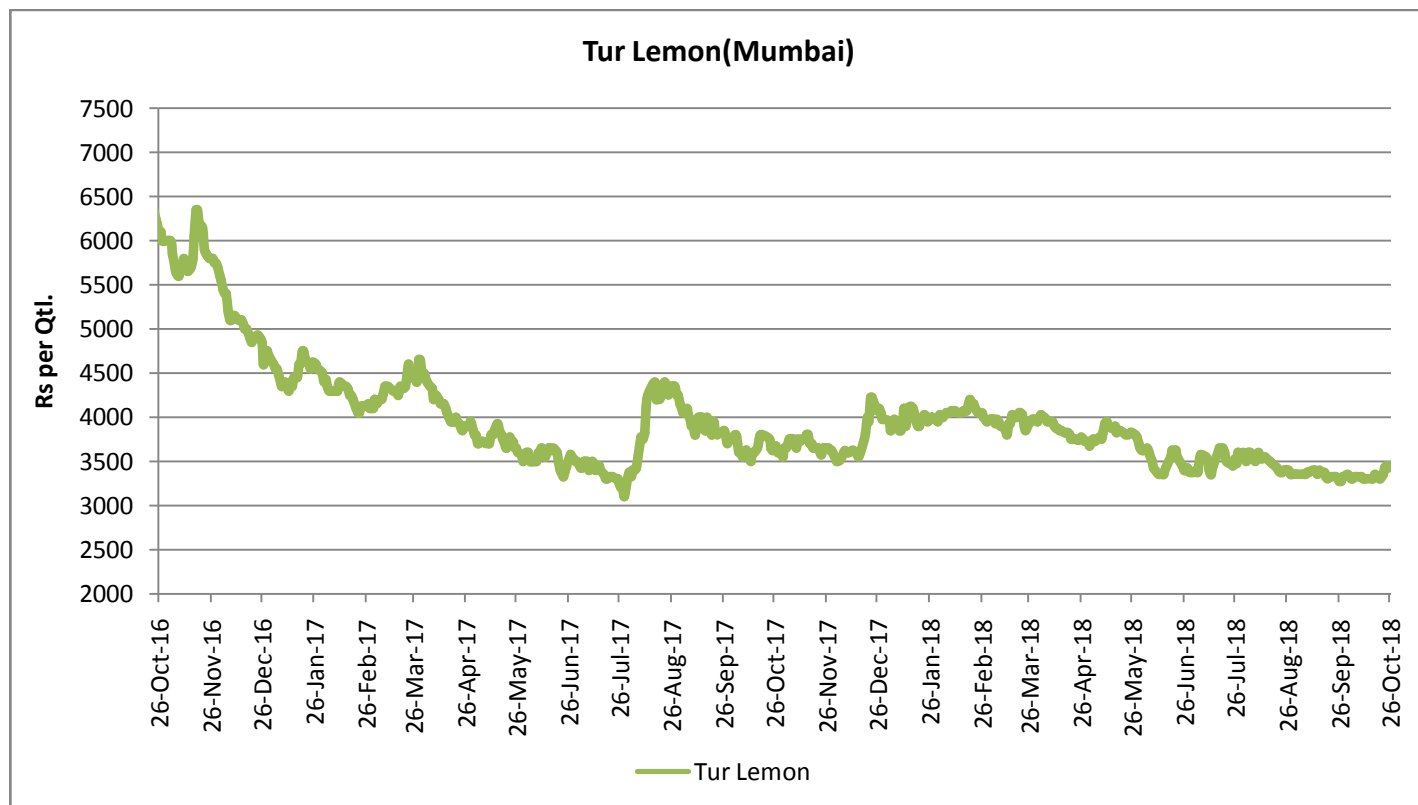

Pigeon Pea (Tur/Toor):

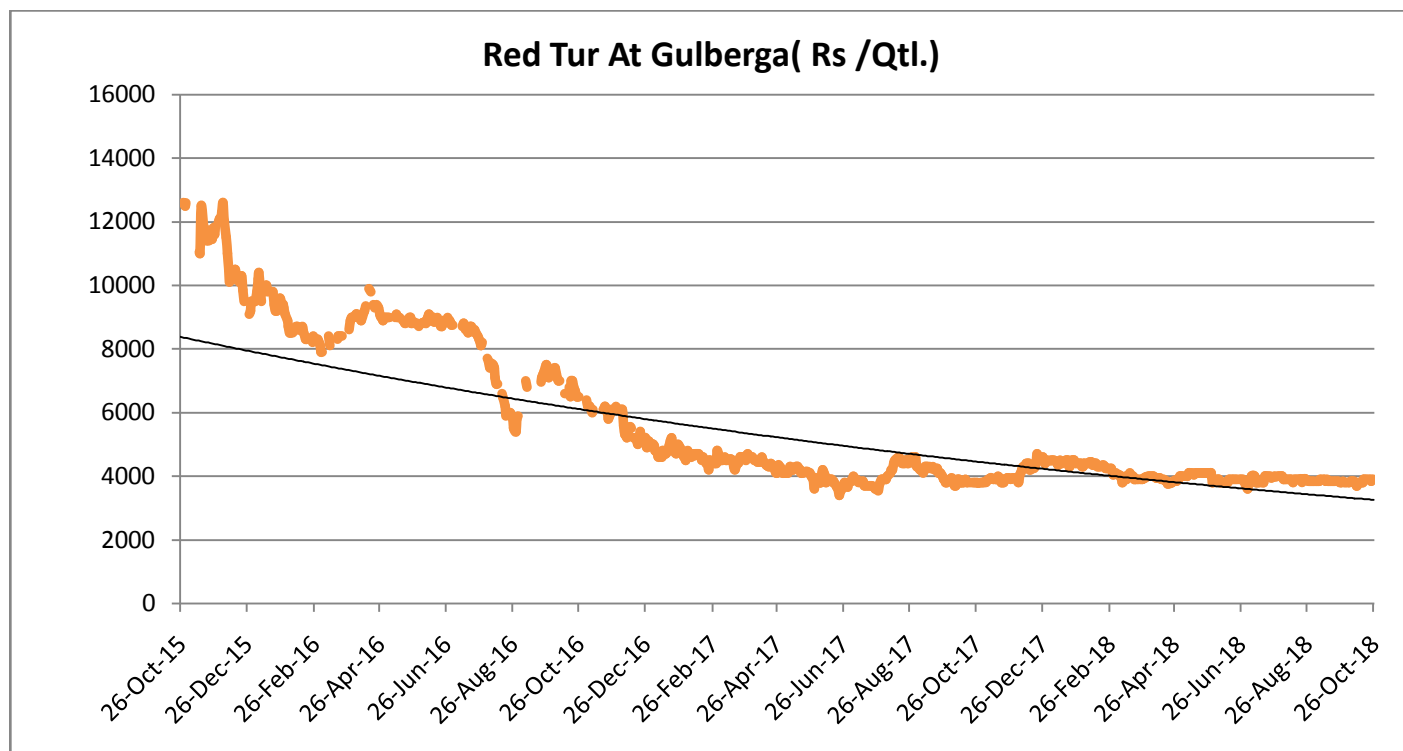

Market Recap:

Tur market traded slightly up on the back of improved demand from retail market, growing fear of lower yield in Maharashtra, Karnataka and Gujarat due to moisture stress in the field. Crop is under flowering stage. Besides, higher MSP (Rs5675) for new crop, govt's intension to re-launch futures in tur and urad, likely higher export incentive(10 to 15 %) and uncertain weather condition may support tur cash market in the weeks ahead. Pressure of higher stock is coming down ahead of new crop, two months away from now. Import would be limited under restricted quota. However, any big spike is unlikely as selling from central pool stock continues. Govt would procure tur at new MSP, so private participation is expected to be lower due to huge gap between MSP and prevailing market price. Private trade retention may increase on the hope of improvement in price. Cash market is likely to stay steady to slightly firm

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675). Burma offered lemon tur new & old at \$320-325 per tonne basis Indian port. Linkely was offered at \$340 per tonne basis Indian port. Overall trend seems firm. In Sep-2018, average price in Mumbai market was down by 1.13 % to Rs 3345 per qtl. due to poor demand against higher supply side.

Market Outlook: Tur prices are likely to show steady to slightly firm movement this in the weeks ahead as trading activities are likely to improve amid festive demand. (Likely futures online trade) may support market.

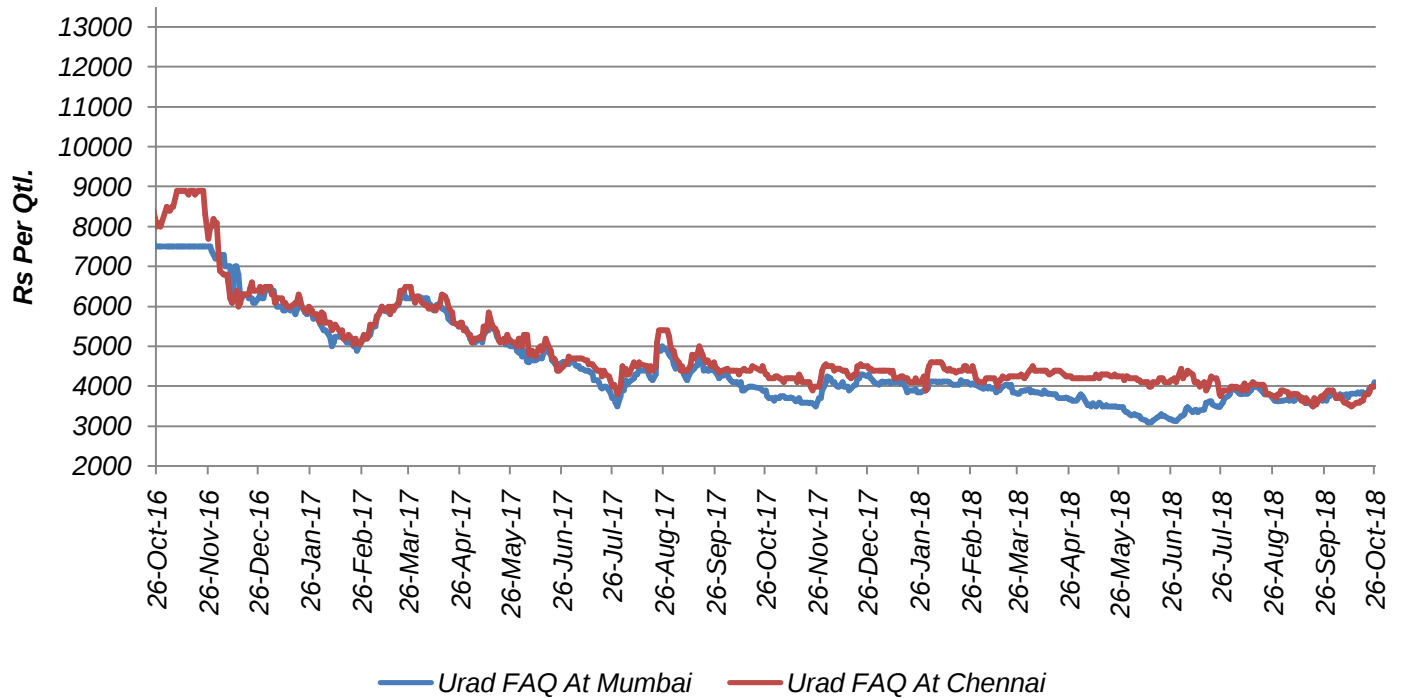

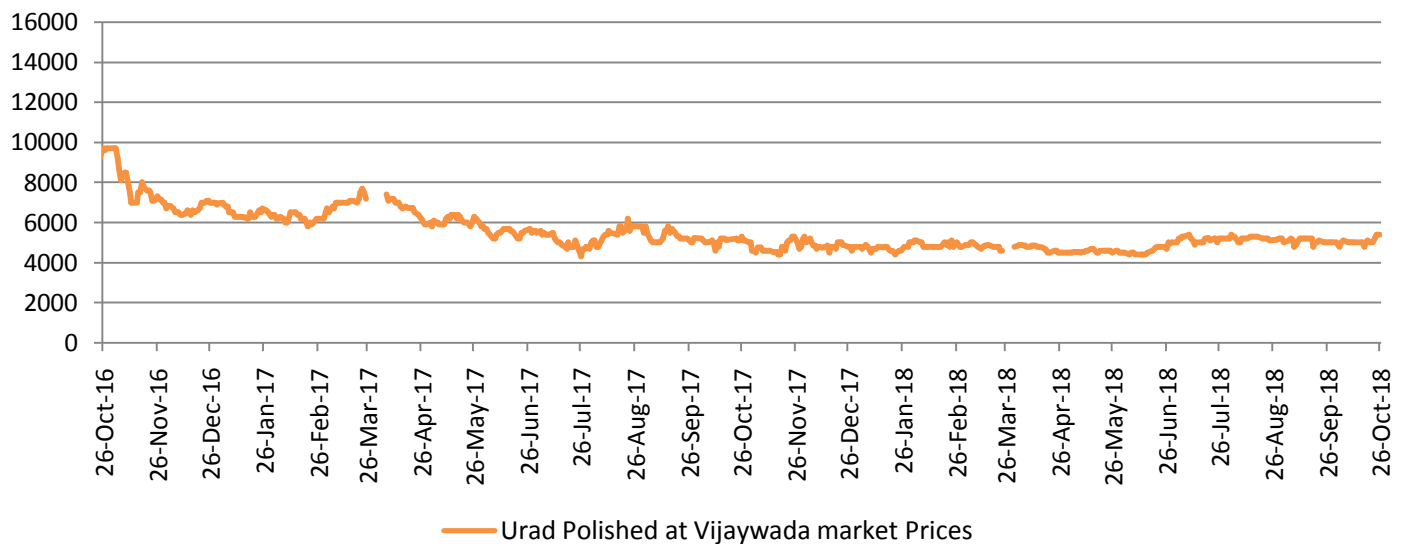

Black Matpe (Urad):

Urad arrival from kharif crop is lower by 20 % than normal expectation and there is a quality issue too with rains affected crop. As crop size is lower and procurement under price support scheme, Bhavantar Yojna is about to begin. Besides, demand is expected to improve from current level due to festive season while import volume would be limited at 1.5 lakh tonne. So Agriwatch expects market to move up from current level during the period of procurement. As govt. agencies have stopped auction, it too would support Urad market in coming weeks. Besides, futures in Urad & Tur is likely as concerned authorities seem ready to allow it once again after 2007. Now Sebi has to decide. Overall outlook remains firm for Urad.

Kharif Urad area is lagging by 8.97 lakh ha from last year to 40.37 Lakh ha as on 20th Sep-2018. Actually, major producer of kharif Urad is MP, Uttar Pradesh, Maharashtra and Rajasthan. Area is down in MP by 7.66 % to 16.52 lakh ha, it is down in Maharashtra by 22.31 % to 3.75 lakh ha and by 12.62 % to 4.72 lakh ha in Rajasthan. However, it is up by 15.44% to 6.88 lakh ha in UP. So production is expected to decrease this year from 25.47 to 24.58 lakh tonne including 5.77 lakh tonne rabi crop.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs. 3650-3800 per Qtl.) and Chennai (Rs. 3800-4000 Qtl.) noticed firm tone. It traded steady in Vijaywada too. Steady to firm movement might be seen in Urad market, due to improved demand at lower level. The following graph shows the price movement in different markets:-

URAD FAQ**Urad Polished at Vijaywada**

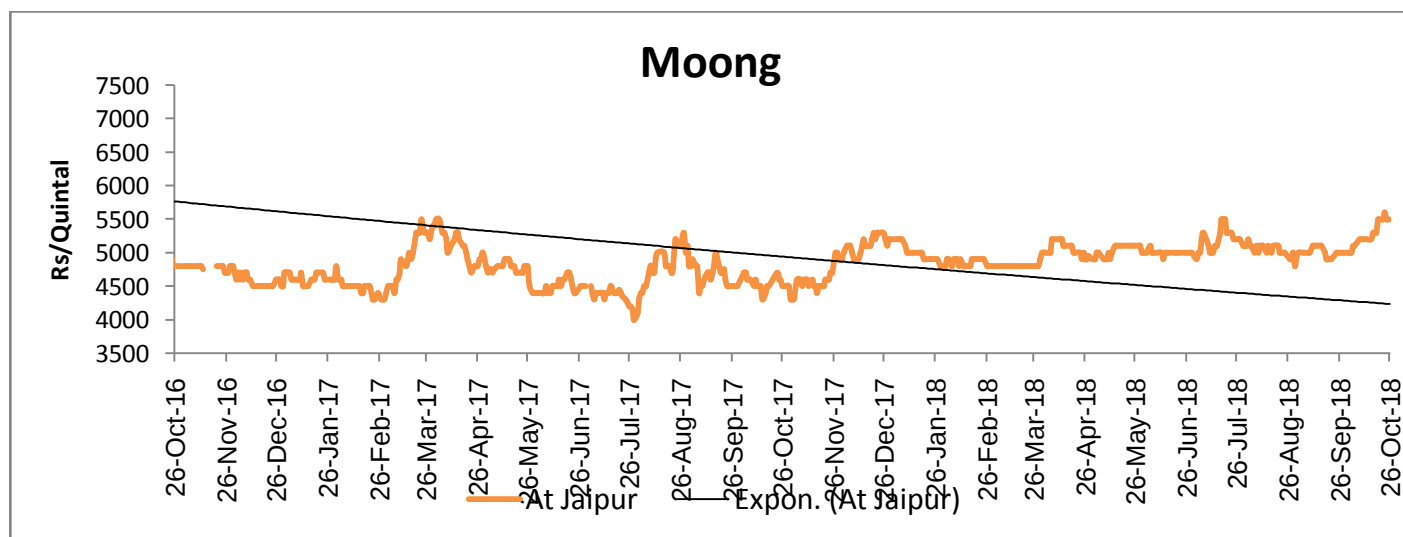

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week too.

Green Gram (Moong):

Market Recap:

Arrival pressure from kharif moong crop has not build up in major markets so far. Besides, there is a quality issue in Karnataka, Maharashtra, Rajasthan. So, arrival of quality crop is much lower than expectation. Next big crop is expected in summer from MP only. In MP, lower rainfall would not allow farmers to increase area under moong despite higher MSP (RS6975). Besides, there is good demand in moong and moong dal. Govt would procure higher quantity due to upcoming election. So moong price is unlikely to come down. Selling from central pool is expected not before mid Dec. Import is not possible beyond limit. So emerging scenario hints moong to go up from current level. It may move up by 300 to 400 per qtl. in the near term.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
